### **Notice Concerning Impact of Typhoon Haishen**

RENOVA, Inc. expresses its support and solidarity towards those who have recently been impacted by Typhoon Haishen.

We have confirmed that we have sustained no damage that will significantly affect our large-scale solar PV plants, Biomass power plant and other businesses under development in the wake of Typhoon Haishen, which caused damage in Kyushu region starting from September 6, 2020 to 7.

However, Kokonoe Solar Power Plant (Kokonoe Town, Kusu District, Oita Prefecture generation capacity of 25.4 MW) was suspended September 7 at 15 o'clock due to safety reasons as a result of tree branch touches the utility line, but on September 8 at 15 o'clock, all power conditioner systems were restarted and power transmission started.

The suspension of power transmission will have only a minor impact on consolidated results for the current fiscal year (Year ended March 31, 2021).

If any new damage occurs in the future, we will immediately make another announcement.
