November	—	—	7,832,736	—	—
Total	—	—	60,921,726	—	—

Due to a relatively low monthly sunshine duration, entire power generation for October 2020 had reached to 8,406,995kWh, which is 9.3% lower than the estimated electricity generation on the basis of the expected amounts of electricity generation in the 50th percentiles of probability of exceedance. As for the LS Nagasaki Isahaya Power Plant, replacement works for the PCS which was damaged by a lightning strike on July 20, 2020 has been completed on October 15, 2020.

(Note) The estimated electricity generation is the total of the expected amounts of electricity generation in the 50th percentile of probability of exceedance calculated by a third party on the basis of the database for hourly solar radiation for a year and others.
