Autonomous Control Systems Laboratory Ltd.

ACSL Ranks 7th in 2020 Japan Technology Fast 50, A Ranking of Fastest-Growing Technology Companies, with a 245.4% Revenue (Sales) Growth Rate

Autonomous Control Systems Laboratory Ltd. (ACSL) announced today that it ranked 7 in the 18th Japan Technology Fast 50, with revenue (sales) growth of 245.4% based on the past three accounting periods. Japan Technology Fast 50, announced annually by Deloitte Tohmatsu Group, is a ranking of the 50 fastest-growing Japanese companies in the technology, media, and telecommunications (TMT) industries based on their revenue (sales) growth percentage based on the last three accounting periods. This is the second consecutive year that the Fast 50 has won the award, following last year's ninth place finish.

Japan Technology Fast 50 is a Japanese edition of the ranking program series of TMT industries compiled by Deloitte Touche Tohmatsu Limited (DTTL) for about 40 countries as well as for three regions: North America, EMEA and Asia-Pacific. It has been serving as a benchmark for growth potential and success for corporations in the TMT industries. Companies, both listed and unlisted, are eligible to apply for Fast 50 and the top 50 companies that have demonstrated exceptional growth in revenues (sales) based on the last three accounting periods are announced each year.

[The factors behind inclusion in Fast 50]

ACSL achievement of a 245.4% revenue (sales) growth rate is attributed to the following factors.

- Sales of industrial drones have increased significantly due to new customer acquisitions, as well as other application projects from existing customers, especially in the logistics, infrastructure inspection, and disaster areas which face labor shortages and other challenges.
- Product launch of new platform, ACSL-PF2, and Mini which responds to the demand for domestically produced, smaller and affordable industrial drones.
- Actual field demonstrations with drone in several major companies aiming practical deployment of drone systems

In the mid-term management policy "ACSL Accelerate FY20" announced in August 2020, ACSL is proceeding its strategy to achieve level 4 flight in urban areas by 2022. ACSL will aim for further growth by solving various social issues through the social implementation of secure domestic industrial drones.

〈About the Technology Fast 50 Program〉

Japan Technology Fast 50 is the Japanese edition of the ranking series organized by Deloitte Touche Tohmatsu Limited, an international public accounting and consulting firm that ranks companies among TMT industries based on their recent revenue (sales) growth based on a three-year period. Because the revenue growth rates are used as indices, the ranking indicates the fastest-growing companies regardless of their sizes. Entries are accepted from both listed and unlisted companies and they are automatically nominated for the Deloitte Technology Fast 500 Asia Pacific that encompasses all technology industry segments including hardware, software, communications, media, life sciences and clean technology.
