| June             |                           |                                   |  |   |                                  |                                      |
| Total            | -                         | -                                 |  | -   | -                                | -                                    |

(\*1) Forecast Power Generation is based on the Forecast Power Generation (P50) provided in the independent technical report.

(\*2) Actual Power Generation is based on SCADA (Supervisory Control and Data Acquisition) system data generation.

(\*3) CO2 reduction is calculated as based on adjusted emission coefficient by electric power companies. For more details, please refer to the link (<https://www.env.go.jp/press/104919.html>).

(\*4) The monthly data includes 2 projects, CS Hiji-machi Dai-ni and CS Ogawara-machi, acquired on March 8, 2021, and are also calculated based on the full month basis from March 1 to March 31, 2021 since the Fund earns the monthly rental revenue from March 1, 2021 as announced by “Notice Concerning Domestic Project Acquisitions and Leasing” released on February 17, 2021.

## 2. Solar Power Generation During the Month of March 2021

The Fund portfolio generated actual electricity production of 17,914,128kWh during the month of March 2021, equivalent to 98.62% of the forecasted electricity production.

| Month of March 2021                 |                          |                                     |                                   |                              |
