

# Forward Map

How will workstyles evolve?

How will lifestyles change?

And through it all, how can we support our users?

Money Forward, Inc. Integrated Report 2022

# Positive Growth Cycle

The word "sustainability" is transforming society. The concept underpins the value we provide to users through all our services. By helping users visualize their money, they can feel a sense of security in household finances, enabling them to face the future with confidence. By helping streamline work, we help to create time to do the things they love. And by lending a hand where it's needed, we help them find the energy to embrace new challenges. It is all about creating a positive growth cycle in the everyday lives of our users. To help people move forward. We still have a lot to do, but we're ready to start.

## Advancing toward My Dream while Spending Money according to Family Life Cycle

My wife and I had started bookkeeping together before marrying. We decided on certain rules, but it was hard because we would forget what we spent money on and had to jot everything down. After we started managing our finances on *Money Forward ME*, we no longer lost track of our expenses. I feel this has reduced stress stemming from money. I especially like the weekly report function, which shows me the total expenditure for the week. I can plan out whether I should save money or have some leeway during the upcoming week. With the addition of a new family member, we are also developing the habit of spending while considering our future; for example, redirecting dining-out expenses to savings for our child. My dream is to design and build a custom home for the three of us, and I am working toward making this dream come true!

Raised productivity by eliminating manual accounting tasks

Looking to launch

3rd, 4th products

to bolster

clients' arowth

Enhanced speed of business operations

## Creating Services That Make the World a Better Place through Speedier Business Operations

Our company was founded in 2016 with a focus on TUNAG, a service that helps solve organizational challenges. We started using *Money Forward Cloud* about a year and a half after our founding, and now use multiple products. Since our administrative department is quite small, eliminating manual tasks and raising productivity is crucial. I feel that these products have raised the speed of our accounting and other operations. In 2020, we also released FANTS, an online platform for supporting monetization in communities. We plan to subsequently launch our third and fourth products, thereby creating services that not only help individuals and organizations but make the world a better place.

Providing real-time financial data

Shaping a future in which Japanese companies can enjoy growth

Expediting clients' decision making

Shaping a Tomorrow in Which Businesses
Can Enjoy Growth by Grasping
Business Performance in Real Time

We use *Money Forward Cloud* to support clients in setting up their businesses and rolling out their accounting, tax, and payroll operations. We are especially focused on enabling clients to grasp their performance on a real time basis. Companies will stop advancing if they cannot respond swiftly to ever-changing internal and external environments. Using monthly financial reports compiled at the traditional speed means making decisions in the dark. Figures would be those from several months earlier, leading to faulty decisions. Companies are able to find more joy in planning next actions and challenges if they can access real-time performance data and outcomes of daily activities. We are committed to spurring the positive growth of Japanese companies by helping to create such situations.

Released PFM app and BFM service

Contributing to the region with sanpo-yoshi spirit Many clients acknowledged benefits of DX

## Evolving with the Community while Embracing Mutual Trust

Okazaki Shinkin Bank is the largest cooperative regional bank in the Chubu region, marking its 97th year in 2021. We first met members of Money Forward, Inc. in 2016, soon after its inception, and began jointly providing services. While Okazaki City's strength lies in *monozukuri* (manufacturing), with its concentration of Toyota Motor subcontractors, efforts in digital transformation (DX) have still just begun. I truly feel that our customers are benefiting from the new tools that streamline their accounting operations and enable them to easily grasp their cash flow. We value the spirit of *sanpo-yoshi*, or mutual benefits for the seller, buyer, and society. Only after we satisfy all those involved and contribute to society, can we sustain our business. We will continue to contribute to the region while incorporating new challenges.

Grasping cash
flow in real time

Making clearer
managerial
Returning to our decisions
roots in scrupulous
monozukuri
(manufacturing products)

Dedicating Ourselves to *Monozukuri*Based on Visualized Business Performance

Founded in 1969, the company develops and markets inner wear for the elderly. For SME owners like myself, ambiguous spending can be financially painful. We can devote ourselves to *monozukuri* owing to the sense of security we feel from being able to visually grasp our business performance. We have far less to worry about now that we have adopted *Money Forward Cloud* and can see our cash flow in real time. Comfort levels of clothes can change dramatically with such elements as yarn or knitting techniques, so it is a common practice to repeatedly create samples and test fitting. We generate added value by adapting to the times and environment, while resolutely protecting what must not be changed. We hope to revisit our roots in scrupulous *monozukuri*.

Creating products as a team

Hoping to show
my child how much
I enjoy growing
at work

Gaining expertise in whole product management

## Studying Product Management, Motivated to Grow in Step with Services

I am a designer of *Money Forward Pay for Business*. I love my current work, which enables me to nurture the service as a whole while listening to users' voices. Consulting with team members, devising designs, and implementing the design with engineers—there is a sense of togetherness when we create products. Although I am currently a designer, my ambition is to eventually be able to manage a whole product. While my job is fun, there is so much to do. I enjoy stepping out of my field of expertise and reaching beyond my limits to achieve positive growth, for example by conducting research on overseas best practices and contemplating what can be done to promote product usage. I hope to show my child how vigorously and enthusiastically I am working.

Aiming to create an organization where people around the globe can work freely

Leads job
interviews and
planning of
hiring events

## Welcoming More People from Around the World to Join the Company I Love

I am responsible for recruiting new graduates and skilled engineers and designers. I joined Money Forward, Inc. out of university because I empathized with its mission, and love the fact that the Company's Mission, Vision, Values, and Culture are shared among every single person I work with. This also serves as the driving force of our recruitment activities. I feel overjoyed in moments during recruiting when I see students being rewarded for their efforts with a job offer. I also believe our mission to be viable across the globe. Having lived in Uganda as a student, my aspiration is to assemble an organization where people I met in Uganda would also want to join—a company where people around the world can work with a high level of freedom.

Achieved tangible personal growth! Aspiring to deliver even better products

Persistently
tackled
challenges
with support
of others

## Taking a Chance—Rising to Challenges to Become an Engineer Who Can Drive the Team Forward

I came to Japan and joined Money Forward, Inc. in 2019 after graduating from a university in Hanoi. I am now developing new functions for cloud accounting. When I joined this project, I was still in my second year and didn't feel very confident. I studied the accounting system and bookkeeping in addition to the technology. It was overwhelming. But with the help of others, I overcame one obstacle at a time.

My wish is to become an engineer expert in both project management and technology. I enjoy propelling the project forward while sharing my motivation with the team to deliver great products to users, and aim to produce only the best products. I will continue stepping up to the challenge even if it means taking risks. Even if I happen to fail, everyone is there to help me, so why not take the chance?

## A Decade of Unceasing Endeavors. And Now, Looking Forward to the Decade Ahead.

The spread of COVID-19 is directly impacting the daily lives of individuals and corporate activities. With many still facing adversities, we pray for life to return to normal and are constantly striving to offer help in any way possible through our services.

Meanwhile, the pandemic has caused dramatic societal changes. Many companies have introduced remote work, which was uncommon prior to the coronavirus outbreak. Additionally, companies' adoption of cloud services and paperless offices has spread rapidly, in part owing to the government's vigorous push for digitalization, including setting up the Digital Agency and revising the Act concerning Preservation of Electronic Books.

Our lifestyles have also changed. I believe the pandemic has prompted many to reconsider the way they work and live, as indicated by the increase in time spent with family or in migrations to rural areas owing to remote work, albeit while harboring anxieties for the future.

May 2022 marks our 10th anniversary. Our business, which kicked off in a studio apartment, has evolved thus far with the support of our many users and various partners. I would like to express my sincere gratitude to all the stakeholders who have supported us to this day.

Our mission "Money Forward. Move your life forward" embodies our wish to alleviate to any extent possible the financial concerns and hassles of individuals and companies by offering our services, helping people to spend time on what they genuinely want to do, and encouraging everyone to take on challenges, thereby creating a forward-looking and optimistic society.

Although the future may be obscure, we will view this environment positively as a chance for major societal changes and continue to make strenuous efforts toward achieving our mission.

#### 2021, a Year of New Prospects

In the fiscal year ended November 30, 2021 (FY11/21), net sales totaled 15,632 million yen (up 38.1% YoY), SaaS annual recurring revenue (ARR) was 11,277 million yen (up 33.0% YoY), and EBITDA was 430 million yen, with all figures landing within the range of initial quidance.

We also transferred our listing to the First Section of TSE in June 2021 and raised 31.5 billion yen through an international public offering in August. We thereby reinforced our financial base to pave the path for further growth.

I would like to elaborate on our businesses. In Business domain, which provides services to corporates, SaaS applications for back-office operations now have over 180,000 users, while SaaS marketing platform *BOXIL SaaS* receives over 10 million page views per month. Particularly, in the rapidly growing domain of SaaS for the mid-cap market, we released eight new proprietary products in FY11/21. We expect these additions to become the new drivers of growth going forward.

In Home domain, dedicated to services catering to individuals, the number of *Money Forward ME* users has topped 12 million. Also, as part of our shift in focus from "visualizing money" to "resolving users' financial issues," we have been releasing various new services, represented by *Money Forward Financial Planning* and *Money Forward Fixed Cost Review*.

As for X domain, which primarily serves the financial sector, we offer our services to 44 financial institutions and are thus promoting digitalization and digital transformation (DX) of those institutions and their customers.

Lastly, in Finance domain, the cumulative amount of receivables purchased in *Money Forward Kessai* exceeded 50 billion yen. We also established joint venture Biz Forward, Inc. with MUFG Bank, Ltd. and aim to further stimulate the growth of SMEs through online factoring services.

## Creating a Positive Growth Cycle to Drive Society and Individual Lives Forward

We are thus implementing an array of initiatives, all of which are executed by our wonderful employees. Despite the intensifying competition in the hiring market, many talents continued to join us in FY11/21, with the number of employees increasing to 1,259 from 865 at FY11/20-end. Thanks to the endeavors of our many talented employees, we have built a foundation that will enable us to continue delivering new value to our users over the next decade.

Meanwhile, it is also imperative to address various risk as we expand our business. Information security in particular is paramount since the Company collects and retains valuable user data. To fortify information security, our Chief Information Security Officer (CISO) is spearheading the clarification and compliance of operational rules and ensuring that appropriate safeguards are always in place against unauthorized system access and other risks. We will continue to reinforce information security while making ample investments.

#### Talents, Teams, and Challenges to Realize Our Vision

To accelerate our growth in the decade ahead, we believe it is critical to develop and implement the right strategies, while also instilling our Mission, Vision, Values, and Culture (MVVC) among the members who will put those strategies into practice.

Previously, around the time our employee count was nearing the 100 mark, we rushed to attract skilled talents to expand our business, but failed to sufficiently establish a common understanding of our culture. This ended up having a negative impact on the organization as a whole.

Learning from this experience, we set three values, or action guidelines—User Focus, Technology Driven, and Fairness—and have cherished them in our daily operations.

Continually, raising the concentration of culture is a valuable task that a CEO must actively lead. We are enhancing the quantity and quality of communications with our members, starting with thorough assessment of corporate culture match in addition to capabilities at the time of hiring, and following that up with on-board culture training and conveyance of our culture through Company-wide meetings thereafter.

Money Forward currently has a diverse employee base, with the ratio of non-Japanese employees to total employees exceeding 15%, and that of female managers to total managers exceeding 21%. We believe one of management's vital roles is to create an environment in

which members with diverse backgrounds and values can express their abilities while being true to themselves.

As a new initiative, we have made English the official language among our engineers. Demand for employing talented engineers is on the rise, and hiring in Japan alone will not suffice in realizing the world we envision. We will also be launching an overseas development base in Hanoi, Vietnam, following the one in Ho Chi Minh. We are committed to cultivating an environment where excellent engineers from across the globe can join us.

We are also actively promoting young members as leaders. The CTOs of Home domain and Klavis, Inc., a Group company, are employees still in their 20s who joined the Company out of university.

Regardless of such factors as age, gender, nationality, or educational background, we offer opportunities for talented members who are motivated to take on new challenges to demonstrate their capabilities and achieve personal growth through their work.

#### Sustainability at Money Forward

Corporate responsibility to create a sustainable society is becoming increasingly important. From dialogues with our users and investors, we acknowledge that there is strong demand for pioneering companies like our own to not only expand our business but to resolve social issues through our businesses.

Money is merely a tool for living. Yet, many individuals and companies are pressured and affected by money because of lack of proper knowledge and are unable to take on the challenges that they wish to pursue. Through our services and businesses, we support each and every individual to move their lives forward and to drastically enrich everyday life, thus creating a sustainable society that drives countless challenges.

To shape such a society, we have set three materiality themes: User Forward, Society

Forward, and Talent Forward. We also established the Sustainability Committee in February 2022, chaired by myself, to facilitate our sustainability initiatives.

Furthermore, we have set "Positive Growth Cycle" as the concept we aim to achieve. We want to help users' lead optimistic lives by providing our services, to help society evolve by urging upgrades in social systems, and to spur growth of our employees by boosting their motivation and cultivating a friendly work environment. In this way, we hope to push society forward with our many stakeholders and shape a promising future where many companies and individuals can take on the challenges that they truly want to pursue. We aspire to create a society where such a virtuous cycle can be sustained.

All Money Forward members will continue to make a concerted effort to provide services that address users' issues while empathizing with them, and thereby propel a myriad of positive growth cycles in society. To this end, we ask for your ongoing support and guidance.

## **History**

### Expanding Business Scope through New Business Development and M&As

Money Forward, Inc. was established in May 2012 and its first product was *Money Forward ME* for visualizing personal finances. The service aggregates data scattered across various services, including that of banks, securities companies, and credit card companies, and display all data on a single screen, making it easier for users to acknowledge and manage their personal finances.

The following year, we released *Money Forward Cloud Accounting/Tax Return* as our first SaaS application for back-office operations. Our aim was to reduce cumbersome manual work in the back office, capitalizing on our aggregation technology and know-how in user interface and user experience as with *Money Forward ME*.

In consideration of the affinity between SaaS platforms and financial services, we then released *Money Forward for XX Bank*, which targets users of financial institutions as an OEM of *Money Forward ME*, to respond to financial institutions' needs to digitally transform their services. Since then, we have continued to bolster co-developments with financial institutions in X domain.

We established Money Forward Kessai, Inc. in 2017 as a company dedicated to financial services, to address companies' key managerial challenge of cash flows and in consideration of the affinity between SaaS platforms and financial services. The company provides an accounts receivable financing service and B2B invoicing and payment BPO service.

Meanwhile, we also established Money Forward Vietnam Co., Ltd. as a development foothold in 2018 with the aim of raising the quality and volume of product development, followed by Money Forward Lab in 2019 with the aim of promoting utilization of technology and data. In the same year, we extended our business coverage through the acquisition of SMARTCAMP Co., Ltd. through an M&A. It offers BOXIL, a marketing platform for SaaS businesses. Five companies,

including SMARTCAMP Co., Ltd., have joined the Group since 2017, contributing to the expansion of our product lineup and business scope.

We will continue to aim for further growth through such strategies as new business development and M&As to meet the expectations of our users and all \* We refrain from using the term "acquisitions" and refer to M&As as "Group joins." stakeholders.

May 2012 Moneybook Co., Ltd. (currently Money Forward, Inc.) is established

Dec. 2012 Money Forward ME is released as a service for visualizing personal finances

## **Core Technology**

We offer our services to a variety of customers including corporates, individuals, and financial institutions. Many of our services are backed by our core technologies, enabling us to improve investment efficiency in technology and expedite product development.

### Creating Unique Value through **Inter-Domain Synergies**

#### Aspiring to Resolve Financial Issues for All and Create a Society that Drives Challenge

Since our founding, we have embraced our corporate mission "Money Forward. Move your life forward," and aspired to eliminate financial issues and concerns from the world. Through our services and businesses, we support each and every individual in their efforts to move their lives forward and enrich everyday life, thus creating a society that drives challenge.

#### **Identifying Our Materialities**

To realize the society we envision and to continuously improve our corporate value, we have set User Forward (to drive users' lives forward), Society Forward (to drive our society forward), and Talent Forward (to drive our employees' potential forward) as three priority materialities.

We identified our materialities by selecting prospective items referencing major guidelines, including the SDG Compass\*1 and SASB's materials\*2, as well as ESG criteria, combining that information with interviews with internal and external stakeholders, and holding discussions at Board of Directors meetings and management meetings.

#### Structure for Promoting Sustainability

In February 2022, we set up the Sustainability Committee to bolster our efforts in sustainability, a priority agenda of the Company. The committee holds regular discussions with external directors and managers of each business division.

Committee members are appointed by the Board of Directors, with the Representative Director, President and CEO serving as chairperson, and Executive Officer and Head of Sustainability Toshio Taki serving as vice chairperson. Business division managers and external directors are also asked to participate as necessary to ensure effectiveness and viability of sustainability initiatives.

More specifically, meetings will be held every other month to discuss matters regarding sustainability and monitor the progress of initiatives, and reports will be made to the Board of Directors. Once the committee and Board of Directors deliberate and decide upon initiatives to be carried out, the committee's secretariat members will promote such initiatives by collaborating with and gathering information from the sustainability officers, a new post established in each Group company and business division.

CoPA (Chief of Public Affairs)
Head of Fintech Research

#### Sustainability at Money Forward

Decisions surrounding finance tend to be left to experts or in many cases, simply procrastinated over. Money Forward, Inc. was founded driven by the desire to change the world in which many people are overwhelmed by financial concerns, such as not having access to the right experts or the tools for making sound judgements. Our wish remains unaltered—we aim to alleviate financial anxieties and create a society that unleashes each and every individual's potential by constantly developing user-centric products.

Since our founding days, Japan has continued to face a host of social issues stemming from its declining and aging population. Individuals are burdened by never-ending pressures, including uncertainties over the social security system and the need to build wealth to prepare for longevity or protect wealth in later life. Meanwhile, workplaces that lag behind in digitalization amid a chronic labor shortage face a decline in managerial capabilities. We feel that the prevalence of such issues may have eroded energy directed toward societal change and productivity in the workplace.

We believe that many of these problems can be solved by tackling certain financial issues.

For example, User Forward, the pillar of our sustainability efforts, calls for moving society forward by addressing users' challenges. If individuals can grasp where they stand financially, see next actions clearly, and access thoroughly designed services, many matters vaguely perceived as "uncertainties" would transforminto practical "issues" that can be solved. As for businesses, by automating their back office, understanding their financial standing, and eliminating concerns regarding operating funds, they will be able to pursue profitability, raise employee salaries, and cultivate a mindset for creating medium—to long-term value.

Resolving financial issues also requires the involvement of the financial service industry, various ecosystems surrounding financial decisions, and an array of governmental regimes and services. We are also focused on actively promoting digital transformation (DX) in these areas with the aim of boosting the probability that businesses will succeed in their mission. This commitment links to the concept of Society Forward, which I will discuss later.

Furthermore, our stakeholders also include many employees working with the Group. As an organization comprising over 1,200 individuals, we believe it is essential that each and every member be able to exert their true self and maximize their potentials by working with us. Cultivating such an environment will in turn enable us to merge the power of our many colleagues to jointly drive society forward.

Decisions regarding money are inextricably linked to judgements made in everyday life and business. Wholehearted decisions made upon careful consideration should prepare us for the future and allow us to bring out the best of ourselves. We believe that Money Forward's initiatives toward sustainability will be greatly instrumental in driving such social innovations.

#### Three Materialities

To achieve the aforementioned objectives, we position the three areas of "User," "Society," and "Talents" as our corporate materiality themes.

User Forward is a commitment to deliver ground-breaking services more broadly, capitalizing on the power of technology and design to resolve users' financial issues. In particular, since we collect and retain highly sensitive financial data, we consider reassurance for data safety as a key component in quality user experience, and thus promote investments in security as a major agenda.

Under Society Forward we aim to contribute to the DX of society as a whole by collaborating with diverse partners. Since the Company's early days, we have been making policy proposals toward building an optimal future in areas where DX has traditionally been viewed as a challenge, including fintech and digital public services. In doing so, we have leveraged insights from users to depict an ideal, yet achievable future. To achieve our mission, we must simultaneously pursue societal change. We will thus continue making recommendations aimed at social transformation and work to put them into practice.

As for Talent Forward, we aspire to offer wide-ranging growth opportunities

**User Forward** To drive users' lives forward.

Society Forward To drive our society forward.

Talent Forward To drive our employees' potential forward.

#### SDGs that We Aim to Achieve through Our Initiatives

#### Foundations Supporting the Three Materiality Themes

Common understanding of Money Forward's Mission/Vision/Value/Culture Governance that balances growth and risk control

that enable our members to live up to their potential, to have our management commit to talent growth, and to create an environment where diverse perspectives are accepted regardless of gender, nationality, age, or academic background. As both our members and businesses become increasingly global and inclusive, we are particularly committed to maximizing investments in human capital, which we consider to be a core managerial input.

In pursuing sustainability at Money Forward, we view "shared understanding of Money Forward's Mission, Vision, Value, Culture " and "governance that balances growth and risk control" as the foundations supporting our three materiality themes.

We believe that if every single member of society can take the necessary actions and make their wishes come true, they will be able to express their inherent kindness and fulfill their responsibilities to the future. Because we are living in an ever-changing age full of uncertainties, we aspire to resolve financial issues for all and create a society that drives challenge.

## User Forward To drive user's lives forward

## Aspiring to Resolve Financial Issues for All and Create a Society That Drives Challenge

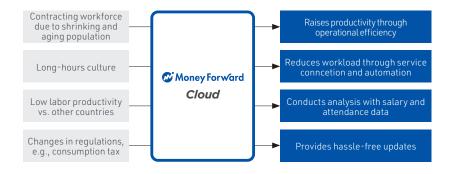

## Challenges of Companies and Sole Proprietors and Value Delivered by *Money Forward Cloud*

Companies and sole proprietors in Japan face a multitude of issues, including the decline in working population, low labor productivity, cumbersome back-office operations, and cash flow.

The Japanese population continues to drop and is estimated to fall from 125.63 million\* $^{1}$  in 2021 to below 100 million by 2050. The working age population ratio (aged 15–64 years) is also projected to contract from 60.8% in 2015 to 53.5% in 2040\* $^{2}$  Comma should come after the number, before the superscript, with rural areas and SMEs already seeing a shortage of workers.

Meanwhile, Japan also faces challenges in labor productivity. In 2020, the country's hourly productivity stood at 60% of that of the U.S., ranking 23rd among the 38 OECD members.\*3

Against this backdrop, companies need to raise productivity; however, it is difficult for them to do so while simultaneously addressing such challenges as structural reform and cash flow. We aspire to support these users by having them utilize on our technology, including connecting and utilizing data and streamlining operations through *Money Forward Cloud* and other services.

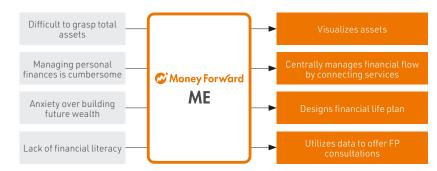

#### Challenges of Individuals and Values Delivered by Money Forward ME

In recent years, the vague anxieties of individuals over future finances have amplified by such issues as the aging and declining population and the so-called "20 million yen retirement problem."

Japan's average longevity is exceptionally high, standing at 82 years for men and 88 years for women as of  $2020.^{*4}$  As heartening as this may be, "wealth span" also becomes vital for retirees to be able to live at ease. In 2019, the Financial Services Agency (FSA) estimated in its report that Japanese retirees will be short of some 13–20 million yen in 20–30 years after retirement,\*5 sparking much public controversy. Although the estimate is based on a model case, it became apparent that many people are anxious about their post-retirement finances, and attention was drawn to the importance of accumulating wealth from a young age. Yet, cash and deposits occupy over 50% of Japanese household assets, with investment trusts and stocks accounting for only 10% or so, compared to 45% in the U.S. This implies that many individuals are still unaccustomed to investing.\*6 One reason for this is the lack of financial literacy education, for which Japan's outreach ranks 6th among the G7 nations and 39th in the world, trailing most developed countries.\*7

Through *Money Forward ME* and other services for individuals, we aim to not only help users visualize personal finances but also enable them to select more adequate financial services and motivate them to take actions that lead to designing or upgrading their financial plan, and thereby enrich their lives.

#### Resolving Users' Issues with Technology and Design

Technology × Design

#### Resolving Users' Issues with Technology and Design

We believe that the power of technology in creating innovations and the design that brings them to life are essential for identifying and resolving issues ahead of the world. As such, spearheaded by our CTO (Chief Technology Officer) and CDO (Chief Design Officer), we aim to resolve users' issues by leveraging the power of technology and design, and to create products that are easy to use for all.

SDGs → Goal 9

#### Technology Is the Key to Solving Issues

Our technologies have served to solve numerous issues thus far. For instance, *Money Forward ME* and *Money Forward Cloud* have helped substantially reduce the time and effort spent on financial management. They leverage such technology as account aggregation to collect and consolidate data previously tabulated by hand, including bank and credit card statements.

Daisuke Sergio Ito
Executive Officer and CDO

Takuya Nakade
Director,
Executive Officer and CTO

Furthermore, we protect accumulated data with advanced security and encryption and deliver new value to users. By analyzing the corporate accounting data that we collect, we can more easily help companies procure necessary funds when required.

In recent years, we have also actively been utilizing Al. Notably, we are seeing constant improvement in the accuracy of analyzing and digitizing receipts and various other paper documents, which companies in general are still swamped in. All enables the automation of burdensome manual tasks.

In this way, we have developed products that leverage technology and data to solve the various challenges of users.

#### Bringing Technology to Life with the Power of Design

Even the most innovative technologies would not penetrate the market unless consumers are able to adequately use them. Design bridges this gap between technology and people.

For example, such products as *Money Forward ME* would be useless if they simply display raw collected data. We uses graphs and images to allow users to easily utilize data to manage their personal finances. As for products like *Money Forward Cloud*, the amount of time each operation takes will collectively have a large impact on productivity. Thus, product usability is essential.

When developing designs, we first approach our users to identify what their true challenges are. Design plays the role of capturing users' substantive issues and delivering solutions in a form that is easy to use for all. We are committed to creating designs that not only look good but also offer a pleasant user experience.

We as a Group embrace "User Focus" as our value and our strength lies in the user-centric approach to product development by both our designers and engineers. By combining the power of technology and design, we aim to create products that drive the lives of users and society forward.

#### Money Forward Lab

#### Creating the Future with the Power of Technology and Data

Money Forward Lab is committed to unleashing the power of technology and data based on the desire to enrich people's lives by enabling them to engage with finance in a positive light.

The lab is particularly focused on the area of autonomous technology and usability. Previously, our focus was on safely and automatically collecting data and visualizing the current state. We are now engaged in R&D that promotes autonomous technology and usability, in which future issues are predicted and actions for solving issues proposed. Key themes include machine learning and deep learning, natural language processing and image processing, and UI and UX.\*

#### Autonomous Back Office as the Ultimate Future

We believe that the shift toward automation and autonomy in back-office operations can be likened to that of autonomous cars. Just as the ultimate goal of autonomous cars is to fulfil the desire to safely, securely, and comfortably travel to a destination, the ultimate goal of accounting operations and business management is to fulfill the desire to safely, securely, and comfortably implement the management that a company envisions. We call this the autonomous back office.

How do we realize an autonomous back office? We believe the evolution is also similar to that of autonomous driving. A car's system can be divided into stages

#### The Future of Cars

Manual Collaborative

Desire to accelerate, make a turn, stop

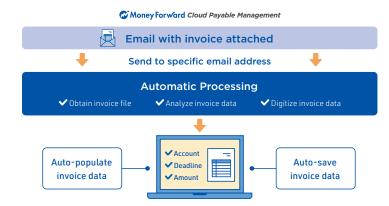

Automatic Autonomous

Desire to travel safely and comfortably to destination

according to level of automation, ranging from "manual driving" to a level where "the system completely controls the car under all conditions." Likewise, we believe that there are different levels in the evolution toward an autonomous back office, and are thus carrying out R&D considering each of these levels.

For example, before complete automation, there is a stage where "tasks are performed by machines based on procedures and criteria provided by humans." For this specific stage, we conducted R&D for video recognition of receipts, where smartphone video clips of receipts placed randomly on a desk are processed and digitized, as well as for AI-OCR, which structuralizes and extracts such information as invoice amount, date, and account on digitized invoices. Specific functions developed for AI-OCR are now incorporated in *Money Forward Cloud Payable Management*.

Similar to a future where one can travel freely to one's destination, through our activities at Money Forward Lab, we aspire to create a future where users can implement management as they envision it.

Released Money Forward Cloud Payable Management function for Automatically Loading Emailed Invoices

<sup>\*</sup> UI (user interface): The point of contact between a user and a product or service
UX (user experience): The experience that a user gains through a product or service

## Investment in Cyber Security to Ensure Safe Use of Services

As our services involve collecting and retaining users' various financial information, we consider adequate information management to be a top priority and believe that constantly reinforcing information management is critical in sustaining stable business activities.

To ensure proper and safe handling of information, we have established the Basic Policy on Information Security (Security Policy). Under this policy, we appointed a CISO (Chief Information Security Officer) to oversee security management operations, stipulated operational rules on information security management, and are taking appropriate measures to prevent risks including data breach through such means as unauthorized system access by malicious third parties to unlawfully obtain information.

Also, to protect sensitive personal information of users, we have established the Personal Information Protection Policy (Privacy Policy) as an action guideline for all employees to comply with. We have also compiled internal rules for protecting personal information and are conducting internal training for executives and employees on the handling of such information. These measures show our commitment to fostering a shared understanding of the importance of the personal information we handle and the rules we must comply with. In March 2022, we established the Personal Data Statement, in which we declared our philosophy on the handling of information about an individual. This includes data that can identify a specific individual, such as personal information and personal data; identifier information, such as cookie information, IP address and terminal ID, and location information; and log information on internet use, such as browsing history.

In addition, to extend governance to the area of information security, every month the CISO reports the status of security operations to the Representative Director and CTO (Chief Technology Officer) to receive evaluation and feedback on the validity and effectiveness of such operations. The CISO also presents an annual summary of these reports at Board of Directors meeting. We will continue to invest in cyber security to ensure safe service usage by our users.

 ${\tt SDGs} \, \rightarrow \, {\tt Goal} \, {\tt 9}$ 

#### Key Initiatives

#### Measures against Third-Party Cyberattacks

- Review at time of development
- Firewall installation
- · App vulnerability evaluation by external security diagnostics firm
- Penetration testing by external security diagnostics firm
- Data encryption and enhanced monitoring system
- Switched anti-virus software on officer and employee devices to EDR (enhanced cyberthreat detection, prevention, and response)
- Separate designated network environment for maintenance involving personal data

#### Measures against Information Leaks

- Review at time of development
- Fortify rules on information security and personal data protection
- Officer and employee training
- SSO & automated provisioning of executive and employee IDs
- · Access control of third-party PCs
- Internal access authorization and access log record
- Separate network between environments of user services and officer and employee PCs

#### **External Authentications**

- Nippon CSIRT Association membership
- Service Organization Control 1 (SOC1) Report (Money Forward Cloud)
- Audits under Agreed Upon Procedures (AUP) (for electronic payment services)

Takashi Ichikawa
Executive Officer and CISO
(Chief Information Security Officer)

## Society Forward To drive our society forward

#### To Achieve a Better Social System

Our Group is involved in making policy recommendations to the government through various activities, including research and information distribution by Money Forward Fintech Institute, policy proposals at meetings set by government agencies, and sharing of Money Forward Group best practices. We also work to reinforce partnerships for realizing financial innovation by managing activities such as study groups and social events with business organizations, including the Fintech Association of Japan and Japan Association for Financial APIs. Furthermore, by holding educational events and operating user communities we help individuals across all generations to think about financial issues.

In particular, there is societal demand to boost financial literacy, buoyed by the government's move to in 2022 lower the age of adulthood and the launch of high school education programs on wealth formation, and mutual funds. Since the Group's services can also serve as an introduction to financial literacy, we are committed to meeting this rise in interest information that is appropriate and easily understood. knowledge. We will accordingly work on resolving social issues, such as economic disparity, and help individuals and businesses unleash their potential with the aim of realizing a better social system.

SDGs  $\rightarrow$  Goals 4, 10 and 17

#### To Move Society Forward with Fintech

In providing services that empower users and contribute to solving social issues, we at times create services that go beyond the expectations of conventional wisdom. For example, a decade ago, it would have been unthinkable for financial institutions to offer open APIs and allow access to data by non-financial companies, or for companies to handle sensitive corporate data in a cloud environment.

Yet, we believe we should create services that contribute to the sound development of society, however unexpected they may be, based on one of our core values - Technology Driven. In addition, to facilitate the sense making of new services and technologies, a wide range of users need to experience the convenience of the technology and to have its safety ensured through expertise. For example, we are developing tools that provide visibility into public pensions and protect the assets of those with declining cognitive abilities, which are both characteristic challenges in an aging society. Our goal is to demonstrate the technical benefits that fintech can offer to society as a whole. society. Meanwhile, we also believe that building relationships with stakeholders to change society and actively making policy proposals for necessary structural changes will lead to long-term improvement in our corporate value. It is essential that we take a collaborative approach as we aspire to become a financial platform for all.

In recent years, digitalization and automation of public services has accelerated, as represented by the launch of the Digital Agency. The Invoice System will be enacted in October 2023, and as My Number Card and the government's Digital Principles gain traction, various procedures will be streamlined. This should bring forth a world where individuals and businesses have direct access to public services that match their needs. Once it becomes possible to incorporate such new functions in public service into our services, more people will be able to carry out administrative procedures without stress and receive government assistance.

In the world of fintech, which is interconnected with the financial system, one failure can lead to the risk of compromising industry trust. At the same time, however, adequately incorporating innovation in the financial world should be a source of individual happiness. While fulfilling our social responsibilities, we will continue to advocate Society Forward activities so that all financial issues of individuals are resolved, and our society will move forward through fintech.

#### Promotion of open innovation in fintech

(FINOVATORS, FINOLAB, Fintech Association of Japan, and Tokyo Metropolitan Government)

#### E-Invoice Promotion Association (Digital Agency and software companies)

In line with the start of the Invoice System, we promote activities for standardizing electronic invoices and streamlining other operations under the system.

Visualization of pension system (Ministry of Health, Labour and Welfare, and others) We take part in activities to provide visibility into public pensions and personal assets, and to support post-retirement life planning, in response to the "20 million yen retirement problem."

Advancement in cyber security of fintech companies (The Center for Financial Industry Information Systems)

We promote the establishment and operation of security standards that provide safety when fintech companies connect with financial institutions and financial systems.

#### Improvement in SMEs' cash flow (The Small and Medium Enterprise Agency)

To enable SMEs to secure operating funds, we make proposals regarding the establishment of systems concerning factoring of accounts receivables and loans.

#### Reform of authentication infrastructure, e.g., My Number system (Digital

We make policy proposals as a key player in realizing digital public services based on the My Number System and corporate authentication infrastructure.

Resolving issues of a super-aging society (Ministry of Economy, Trade and Industry; Ministry of Health, Labour and Welfare; and Financial Services Agency)

As users face various changes such as the onset of dementia in a super-aging society, we gather knowledge and make policy proposals to inclusively provide financial services.

Payroll Card, etc. (Financial Services Agency and Ministry of Health, Labour and Welfare) We propose systems that offer more options for workers in the way they receive their salaries or accumulate wealth.

Promotion of Financial Service Intermediary Business (Japan Financial Service Intermediary Business Association)

Ensuring safe and reliable services and supporting the industry for the newly introduced intermediary business for financial products.

Association activities related to banking API (Japan Association for Financial APIs) We implement activities as a member of a business organization to realize systems and infrastructure that facilitate the linking of financial information and transactions, represented by bank APIs.

Reform in payment infrastructure/CBDC (Fintech Association of Japan, Bank of Japan, and Japanese Banks' Payment Clearing Network)

We actively participate in discussions on the transformation of payment infrastructures such as the Zengin System and CBDC (Central Bank Digital Currency), and make recommendations regarding systems toward the establishment of a convenient payment infrastructure.

Promotion of data portability (Japan Association for Financial APIs and MyData Japan) We conduct research and build a consensus towards personal data ownership rights, which have not yet been established in Japan.

Promotion of open innovation in fintech (FINOVATORS, FINOLAB, and Fintech Association of Japan, and Tokyo Metropolitan Government)

Beyond our self-interest, we support the advancement of the fintech industry and implement activities to maintain a structural environment where innovation continuously comes to life.

## Contributing to DX in Society through Co-creation with Diverse Partners

In recent years, rapid change in the business environment has accelerated DX initiatives that enhance corporate competitiveness and improve productivity. We promote our business with a wide range of business partners, including financial institutions, accounting firms, business corporations, and chambers of commerce and industry across Japan.

- \*2 As of January 14,2021. Counting financial institutions (including Shinkin Banks, Labor Banks and Agricultural and Fishery Coopera tive Savings Insurance Corporations) that have API connections or web scraping connections with contracts.

#### **Moving Forward with Our Partners**

The Company Establishment Center was established in Kyoto in 2017 as a group of professionals that supports the founding and establishment of businesses. We use *Money Forward Cloud* to support clients in setting up their businesses and rolling out their accounting, tax, and payroll operations.

We strongly believe that speed is vital in deploying businesses and have thus launched "remote advisory," a new style for offering tax advice.

By combining multiple IT tools, we have created a

system in which clients can consult us at any time or place with minimal documents. We value the concept of daily financial results, where we can view daily financial performance. At the core is *Money Forward Cloud Accounting*, which enables the aggregation of various data. We aim to continue utilizing various tools to pursue our mission of speedily delivering accounting data that can serve as indicators for accelerating clients' decision making.

## Putting Environmentally Friendly Management into Practice

Protecting the global environment is now a pressing issue, and it is the responsibility of all people and companies that constitute society to take this issue into their own hands. The Company also recognizes that this issue is important and is implementing Company-wide initiatives. Internally, we identify areas to be reviewed in the office, internal tools, and employees' workstyles, and implement environmentally friendly measures. In addition, we help reduce the use of paper and improve operational efficiency through our services, thereby promoting eco-friendly individual and corporate activities.

SDGs → Goal 15

Internal Initiatives

- Introduction of a new workstyle centered on remote work. Reduction in the movement of people and goods, and the use of paper by shifting to cloudbased operations including for internal memorandums, settlement of expenses, and contracting
- Use of 100% renewable energy for power generation in our headquarters
- Use of renewable energy-based AWS (Amazon Web Service)
- Calculation of Greenhouse Gas in scope1 and 2 (disclosed in ESG Data Book) https://corp.moneyforward.com/ir/library/integration/

Servicebased Initiatives

- Improving operational efficiency and promoting reduction of paper usage including for invoices (e.g., #Invoice Forward Project) by migrating backoffice operations to cloud
- Promotion of reduction of paper passbooks and streamlining of operations through support for DX in financial institutions with many users
- Efforts to visualize environmental impact utilizing fintech (patent pending)

## **Talent Forward**

#### To drive our employees' potential forward

#### Upgrading the HR System to Propel Growth of Each and Every Member

the Money Forward Group has released an array of services and achieved drastic growth in a decade since its founding. We have actively invested in talents in addition to marketing, particularly since our first equity offering in 2018.

Accordingly, we developed many new products in FY11/21, represented by Money Forward Cloud Contract and Fixed Assets, and also reduced the time to PMF (product-market fit). We can feel the positive impact of HR investments in all stages, ranging from development to service launch.

Yet, to achieve our vision of "becoming the financial platform for all," we must attract more talents, urge further growth of each and every employee and work in union toward our goal. To drive this effort, we revamped our HR system (titled MF Growth System 2.0) in December 2021.

As part of MF Growth System 2.0, we decided to give out bonuses and increase the rate of salary raises of high performers with the aim of attracting and retaining excellent talents. Additionally, to encourage employees to be goal-oriented, we provided clearer visibility into how the goals of individuals are linked to the Company's goals and whether they are making progress in achieving these goals. We also introduced a training program for learning how to set goals and provide one-on-one feedback. From the perspective of providing a friendly work environment, we are striving to create a system where employees can work flexibly and with peace of mind according to their personal situation, including expanding the scope of those eligible for nursing leave and caregiver leave and widely accepting remote work on the back of the pandemic. We implemented various other changes as well, including raising the discount rate of the employee shareholding association from 5% to 15% to support members' wealth accumulation.

Furthermore, conduct the MF Group Survey, which asks employees to evaluate job satisfaction and work environment every half term. It enables the Company to acknowledge challenges in cultivating a motivating work environment and to work toward improvements. In the survey conducted in February 2022, we received responses from 97% of those eligible, with 88% giving a positive response regarding the Company's businesses and daily operations. After the survey, we offer career interviews to those interested, and each division and office develops action plans based on survey results. We are thereby endeavoring to further enhance our work environment.

In FY11/22, we will continue to actively recruit talents and also plan to hire many non-native engineers. Even as members of the Group increase, we will continue to flexibly design our HR systems and organizational structures to foster a culture unique to Money Forward and enable each and every member to work with discretion.

SDGs  $\rightarrow$  Goals 8 and 10

Chiaki Ishihara Department Manager of People Forward Department

#### The Growth of Members is Our Driving Force

To realize our mission and vision, we have focused on the development of our business and organization, together with the growth of our people. We believe talent development is critical for the sustainable operation of our business and organization. Therefore, in addition to creating a wide range of growth opportunities, including for career and skill development, we emphasize management's commitment to individual growth and the creation of an environment that accepts diverse perspectives.

#### **Creating Diverse Growth Opportunities**

We cherish our culture, which encourages employees to set challenging goals and provides appropriate and clear feedback through periodic one-on-one sessions to communicate expectations to each member. We also offer opportunities for considering the abilities and preferences of employees regardless of age, number of years with the Company, or academic background, and decide job assignments in a way that respects their passion and suitability, rather than merely being on convenience for the organization.

SDGs  $\rightarrow$  Goals 8 and 10

Key Initiatives

- HR evaluation and compensation system of performance-based salary raises and bonuses
- One-on-one mentorship and trainings for members' goal achievement and self-learning
- MF Challenge System: Internal job posting system to realize transfers initiated by employees
- MF Group Survey: A survey on employee satisfaction and career design
- Career Interview: Career consultation for employees upon request
- · New business proposal opportunity

#### **Management's Commitment**

We believe that growth of people is most important for realizing our mission and vision. We are aware that management in general, as well as the HR Department, must engage with employees to maximize their potential and commit to their

development. Our management is actively engaged not only in raising employees' performance but also in maintaining and raising their motivation, and discussing their career design and workstyle.

SDGs → Goal 8

Key Initiatives

- Various training programs hosted by management
- Leadership Forward Program to foster leadership Initiatives
- Discussion regarding next-generation leadership development at management meetings

## Driving Society Forward with the Combined Power of Diverse Members

The Company thoroughly embraces "fairness" as one of its core values and has adopted a hiring policy based on employing people regardless of gender, nationality, religion, age, or academic background. We are committed to creating a work environment that is friendly and motivating for all employees with diverse backgrounds, including those who are experiencing changes in life stages such as childcare and nursing care. We respect each individual's personality and aspiration for growth, positioning "realization of diverse perspectives" as the core of our HR strategy to maximize the abilities and output of each employee and to realize innovation. We will thereby promote various HR measures with a focus on diversity and inclusion.

SDGs → Goal 5

Key Initiatives

- Compliance with Hiring Policy
- · Mid-career and new graduate hiring throughout the year
- Hiring of disabled persons
- Global hiring
- Japanese language study support system TERAKOYA for non-native members
- English language study support for Japanese engineers
- Promotion of childcare leave for both men and women, and support for returning to work
- Introduction of remote work

## Foundations Supporting the Three Materiality Themes

In carrying out our sustainability initiatives, we embrace three materiality themes: User Forward, Society Forward, and Talent Forward, while also placing value on the underlying foundations: "common understanding of Money Forward's mission, vision, values, and culture" and "governance that balances growth and risk control."

Our mission and vision reflect the society that we aspire to create and the role we wish to play in such a society through our business activities. We believe we must promote common understanding among our members, while also sharing our values and culture in that process. In addition, we think it is essential that corporate governance functions effectively to strike a balance between the soundness and growth of our business activities.

#### Foundations Supporting the Three Materiality Themes

Common understanding of Money Forward's Mission, Vision, Values, and Culture

Governance that balances growth and risk control

#### **Shared Understanding of MVVC**

#### Culture

Another vital element behind our ability to achieve our Mission and Vision is our corporate Culture, which has been built by incrementally accumulating various achievements since our founding. We believe that instilling our culture in the minds of our members is what helps us achieve our MVV (Mission, Vision, and Values). Money Forward's culture is shaped by the results of each of our actions grounded in our MVV, and this culture is created by none other than our people. To maximize our mission of driving our lives and society forward, we believe it is of utmost importance to maximize the lives and potential of members working with Money Forward, and to enable everyone to paint an exciting picture of their future.

We have made Company-wide efforts, including sharing the vision and values that Money Forward aims to achieve, creating an organization that elicits the challenges and possibilities of our members, and building an open environment for

co-creating with society. To maintain the integrity of our culture even as the organization expands, we will instill our culture by engaging our management and People Forward (HR) Department, as well as each and every member.

We are committed to fostering Money Forward's culture.

Keiko Kanai VP of Culture

Members who embody our culture are given the award of "Culture Heroes" in front of all employees.

Wall painting by employees when building a new office in Tokyo. We also hold events that allow members to experience and share our culture.

#### G

#### Role of Culture in Money Forward's Values

We place importance on culture as a pillar upon which we build our organization. In Vietnam, many of those who apply for a job say they place value on work environment. Because work environment translates to culture, actively publicizing our culture gives us an advantage in the IT market, where hiring is competitive. It is also reassuring that those who join us already empathize with our culture at the time of application.

A clear presentation of our culture holds significance in terms of organizational management as well. Because our shared culture is ingrained in each member's mind, we can create an environment where individuals are respected for their own decisions. Since culture is intangible, we organize activities that incrementally foster understanding and lead to enhanced corporate loyalty and employee engagement. Through such experiences, we hope to build an organization where members can empathize with and take pride in Money Forward's culture.

Nana Nagai Money Forward Vietnam COO

Members in charge of organizing the semi-annual Group employee meeting

Members of Money Forward Vietnam Co., Ltd.

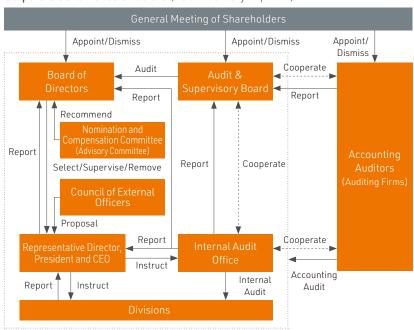

#### **Governance That Balances Growth and Risk Control**

#### **Basic Policy on Corporate Governance**

We aim to move society forward and create a world where all individuals and corporates, including our users and employees, can actively take on challenges. To this end, we ceaselessly deliver services in the IT industry, where the operating environment is subject to constant change. Against this backdrop, it is essential that corporate governance function effectively for the Company to realize its vision and achieve sound growth. We are therefore developing a governance structure that balances growth with risk control. To deploy business management grounded in sound ethical standards, we are committed to adhering to our compliance structure and ensuring corporate soundness and transparency. In addition, we are striving to develop an internal structure that allows for prompt and rational decision making as well as streamlined business execution. This will enable us to achieve a steady increase in shareholder value on a long-term basis.

#### **Corporate Governance Structure**

Corporate Governance Structure (As of February 21, 2022)

#### Reinforcing Corporate Governance

The Company increased the number of external directors from five to six upon obtaining approval of the General Meeting of Shareholders held in February 2022. Although external directors have comprised the majority since last year's General Meeting of Shareholders, we aim to reinforce governance by raising their proportion. Meanwhile, the Nomination and Compensation Committee, set up at the discretion of the Company, deliberates on remuneration of not only directors but also executive officers, thereby enhancing the objectivity, transparency, and fairness of the deliberation process of directors' and executive officers' compensation. In addition, on February 21, 2022, the Company established a Council of External Officers. This is to enhance the governance system from the viewpoint of management monitoring and supervision. External officers (external directors and external members of the audit and supervisory board) will enhance the quality of monitoring of executive divisions by exchanging opinions regularly.

The Company aims to contribute to sustainable growth and enhance its corporate value over the medium to long term. Also, at the business execution level, we split the position of CLCO (Chief Legal and Compliance Officer) into CLO (Chief Legal Officer) and CCO (Chief Compliance Officer) from December 1, 2021, with both holding the title of executive officer, to exercise "governance that balances growth and risk control" in business executions.

Masakazu Sekita
Excutive Officer and CLO

#### ,

# Our Business

Our vision is to become the financial platform for all. This vision guides us in providing a wide range of services to various users including corporations, individuals and financial institutions. We deploy the power of technology and design to create products that resolve user issues. We will continue to create innovative services by making further use of data and by linking products.

#### (4)

## **CFO Message**

#### Continue to invest for Medium- to Long-term Growth to Maximize Shareholder Value

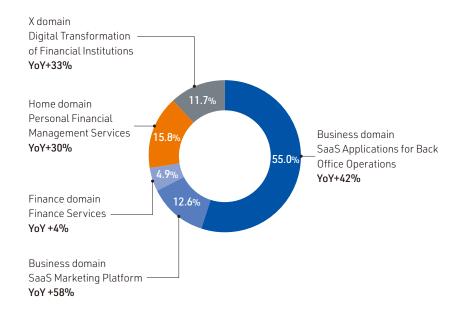

Naoya Kanesaka Director, Executive Officer, and CFO

#### Fiscal Year Ended November 2021 Financial Results

In FY11/21, we recorded consolidated net sales of 15,633 million yen, up 38% YoY, an operating loss of 1,062 million yen, and EBITDA of 430 million yen, with all three figures landing within the range of initial guidance for the fifth consecutive fiscal year since our listing. Also, SaaS annual recurring revenue (ARR), or the Group's total recurring revenue, jumped 33% YoY to 11,227 million yen, indicating sustained robust growth. This strong growth was driven by ARR of *Money Forward Cloud* and other SaaS applications for back-office operations. It soared 36% YoY to 8,466 million yen propelled by the expansion in product lineup accompanying the release of seven new products for medium-sized companies, as well as enhancement in the sales and marketing structure.

Additionally, in November 2021, we announced the M&A of internal AI chatbot developer HiTTO Inc. as a consolidated subsidiary. We are building a portfolio of businesses in the SaaS and fintech Fintech area and each of the businesses boasts high growth rates.

<sup>\*</sup> Graph shows the proportion of FY11/21 revenue.

#### Market Listing Transferred to First Section and Transitioning to Prime Section of TSE; Continuing to Aim for Maximized Mediumto Long-term Growth

The Company transferred its stock market listing to the First Section of the Tokyo Stock Exchange (TSE) in June 2021. We plan to transition to the top-tier Prime Market in TSE's new market segment in April 2022. We are truly grateful to the shareholders and various other stakeholders who have supported us thus far. Building on this market listing transfer, we aim to expand our investor base and reduce funding costs, thus raising the ability of our management strategies.

The Group's primary business model is the SaaS model, which recognizes revenue according to use of services. Compared to a model where revenue is recorded at the time of system implementation, the SaaS model takes time to monetize; however, the churn rate is low (FY11/21 full-year average\*: 1.5%) and profitability is expected to be substantially higher in the medium to long term. In addition, the shift toward remote work and paperless operations has been accelerating; this should fuel demand for cloud services and cashless operations, which in turn, should further drive demand for our services.

We will continue to make active upfront investments to capture new users and develop products and services that meet new market demands. Meanwhile, we will also facilitate management to achieve optimal medium- to long-term growth by bolstering customer success and further minimizing the churn rate.

#### Enhancing Balance Sheet through International Offering, and accelerating investments toward Accelerated Growth and **Solid Business Foundation**

In August 2021, we raised 31.5 billion yen through an international offering. The main purpose was to accelerate business growth in Japan's SaaS and fintech realm, to solidify our business foundation and secure a financial base in preparation for M&As oriented toward achieving exponential growth, and to improve stock liquidity and expand our investor base. We captured demand equivalent to some ten-fold the allocated amount, including from many long-only investors and U.S. institutional

#### **Growth Strategies**

Superior Back-office SaaS Platform with Differentiated Go-to-market Strategy

Multiple Avenues for Future Growth with Significant Synergies

Disciplined M&A Strategy with Proven Track Record

Leverage Existing Assets to Create New Opportunities

investors, and believe we have successfully built a stable base of investors who have in-depth understanding of our business. We also received highly supportive feedback on our medium- to long-term growth policy.

Going forward, we will steadily implement our four growth strategies.

#### Promoting Strategically Disciplined M&A and PMI for Accelerating Growth

In Business domain, all five companies that joined the Group through M&As offer products with a competitive edge in their respective business fields, and each had sustained a high grow rate even at the time we acquired their shares. The Group values not only business synergies but also that such companies have affinity for our Mission, Vision, and Culture. We also promote PMI (post-merger integration) so that companies joining the Group can continue to focus on their business and evolve.

As a result, Klavis, Inc., Knowledge Labo Inc., and SMARTCAMP Co., Ltd., which joined the Group, have continued to grow strongly, with CAGR (compound annual growth rate) in net sales coming in at 51%, 65%, and 50%, respectively. SMARTCAMP Co., Ltd., which joined the Group in November 2019, has continued to expand its existing businesses BOXIL SaaS and BALES, while also successfully launching new businesses BOXIL EXPO and ADXL, thus achieving a strong growth rate of 58% YoY in FY11/21.

Moreover, the founders and managing members of the companies that joined the Group now play key roles in our management. We believe that such successful M&As and active involvement by the entrepreneurs and management members thereafter will have a positive impact in promoting future M&As.

<sup>\*</sup> Customer churn rate is 12-month average

#### Accelerated Growth after M&A

\*Financial results of SMARTCAMP Co., Ltd. are consolidated from FY11/20. Full-year results for FY11/19 are calculated by aggregating monthly sales from December 2018 to November 2019 based on FY3/19 and FY3/20 monthly

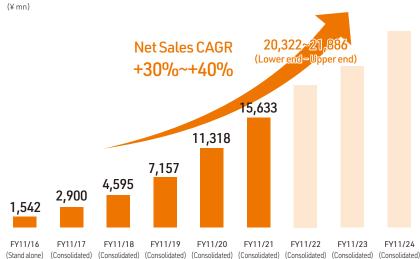

#### Outlook for FY11/22 and beyond and Mid-term Growth Plan

We will focus on increasing recurring revenue represented by SaaS ARR, and accelerate upfront investments mainly in Business domain. We thereby aim to maintain 30–40% in net sales CAGR until FY11/24. For FY11/22, we expect consolidated net sales to reach 20,322–21,886 million yen (growth rate of +30–40% YoY). In addition, we will prioritize growth in SaaS ARR, centered on SaaS applications for back-office operations, with SaaS ARR projected to reach 15,718–16,814 million yen (growth rate of +40–50% YoY).

While SaaS ARR topped 10 billion yen in FY11/21, some nine years since our founding, we intend to step up growth and reach the 20 billion yen mark by early FY11/23. To sustain the high growth of SaaS ARR, we are primarily focused on

#### Policy for Medium-term Growth Investment and Guidance for FY11/22

(Stand alone) (Consolidated) (Consol

increasing customers and average revenue per account (ARPA) in Business domain. In FY11/21, the number of paying customers rose by 41,000 from FY11/20-end (1.7-fold increase YoY), while ARPA grew by 5% YoY, with corporate ARPA in particular climbing steadily by 8% YoY. Implementation of our products by medium-sized companies is especially showing favorable progress and driving growth, with the ratio of medium-sized companies to corporate ARR increasing by 7.4 ppt in just one year, from 19.8% at FY11/20-end to 27.2% at FY11/2021-end. In addition to new deployments by medium-sized companies, we expect to raise ARPA through upselling and cross-selling.

Meanwhile, we are closely monitoring the soundness of investment returns. Specifically, we plan to invest in recruiting and marketing by setting a CAC payback period $^{*2}$  of within 24 to 36 months.

## Actively Communicating with the Capital Market and Incorporating Feedback into Business Management

A key initiative of the Company is to communicate closely with the capital market,

<sup>\*2</sup> Customer acquisition cost payback period: calculated as (customer acquisition cost / No. of customers acquired) / (ARPA \* gross profit margin)

#### Fiscal Year Ending November 2022 Earnings Forecast (SaaS ARR) ■ Home: premium charges Business: corporates Finance: recurring revenue Business: sole proprietors X: recurring revenue (¥ mn) 15,718~16,841 20,000 $(+40\sim50\%)$ (Lower end - Upper end) +31% or more 15,000 +39% or more 11,227 10,000 8,439 10,853 +47% or more 6,319,, 7,374 **4.164**<sub>71</sub> 5,000 5,381 **2,677**<sub>10</sub> 3,827 2.383 1,379 +26% or more 1,092 857 +20% or more 472 2.129 1,769 1,428 1.139 FY11/17-end FY11/18-end FY11/19-end FY11/20-end FY11/21-end FY11/22-end Results Results Results Results Results Forecast

respond to expectations, and foster trust. Additionally, we disclose information in a timely and fair manner, and are also committed to conveying information more thoroughly and comprehensively in order for investors and shareholders to better understand and accurately evaluate the Company's strategies and performance. We will continue to consider and incorporate investors' feedback into our disclosure policy.

Furthermore, we regularly provide the Board of Directors and managers of each business division with feedback from IR meetings with numerous domestic and overseas shareholders and investors. As such, we thereby strive to make managerial decisions that also reflect the capital market's perception.

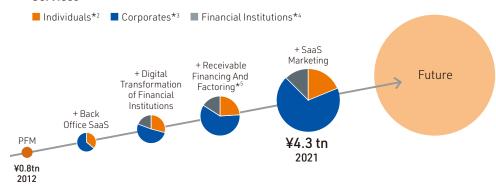

## Bolstering Financial Base and Governance for Aggressive Strategies in Growing Markets with Large TAM<sup>11</sup>

As represented by SaaS applications for back-office operations, we are operating in the SaaS and fintech market characterized by a substantially growing TAM and drastic change. We thus value speed and proactive approaches, including swiftly launching new businesses and actively conducting M&As and investments to accelerate business

growth. The Company will fortify its financial base to facilitate such aggressive investment, and at the same time, bolster governance, including through closely examining and minimizing risks when launching new businesses or implementing M&As. We will thereby strike a balance between active growth and controlled risk.

We have also enhanced our management team by welcoming Hiroaki Yasutake and Gen Miyazawa, who both have experience managing mega ventures, in February 2022. External directors will continue to comprise the majority of the Board of Directors. Furthermore, we will gradually transfer authority to the business divisions and promote initiatives in expediting business execution. In this growth market with a large TAM, we will continue to deploy aggressive strategies in an agile manner, while also deploying resilient risk control. We thereby aim to achieve medium- to long-term growth that meets the expectations of our investors and shareholders.

## TAM Continued to Expand, Driven by Expansion of Business Areas and Services

- \*1 Total Addressable Market. Potential market size for four domains of Money Forward is estimated, by using certain assumptions, based on third party research, publication as well as Money Forward historical data.
- \*2 See page 109 of the presentation material for FY11/21 Full-Year financial results for the calculation of the total TAM of individuals.
- \*3 See pages 105 and 106 of the presentation material for FY11/21 Full-Year financial results for the calculation of Corporates TAM, including back office SaaS, SaaS marketing. See \*6 for receivable financing and factoring markets.
- \* 4 Calculated based on the market size for the Japanese contract software development market size according to the Ministry of Internal Affairs and Communications/Ministry of Economy, Trade and Industry's 2018 Basic Survey on Information and Communications Industry multiplied by an estimated market share.
- \*5 Calculated based on an annual required working capital for Japanese companies with revenues of ¥500 million or less according to the Small and Medium Enterprise Agency of Japan's Report on Basic Survey on SMEs in 2016 multiplied by an estimated usage rate for accounts receivables financing services multiplied by a rate based on Money Forward Kessai's past fees received.

## **CSO Message**

Corporates, individuals, and financial institutions.
Creating a seamless flow of money that transcends boundaries.

Tatsuya Kanto
Executive Officer and CSO (Chief Strategy
Officer)
Money Forward Company CSO
Representative Director and CEO of
Klavis, Inc.

#### Domains Covering Both Individuals and Businesses

We first started providing services to individuals, and gradually expanded our scope to include corporates and financial institutions. We have extended our business to areas where there is strong demand that can be addressed under our vision of "becoming the financial platform for all" and where our technology and members' abilities can be leveraged. Currently, we serve over 12 million individual users, over 180,000 paying business customers, and 40 financial institutions, which means our customer base in each domain is one of the largest in Japan. We also have data connections with more than 2,590 financial services.

In addition, we aspire to become a financial platform that resolves users' true financial challenges. To this end, we need to understand and facilitate the entire financial flow. This cannot be achieved by considering only one type of customer segment. For example, eliminating business concerns regarding cash flow requires the capacity to offer timely financing through seamless data connections with financial institutions. We therefore believe that to realize our vision, it is necessary to develop strategies in view of each of the diverse players involved with money.

## Enhancing Value as a SaaS Platform for Back-Office Operations and Optimizing Go-to-Market Strategies

The Company provides cloud services that streamline back-office operations, represented by *Money Forward Cloud*. We started offering accounting software to SMEs from 2013, but now also provide products that raise efficiency in the areas of HR, legal affairs, and IT to companies in varying stages of growth. This is because we believe that back-office issues are not limited to accounting, and that convenience can be raised by offering a platform that incorporates many functions vast amounts of data. While we have developed products with speed, we also place value on integrating design, engineering, and technology. ( $\triangleright$  P.22 Technology  $\times$  Design)

Aside from developing quality products, it is also important to establish optimal go-to-market strategies. Since we started offering our services, we have emphasized partnerships with professional service firms across Japan and have built a network comprising 4,800 firms.

#### Continued Investments in Businesses with Significant Growth Potential and Creating Synergies among Domains

As our business coverage expands, synergies among our domains have become stronger. Since our domains share common core technologies (> P.16 Core Technologies), investment efficiency in R&D is extremely high, driving speed in product development and boosting our competitive edge.

In addition, broad awareness of our brand distinguishes us from other companies. Many businesses using *Money Forward Cloud* are dedicated users of *Money Forward ME*. In terms of hiring, brand awareness of *Money Forward ME* also attracts many talents who empathize with our mission, vision, values, and culture.

Furthermore, synergy is noticeable through the volume of customer crossovers and cross-selling among domains. For example, we offer *Money Forward Cloud Tax Return* to sole proprietors who use *Money Forward ME*, and also bolster online experience of financial institutions' services by providing *Money Forward ME* and its functions on an OEM-basis to those institutions.

Going forward, we aim to capitalize on customer touchpoints and data of our SaaS applications for back-office operations to reinforce financing services, including our accounts receivable financing service (Money Forward Early Payment) and Money Forward Pay for Business.

#### Disciplined M&A Strategies as Proven by Successful PMI

The Company has grown rapidly while welcoming peer companies and expanding its business coverage (TAM\*1) through M&As.

Klavis, Inc., which I founded, has concentrated its resources on product development after joining the Group and continues to grow rapidly with Money Forward's sales team that specializes in professional service firms engaged in cross-selling of *STREAMED*. More recently, we welcomed HiTTO Inc. to the Group in FY11/21 and plan to promote cross-selling of their internal AI chatbot to our medium-sized company users.

While companies operating in the same industry can be competitors, from a broader perspective, they are peers trying to solve the same challenges. Although we may compete at times, in more cases, collaboration can likely expedite problem solving. Klavis, Inc. served as the first model case, and I believe it is my responsibility to promote such partnerships further.

\*1 The total addressable market of the Company's business

## New Business/Product Development Capitalizing on Existing Assets

Moving forward, we believe that digitalization of operations and evolutions in fintech services will further facilitate the flow of transactions and data among corporates, individuals, and financial institutions. The Company will drive this change and consider how to provide services with unique value.

One such initiative is expansion into the area of financing. We are striving to shape a world where businesses can be managed more seamlessly based on a natural flow from the back office to procuring funds and other managerial resources. We also aim to provide individuals with optimal financing services according to their respective life stages by utilizing personal finance and asset data.

Ultimately, we envision offering services that refine the flow of money from corporates to individuals in the most accessible way, prompting those individuals to take financial actions.

## **Business Overview**

#### **Business Outline**

We deploy business catering to corporate and individual customers, and financial institutions. We offer wide-ranging services that build on our customer base, which is among Japan's largest in the field of  $SaaS \times Fintech$ .

## **Products**

We have released more than 40 services during the ten years since our founding.

## **Our Service 1**

# BUSINESS

We provide integrated management support by streamlining back-office operations such as accounting and finance, personnel labor and contracts for corporate users. We also provide other tools that help managers make decisions and support financing activities. Furthermore, we are proactively developing services that support SaaS marketing.

#### **Business**

## SaaS Applications for **Back-office Operations**

#### **Business forward.** Life forward.

Work can be more liberating and fun. Thus, it is necessary to eliminate unessential labor from complex daily tasks and radically change the quality of and time spent on work. We will revamp operations through digitalization and cloud to help create a society where each and every employee can express themselves with passion.

#### Ryo Shibuya Executive Officer, Money Forward Business Company VPoE (VP of Engineering)

#### Masanobu Takeda Director, Executive Officer, and Executive, Money Forward Money Forward Business Company COO (Chief Business Company CSO

## Kazuya Yamada Executive Officer,

#### Mission and Vision

#### Beyond Operational Efficiency and Convenience— Shaping the Future of Users

Money Forward Cloud is a SaaS application that connects various back-office data to streamline operations in accounting and finance, HR, and legal affairs. We view the back office as a foundation that empowers companies, and thus help turn it into a business strength.

In raising the efficiency of the back office, we embrace our service policy "cloud that touches your heart," and propose solutions that are just half a step away-rather than two or three (which hinders practical understanding)—with the aim of resolving issues in a way that empathizes with users.

Owing to the spread of cloud-based back-office tools, service providers now have access to business data previously restricted to users, creating an environment where vendors can provided further value by utilizing accumulated data. In addition to boosting back-office efficiency with our SaaS applications, we will add value by utilizing such data, for example, to improve companies' credit and support their financing.

#### **Business Opportunities**

#### Steady Cloud Adoption Owing to Reform toward Digitalization and Rapid Spread of Remote Work

According to a survey by Gartner, Inc.\* of the US, Japan is positioned as a "resistive country" that is more than seven years behind the U.S. in terms of adopting cloud. Thus, there is ample room for penetration of such services. In addition, the spread of COVID-19 has triggered proliferation of remote work and supportive governmental measures such as IT introduction subsidies, which in turn has led to steady cloud adoption and substantial expansion of the market.

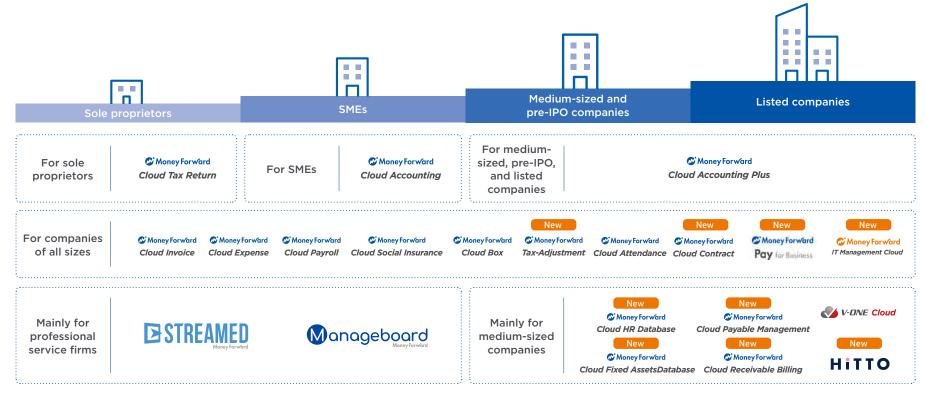

In its interim report DX Report 2, the Ministry of Economy, Trade and Industry warns that existing systems, which are dated and becoming increasingly complicated and obscure, will become barriers to digital transformation (DX). At the same time, the report urges companies to strategically deploy DX with the aim of transforming into digital companies by 2025.

This also underscores expectations that Japan as a whole will pivot toward cloud. Furthermore, the favorable business environment will most likely prevail owing to such factors as the expected rise in demand for replacing existing systems in response to upcoming law revisions, including that of the Electronic Book Preservation Act and introduction of the Invoice System in 2023. Against this backdrop, we anticipate pronounced growth as the leading provider of cloud-based ERP.

#### Services

## Delivering Products that Meet the Needs of Wide-Ranging Businesses, from Sole Proprietors to Medium-sized Companies

Our first cloud service offering was a tax return and accounting software product targeting sole proprietors and SMEs. We have since expanded our product lineup to support various areas, from accounting and finance, to HR, legal affairs, and IT, of companies in varying growth stages, from startup to post-IPO expansion phase. We have also started offering fintech services that help businesses manage their payments and credit situation, represented by *Money Forward Pay for Business*. We are thus delivering values aside from improving operational efficiency.

<sup>\* &</sup>quot;New" indicates products that were either released in FY11/21 or developed by a company that joined the Group in FY11/21 (as in the case of HiTTO)

<sup>\*</sup> Based on percentage and growth rate of cloud spending in 2022 (by country).

#### **Value Proposition**

## Unrivalled Efficiency and Convenience Leveraging Cloud and Data Connectivity

We capitalize on the features of cloud to raise efficiency in various operations. For example, in the area of accounting and finance, we automate data and journal entries by connecting with an array of services, including banks and credit card services, electronic money, and POS cash registers. In addition, AI suggests account titles based on big data. The more the service is used, the smarter it becomes, expediting automatic data and journal entries. In the area of HR, hiring and resignation procedures as well as attendance of employees can be managed on cloud. Also, by connecting attendance data to the payroll system, payroll calculations and salary payments can be completed via cloud.

Furthermore, multilple users can simultaneously operate the system, whether it be from their PC or smartphone. Unlike conventional packaged software, our services are quickly updated free of charge in response to law revisions or consumption tax changes, as well as for daily service improvements.

## Adding Value by Integrating SaaS Applications for Cloud and Data Connectivity Back-office Operations with Fintech

On top of being a tool for boosting workplace efficiency, *Money Forward Cloud* adds value by leveraging accumulated user data.

We released a new fintech service *Money Forward Business Card*, which uses data from *Money Forward Cloud*. The prepaid card is for business use and is issued by Money Forward. Since credit screening is unnecessary, the card can be issued and used immediately. Therefore, even companies in their early stages can make large payments for server fees and other expenses. We also plan to release a deferred payment function, which does not require pre-charging and provides a maximum monthly usage limit of several hundred million yen, calculated using a proprietary credit analysis model based on data of *Money Forward Cloud Accounting*.

## For Growing, Medium-sized, or Large Companies

## Growing and Medium-sized Companies Are Consumed with Manual Work

Growing and medium-sized companies tend to be consumed with manual work because their back-office structure cannot keep up with the growth of their business. Companies whose business remains unchanged may install a suitable system and continue to use it. However, more commonly, back-office workflows and systems must be upgraded in step with such shifts as launch of new businesses or organizational changes.

#### Constantly Evolving ERP for Companies Fearless of Change

We resolve issues in users' back-office operations by providing best practices, which advance with the times. While our services cover all corporate activities, including accounting and finance, HR, and legal affairs, they can also be implemented one at a time from areas where users face the most challenges, because they are divided into components. Thus, large enterprises can also easily adopt our services.

In August 2021, we released *Money Forward IT Management*, which solves issues in ID management of companies implementing an increasing number of SaaS. With this addition, our lineup has extended to include products targeting IT departments.

#### **Phased Implementation**

The larger a company becomes, the more resources it takes to upgrade a system or install a new one. With this in mind, we have adopted an architecture that allows partial or phased system implementation, for example, starting with only expense claims, or only payroll and attendance. We also offer seamless integration among modules and with third-party services. Our services can be implemented in a way that does not hinder existing operations, and can significantly raise operational productivity.

## Raising Brand Awareness in Accounting/Finance, HR, and Legal Affairs

In January 2022, we renewed the TV commercials that we had been broadcasting since October 2020 and created several versions to target different audiences. Through such marketing activities, we aim to gain service recognition not only in accounting but more broadly, including in the areas of HR and legal affairs. We are also distributing a variety of information and holding seminars in preparation for revisions to the Electronic Book Preservation Act and launch of the Invoice System. We are thus working toward boosting awareness as we approach the age of digital invoicing.

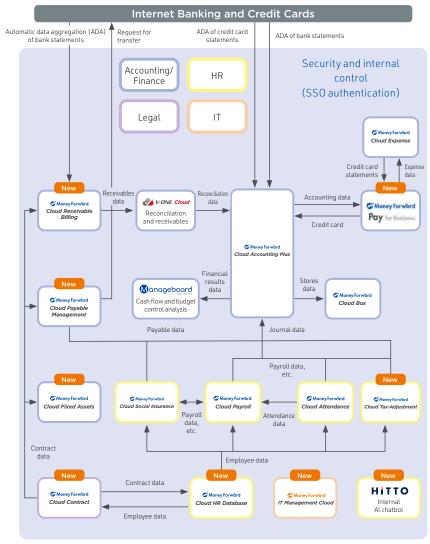

#### Solving Internal Communication Issues with AI Chatbot HiTTO

In December 2021, HiTTO Inc. joined the Group.

The company's product *HiTTO* is an internal chatbot used primarily in HR. It responds automatically 24/7 to employees' inquiries, previously handled by humans.

Back-office issues can extend beyond the back office. We therefore also address the challenges and inefficiencies of communications between back-office personnel and other employees.

#### Product Lineup that Covers Accounting/Finance, HR, Legal, and IT

<sup>\*&</sup>quot;New" indicates products that were either released in FY11/21 or developed by a company that joined the Group in FY11/21 (as in the case of HiTTO).

#### **Professional Service Firms and SMEs**

## Reinforcing an Environment Where Professional Service Firms Can Fully Exert Their Expertise to Support Companies

We have strengthened partnerships with professional service firms, who are vital partners in resolving SME's managerial issues in areas such as productivity and cash flow. Currently, our services are used by more than 19,000 certified members. 70% of Japan's top 100 professional service firms are using our service. \*

Not only is *Money Forward Cloud* a one-stop service that streamlines backoffice operations, but its products have been developed with an emphasis on usability for users working at professional service firms.

In addition to offering *Money Forward Cloud* as a service, we aim to be a partner who addresses and resolves various challenges of professional service firms.

## Supporting Professional Service Firms and SMEs through Swift, Flexible Responses to Law Revisions

#### Started Registrations for Qualified Invoice Issuer

Registrations for qualified invoice issuers commenced on October 1, 2021.

Many professional service firms and businesses must take action by October 2023, when the Invoice System comes into effect. In addition to distributing various information, we have released a service that enables easy registration to conform to the upcoming system.

#### Completely Accommodates the Revised Electronic Book Preservation Act

We rolled out *Money Forward Cloud Box*, which enables the storing of electronic transaction data free of charge, and updated functions for attaching evidence and tracking logs of journal entry edits and deletions in *Money Forward Cloud*, thus meeting all requirements for "preservation by electronic or magnetic records," "preservation by scanner," and "electronic trading" set forth in the revised Electronic Book Preservation Act. *Money Forward Cloud* users can now preserve electronic books safely while reducing paper consumption.

<sup>\*</sup> Calculated by Money Forward, Inc. based on Top 500 Professional Service Firms in 2019 by Monthly ProPartner.

## Automated Bookkeeping Frees Up Time for More Meaningful Work (STREAMED by Klavis)

STREAMED, which automates journal entries of such paper documents as receipts and passbooks, is currently used by 3,000 professional service firms. It helps create an environment where users can focus on more meaningful work.

## Visualizing Management with Accounting Data and Helping Clients Achieve Their Goals

(Manageboard by Knowledge Labo)

Targeting accounting firms that want to enhance clients' business management, we provide a budget control software product that can easily forecast profit and loss and cash flow by connecting with *Money Forward Cloud Accounting* and various other accounting software products.

Support from Streamlining to Enhancing Operations			
Data entry	Accounting processes	Budget control	
STREAMED	Money Forward Cloud Accounting	Manageboard	
Automates journal entries of paper data	Automates journal entries and visualizes cash flow	Visualizes budget control and forecasts future cash flow	

### **Sole Proprietors**

#### Connecting Money Forward ME Data with Tax Returns

Money Forward Cloud Tax Return integrates Money Forward ME data to automatically record journal entries. Those with a second job or business owners can create financial statements required for tax returns by simply extracting business expenses, miscellaneous income, and other relevant data from their household accounting book, and linking that to Money Forward Cloud Tax Return.

マネーフォワードクラウド会計・確定申告

#### スマホで始める、確定申告

スキマ時間にスマホで仕訳登録 あなたの会計業務をサポートします

#### Covers Additional Tax Return Forms to Support More Users

In Money Forward Cloud Tax Return, users can create the Separation Taxation Form and Case of Loss Form from December 2021. This enables more users to file tax returns on their smartphones, including those who booked not just business income but income related to stock transfers or losses.

#### **Business**

#### SaaS Marketing Platform

## Promoting DX in Companies by **Accelerating SaaS Adoption**

#### Mission and Vision

#### Small Company, Big Business

SMARTCAMP Co., Ltd., which joined the Money Forward Group in November 2019, believes that big businesses can be achieved regardless of the number of people or amount of goods or money. We want to prove that even a small team can make the world a better place and drive society forward. In keeping with this spirit, our offerings include SaaS comparison site BOXIL SaaS, inside sales outsourcing service BALES, online exhibition BOXIL EXPO, and SaaS digital agency service ADXL. Based on our mission to "eliminate inefficiencies in society with technology," we provide solutions and promote adoption of SaaS tailored to each company's challenge, thereby helping to raise operational efficiency and productivity, and drive business growth.

#### Satoshi Furuhashi

**Executive Officer** Chairman of the Board, SMARTCAMP Co., Ltd. Representative Director, Money Forward Venture Partners, Inc.

#### **Business Opportunities**

#### Dramatic Growth in Japanese SaaS Market

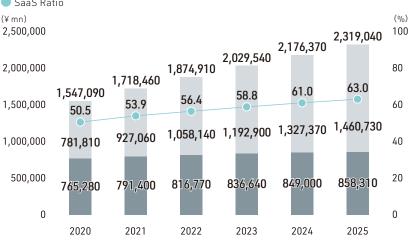

The Japanese SaaS market has maintained an average annual growth rate of some 13% and is projected to reach approximately 1,460.7 billion yen in 2025, doubling from 2020 levels. Moreover, SaaS implementations per company continue to climb as the SaaS market expands. In particular, Japan is seeing drastic growth in such implementations, with the market growing at an average annual rate of some 130% between 2018 and 2021.

#### Expansion of SaaS Market

SaaS Market

#### **Services**

Aiming to Be an Inclusive B2B Marketing Company by Offering Unique Services under the Mission "for SaaS"

#### **BOXIL SaaS**

An informative media for comparing and requesting materials of various cloud services for corporates. It offers exhaustive product information, including information on functions and pricing, as well as case studies, and enables users to create comparison charts of multiple SaaS. It also lists credible word-of-mouth reviews by those who led implementations, helping to prevent inefficient SaaS selections.

#### **BALES**

An outsourcing and consulting service for inside sales, which has been gaining attention as a new sales method for streamlining corporate sales in the new era of remote work. We offer end-to-end support, from planning strategies and

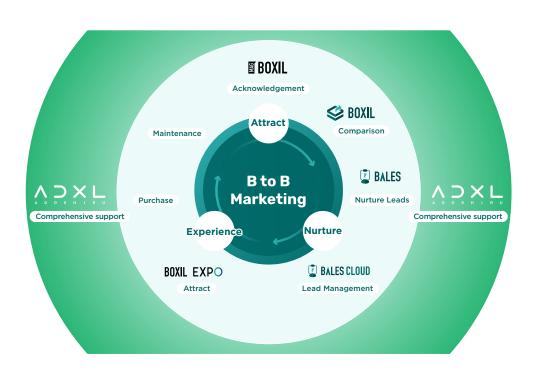

frameworks, to executing inside sales with our dedicated team. We also offer *BALES CLOUD*, a cloud service that manages and streamlines inside-sales operations, leveraging our know-how accumulated through *BALES*.

#### **BOXIL EXPO**

An online exhibition where participants can find the optimal SaaS and other services. We webcast seminars on raising operational efficiency, adopting remote work, and increasing sales, as well as lectures on the latest industry trends by influential leaders in various industries.

#### **ADXL**

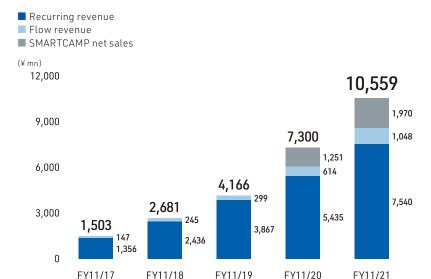

ADXL, Inc. was established in March 2021 as a subsidiary of SMARTCAMP Co., Ltd. With an underlying mission to "help businesses enrich the world," *ADXL* is a digital agency that supports SaaS companies' marketing activities through strategy planning, operation, and execution, as well as data analysis.

In FY11/21, net sales continued to grow rapidly, soaring by 45% YoY to reach 10,559 million yen. Growth was driven by recurring revenue of Money Forward Cloud and other SaaS applications for back-office operations, which came in at 7,541 million yen, up 39% YoY.

Net sales of SMARTCAMP Co., Ltd. rose steadily to 1,970 million yen, jumping by 58% YoY, fueled by active marketing investments by SaaS companies and successful launches of new services BOXIL EXPO and ADXL.

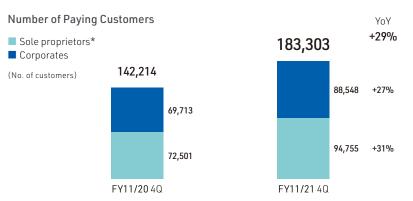

#### Net Sales of Business Domain

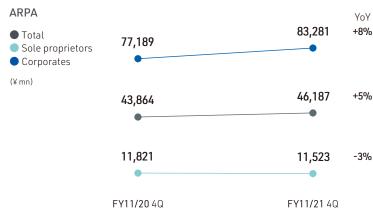

<sup>\*</sup> Recurring revenue is revenue from service fees including for Money Forward Certified Membership, STREAMED, Manageboard, V-ONE Cloud, and Money Forward Certified Member System.

#### **Trends in KPIs**

On the back of accelerated customer acquisition, the number of paying customers saw a 1.7-fold increase over the previous year, reaching 183,000 (of which some 88,000 were corporates) as of November 30, 2021. In services for sole proprietors and SMEs, ARPA is following a downward trajectory due to the increase in ratio of annual user subscriptions. However, the proportion of medium-sized companies, which pay a higher unit price, to total corporate ARR increased steadily to 27.2% (+7.4 ppts YoY), with total ARPA and corporate ARPA increasing firmly by 5% YoY and 8% YoY, respectively.

\* The number of paying customers who are sole proprietors is the number of sole proprietors who pay for Money Forward Cloud services catering to individuals. The number of corporate paying customers includes business corporations, and professional services firms and their clients that pay for services catering to corporates, including Money Forward Cloud, STREAMED, Manageboard, and V-ONE Cloud, as well as professional service firms that pay for Money Forward Cloud Certified Member System. SMARTCAMP Co., Ltd. is not included.

<sup>\*</sup> ARPA: 12 times the monthly recurring revenue (ARR) of Business domain in the last month of each term.

#### Mission and Vision

## Creating a Society Free of Financial Concerns, and Moving Forward to a Future Where Everyone Can Live True to Themselves

#### **Business Opportunities**

#### Services Tailored to Life Events of Users

Money Forward, Inc. was established with a desire to improve people's access to accurate information or solutions regarding finance. While anyone can encounter financial challenges, details will vary depending on age and financial situation. In a survey targeting *Money Forward ME* users, over 60% of those in their early 20s responded that they are concerned about living expenses, outstripping all other categories. Respondents in their late 20s to early 30s were more likely to be anxious about funds for life events, such as children's education or buying a home, in addition to daily funds. People from their late 30s on were worried about retirement and pensions, with over 70% of those aged 35-65 holding doubts about post-retirement wealth accumulation. However, a common characteristic

Tomohiko Kimura

Money Forward Home Company COO

of financial concerns among all generations is the difficulty in grasping one's financial status because relevant data is scattered. The first service to tackle this was *Money Forward ME*, which now ranks No.1\*1 in this field in terms of number of users.

However, our fundamental aspiration is to address the true financial challenges. For many users, financial solutions are out of reach. Such solutions are regarded as difficult or intimidating, and information and tools that ought to be accessible to more people are not. To address this true challenge, we are committed to developing services that conform to our corporate value of User Focus and helping users resolve their challenges.

First, we collaborate with partner companies to provide users with options for improving their personal finance. We started off by proposing solutions related to life insurance, which accounts for a large portion of users' spending, and to switching electric companies, which has little impact on quality of life. Going forward, we intend to deliver services that support wealth formation, targeting users who have successfully improved their personal finances. We also believe we can propose solutions that are intuitive, manageable, and optimal for each and every user by combining data analysis algorithms with sophisticated UI and UX. We will continue to expand our solutions and build systems that make proposals based on data and AI. We will thereby eliminate financial concerns in a feasible way through *Money Forward ME* while empathizing with our users.

#### **Our Business and Value Proposition**

#### Visualizing Users' Financial Situation with Money Forward ME

Money Forward ME is a service that uses aggregation technology to consolidate information on personal finances and assets, which was previously scattered, and to visualize the flow of money. Users can link various accounts, including credit card accounts, bank accounts, and e-commerce accounts. The service helps people manage not only daily flow of money but also assets, by connecting with securities accounts. Thus, users can easily check the latest status of their personal finances.

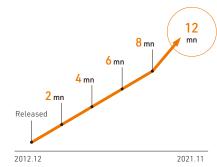

Money Forward ME currently links with over 2,590 services, the most among any PFM (personal financial management) service\*1, enabling us to cover users' specific needs. API connections are also smooth owing to our tight network with

financial institutions. Through these efforts, Money Forward ME is now being used

by many users, holding the top share and highest brand recognition among PFM apps,\*2 with the number of users topping 12 million, and the number of premium paying users topping 360,000.

- \*1 As of April 30, 2021. (Based on research by Money Forward, Inc.)
- \*2 Based on an internet survey by Macromill on Personal financial management (PFM) app that one currently uses. Respondents consist of 1,034 PFM app users in their 20s to 60s. Survey period: November 18-19,

Aside from Money Forward ME, which visualizes personal finances, we are encouraging users to take actions that resolve and alleviate financial issues. Specifically, we offer opportunities for raising awareness and learning through MONEY PLUS, Money Forward Week, and consulting services by financial planners, targeting areas such as funds for daily living, life events including marriage, childbirth, home purchase, and retirement.

#### **Increasing Value Proposition**

#### ъ

#### Promoting Business Alliances to Resolve Users' True Challenges

#### Money Forward Financial Planning Service offering free consultation by financial planners (FP). By partnering with multiple financial planning companies, we have Broad-minded Co., Ltd. built a structure for offering high-quality consultations across HOKEN-ALL Co., Ltd Japan. Consultations are carried out efficiently by sharing personal FP Partner Inc. finance data of Money Forward ME with FPs. Since our partners Financial Standard Co., Broad-minded Co., Ltd. and Financial Standard Co., Ltd. have Ltd. independent financial advisors (IFAs), or asset management experts, users can also inquire about purchasing or investing in specific financial products. Money Forward Fixed Cost Review (Electricity Service) Those who switch electric companies on Money Forward ME can use electricity for 3% less than the rate of plans for consumers of general SymEnergy Inc. electric utilities (e.g., Tokyo Electric Power Company Holdings, Inc. or The Kansai Electric Power Company, Incorporated) and can also use Money Forward ME premium services for free during the electricity contract period. Money Forward Fixed Cost Review (Life Insurance Service) Provides diagnostic tools for reviewing insurance, while also LIFFNET INSURANCE suggesting life insurance products of the Company's brand. We plan COMPANY to develop a comprehensive system that enables users to review SBI IKIIKI SSI Inc. their insurance and apply for life insurance online. We plan to provide new customer experiences in the areas of PFM and insurance. Promoting Business Alliance in the Real Estate Field We collaborate with TSUKURUBA Inc. which provides cowcamo, a TUKURUBA Inc. distribution platform for existing and refurbished homes, to create new services that visualize the value of real estate assets and optimize users' lifestyles grounded in those assets. Promoting Capital and Business Alliance in the Asset Management Field Users can connect SUSTEN, a fully automated asset management Susten Capital service, with Money Forward ME. In addition to promoting SUSTEN Management Inc. among Money Forward ME users, we are jointly developing a function that automatically proposes the optimal asset management method for each individual based on personal finance and asset data retained by Money Forward, Inc.

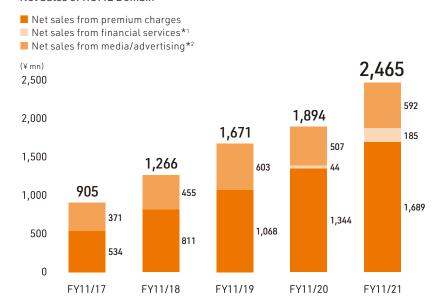

#### **Business Highlights**

FY11/21 net sales stood at 2,465 million yen. Revenue from premium paying users of *Money Forward ME*, which is recurring revenue, increased by 26% YoY to 1,689 million yen. Net sales from media/advertising climbed steadily as the number of users rose, growing by 17% YoY to 592 million yen.

Net sales from financial services released during the previous fiscal year, represented by *Money Forward Financial Planning* and *Money Forward Fixed Cost Review*, soared by 324% to 185 million yen, becoming the new pillar for growth.

Net sales from media/advertising sales increased steadily by 13% from the previous year due to steady progress in bringing events online, etc., in the spread of the COVID-19.

#### Net Sales of HOME Domain

<sup>\*1</sup> Net sales from financial services include revenues from *Money Forward Financial Planning, Money Forward Fixed Cost Review,* and other PFM services.

<sup>\*2</sup> Net sales from media/advertising include advertising sales from MONEY PLUS, a practical economic media, and sponsorships and ticket sales of events (Money EXPO).

## **Our Services 3**

Money Forward X takes on the various issues of clients and combines Money Forward's technology and design capabilities to create new services that deliver convenience. We are totally adaptable, enabling us to support the resolution of an array of issues.

#### Promoting DX of Financial Institutions and Their End Users

Our Business and Value Proposition

For individual customers of financial institutions, we offer Money Forward for XX Bank, an automated personal finance and asset management service, as well as Household Accounting Book Unit and Asset Management Unit, functions that can be added on to the apps of financial institutions. We also provide Passbook App, which

tailored to the needs of each client, with a view to addressing the true needs and

challenges of financial institutions as well as their individual and corporate customers.

members-only portal site for corporates and sole proprietors, and Business Financial Management (or BFM), a fund management service that centralizes management of deposit information.

Currently, a total of 44 financial institutions\* utilize our services catering to individuals and corporates.

\* As of January 31, 2022.

#### Promoting Development of Services Tailored to the Various **Needs of Financial Institutions and Companies**

Based on our aggregation technology, which obtains account balance and other data by linking with financial services, we provide consulting and solutions for design, UX, data analytics, and marketing and promotion.

Jointly developed a PFM app that links with NTT DOCOMO's services, such as d POINTs, and account data of financial institutions.

#### Mission and Vision

## **Create New Experiences in Financial** Service and Bring Forth Prosperity

Money Forward X addresses the various challenges of our clients; in this case financial institutions. With our clients, we create services that deliver new benefits and efficiency by combining our accumulated strengths in design and technology. As a partner in co-creation, we aim to build an open and fair financial platform, which constantly and flexibly evolves.

#### **Business Opportunities**

#### **Expanding Partnerships with Financial Institutions**

On our own, we can neither build the open and fair financial platform that we envision, nor create new financial experiences that resolve financial issues of each and every individual. It has therefore been essential for us to collaborate with financial institutions and various other partners. Initially, we only provided Money Forward ME, a personal finance and asset management service for individuals, and Money Forward Cloud, a SaaS application for corporate back-office operations. We now promote product enhancements and customized service developments and implementations

digitizes paper passbooks.

For corporate customers of financial institutions, we offer Corporate Portal, a

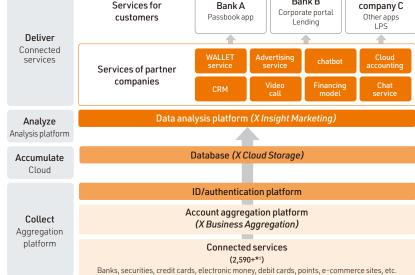

#### Operating an Open Platform for Financial Institutions

Under the new normal stemming from the spread of COVID-19, users' needs are rapidly diversifying while shifting toward the digital and online world. Financial institutions, which play a central role in the financial and economic system, are also pressed to transform their business models through digitalization; in other words, to achieve financial DX. On the one hand, there are individuals who enjoy more convenience and companies that have grown markedly by leveraging digital technology. On the other, many SMEs have not gained the full benefits of IT and continue to have relatively low productivity. The Small and Medium Enterprise Agency has also indicated in its 2021 White Paper on Small and Medium Enterprises in Japan that labor productivity of SMEs is some 50% of that of large enterprises, with the gap continuing to grow.

In partnership with financial institutions, *Money Forward X* provides user-friendly and innovative services to their individual and corporate customers, thereby boosting the operability of individuals and the productivity of corporates. We will continue to operate an open platform so that financial institutions can deliver added value to their customers.

#### **Expanding Services on Open Fintech Platform**

<sup>\*1</sup> As of December 31, 2021

We launched Money Forward Fintech Platform targeting financial institutions in 2021. The platform aims to enhance services for customers of partner financial institutions and further support their DX.

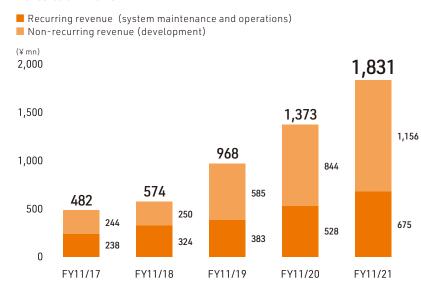

It is a common infrastructure that accumulates and analyzes data from financial services, and connects that data with services provided by fintech and other partner companies. Financial institutions can use this platform to swiftly deliver services that match their strategies or needs.

We have expanded our service lineup to include data X Insight, a data analytics platform for corporates, and XIM-BI, which offers business intelligence functions. We plan to bolster our service lineup further during the current fiscal year.

#### **Business Highlights**

FY11/21 net sales totaled 1,831 million yen, increasing by 33% YoY. We continued to offer our services to 40 financial institutions (as of November 30, 2021), and recurring revenue climbed steadily, up 28% YoY.

Businesses want to focus on growth without worrying about finance. We want to focus on energetic companies in addressing this desire. We support managers and accelerate corporate growth with services that drive fast, efficient financing activities. We support accelerated corporate growth.

#### **Finance**

#### Mission and Vision

#### Resolving Companies' Financial Issues and Jointly Moving Their Business Forward

#### Money Forward Kessai/Biz Forward

The widespread use of the internet has enabled us to make transactions with far more counterparts at a lower cost and faster speed. Yet, no improvement can be seen in the cost or speed of back-office operations, such as credit screening, invoicing and collection, or management of operating cash flow, which are all essential to credit sales. We believe that this impedes the efficiency of business transactions and makes it difficult for companies to focus on their core business.

To resolve this issue, we established Money Forward Kessai, Inc. and are striving to streamline not only back-office operations of companies and sole proprietors, but also their flow of funds.

## Naomichi Tomiyama Executive Officer. Money Forward, Inc. Representative Director, Money Forward Kessai, Inc. Representative Director and President of Bix Forward, Inc.

#### Established Biz Forward, Inc., a Joint Venture with MUFG Bankj, Ltd., to Help More Companies Continue to Challenge

Currently, credit information of SMEs, which account for 99.7% of all companies in Japan, is neither sufficiently maintained nor utilized. Companies and financial institutions also face many problems in credit and payment operations. Many companies seem to be hesitant to take on new business opportunities for scores of reasons, such as concerns about debt collections, operational burden, or inability to raise funds when necessary.

To resolve this issue, Money Forward, Inc. (51%) and MUFG Bank, Ltd. (49%) established Biz Forward, Inc. as a joint venture.

Fueled by Money Forward's development and technical capabilities, and MUFG Bank's brand and network, we are committed to providing a wide range of companies with data-driven services that transcend the bounds of conventional financial services. We thus aim to propel all companies toward their challenges and contribute to bolstering Japan's economy.

#### **Business Opportunities**

## Approaching SMEs Whose Financing Needs Cannot Be Met by Short-term Loans

The annual transaction volume of bill receivables and accounts receivable by SMEs in Japan is some 70 trillion yen. This can be considered the TAM for business process outsourcing (BPO) for invoicing with promising growth opportunity. Meanwhile, the amount transacted through B2B deferred payment services still only accounts for some 100 billion yen, leaving room for such services to become more widely known by collaborating with major financial institutions.

In addition, many SMEs cannot procure enough funds through short-term loans from financial institutions, with the shortage in funds estimated to reach 25 trillion yen on a recurring basis, which translates to TAM for the financing business. Conventional methods of credit screening require extensive operating costs, and moreover, setting a high credit line is difficult for companies lacking a proven track record. Against this backdrop, we believe there is great demand for financing services.

#### Services

#### Money Forward Kessai and SEIKYU+

Money Forward Kessai and SEIKYU+ are services that help maintain steady cash flow, essential for business growth. We provide BPO for the entire invoicing process, including credit screening, issuance and delivery of invoices, collection, and follow-up for outstanding payments. We also guarantee\* accounts receivable to eliminate concerns that come with credit sales. Accounts receivable can be collected within three business days at the earliest.

Through our services, we offer BPO for the processes necessary in B2B billing with the aim of advancing clients' businesses.

Processes Subject to BPO by Money Forward Kessai and SEIKYU+

Collection

Credit screening

Confirmation of

payment

#### Money Forward Early Payment and SHIKIN+

Issuance and

delivery of invoice

Money Forward Early Payment and SHIKIN+ are services that enable early financing of purchase orders and invoices. We offer B2B factoring, which allows a company to receive an amount less a specific fee by selling the company's own accounts receivable. The company need not notify the other party or register for credit transfer, enabling them to easily and quickly secure funds without affecting their future business.

#### **Growth Strategy**

## Speedy Service Delivery through Enhanced Credit Screening Model

We are expanding the scope of automatic screening through continuous updates to our transaction screening model. We are thus able to notify customers of screening results within a few seconds at the earliest, or one business day at the latest.

#### **Expanding Target Customer Base**

Our primary customer base has been startups and SMEs, but we also plan to strengthen the large enterprise domain. We will develop and provide functions that are essential for large enterprises to deploy *Money Forward Kessai* services. This includes authorization, IP address restrictions, and system enhancements for processing large volumes of transactions. Also, since large enterprises tend to have low default risk, we will expand our product lineup, including services that specialize in BPO for invoicing without the transfer of claims, and services for guaranteed accounts receivable.

## Collaboration with and Provision of OEM to Financial Institutions and Large Corporations

We will continue to increase partnerships with financial institutions that have ties with customer bases to which the Money Forward Group does not have access (e.g., regional companies and leading enterprises), as well as with major business corporations. In addition to commission agreements and business matching agreements, we conduct OEM of *Money Forward Kessai*, *SEIKYU+*, *Money Forward Early Payment*, and *SHIKIN+*, and thereby deliver payment services that leverage the brands of our partners.

Furthermore, our partners are the main service provider, with Money Forward Kessai, inc., working in the background and providing systems and accounts receivable guarantees. We thus realize services that combine the credibility of financial institutions with the technology of Money Forward Kessai, Inc. and Biz Forward, Inc.

<sup>\*</sup> Only when prescribed conditions are met.

#### 6

#### Money Forward Synca Synchronizing with the Vision of Evolving with Companies' Management

We aspire to provide high-quality financial advisory services—previously only available to large enterprises—more broadly, targeting growing companies and their management. Under this vision, we offer advice centered on financial and capital policies. Building on the latent needs that we identify, we hope to bring forth new financial solutions to society while collaborating with financial institutions and member companies of the Money Forward Group.

From our clients' seed stage to IPO, we provide truly meaningful support backed by practical experience.

#### Financial Advisory Service

Ranges from support for developing financial strategies and capital policies to support for financing and creating equity stories in preparation for IPO.

## Growing Companies Managerial Support Service

Managerial support from external CFO, and support for establishing management structure and internal controls in preparation for IPO.

#### Career Support Services

Support for developing hiring strategies and for hiring procedures.

## HIRAC FUND Opening Doors to New Possibilities with Entrepreneurs

HIRAC FUND was launched with a vision of jointly resolving the various issues that clients face in their early stage through the sharing of the know-how of entrepreneurs who are at the forefront of business management.

We primarily invest in domestic and overseas non-listed companies that are engaged in internet or technology businesses at their seed or series A stage. We will leverage entrepreneur communities and the Group's network—where investees can meet, learn from, and grow with peer entrepreneurs—and together carve out a new future with entrepreneurs.

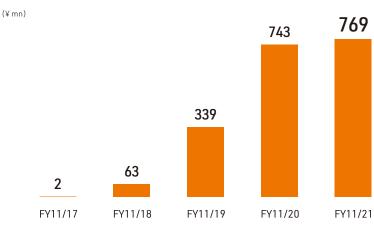

#### **Business Highlights**

FY11/21 net sales to talled 769 million yen, increasing by 3% YoY.

Growth was significant in the second quarter on the back of increased demand for factoring, fueled by the spread of COVID-19.

Meanwhile, we are strengthening credit management to adequately understand the impact of the pandemic on financial conditions of businesses.

#### **Net Sales of Finance Domain**

#### **Group Joins**

#### Money Forward's M&As (Group Joins)

To realize our mission and vision, we actively drive dynamic growth through M&As, minority investments, and business alliances. Since listing on TSE Mothers in 2017, we have been joined by five excellent companies and have also been making minority investments in over 20 growing companies both in Japan and abroad. We believe that by joining forces, growing companies like our own can mutually raise corporate value and expand business more speedily.

We have set three focal areas in our M&A strategy. First is M&As for increasing our product lineup of SaaS applications for back-office operations in Business domain, which holds the top sales ratio in the Group. Four of our past M&As were executed under this strategy, including that of HiTTO Inc., provider of an internal AI chatbot specializing in HR, which joined in December 2021. Second is M&As aimed at expanding TAM by broadening business coverage, as in the case of SMARTCAMP Co., Ltd., which became part of the Group in 2020. Third is M&As and investments designed to extend TAM geographically, primarily in Southeast Asia. In FY11/21, we made minority investments to startups in Vietnam and Thailand and also acquired additional shares of our strategic partner Mekari, based in Indonesia.\*

#### M&As Focused on Talent and Culture

M&A is an important event for both the acquired company and the company that acquires it, with various risks involved. We believe that to achieve successful M&As, it is critical to have a disciplined investment policy, or more specifically, to acquire companies at a reasonable valuation. Since attractive growing companies have many potential buyers, the approach we take in establishing a deal at a reasonable valuation becomes important. We believe talent and culture to be key. We believe that for companies to continue growing after joining the Group, it is vital that their leader and other key members remain on board. We therefore focus on not only setting quantitative incentives but creating an environment that offers new growth opportunities and challenges to every Group company and individual. Several executive members who joined us through M&As are now engaged in Group-wide management in addition to maximizing growth and synergy of their respective companies.

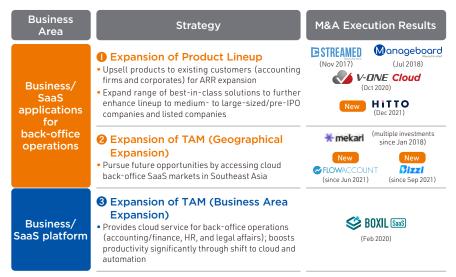

It is paramount that we instill a culture that welcomes Group companies at the management level as well as among all employees of the Group. This lays the foundation for successful post-merger integrations. For example, immediately after the joining of HiTTO Inc. was announced in 2021, CEO Yosuke Tsuji held a meeting with HiTTO's employees. Since then, we have held internal sessions and social events to introduce HiTTO Inc. to different areas of the Group. Also, both co-CEOs attended Money Forward's management-level boot camp. Aside from onboarding events for new companies, we hold regular morning meetings and assemblies attended by all Group employees and exchange personnel including through mutual secondments. To eliminate any disconnect in information or

personnel exchanges among Group companies, and to emphasize that we are partners working toward the same mission, we refrain from using the term "acquisitions" and refer to M&As as "Group joins."

As a result, all companies that joined the Group thus far have been growing at an accelerated pace.

Yumiko Nagao Head of Corporate Development

<sup>\*</sup> Mekari, FlowAccount and Bizzi are of minority investments.

Nov.

2017

Jul.

2018

Nov.

2019

Aug. 2020

Dec.

2021

Established in 2012.

Provides STREAMED, which converts paper documents such as receipts into digital accounting data within one business day in principle, simply by scanning them. Customers are mainly accounting firms.

Money Forward Cloud excels in automating journal entries from digital data, while STREAMED excels in the same from paper documents, complementing value proposition. User acquisition, previously a challenge for us, has also accelerated by capitalizing on Money Forward's strong sales network consisting of accounting firms. The cumulative number of users has topped 3,000 firms owing to synergies on both the product and sales front.

Tatsuya Kanto Representative Director and CEO Klavis, Inc.

#### Knowledge Labo, Inc.

Established in 2013 by certified public accountants and tax accountants.

Provides cloud-based budget control software *Manageboard*, which visualizes finances by collecting, analyzing, and projecting managerial data, as well as business administration consulting.

We cross-sell *Manageboard*, released in 2018, to professional service firms that use *Money Forward Cloud* and medium-sized companies that use *Money Forward Cloud ERP*. In our consulting service, we collaborate with Money Forward, Inc. and other Group companies to support growing companies according to their life cycle, from DX in back-office operations to turning around businesses.

Hidetsugu Kunimi Representative Director and CEO Knowledge Labo, Inc.

#### SMARTCAMP Co., Ltd.

Established in 2014.

Supports sales and marketing mainly through SaaS comparison site BOXIL SaaS.

The pandemic has driven operational digitalization and DX of companies, raising demand for cloud services. Thus, *BOXIL SaaS* and *ADXL* are growing steadily. Online exhibition *BOXIL EXPO* has become Japan's largest exhibition for SaaS providers, while *BALES* is expanding with new locations in Hokkaido and Fukuoka and contributing to regional revitalization. We collaborate with Money Forward by combining our strengths to deploy back-office support and are also actively exchanging personnel by seconding members in various ranks, from managers to general staff.

Satoshi Furuhashi Representative Director and Chairperson SMARTCAMP Co., Ltd.

#### R&AC Co., Ltd.

Established in 2004.

Provides *V-ONE Cloud* and *Victory-ONE/G4*, cloud services for payment reconciliation and receivables management. Has the largest user base\*1 among such software in Japan. Clients include many major domestic companies.

On the sales front, we drive customer crossovers mainly of medium- to large-sized companies. On the product front, we are co-developing *V-ONE Cloud* and *Money Forward Cloud ERP's* receivable billing function. Also, with Money Forward Lab, we are drastically streamlining reconciliations with an enhanced Al function for matching statements.

Tomoyasu Takayama Representative Director R&AC Co., Ltd.

#### HiTTO Inc.

Established in December 2021.

Provides HiTTO, which holds the top share in Japan\*2 for internal AI chatbots and is widely used by medium- to large-sized companies. Specializes in HR (e.g., attendance management, tax adjustment, expense claims, welfare) and boosts efficiency in handling internal inquiries.

After joining the Group, we have been collaborating on the sales front, including crossover of customers, consisting mainly of medium-sized companies and large enterprises.

Tomohiro Igarashi Representative Director and Co-CEO HiTTO Inc. Akito Kimura
Representative Director
and Co-CEO HiTTO Inc.

<sup>\*1</sup> Was No.1 among cloud-based payment reconciliation services in terms of number of corporate users, according to a survey by Shopper's Eye Inc. issued on July 22, 2020.

<sup>\*2</sup> According to research by Techno Systems Research Co., Ltd. (May 2019)

#### **Driving Services Forward through Teamwork**

#### **Business**

## Marketing Department, SMB Division, Money Forward Business Company

With an aim to promote *Money Forward Cloud* among SMEs, we engage in marketing initiatives, such as advertising management and campaign planning, and in customer success, including support for users' onboarding and product enhancements. Under our overarching mission of "accelerating business growth," we are making every effort to help drive users' businesses forward by positioning the back office, often considered a burden, as the foundation of business.

#### **Design Strategy Office**

#### **BX Design Group**

The Design Strategy Office is a team centered around the CDO and managers of each design department. We are committed to strengthening the Group's design teams, enhancing product design quality, and promoting branding strategies from a cross-sectional and medium- to long-term perspective. In particular, the BX Design Group is dedicated to corporate branding, and deploys branding initiatives in all dimensions, both internally and externally, through reinforced collaborations with public relations, recruiting, corporate planning, and other departments.

#### **Money Forward Home Company**

#### **User Support Department**

We respond via email to inquiries about the services offered by Money Forward Home Company and X Company and also manage the user support website. Since we receive feature requests in addition to questions about operations and usage, each one of us readily communicates with the relevant team to prompt the release of the requested features. The team puts user focus into practice by demonstrating teamwork as well as by providing dedicated day-to-day user support.

#### HiTTO Inc.

#### **Customer Success Team**

Our team is dedicated to providing users with end-to-end support, from product implementation and usage to dialogue analyses and contract updates. We feel encouraged and are filled with joy when users nurture and treat our chatbot HiTTO with affection as their co-worker. We will continue our efforts in streamlining administrative divisions as well as in cultivating employee-friendly work environments by creating new internal dialogue initiated by HiTTO.

## **Moving Society Forward with Soccer Clubs**

In 2020, we signed a lead partner agreement with Yokohama F.Marinos and partner agreements with Avispa Fukuoka and Hokkaido Consadole Sapporo of the Japan Professional Football League. This was because we wished to support a society where people can take on challenges, drive society forward, and contribute to the world of sports, which is under pressure amid the pandemic. In 2021, we sponsored Money Forward Day at Yokohama F. Marinos' home game.

The event was organized under the concept of "moving forward with all members of the Marinos family," with co-creation by all fans and supporters as the overriding theme. We also promoted regional DX with sports acting as the hub. For example, with AVISPA FUKUOKA, we held a seminar aimed at promoting DX in the Kyushu region as an official DX partner. Meanwhile, we introduced four Money Forward Cloud products to Consadole Hokkaido Sports Club, established by Hokkaido Consadole Sapporo. Money Forward Cloud has been implemented by 18 clubs so far.\* We thereby continue to push forward the world of sports as well as society at large.

## Governance

A stable financial base and robust corporate governance are both key components of the foundation underpinning the Money Forward Group. We balance offense and defense in building an organization that empowers all Group businesses to move forward.

#### **Discussion**

### Interview with External Director

Director and Executive Office Money Forward Business Company COO Akira Kurabayashi

## Aiming to meet the global standards of SaaS corporate management

We will further accelerate our growth by refining our products, improving their intrinsic value to users, and creating an organization capable of executing M&A and PMI.

#### (Profile of Akira Kurabayashi)

After engaging in venture capital businesses targeting Japan and the U.S. at Fujitsu Limited and Mitsui & Co., Ltd., oversaw investments in Japan at Globespan Capital Partners and Salesforce Ventures. Joined Draper Nexus Partners (now DNX Ventures) and was appointed Managing Director in March 2015 and Managing Partner and Head of Japan in December 2020. Holds an MBA from the Wharton School of University of Pennsylvania and a bachelor and Ph.D. degree from Doshisha University.

# **Evolution since the Pioneering Days of SaaS**

Takeda

Mr. Kurabayashi, you've served as an external director since 2018. How do you view the discussions held at the Board of Directors meetings?

Kurabayashi Ever since I was appointed director, Mr. Tsuji and other members have consistently taken the stance of making the most of external directors' inputs. Experts in each field offer excellent insights, to which the management members respond adeptly. I exchange opinions on SaaS with Mr. Takeda, while Mr. Tanaka and Mr. Kurumatani comment on corporate finance, and Ms. Okajima and Ms. Ueda on ESG and talents, striking an ideal balance. Serious discussions and perceptive comments can be observed at every meeting, so I have much to learn. I also look forward to the addition of new perspectives from Mr. Yasutake and Mr. Miyazawa, who were newly appointed.

Takeda

You used to be an angel investor of the Company. How did you become an external director? Also, did you anticipate SaaS would become such a sweeping trend?

Kurabayashi Since Mr. Tsuji and I studied abroad at the same university, he consulted me about starting up a business, which prompted me to become an angel investor. At that time, the startup was dedicated to what is now the Money Forward ME business. We later spoke again when the Company was launching SaaS for the back office. I had been considering building my expertise in the field of SaaS at an early stage, leaning on my work experience. Yet, it was still hard to find a promising SaaS investee in Japan back then (2013). So when Mr. Tsuji told me he wanted to take on back-office SaaS, I was taken aback, to be honest, and didn't think it would be easy. But I can clearly remember Mr. Tsuji exclaiming, "We can definitely create a great service with our account aggregation technology," at a cafe in Ebisu. I became an external director when the Company went public in 2018.

Takeda

So it seems SaaS wasn't yet mainstream back then. I started working with Klavis, Inc. around 2015, and feel that the environment and quality of talents involved have changed drastically since then. But I suppose Japan still lags far behind the U.S. and other countries that are taking the global lead in SaaS.

Kurabayashi Yes, although the gap seems to have narrowed considerably, the U.S. is probably three to four years ahead of us. I felt that the quality of management members involved in Japanese SaaS companies rose notably from around 2018. IPOs by Money Forward, Inc. and other leading companies, such as freee K.K., and Sansan, Inc., opened the door to usher in a host of SaaS in various fields. Previously, career paths were far too uniform in Japan. But I believe an ecosystem was finally established where joining a startup is a common option among young and skilled talents.

# **Growth Strategy as a SaaS Company**

Takeda

From your perspective, what is the Company's managerial challenges as a SaaS provider?

Kurabayashi Till a few years ago, I felt that the low average revenue per account (ARPA) was an issue. Unless the Company provides products whose unit price can be raised, it is difficult to achieve the growth expected of a SaaS company, creating a deadlock where shareholders' expectations are not met. Needless to say, it is important to refine products so that they deliver economic value worth their unit price, rather than forcibly marking up the price. As director, I have repeatedly pointed this out at discussions and closely monitored developments. Investing in products can lead to enhanced economic value, which in turn boosts pricing within a reasonable range and contributes to better ARPA. I believe that

such efforts have served to facilitate strategies targeting medium-sized companies and that we are moving in the right direction.

SaaS companies, valued for their growth, tend to face a dilemma where they push their marketing too far ahead of actual product development and fail to deliver true benefits to users. Over the past few years, the Company has aptly balanced investments in both the product and marketing fronts to fuel growth; I think it's wonderful that such efforts are bearing fruit.

Another point to note is the favorable progress of M&As.

Takeda

I'm eager to hear about your thoughts on M&As. Do renowned U.S. SaaS companies, for example, tend to respect the business style of acquired firms or impose their own style on such firms?

Kurabayashi I believe it is a mix of both. Companies definitely gauge whether the acquired firm's management can blend in from a cultural perspective and become an active leader. At the same time, they disseminate their own know-how for achieving success. The idea is to expand by merging the best of both companies. Since optimal personnel placement is obviously important, I believe capitalizing on the skills of members of the acquired company, regardless of age or gender, is the right thing to do.

Takeda

As the COO of Business domain, I also believe M&A is an effective and meaningful strategy from the perspective of future growth. However, even in cases where an M&A is rational in economic terms, I believe that members on the front line must understand its significance and potential and be prepared to sincerely commit themselves. Yet, I am torn between whether to delay/drop an ideal M&A or not when this criteria isn't met.

**Kurabayashi** I think that is a rightful concern. Without experience in running a startup, one would likely make a judgement based solely on economic rationality at the time of acquisition, but as a leader, it is vital to consider how to manage the organization to deliver value after the M&A. It's great that the Company is taking a disciplined approach. In other countries, the relevant division leads and sponsors M&A deals, but such countries also have a vast pool of talents, enabling them to set up a team of experts with extensive background in M&As and post-merger integrations (PMIs). In Japan, this is still hard to achieve.

Takeda

We would need ample human resources, so it isn't easy.

I believe M&A is an effective and meaningful strategy from the perspective of future growth.

My wish is for Money Forward to lead the Japanese startup industry.

Kurabayashi My wish is for the Company to lead the Japanese startup industry. I believe that for Japan's startup domain to advance, companies managed according to global standards while embracing a corporate purpose need to achieve full-fledged growth rather than being confined to mediocre advances.

> To this end, I feel that the role of corporate development in implementing M&As for accelerated growth and driving successful PMIs will become increasingly important. It is also essential to create an environment where members of acquired companies can play an active role. Mr.Takeda, yourself is a great example. This kind of personnel placement is difficult to put into practice.

Takeda Thank you.

# **Toward Future Growth**

Takeda What areas should the Company focus on to achieve further growth?

Kurabayashi As a SaaS company, it is necessary to produce a high growth rate to meet shareholders' expectations, which is difficult to achieve with just one product. Best-in-class SaaS companies readily launch new products as soon as their growth slows. This is challenging from the perspective of management strategy. For example, my previous employer Salesforce offers multiple services, with the number of M&As increasing by year, Slack Japan among them. As the Company's sales grow further to 200 billion yen, 500 billion yen, and 1 trillion yen, it will be necessary to operate while also eyeing such largescale M&As.

As for the Company's broad business coverage, generating synergies is crucial. How will the Company leverage the value of its fintech business? Once such areas are sufficiently addressed, I believe the Company will advance to the next level.

Also, the Japanese B2B SaaS market still has ample room for growth. Although this market has been gaining traction, its share of companies' total system investment is still small. Digital transformation (DX) in Japan has just begun, with the traditional system integrator (SI) market still expanding. I hope the Company continues to spearhead the ever-evolving SaaS industry.

Takeda

I hope so too. Thank you for your time and ongoing support.

# Governance

# **Overview of Corporate Governance**

(As of February 21, 2022)

The Company, which offers a platform service as its core business, has adopted an Audit & Supervisory Board system. This is based on the judgement that to ensure managerial efficiency and soundness, it is effective to have in place a structure where the Board of Directors, consisting of directors who are familiar with the Company's business, decides on basic management policies and important business execution, while Audit & Supervisory Board members, with strong legal authority, audit the directors' execution of duties from an independent position. In addition, the Company has voluntarily established a Nomination and Compensation Committee and employs an executive officer and chief officer system.

Hirokazu Ban
Executive Officer and CCO
(Chief Compliance Officer)

Organizational Form		Company with Audit & Supervisory Board
Chairperson of the Board of	Directors	Yosuke Tsuji
Directors	Members	10 (among whom 6 are independent external directors, with 5 having experience managing other companies)
	% of Female Members	20%
	% of External Members	60%
	Term of Office	1 year
Audit & Supervisory Board	Members	3 (All are independent external Audit & Supervisory Board members with knowledge and experience in finance and accounting, with 1 also having knowledge and experience in legal affairs)
	% of External Members	100%
	Term of Office	4 years

	Attendance Rate	100%
Executive Officers		15
Chief Officers		CEO, CFO, CTO, CSO, CISO, CDO, CoPA, CLO, and CCO
Accounting Auditors		Deloitte Touche Tohmatsu LLC

# Rationale behind Composition of Board of Directors

Upon deliberation by the Nomination and Compensation Committee followed by a resolution of the Board of Directors, the composition of the Board of Directors has been set forth as below.

- The number of directors shall be that deemed appropriate to stimulate deliberations at Board of Directors meetings and make adequate and prompt decisions, in accordance with the provisions of the Articles of Incorporation.
- Independent external directors shall account for the majority of the Board of Directors.
- To promote invigoration of the Board of Directors, the maximum term of office for independent external directors shall be eight years, and in cases where a director is aged 72 by the end of an Annual General Meeting of Shareholders, the director shall resign as of the end of that meeting.
- In order to effectively fulfill the roles and responsibilities of the Board of Directors, well-balanced selections shall be made among individuals with knowledge, experience, and abilities in the areas of corporate management, global business, SaaS/fintech business and industry, investments and M&As, finance and accounting, talent development, legal compliance and risk control, technology, and sustainability and ESG. Such characteristics as gender, diverse national representation, and age will also be considered to achieve member diversity.
- Independent external directors shall also include those with experience managing other companies.
- As for Audit & Supervisory Board members, one or more persons with knowledge and experience in finance and accounting, and one or more persons similarly qualified in legal affairs shall be appointed.

# Key Matters Deliberated at Board of Directors Meetings (FY11/21)

- Matters relating to directors and executive officers (selection of representative director, selection of Nomination and Compensation Committee, compensation of directors, appointment of executive officers, and appointment of chief officers)
- Matters relating to management in general (annual budget, performance status reports, KPI reports, M&As, investments, and financing = equity offerings and loans)

 Other matters (evaluation of effectiveness of Board of Directors, internal control system status reports, intellectual property strategy reports, IR activity reports, D&I activity reports, compliance reports, and information security activity reports)

# Evaluation of Effectiveness of Board of Directors (FY11/21)

From FY11/20, the Company has been evaluating the effectiveness of the Board of Directors and working on improvements based on evaluation results. In FY11/21, the Company continued to entrust a third-party institution with the task of conducting a survey targeting all officers. Items covered in the survey include (1) operation and information provision of Board of Directors meetings, (2) composition and operation of the Board of Directors, (3) supervision and confirmation of strategies by the Board of Directors, (4) risk management, (5) monitoring of corporate ethics and performance, (6) evaluations and compensation of management members, and (7) topics of dialogue with institutional investors (a total of 24 questions). Responses were received from all officers.

# Summary of Evaluation Results

As in FY11/20, the average ratings for all items were high, with the Board of Directors being evaluated as generally effective. Overall deviation was low with no significant bias between evaluations by directors and Audit & Supervisory Board members, and by internal officers and external officers.

"Operation and information provision of Board of Directors meetings," which was an item requiring improvement in FY11/20, saw improvement through actions including setting effective agendas for more thorough deliberations at meetings, early provision of materials, and enhancements in material contents.

#### Initiatives

- Discussions will be held about the provision of officer training targeting those other than newly appointed officers. Regarding newly appointed directors, the Company has started and will continue an initiative whereby directors and business unit heads explain such matters as the Group's current situation and challenges.
- To raise corporate value by responding to issues related to sustainability, the Sustainability Committee, established on February 17, 2022, will hold regular discussions with external directors and business unit heads and will also report to the Board of Directors as necessary.
- Regarding non-financial information, the Company will enhance content subject
  to information disclosure in its integrated reports and on its corporate website,
  while also expanding the scope of information disclosure and provision in English.

<sup>\*</sup> Skills Matrix of Directors and Audit & Supervisory Board members ▶ P80

# **Director and Audit & Supervisory Board Member Compensation**

Director Compensation	Maximum Pool	500 million yen or less per year * The total amount of monetary compensation receivables for granting restricted stock to eligible directors is set at 200 million yen or less per year
	Туре	Base compensation (i.e., fixed monetary compensation), non-monetary compensation, etc. (i.e., restricted stock compensation)
Audit & Supervisory Board Member	Maximum Pool	50 million yen or less per year
Compensation	Туре	Base compensation (i.e., fixed monetary compensation)

# Basic Policy for Director and Audit & Supervisory Board Member Compensation

Directors' compensation consists of base compensation and stock compensation. The former is fixed monetary compensation in accordance with one's role to encourage thorough execution of duties. The latter is distributed as restricted stock (RS) and positioned as an incentive to raise corporate value in the medium to long term by sharing value with shareholders and raising directors' awareness of stock price.

At the Annual General Meeting of Shareholders held on February 21, 2022, it was resolved to maintain the annual upper limit for directors' compensation at 500 million yen while altering its breakdown. More specifically, the total amount of monetary compensation receivables for granting RS to directors was set to 200 million yen or less per year. By increasing the proportion of RS to directors' compensation, the Company aims to share values with shareholders further and urge directors to take stock performance into account, ultimately boosting corporate value in the medium to long term.

Meanwhile, Audit & Supervisory Board members' compensation is composed solely of base compensation in the form of a fixed monetary compensation in accordance with their responsibilities for sufficiently executing the functions of auditing and supervising management and business execution.

# Process of Determining Compensation of Each Director

Individual directors' compensation is deliberated by the Nomination and Compensation Committee, set up on a voluntary basis, within the upper limit resolved at the General Meeting of Shareholders. Based on the committee's proposal, the Board of Directors determines such matters as the composition, level, and maximum pool of compensation. Directors' compensation is set at a level that appropriately compensates for sufficiently executing the Company's managerial decision-making and supervision functions, taking into account social and market conditions, as well as comparison with other companies. To ensure the transparency and objectivity of evaluations and decision-making processes related to compensation, the Nomination and Compensation Committee is delegated by the Board of Directors to determine the amount of compensation for each director. Decisions are made by considering resolutions of the Board of Directors including on composition, level, and maximum pool of compensation, as well as the responsibilities to be fulfilled by each director (including capabilities and performance in the case of the representative director and executive directors) based on the director compensation table for respective positions.

# Process of Determining Compensation of Each Audit & Supervisory Board Member

Individual Audit & Supervisory Board members' compensation shall be determined upon discussion by the Audit & Supervisory Board within the upper limit resolved at the General Meeting of Shareholders.

# Total Amount of Compensation in FY11/21

	Total	Breakdown b	No. of		
Title	Compensation, etc. (¥mn)	Base	Performance- based, etc.	Non- monetary, etc.	Eligible Officers
Directors (External Members)	140 (45)	105 (35)	-	35 (10)	12 (5)
Audit & Supervisory Board Members (External Members)	23 (23)	23 (23)	-	-	3 (3)
Total (External Members)	164 (69)	129 (59)	_	35 (10)	15 (8)

<sup>\*</sup>The table above includes three directors who resigned as of the end of the ninth Annual General Meeting of Shareholders held on February 26, 2021.

# **Basic Policy on Compliance**

The Group believes compliance to be a precondition for conducting its corporate activities. For the Group, compliance involves deploying business activities based not only on laws and regulations and internal rules but also on high ethical standards.

The Group has established the *Money Forward Group Compliance Manual*, which sets forth basic action principles on compliance that all officers and employees of the Group must put into practice. At the same time, the Group is striving to cultivate a culture of compliance and to have all members of the Group habitually and naturally demonstrate compliance in their business activities.

# Compliance Promotion Structure

The Group has established the Group Compliance Rules that stipulate such matters as control policies, structure, and codes of conduct regarding compliance. In addition, a chief compliance officer (COO) has been appointed to promote the Group's compliance-based management. To achieve this end, a Compliance Meeting is held once every quarter, in which the CCO develops plans for various initiatives aimed at enforcing compliance and reports on their status, and also reports on and discusses matters and developments in laws and regulations that require attention in daily operations from the perspective of compliance.

# Internal Reporting System

The Group has established the Group Internal Reporting Rules, which clearly emphasize confidentiality and prohibition of retaliation, and has set up an Internal Reporting Office accessible to all officers and employees of the Group. The system allows them to directly report and consult on conduct or possible conduct related to compliance breaches and harassment within the Group, and comprises an internal contact as well as a full-time external auditor and external lawyer.

# Activities for Eliminating Anti-Social Forces

As basic principles for severing and eliminating any relations with anti-social forces, the Company has formulated and disclosed the Basic Policy on Preventing Damage by Anti-social Forces. Under this policy, the Group has enacted the Group Rules on Anti-social Forces, which includes investigating business partners, employees and officers, and other counterparts for any ties with anti-social forces, and introducing provisions for the exclusion of anti-social forces in trade agreements and contracts.

#### Activities for Preventing Bribery

The Company has formulated and disclosed the Group Basic Policy on Bribery Prevention as basic principles to prevent the offering of bribes to civil servants, among others, as well as for building fair and transparent relationships, devoid of corruption, with users and business partners. Based on this policy, the Group Basic Rules on Bribery Prevention has been enacted throughout the Group to obligate such matters as the prohibition in principle of offering bribes to civil servants and other third parties, and with regards to exceptional cases, the procedures for prior approval and post reporting as well as the recording and preservation of such acts.

# Compliance Training

The Group provides a variety of compliance training for officers and employees to impart knowledge and raise awareness of compliance. Specifically, all Group employees receive training, with instruction from the CCO, on general compliance matters during new hire orientation. In addition, at the time of joining the Group and on a regular basis thereafter, they enroll in online training based on the *Money Forward Group Compliance Manual*, insider trading and information management, harassment, and information security and personal data protection. The Group also carries out tests to assess understanding. Furthermore, various compliance training sessions on specific topics (e.g., presentation methods, subcontract laws, trademark rights, and copyrights) are offered as necessary to address laws and regulations and internal rules associated with daily operations.

# Survey on Efforts to Enforce Compliance

The Company has included queries on compliance in the MF Group Survey (i.e., an employee engagement survey)—carried out twice a year to objectively understand the Group's issues—and analyzes the responses to make improvements. In addition, the Company regularly carries out surveys on compliance to identify concerns regarding compliance issues that are not raised in internal reports and to foster awareness of compliance among all officers and employees of the Group.

# **Executives**

(As of March 30, 2022)

Yosuke Tsuji
Representative Director, President and CEO

#### Background

Graduated Faculty of Agriculture, Kyoto University. Joined Sony Corporation in 2001. Seconded to Monex, Inc. in 2004. Obtained MBA at Wharton School, University of Pennsylvania in 2011. Established Money Forward, Inc. in 2012, and was appointed representative director and CEO. Currently serves as an executive officer of the Japan Association of New Economy (JANE), executive committee member of the Silicon Valley Japan Platform (SVJP), and first-term nominated member of the Japan Association of Corporate Executives (KEIZAI DOYUKAI)

Takuya Nakade
Director, Executive Officer,
Head of D&I and CTO

#### Background

Joined Jupiter Shop Channel Co., Ltd. in 2001, where he led development, maintenance, and operations of order management and CRM systems as IT manager. Joined Simplex Inc. in 2007 and engaged in development, operations, and maintenance of stock trading systems for securities companies. Led the development of an FX dealing system as an architect and product manager. Joined Money Forward, Inc. in 2015, and developed financial systems. Appointed CTO in 2016.

Naoya Kanesaka
Director, Executive Officer and CFO

#### Background

Joined Goldman Sachs Japan Co., Ltd. in 2007 after graduation of Faculty of Economics, The University of Tokyo. Worked at the Tokyo and San Francisco offices, during which time he was involved in advisory services for cross-border M&As and fund procurement mainly in the technology and financial industries, as well as in enhancing value of investee companies. Joined Money Forward, Inc. in 2014. Appointed director in 2017. Appointed representative director of Money Forward Synca, Inc. in September 2019. Serves as representative partner of HIRAC FUND of Money Forward Venture Partners, Inc., established in May 2020.

Masanobu Takeda

Director, Executive Officer and Money
Forward Business Company COO

#### Background

Joined an internet advertising agency in 2001, where he engaged in strategy marketing. Joined Macromill, Inc. in 2003, and was appointed director in 2008. Was mainly in charge of corporate planning and led the company's corporate and HR strategic planning, M&As, and new business development. Joined eole Inc. in 2012, where he served as director and head of corporate planning. Has been serving as director and CFO of Klavis, Inc. since 2016, and joined Money Forward, Inc. in 2017 at the time of the acquisition.

# **External Directors**

Masaaki Tanaka External Director; Vice Chair, Board of Councilors, US-Japan Council; Former Chairman, President & CEO, Nippon Paint Holdings Co., Ltd.

#### Background

Masaaki Tanaka has over 40 years of experience in the finance industry, beginning his career at the Mitsubishi Bank (currently MUFG Bank). His previous senior roles include Representative Director and Deputy President of Mitsubishi UFJ Financial Group, President and CEO of Union Bank, N.A. and Senior Managing Executive Officer and CEO for the Americas of The Bank of Tokyo-Mitsubishi UFJ. Ltd. He was also a board member of Morgan Stanley from 2011 until 2015. He has served as a member of Financial System Council of the Financial Service Agency and various other governmental organizations. From September until December of 2018, he was President and CEO of Japan Investment Corporation. Mr. Tanaka was appointed Executive Chairman of the Board of Nippon Paint Holdings Co., Ltd. in March 2019, Chairman, President & CEO in January 2020, and served as Adviser from April until June 2021. He was appointed as Advisor to the Dean, Graduate School of Economics, The University of Tokyo in October 2021. He has also served as Vice-Chair of the Board of Councilors of the US-Japan Council since 2013.

Akira Kurabayashi External Director; Managing Partner and Head of Japan, DNX Ventures

#### Background

After engaging in venture capital businesses targeting Japan and the U.S. at Fujitsu Limited and Mitsui & Co., Ltd., Akira Kurabayashi oversaw investments in Japan at Globespan Capital Partners and Salesforce. Joined Draper Nexus Partners (now DNX Ventures) and was appointed Managing Director in March 2015 and Managing Partner and Head of Japan in December 2020. Holds an MBA from Wharton School of University of Pennsylvania and a bachelor and Ph.D. degree from Doshisha University. Is the author of *Corporate Venture Capital no Jitsumu* [Corporate Venture Capital in Practice] (CHUOKEIZAI-SHA HOLDINGS, INC.).

Etsuko Okajima External Director; CEO, ProNova Inc.

#### Background

Etsuko Okajima is a professional in human capital management and executive-level leadership development. She founded ProNova Inc. in 2007 and has been serving as CEO. Earlier in her career, she worked at Mitsubishi Corporation and McKinsey & Company. She also worked at the Globis Group and was involved in establishing Globis Management Bank, Inc., where she served as President from 2015. She holds an MBA from Harvard University.

Ryoko Ueda External Director; Associate Professor, SBI Graduate School

#### Background

After joining Mizuho Securities Co., Ltd., Ryoko Ueda was seconded to Japan Investor Relations and Investor Support, Inc. (J-IRIS). Subsequently served as special research fellow of Financial Research Center of FSA. After working at Mizuho International plc (London), she was appointed senior researcher at J-IRIS. Has served as associate professor at SBI Graduate School since March 2020. Holds a Ph.D. in policy research. Has served as a committee member of governmental and international organizations including Growth Strategy Council - Investing for the Future/ Council for Advancing Structural Reform under Prime Minister of Japan and His Cabinet, The Council of Experts Concerning the Follow-up of Japan's Stewardship Code and Japan's Corporate Governance Codes under the FSA, and Management Commentary Consultative Group of IFRS Foundation.

Hiroaki Yasutake

External Director
Director, Japan CTO
Association

#### Background

Hiroaki Yasutake joined MDM, Inc. (currently Rakuten Group, Inc.) a year after its foundation and has contributed to its rapid growth as head of engineering from his standpoint as Executive Officer and Director, having been involved in the development of various services since starting with the development of the "RMS" ASP service for opening stores, which is the foundation of the Rakuten marketplace. Furthermore, he has also focused on internationalizing the engineering team, strengthening collaborative relationships between Rakuten Group engineers around the world. After retiring from his director's position at Rakuten, Inc., he moved to the United States, where he founded Junify Corporation, where he currently serves as CSO. He is also a Director at the Japan CTO Association, where he focuses on initiatives for empowerment of engineers.

**Gen Miyazawa** Yahoo Japan Corporation Director, Managing Corporate Officer

#### Background

Gen Miyazawa founded Sirius Technologies, Inc. When it was acquired by Yahoo Japan Corporation, he joined that company where he served as a corporate officer responsible for the search service and the media service, including top pages and news. In October 2019, he was appointed Director of Yahoo Japan Corporation and in October 2020 he was appointed as head of the company's Corporate Group, where he is responsible for corporate fields in general, such as finance, accounting, legal affairs, and human resources.

# Skill Matrix for Directors and Audit & Supervisory Board members

For each officer, the matrix maps four fields in which the Company expects each officer to contribute to discussions at the Board of Directors meetings, in light of that person's specific knowledge, experience, etc.

# Reason for Appointment

## Masaaki Tanaka

Masaaki Tanaka has been engaged in the management of Mitsubishi UFJ Financial Group, Inc. for many years. He has abundant experience and broad expertise in the finance field. He has served in positions including President and Chief Executive Officer, and Director at large listed financial institutions in the U.S. He also has assumed office as Chairman, President & CEO of a large global company. He is a manager with a wealth of knowledge and experience in international business management. In addition, he has an in-depth knowledge of corporate governance, having participated in working groups of the Financial Services Agency such as the Council of Experts Concerning the Follow-up of Japan's Stewardship Code and Japan's Corporate Governance Code. He provides supervision and valuable advice on the Company's management from an independent and objective standpoint as an External Director, mainly on issues concerning global strategy, M&A and investments, finance, and governance.

We expect him to continue providing supervision and valuable advice on the Company's management, mainly on issues concerning global strategy, M&A and investments, finance, and governance. In addition, we expect him to contribute to increasing transparency of the Board of Directors and strengthening its oversight function. The Company expects him to be involved as a member of the Nomination and Compensation Committee from an objective and neutral standpoint in the selection of candidates for Director of the Company and the determination of remuneration, etc. for Directors.

Although the Company borrows from MUFG Bank, Ltd., Mr. Tanaka has retired from all of his positions of the bank and we believe that his independence is unaffected.

# Akira Kurabayashi

Akira Kurabayashi has a wealth of investment experience in new businesses in Japan and overseas. Based on his extensive knowledge of SaaS companies as a top expert of investment in the SaaS area, he provides supervision and valuable advice on the Company's management from an independent and objective standpoint as an External Director, mainly on issues concerning Business domain and M&As and investments. In addition, we expect him to contribute to increasing transparency of the Board of Directors and strengthening its oversight function.

# Etsuko Okajima

Etsuko Okajima has abundant experience, knowledge and broad expertise as a professional in human resources development, organizational management and other related fields. She provides supervision and valuable advice on the Company's management from an independent and objective standpoint as an External Director, mainly on issues concerning human resource development and sustainability.

We expect her to continue providing supervision and valuable advice on the Company's management, mainly on issues concerning human resource development and sustainability. In addition, we expect her to contribute to increasing transparency of the Board of Directors and strengthening its oversight function. The Company expects her to be involved as a member of the Nomination and Compensation Committee from an objective and neutral standpoint in the selection of candidates for Director of the Company and the determination of remuneration, etc. for Directors.

# Ryoko Ueda

Ryoko Ueda has abundant experience, knowledge and broad expertise concerning corporate governance, having participated in working groups of the Financial Services Agency such as the Council of Experts Concerning the Follow-up of Japan's Stewardship Code and Japan's Corporate Governance Code as a professional in corporate governance. She provides supervision and valuable advice on the Company's management from an independent and objective standpoint as an External Director, mainly on issues concerning governance.

In addition, we expect her to contribute to increasing transparency of the Board of Directors and strengthening its oversight function. The Company expects her to be involved as a member of the Nomination and Compensation Committee from an objective and neutral standpoint in the selection of candidates for Director of the Company and the determination of remuneration, etc. for Directors.

#### Hiroaki Yasutake

In addition to abundant experience, knowledge and broad expertise concerning internet-related markets, where the Group's businesses are being developed, he also has abundant knowledge and experience in the fields of technology and IT.

In addition, as a business manager, he also has abundant knowledge and experience concerning international business management. As such, we expect him to provide supervision and valuable advice on the Company's management from an independent and objective standpoint, drawing from his knowledge and experience of the technology and IT fields and of international business management.

# Gen Miyazawa

In addition to abundant experience, knowledge and broad expertise concerning internet-related markets, where the Group's businesses are being developed, as a business manager Gen Miyazawa also has abundant experience in managing an internet company, having founded his own company and served as a Corporate Officer and Director of Yahoo Japan Corporation. As such, we expect him to provide supervision and valuable advice on the Company's management from an independent and objective standpoint, drawing from his abundant experience and knowledge of internet-related markets and corporate fields in general.

Furthermore, Yahoo Japan Corporation's parent company, Z Holdings Corporation, is operating business in the finance field, which is the business domain of the Group. However, there are currently no businesses in which Yahoo Japan Corporation and the Company compete directly, and we judge that there are no concerns of a competitive relationship. In deliberations at Board of Directors' meetings, if a competitive relationship or conflict of interest is recognized, we plan to exclude Mr. Miyazawa from the deliberation of that item.

# **Audit & Supervisory Board Members**

Yozo Ueda
