Impact of applying the new revenue recognition standard

"Accounting Standard for Revenue Recognition" (ASBJ Statement No. 29), etc. has been adopted from the beginning of FY2022

Until the previous year, we recognized revenue on a gross basis from the programmatic advertising service etc. in the digital marketing business, as it was considered we were acting as a principal in the transactions.

However, after the application of this standard, it is considered we are acting as an agent in the same transactions, and we recognize revenue on a net basis.

Both sales and cost of sales decreased 4,984 million yen in the digital marketing business segment for 2Q FY2022, compared to the conventional revenue recognition method.

There is no impact on profits and the balance at the beginning of retained earnings.
