To whom it may concern:

Company Name	JAPAN ECOSYSTEM CO., LTD.
Name of Representative	Minoru Matsushima, President (Code: 9249 Standard Market of the Tokyo Stock Exchange and Main Market of the Nagoya Stock Exchange)
Inquiry Destination	Atsuhiko Ino Director in charge of the Management Division Phone Number +81-586-64-9249

**Notice of Registration of Indian Patent Concerning “Malox® Series,” a Series of Products that Purify Water**

The patent applied for is for the wastewater treatment agent “Malox® Series,” a series of products that purify water, which we have developed and manufacture and sell, and the patent has been registered with the Indian Patent Office. We hereby report its details.

Title of invention	WATER TREATING AGENT, METHOD FOR PRODUCING WATER TREATING AGENT, METHOD FOR TREATING WATER OF INTEREST USING WATER TREATING AGENT, AND KIT FOR PRODUCTION OF WATER TREATING AGENT
Patent number	406393
Registration date	September 12, 2022

As “a company leading the environment-oriented society,” we aim at the sustainable development of regional economy and society by proactively making corporate activities with the utmost consideration given to the environment and society. To achieve this goal, centering around our environment business, we are conducting research on a daily basis so as to develop new agents that will change the traditional concept of wastewater treatment.

Recently, the Indian Patent Office registered a patent for which we submitted an international application. This patent provides a water treatment agent, the manufacturing method of the agent, a treatment method of water treated by means of the water treatment agent, and a kit for manufacturing the water treatment agent, which are useful for the following:

- Reduction of mixed liquor suspended solids (MLSS) and other substances contained in the wastewater from a food factory and other facilities
- Reduction of total nitrogen in treated water that contains nitrogen-containing compounds and others

By leveraging the cutting-edge technology of this patent, we will develop, manufacture, and sell new products that balance low costs and compliance with laws and regulations, and thus make contributions to the prevention of environmental contamination, securing of safe living, and building of sustainable society in India.
