1. QUALITATIVE INFORMATION ON QUARTERLY FINANCIAL RESULTS

(1) Overview of Consolidated Operating Results

The business environment during the three months ended March 31, 2023 (the "current period"), saw a slowdown of inflation in the beginning of the year. However, myriad events with significant repercussions on international affairs continued, such as the lingering geopolitical tension as the war drags on in Ukraine, the high-level inflation, and financial turmoil, which all put burden on economic activities.

The economy in Japan saw some political tailwinds, such as a pickup in personal consumption fueled by a decrease in the number of newly infected cases of COVID-19 and an easing of border control, against the backdrop of high raw material and fuel prices. However, business sentiments among major manufacturers, representing the Company's main customers, worsened and remained unclear. Meanwhile, companies in a wide range of industries, including the information technology (IT) sector, continued to show a strong need for hiring engineers on the back of the tight labor market.

In response to such business environment in Japan, the OUTSOURCING Group (the "Group") pursues to reinforce the growth domain by smoothing out earnings. In the manufacturing field, business conditions in the automotive industry are starting to improve, but isn't completely recovered. In the administrative work outsourcing business for technical intern trainees, thanks to positive feedback from customers for the Group's efficient and appropriate management service, the number of foreign workers under management marked 19,226 as of March 31, 2023, continuing to represent the top share in Japan. The Group also tackled on the issue of debt bondage to make the overall foreign workforce market much healthier. Debt bondage exists when laborers (sometimes with their families) are forced to work outside of their home countries in order to pay off their own debts or those they have inherited. In the engineering field, in response to the heightened demand for engineers, the Group has developed a business scheme utilizing KEN School, one of the Group companies specialized in offering training services. KEN School provides training to people with little experience to enable them to work not only in the engineering field but also in various industries, including IT, construction, and pharmaceuticals. By keeping recruitment costs at a low level while increasing the number of hires through this scheme, the Group has successfully grown the business. Furthermore, in April 2023, approximately 2,300 new hires joined the Group, making it one of the leading companies in Japan in hiring new graduates. This clearly demonstrates not only the high recruiting capability but also the Group's excellence in marketing to find a new workplace suitable for people with little experience, onboarding training for people, and the ability to build a trusted relationship with client companies. Besides the manufacturing field, which is more susceptible to macroeconomic dynamics, the Group aims to expand businesses that are less affected by economic fluctuation. In particular, the U.S. military facilities business continued to see steady growth in demand for renovation and maintenance services for buildings and facilities. However, a longer procurement lead time and escalating material prices weighed on the business growth during the current period.

Looking at the market overseas, uncertainties remained high as the economic growth was sluggish and financial risks heightened while inflation continued to elevate.

Under such business environment, the Group continues to make an all-out effort to reinforce the growth domain by smoothing out earnings for its overseas businesses. Specifically, in addition to expanding outsourcing businesses in the public sector, including government projects, which are less susceptible to economic fluctuations, the Group offers engineering outsourcing services where persistent demands are seen. Also, the Group is rolling out a scheme to mobilize human resources at a global level from countries that have plenty of workforce to those that face labor shortages. Owing to the Group's diversified business and geographic portfolios, both revenue and profit reported double-digit growth in the current period, not just in the engineering business but also in the manufacturing and service businesses.

As a result, the Group recorded revenue of 175,881 million yen on a consolidated basis for the first quarter ended March 31, 2023, up 13.2% year-on-year, exceeding its previous high for the quarter for the 14th consecutive year. Operating profit marked 5,276 million yen, down 11.4% year-on-year, profit before tax of 4,701 million yen, up 19.6% year-on-year, and profit attributable to owners of parent of 3,135 million yen, up 98.0% year-on-year.

The Group places a high value on sustainable growth. As for the sustainability policy of the Group to promote Sustainable Development Goals ("SDGs") management, the Group is committed to corporate activities that will create job opportunities and education opportunities for many people around the world, through which the Group will seek to tackle society's challenges, develop businesses, and contribute to the benefit of stakeholders in a sustainable manner. The Group continues to pursue the goal of creating a system under which its business activities will widely benefit society.

Segment results are provided below.

[Domestic Engineering Outsourcing Business]

The Domestic Engineering Outsourcing Business experienced limited negative effects of the COVID-19 pandemic and continued to see an increase in both revenue and profit year-on-year. While focusing on hiring new graduates to address employee retention, the Group continued to constrain recruitment costs by leveraging KEN School, which provides training to people with little experience for dispatching purposes. Even though the labor market became more competitive as many companies across various industries restarted recruiting activities, the Group successfully hired as planned. As of March 31, 2023, the number of worksite employees totaled 24,779, up 2,694 from a year earlier, which remained the highest in the industry despite the Group being a latecomer. Mainstay fields also continued to grow, such as IT, construction, and pharmaceutical industries, positioned to make the business less vulnerable to economic fluctuations in the manufacturing industry.

Based on the above, segment revenue and operating profit for the Domestic Engineering Outsourcing Business during the current period were 39,155 million yen, up 14.4% year-on-year, and 3,007 million yen, up 2.9 year-on-year, respectively.

[Domestic Manufacturing Outsourcing Business]

The Domestic Manufacturing Outsourcing Business recorded an increase in revenue from a year earlier, as the production adjustment in the auto industry turned to an increase in line with a gradual improvement of semiconductor shortages. However, segment profit declined due to increased costs, as the Group hired more worksite employees in anticipation of further production increase. The number of worksite employees at the periodend was 25,903, up 4,397 year-on-year. In the administrative work outsourcing business, the demand for recruiting technical intern trainees continued to be robust among manufacturers. Thanks to positive feedback from customers for the Group's efficient and appropriate management service, the number of foreign workers under management marked 19,226 as of March 31, 2023, leading the Japanese market.

Based on the above, segment revenue and operating profit for the Domestic Manufacturing Outsourcing Business during the current period were 30,567 million yen, up 13.1% year-on-year, and 937 million yen, down 36.9% year-on-year, respectively.

[Domestic Service Operations Outsourcing Business]

The Domestic Service Operations Outsourcing Business mainly provides services to U.S. military facilities, which are less susceptible to macroeconomic dynamics, unlike businesses in the manufacturing field. Although the demand for renovation and maintenance services for U.S. military buildings and facilities remained high, a procurement lead time for construction materials, particularly those imported by sea freight, continued to become longer. Also, costs increased due to a surge in construction material prices and marine transport costs. As a result, the business saw a decrease in both revenue and profit from a year earlier. However, the Group is building up order backlog and believes the business profitability over the medium- to long-term is not impaired.

Based on the above, segment revenue and operating profit for the Domestic Service Operations Outsourcing Business during the current period were 7,669 million yen, down 8.7% year-on-year, and 475 million yen, down 56.3% year-on-year, respectively.

[Overseas Engineering Outsourcing Business]

The Overseas Engineering Outsourcing Business recorded double-digit growth in both revenue and profit year-on-year. In the UK, the profitable public debt collection business continued to show a recovery, while in Ireland, an economic uncertainty, including the layoff at a major global IT company, partly affected the recruiting and placing business. Despite increased costs driven by higher inflation, the dispatching business stayed brisk during the current period.

Based on the above, revenue and operating profit for the Overseas Engineering Outsourcing Business during the current period were 41,274 million yen, up 12.4% year-on-year, and 2,037 million yen, up 20.0% year-on-year, respectively.

[Overseas Manufacturing and Service Operations Outsourcing Business]

The Overseas Manufacturing and Service Operations Outsourcing Business marked double-digit growth in both revenue and profit year-on-year. The e-commerce related business centered around major supermarkets in the Netherlands leveled off because of the sluggish consumer sentiment. However, such negative impact was mitigated to a certain extent by reinforcing logistics-related business and by raising dispatch unit prices. In Germany, a

restructuring was conducted to reinforce the organization and the aviation field related business performed well, which both contributed to the business growth.

Meanwhile, segment profit significantly grew during the current period, mainly because one-off factors recorded last year faded, such as costs related to the rapid spread of covid variants. That said, costs generally continued to rise during the period driven by higher inflation, as seen in the Overseas Engineering Outsourcing Business.

Based on the above, revenue and operating profit for the Overseas Manufacturing and Service Operations Outsourcing Business were 57,200 million yen, up 17.0% year-on-year, and 1,379 million yen, up 92.9% year-on-year, respectively.

[Other Business]

Included in Other Business are shared services of administrative work and sign language classes provided by disabled employees who work for the Group's special subsidiary company, which performed relatively well during the current period.

Based on the above, segment revenue during the current period marked 17 million yen, up 8.7% year-on-year, and operating profit posted 23 million yen, down 78.6% year-on-year.

(2) Overview of Consolidated Financial Position

Total assets as of March 31, 2023, were 416,326 million yen, an increase of 16,283 million yen from December 31, 2022. This is primarily attributed to increases in cash and cash equivalents, trade and other receivables, right-of-use assets, and goodwill.

Total liabilities as of March 31, 2023, were 329,815 million yen, an increase of 13,337 million yen from December 31, 2022. This is primarily attributed to an increase in bonds and borrowings.

Equity as of March 31, 2023, was 86,512 million yen, an increase of 2,947 million yen from December 31, 2022. This is mainly due to an increase in equity by recording profit and exchange differences, offset by a decrease due to the payment of cash dividends.

(3) Explanation of Forecasts Including the Consolidated Financial Results Forecasts

The financial results forecasts for the six months ending June 30, 2023, and the fiscal year ending December 31, 2023, have not changed from those that were originally announced on February 14, 2023.

The forecasts represent forward-looking statements determined based on information available as of the time of the creation of this document and involve uncertainties to some degree. Actual financial results may differ from the forecasts due to changes in business situations or other reasons.

(5) Notes to Condensed Quarterly Consolidated Financial Statements

[Going Concern Assumption] Not applicable.

[Changes in Significant Subsidiaries] Not applicable.

[Changes in Accounting Policies]

Material accounting policies adopted for the condensed quarterly consolidated financial statements are the same as those for the consolidated financial statements for the fiscal year ended December 31, 2022, with the exception of the item described below.

The Group calculated income tax expenses for the three months ended March 31, 2023, based on the estimated average annual effective tax rate. The Group adopted the following accounting standard from the quarter ended March 31, 2023.

IFRS		Details of new and amended accounting standards	
IAS 12	Income taxes (amended May 2021)	Clarify how companies account for deferred tax on transactions such as leases	
IAS 12	meome taxes (amended way 2021)	and decommissioning obligations	

The Group adopted IAS 12 "Income taxes" (amended May 2021) starting from the quarter ended March 31, 2023.

The amendment clarifies that entities should recognize deferred tax liabilities and deferred tax assets on transactions such as leases and decommissioning obligations if such transactions create the same amount of taxable temporary difference and deductible temporary difference.

The amendment was applied retrospectively. Accordingly, the condensed quarterly consolidated financial statements for the three months ended March 31, 2022, and consolidated financial statements for the fiscal year ended December 31, 2022, are presented on a retrospective basis.

As a result of the adoption, the restated consolidated statement of financial position as of December 31, 2022, shows that deferred tax assets and deferred tax liabilities increased by 112 million yen and 71 million yen, respectively, and retained earnings increased by 41 million yen. The effect of restatements was minimal on the condensed quarterly consolidated statement of profit or loss for the quarter ended March 31, 2022, and 2023.

As cumulative effects of changes in accounting policies were reflected in equity at the beginning of the quarter ended March 31, 2022, the restated balance of retained earnings in the condensed quarterly consolidated statement of changes in equity increased by 0 million yen as of January 1, 2022.

[Segment Information]

(a) Overview of Reportable Segments

The reportable segments of the Group are its components for which discrete financial information is available and which are subject to periodical assessments by the Board of Directors to determine allocation of management resources and evaluate performance.

The Group consists of segments categorized by description of business, with five reportable segments, namely "Domestic Engineering Outsourcing Business," "Domestic Manufacturing Outsourcing Business," "Overseas Engineering Outsourcing Business," and "Overseas Manufacturing and Service Operations Outsourcing Business."

Major operations of each segment are as follows:

Domestic Engineering Outsourcing Business:

Subsidiaries of the Company provide the following: services to offer sophisticated technologies and know-how to assist manufacturers in their design/development and experiment/evaluation processes; development of telecommunication-related applications for websites, smartphones, etc., as well as development of e-commerce websites; various solution services for and development of foundational IT systems, infrastructure, and networks; outsourcing services for research and development operations specializing in medical- and chemical-related areas; services to offer expertise and know-how for construction management/design as well as for the design, construction, management, and the like of various plants; and IT schools.

Domestic Manufacturing Outsourcing Business:

The Company and its subsidiaries offer services to realize better production efficiencies by providing technologies and management know-how in response to manufacturers' needs for outsourcing manufacturing processes. In addition, the Company and its subsidiaries offer comprehensive consignment services covering everything from outsourced recruitment of fixed-term employees to be directly employed by customers (feecharging recruiting service), administrative work outsourcing including labor management and housing management for fixed-term employees, technical intern trainees, international students, etc., and job searching support for workers whose employment terms have expired.

Domestic Service Operations Outsourcing Business:

Subsidiaries of the Company offer services to government officials such as U.S. military facilities and services for logistics companies and call centers.

Overseas Engineering Outsourcing Business:

Overseas subsidiaries of the Company offer dispatch and recruiting services of specialists, mainly in Europe and Australia, in the following areas: IT, finance, pharmaceuticals, life science, medicine, and healthcare. Government debt collection service using artificial intelligence is also provided.

Overseas Manufacturing and Service Operations Outsourcing Business:

Overseas subsidiaries of the Company mainly offer human resource services for manufacturing-related production outsourcing, dispatching and recruiting of personnel for administrative and service-related work, and payroll services in Asia, South America, Europe, and other areas. In addition, they offer other services, including BPO services and temporary worker dispatching for public institutions in Europe and Australia as well as cross-border employment services in Europe and Asia.

Other Business:

Subsidiaries of the Company provide administrative outsourcing services and the like.

(b) Segment Revenues and Results

Revenues and results by reportable segment are as shown below. Segment profit figures are based on operating profit.

For the three months ended March 31, 2022 (From January 1, 2022 to March 31, 2022)
