The Company believes it is important to increase corporate value by fulfilling accountability through dialogue with various stakeholders such as shareholders and customers, making effort to execute transparent business activities, and swiftly conducting business activities with fairness and honesty based on its management philosophy of “a company is a public entity of society.” For this reason, we recognize that corporate governance is an important foundation of management. The Company complies all of the principles set forth in the Corporate Governance Code.

[Disclosure based on each principle set forth in the Corporate Governance Code] [updated]

【Principle 1.3 Basic Strategy for Capital Policy】

The Company operates its business placing considerable weight on “return on invested capital” and development of “financial stability”.

As for the “return on invested capital”, the Company runs business with consciousness of the cost of capital by calculating business division-based ROIC (Return on Investment Capital) and WACC (Weighted Average Cost of Capital), and utilizing it for accelerating business selection & concentration if necessary, and taking up in organic measures to strengthen/revitalize businesses and for decision making on investment, to create sustainable return which outweighs the profit forecast of the capital market. The Company aims continuously 10% or more of ROE (*) the Company-widely.

As for the “financial stability”, we are increasing our shareholders fund by building up the net profit so that we are able to build up firm financial base to fully promote business restructuring and active investments. Under the capital allocation policy, the Company will allocate capital for implementing the Mid-term strategy with cash flow generated from business (operating CF, divestiture) in manner of financial discipline consciousness.

From the perspective that shareholder return is the return on the capital invested by shareholders, the Company, in principle, distributes profits to shareholders based on its business performance and strives to provide stable and continuous of dividends, targeting a dividend payout ratio of approximately 30% with respect to consolidated net profit attributable to Panasonic Holdings Corporation shareholders.

* ROE (Return on Equity): Net income attributable to the owners of the parent company / Average of the equity attributable to the owners of the parent company at the beginning and the end of the fiscal year.

【Principle 1.4 Strategic Shareholdings (So-called “Cross-Shareholdings” in the Corporate Governance Code)】

Other than holding shares of affiliated companies, the Company acquires and holds shares or interests of other companies, limiting the holdings to those of strategic partners to which Panasonic Group has a close business relation. The Company also judges whether the holding is necessary to increase its mid- to long-term corporate value, considering comprehensively its business strategies and business relation with such partners, among other factors.

For the shares other than those of affiliated companies, the Company determines that the holding of the shares be limited to a minimum necessary, and every year at the Board of Directors Meeting, examines the purpose of the acquisition and holdings per share and cost & benefit with consideration of capital cost, and periodically judges the appropriateness of holding. Based on its examination result, the Company considers disposing and reducing the shares if it determines that the holding cannot be justified.

In exercising voting rights of the shares that the Company holds, the Company decides and exercises each agenda, considering in a comprehensive manner with the concrete voting right

check list, whether the Company can expect, among other things, the increases of the mid- to long-term corporate value of the investee company. The Company does not make affirmative decision on the agenda which might damage the shareholders' value.

【Principle 1.7 Related Party Transactions】

Through discussion, the Board of Directors identifies issues for improving Board of Directors effectiveness, important supervision themes for Board of Directors in the next fiscal year, items for improving operations, and other matters.

iii) Board of Directors effectiveness evaluation results and issue improvement measures.

It was confirmed from the survey results that, continuing from the fiscal 2022, the evaluation of Board of Directors effectiveness, have been generally ensured. We received the following comment from an outside agency. “At all stages including the design stage for questions and response methods, the response stage with many constructive comments from all officers, and the review stage of collected results, the entire company was directly involved with an awareness of issues aimed at improving the effectiveness of the Board of Directors.” The Panasonic question design and evaluation process, and the collected responses and comments were assessed as sufficient to confirm the effectiveness of the Board of Directors.

The identified issues were also discussed by the Board of Directors and the following improvement measures were proposed.

- Ensure sufficient time and expand discussion of Group medium- to long-term strategies and business portfolios.
- For agenda item of Operating Company medium- to long-term strategies and important matters, clearly identify the division of roles between the Board of Directors as the Panasonic holding company and the Panasonic execution side and Operating Company Board of Directors, and narrow down the list of resolutions which should be supervised and monitored by the Panasonic Board of Directors.
- From the perspective of utilizing intangible assets, functions reports on matters such as investment in human capital and DX should be connected directly to resolutions of Group management issues and Group medium- to long-term strategies, and expanded as strategic discussions that contribute to improving corporate value.
- Clearly identify the division of roles between the Board of Directors and the Nomination and Compensation Advisory Committee, and expand the activity contents and policy of the committee in order to strengthen supervision of nomination and remuneration jointly by the Board of Directors and the committee and ensure its transparency.

In fiscal 2024, based on the above improvement measures which were discussed and concluded by the Board of Directors, we will continue working to improve the Board of Directors effectiveness.

[Evaluation of Audit & Supervisory Board (A&SB) effectiveness]

An evaluation of effectiveness is also conducted for the Panasonic A&SB at the end of each fiscal year. Issues and improvements proposed by A&SB Members are discussed and the action

to be taken is decided. The results are applied to the Audit Plan for the following fiscal year, and continual efforts are made to improve the effectiveness of audit & supervisory activities. Activities in fiscal 2023 included attendance at Board of Directors Meetings, monitoring the status of supervising execution of Director duties, and stating opinions when recognized as necessary. In addition, the decision-making process for important Group matters and the conditions of discussion at important meetings were checked, and the status of execution of duties by the President and Chief Executive Officer, Operating Company Presidents, and functional top management was monitored. Observers attended meetings—generally held once each quarter—of the Internal Audit Committee which is the controlling institution for internal audit functions. The results of audits and other information was reported to the A&SB by the internal auditing group, and the A&SB Members, internal auditing group, and Accounting Auditors all met together to exchange information such as risk assessments and plans for visits at the start of the year, as well as changes in the audit contents, identified items, and risk assessments in order to improve the effectiveness of audits intended to strengthen governance under the new system. In addition to a quantitative evaluation of effectiveness based on a total of 40 evaluation items from perspectives such as action based on Corporate Governance Code, the effectiveness evaluation identified specific issues proposed by each A&SB Member, and worked to identify items for improvement. The A&SB discussed the effectiveness evaluation results and concluded that “it is functioning effectively.” For issues and other matters which were identified at discussions during fiscal 2023, measures in response will be decided and continual efforts will be made to improve the effectiveness of the A&SB.

【Principle 5.2 Establishing and Disclosing Business Strategies and Business Plans】

In April 2022, the Panasonic Group transitioned to an Operating Company system (holding company system) to enhance the competitiveness of our business from a mid- to long-term perspective. Each Operating Company incorporated upon the transition to the Operating Company system will work to significantly enhance its competitiveness by acquiring outstanding adaptability to various external factors such as labor shortages, rising prices, and supply chain disruptions due to geopolitical risks. Meanwhile, the holding company will actively support the enhancement of competitiveness of each Operating Company and promote growth strategies from a group-wide perspective, including business portfolio management beyond the judgment of each Operating Company.

As stated in "Principle 3.1 Full Disclosure" - (1) Company objectives (e.g., business philosophy), business strategies and business policy, the Company will thoroughly strengthen its competitiveness by focusing on two areas, that is, solving global environmental issues (environment), and life-long health, safety, and comfort for everyone (lifestyle), in order to demonstrate how the Panasonic Group can be helpful in achieving its mission of creating an ideal society with affluence both in matter and mind. The Company has established a group-wide strategy to move toward the Group's vision, and in order to address urgent global environmental issues, it has designated "automotive batteries," "air quality and air-conditioning" and "supply chain management (SCM) software" as three investment areas, with "automotive batteries" designated as the priority investment area for the Group.

To continue realizing the happiness of all stakeholders, the Panasonic Group will continue its internal efforts to enhance the competitiveness and growth potential of businesses that can make contributions in the future. On the other hand, businesses that can enhance

competitiveness and grow faster outside the Group will aim for growth outside the Group for the happiness of all stakeholders. The Company has established two criteria for determining the Group's business portfolio, along with their standards. The first criterion is compatibility with the group-wide strategy. In the environmental area, the criterion is whether the business can contribute to reducing CO₂ emissions for society or reducing the use of resources. In the lifestyle area, the criterion is whether the business can propose value tailored to each customer through diverse customer touchpoints and utilizing digital technology and AI, and whether it can comply with financial discipline. In addition, for the second criterion of business location and competitiveness, the Company will thoroughly assess the quantitative and qualitative aspects of the market's growth potential and sustainability over the next decade, as well as the position and profitability of the business in the market. The Company will provide guidance for business portfolio reviews based on these criteria and standards and implement them in a phased manner by the end of fiscal 2024.

In addition to dividends etc., the Company has set a cumulative operating cash flow as a medium-term management indicator for the Group to measure its cash generation capability, in order to secure sufficient investment for future social contribution. The Company aims for a cumulative operating cash flow of 2.0 trillion yen and a cumulative operating profit of 1.5 trillion yen over the three-year period from fiscal 2023 to 2025. The Company has also set a target of 10% or more for ROE as a measure of capital efficiency by fiscal 2025. 3. Reasons for Adoption of Current Corporate Governance System [updated]

Prior to the transition to an operating company structure in April 2022, the Company carried out a number of discussions concerning the Company's corporate governance structure.

Under the Operating Company structure, a full-fledged autonomous management is implemented by the Operating Companies that have gained substantial delegation of authority for investments, etc. As a holding company, the Company's role is to determine the Group's mid-to long-term strategies and important Group matters, and monitor Group through group governance and risk management. As a result of the study, the Company has determined that it has been able to ensure the effectiveness of corporate governance by having an independent A&SB establish and operate the Group internal audit system in cooperation with the Internal Audit Division, and by having a voluntary Nomination and Compensation Advisory Committee chaired by an independent outside director, with a majority of independent outside directors,

deliberate on executive personnel matter and remuneration. The Company has determined that the corporate governance that it aims to achieve under the Operating Company structure can be achieved without changing the conventional corporate governance structure and maintaining the system of a company with A&SB Members. For that reason, the Company has established the corporate governance structure, based on the A&SB System composed of the Board of Directors and A&SB Member / A&SB, holding the following elements.

<The Board of Directors>

- The Board of Directors concentrates on decisions about the group-wide strategies and the supervision of the Operating Companies.
- With the policy of maintaining the ratio of outside directors to be one third or more, the Company elects Outside Directors, from among such as management of external entities, those who have extensive managerial experience with various careers and deep insight, and are expected to bring valuable opinion to the Board for decision-making of business execution, and monitoring of execution of Directors' duties.

<Audit & Supervisory Board Members (A&SB Members) and Audit & Supervisory Board (A&SB)>

- The Company sets A&SB Members who are able to exert their monitoring functions according to their individual discretionary decision, but not to majority vote decision. The A&SB Members are also able to independently act upon their own decision in pursuing liabilities of Directors.
- The Company sets Senior A&SB Members who are well versed about corporate operations and are able to comprehend actual condition of businesses by exercising their right to visit and investigate operating sites. The Senior A&SB Members are selected from among those who have experiences as higher or equal position of Managing Directors or equivalent position.
- The Company selects Outside A&SB Members, from among such as management, lawyer, and certified public accountant, those who have extensive expertise with various careers and deep insight and are expected to bring valuable auditing to the execution of Directors duties.
