**Overseas Wi-Fi Router Rental Service “GLOBAL WiFi®”
launches ultra-high-speed 5G plan for “GLOBAL WiFi for Biz”, an essential gadget for business
travelers.**

On September 13th, Vision Inc. (Headquarters: Shinjuku-ku, Tokyo, President, Representative Director, and COO: Kenji Ota, hereinafter Vision), the provider of the low-cost, high-quality overseas Wi-Fi router rental service “GLOBAL WiFi®” (<https://townwifi.com/>), has launched an ultra-high-speed 5G plan for “GLOBAL WiFi for Biz”. Mainly available for business travelers, it allows internet connection for both domestic and international networks, without the need to apply before usage, or the need to pick up and return the device.

As of September 2023, the 5G network is available in 12 countries and regions (mentioned later). These areas include the United States and China, and we gradually plan to expand to different areas as soon as we have established more networks.

■ **“GLOBAL WiFi for Biz” Features**

“GLOBAL WiFi for Biz” is a service model that allows its user (company/organization) to store the Wi-Fi router within their facility and use it domestically and internationally as often as needed, unlike the conventional model of renting and returning the device after each usage.

As the Wi-Fi device will be stored within your facility, there will be no need for advance delivery or pick up at airport counters. Additionally, you will only be charged for the number of days the device has been actively used, this allows for productivity improvement and reduces costs when traveling overseas.

This model allows users to have easy access to overseas networks in case of sudden overseas business trips, an extension of travel periods, and changes or additions to travel destinations. We have introduced

this model successfully to over 9,000 companies and organizations, to support business travelers who are actively traveling around the world.

We will make sure to continue working on improving service quality, network quality, and expand our coverage areas to allow a smooth and comfortable internet connection for business travelers and tourism around the world.

○ Area Coverage:

Mainland U.S.A. / Hawaii / China / Hong Kong / South Korea / Taiwan / Thailand / U.K. / Italy / France / Germany / Spain

○ Plans and Rates: 5G (ultra-high-speed) unlimited data

Monthly fee 3,278 yen (tax included)

Area 1 South Korea / Hong Kong / Taiwan 1,570 yen/day

Area 2 Thailand / China 1,970 yen/day

Area 3 Mainland U.S.A. / Hawaii / U.K. / Italy / Spain / Germany / France 2,070 yen/day

Monthly option 5G Japan flat rate plan 10,780 yen (tax included)

Usage Precautions:

- Plan provides data communication even without a 5G connection by switching to 4G in areas 1, 2, and 3.
- 5G may be unavailable due to local circumstances; in such cases, only 4G is provided.
- You will be able to use unlimited 4G/3G in all countries and areas except for 1, 2, and 3. In that case, in addition to the basic 5G fee, you will be charged a daily fee for the 4G/3G unlimited plan depending on the country and area you are in.
- As the service plan uses the newest devices, you can expect a higher communication speed compared to previous 4G devices, even when connecting through 4G.
 - * Varies depending on location.
- In case of excessive data usage, connectivity may be restricted depending on the policies of the partner carrier or our own assessment.

- Vision's "communication quality" standards and "signal audits"

Under "GLOBAL WiFi®", Vision provides a global high-speed mobile network based on information updates and verifications conducted in collaboration with partner mobile carriers around the world.

When adding coverage areas, communication methods, and plans, we also verify locations with "signal audits".

After verifying the extent of the coverage area (signal area), including dead spots and locations where signals are blocked by buildings, etc., we measure actual communication speeds. Only if these measurements meet our own communication quality standards do we begin purchasing service plans. While there are many existing 5G communication carriers around the world, at Vision we only provide service in areas that meet our quality standards.

■ Outline of the "GLOBAL WiFi for Biz" service

Outline of the “GLOBAL WiFi for Biz” (<https://townwifi.com/solution/cloud>)

“GLOBAL WiFi for Biz” is a Wi-Fi service that does not require an application, pick-up, and return before and after any business trip. The service is provided by a cloud-type Wi-Fi router that automatically connects to the local carrier’s network as soon as you turn on the power after arriving at your destination.

This service is specially designed to be convenient and economical for companies that often travel overseas, as there is no need to go through rental procedures each time.

○ Features:

(1) No arrangement is required (no need to rent each time). You can always leave within your office or at home in case of remote work.

There is no need to apply each time, make a payment, visit the airport counter, and return the device. The device will be ready for immediate departure and immediate use.

(2) As the device can be shared by multiple people, it’s possible to further reduce costs.

The Wi-Fi device can be placed within your office, it can be shared by multiple people, making it more economical than regular Wi-Fi rental services.

(3) Cloud Wi-Fi technology allows a single device to cover more than 100 countries and regions around the world (as of September 1, 2023) with optimized communication.

The service is provided by a cloud-type Wi-Fi router that automatically connects to the local carrier’s network within the area where the device is active.

It automatically selects and connects to the network of Vision’s most suitable partner carrier. This works even in areas with multiple carriers within the country, ensuring the best possible network.

Whether you are on a business trip to multiple countries, transiting, or moving domestically, you will have the best possible internet environment right away so you don’t miss any business opportunities.

(4) “Japan flat rate plan” which can be used on a daily basis in Japan (4G plan, free up to 3GB per month *Flat rate system after that).

A large-volume data network communication is possible for business usage within Japan.

(5) Reliable data communication with large data usage. You’ll be able to choose from unlimited data, 500MB per day, or 1GB per day.

(6) Simple low-price, fixed-rate plans.

Data consumption charges only apply for actual usage days.

(7) “Emergency location information service” is provided as a standard.

We provide an “emergency location information service” to the head of your company.

○ “Emergency location information service”:

A service that allows those who are using “GLOBAL WiFi for Biz” to check their location information and connection time when they are unable to confirm their safety due to a disaster or incident while traveling.

• If traveling overseas, we will provide the head of your company with the whereabouts of your last known location.

• Additionally, we will lift communication usage limits until safety is ensured, providing an environment that is the lifeline of communication.

○ Price: <https://townwifi.com/solution/cloud/>

● Monthly fee
