1. Qualitative Information on Quarterly Financial Results

(1) Explanation of Operating Results

During the nine months ended August 31, 2023, the Japanese economy has been gradually recovering due to the effects of various government policies such as improvement in the employment and income environment. However, it is necessary to mind commodity prices rise, fluctuations in financial and capital markets, and other factors.

Under these circumstances, in the Japanese used car sales industry, domestic used car registrations from December 2022 through August 2023 were 4,482,030 vehicles (up 0.1% year on year). By vehicle type, used car registrations were 2,308,278 vehicles (down 0.6% year on year) for ordinary passenger cars and 2,173,752 vehicles (up 0.9% year on year) for kei-cars for the same period. (Source: statistical data from the Japan Automobile Dealers Association and Japan Light Motor Vehicle and Motorcycle Association.)

Recently, the used car industry has been pointed out by various news reports and other media for events that have been evaluated as inappropriate in the past. We have taken appropriate action in each case to prevent recurrence. However, to gain the trust of our customers and continue to grow, it is important to establish a management system that prevents inappropriate incidents fundamentally.

Considering recent social conditions in the used car industry, we are committed to conducting our business activities with an even greater awareness of compliance and strengthening our internal governance system by managing our business from the perspective of our stakeholders.
