### **Announcement of Sales Launch of New Antibodies/Reagents**

Perseus Proteomics Inc. is pleased to announce the sales launch of new antibodies/reagents below:

- Anti-mAQP4 antibody (for reproducing symptoms of neuromyelitis optica in animal experiments, etc.)
- Anti-DOTA antibody (for measuring DOTA-bound antibodies concentration in blood in animal experiments or clinical trials, etc.)
- Anti-DM1 antibody (for measuring ADC concentration in blood in animal experiments or clinical trials, etc.)

We provide various antibodies/reagents for researchers at academia or companies throughout the world. We hope the expansion of our product lineup, which includes the entire 48 nuclear receptors, will be of help for various research.

We will provide various services to support research activities of academia and companies.
