1. Qualitative information on quarterly financial results

In the third quarter of the previous fiscal year, the Company finalized the provisional accounting treatment for business combinations. The amounts used for the comparison and analysis with the first six months of the previous fiscal year are those that reflect the material revision of the initially allocated amounts of the acquisition costs due to the finalization of the provisional accounting treatment.

(1) Explanation on operating results

In the Japanese economy in the six months ended September 30, 2023, there was a gradual economic recovery trend against the backdrop of COVID-19 being reclassified as a Class V Infectious Disease in May 2023. However, inflation continued together with the weak Japanese yen, and the situation still requires vigilance concerning the impacts due to monetary policies and conflicts overseas, etc.

In the information services industry, interest remains high in systems investments, such as for addressing labor shortages and using digital technologies for automation, streamlining, labor savings, etc., and the trend towards greater use of IT remains strong. [From the "Survey of Selected Service Industries," Ministry of Economy, Trade and Industry, August 2023 (confirmed data)]

In this environment, the Group set "ODK Group expansion" as the basic policy for the medium-term management plan (from the fiscal year ending March 31, 2024 to the fiscal year ending March 31, 2026) and is carrying out various initiatives of "promoting a new business portfolio," "generating group synergies," and "promotion of M&A and alliances," as the priority challenges for the fiscal year.

Concerning the non-consolidated operations, the Company has set "Create new value by strengthening expertise" as the basic policy for the medium-term management plan and has made "Tighten management of individual revenue sources," "Demonstrate consulting capabilities," and "Promote R&D" the priority challenges for the fiscal year.

As specific initiatives for priority challenges for the Group and the Company's non-consolidated operations, we are proceeding with development of various services based on the next-generation solution "Updemy®" to certify experiences utilizing NFTs(*1). As one of those initiatives, the consolidated subsidiary Pottos, Inc. began providing the career experience platform "Career Port." This platform aims to break free from the typical job hunting (short-term, intensive, simultaneous recruiting of new graduates) and promote social implementation of a career experience accumulating type of job hunting. Together with client companies, this platform provides opportunities for students to prepare for their career formation without placing an excessive burden on their schoolwork, and by making their efforts visible through the issuance of experience NFTs, the platform enables the students from their early school years to easily establish contacts with companies.

In addition, amid the promotion of measures to encourage individuals to engage in investment, such as reviewing the new NISA system and improving financial literacy, we refreshed our securities trading services as the "SAKIX" series in preparation for rising systems demand from the financial industry, and began providing "WITH- $X_{\mathbb{R}}$ " (*2), which is a core service within that series, to new users.

While developing UCARO $_{\circledR}$ as a data platform that will serve as a hub that connects the various business domains, the Company has also aimed to expand the volume and types of data stored by strengthening external contact points, enhancing services, etc. Going forward, the Company will continue to create new value through the data business by following growth strategies focused on the services of this site.

In terms of results, net sales increased by 3.4% year on year to \$1,935,058 thousand mainly due to the increase in sales from the "WITH-X®" and "KIZUNA-X®"(*3) securities operations and from cultivating business with existing customers of the subsidiary Fplus,Inc. Operating loss was \$284,316 thousand (operating loss of \$390,937 thousand in the first six months of the previous fiscal year) mainly due to a decrease in retirement benefit expenses and outsourcing expenses as a result of optimizing development and operation systems. Furthermore, ordinary loss was \$270,288 thousand (ordinary loss of \$375,384 thousand in the first six months of the previous fiscal year), and loss attributable to owners of parent was \$203,612 thousand (loss attributable to owners of parent of \$271,942 thousand in the first six months of the previous fiscal year).

As the Group's business has characteristics of a sharp spike in profits from entrance examination operations at universities and other operations in the fourth quarter, sales for the first six months tend to be comparatively small. However, as the fixed costs of personnel expenses, etc. do not change from quarter to quarter, profit/loss for the first six months is at an extremely low level compared with other quarters. In a typical year, a loss is recorded for the first nine months but in the full-fiscal year, that loss is offset by the profit of the fourth quarter.

(*1) NFT:

Abbreviation of Non-Fungible Token. This token is registered on a blockchain to guarantee its uniqueness. It is also possible to verify the ownership and transaction log of the token cryptographically.

(*2) WITH-X_®:

This comprehensive securities system is equipped with functions for work from front-office operations to back-office operations at securities companies, and can be flexibly customized.

(*3) KIZUNA-X_ℝ:

This is an online investment trust transaction and management system for independent financial advisors (IFAs).

The breakdown of net sales is as follows.

Systems operation

Net sales increased by 1.5% year on year to \$1,799,853 thousand mainly due to the increase in sales from the "WITH-X®" and "KIZUNA-X®" securities operations by cultivating business with existing customers and due to sales of the human resources training support business that was transferred in the second quarter of the previous fiscal year.

System development, maintenance

Net sales increased by 43.7% year on year to ¥99,476 thousand mainly due to "KIZUNA-X®"-related development in securities operations.

Machine sales

Net sales increased by 18.1% year on year to \(\frac{1}{2}\)35,728 thousand mainly due to sales of tablet products for medical systems.

(2) Explanation on financial position

Total assets at the end of the second quarter under review were \(\frac{1}{2}\),796,413 thousand, a decrease of \(\frac{1}{2}\)741,470 thousand compared with the end of the previous fiscal year. This was primarily the result of a decrease in trade receivables.

Liabilities were \(\frac{4}{2}\),217,716 thousand, a decrease of \(\frac{4}{5}\)522,932 thousand compared with the end of the previous fiscal year. The decrease was primarily the result of repayments of long-term borrowings.

Net assets were \(\frac{4}{5}\),578,696 thousand, a decrease of \(\frac{4}{2}\)18,537 thousand compared with the end of the previous fiscal year. This was primarily the result of a decrease in retained earnings.

(3) Explanation on consolidated earnings forecasts and other forward-looking statements

Financial results in the first six months of the current fiscal year were substantially as originally expected, and there is no change in the full-year consolidated earnings forecast from the forecast figures announced on April 28, 2023.

Material revision of the initially allocated amounts of the acquisition costs in comparative information

Regarding the business acquired from Kushim Inc. on July 1, 2022, although provisional accounting treatment was applied in the second quarter of the previous fiscal year, the provisional accounting treatment was finalized in the third quarter of the previous fiscal year.

In accordance with the finalization of the provisional accounting treatment, the comparative information included in the quarterly consolidated financial statements for the first six months of the current fiscal year reflects the material revision of the initially allocated amounts of the acquisition costs.

As a result of finalizing the accounting treatment, the final calculation for goodwill amounted to \$41,083 thousand, which was a decrease of \$70,114 thousand from the provisional calculation of \$111,197 thousand. In addition, customer-related intangible assets increased by \$101,000 thousand and deferred tax liabilities increased by \$30,885 thousand.

The impact on the quarterly consolidated statement of income for the six months ended September 30, 2022 was immaterial.
