Signing of LumiFree Business Partnership with GRE Alpha Electronics **~ Expand LumiFree Power Supplies and Accessories to Drive Growth ~**

JDI has entered into a LumiFree business partnership with GRE Alpha Electronics, Ltd. ("GRE Alpha"), a designer and manufacturer of power supplies and lighting control accessories for LED lighting fixtures.

1. Background of Partnership Agreement

JDI's LumiFree is the world's first LED lighting technology that makes it possible to control the light distribution characteristics of LED lighting, and has been in mass production since July 2023. Since its launch, LumiFree has received high acclaim in Japan and across the world.

The partnership aims to further expand the use of LumiFree in lighting applications by having GRE Alpha extend its lineup of LED lighting fixture power supplies and lighting control accessories to be compatible with LumiFree.

Through this partnership, GRE Alpha and JDI will provide support to customers and drive higher value through LumiFree's advanced light distribution control.

2. Overview of Partnership Agreement

Expand the scope of GRE Alpha's LumiFree compatible products by:

- (1) Development and sales of dimming modules that allow simultaneous control of LEDs and LumiFree
- (2) Development and sales of interface products for use of LumiFree in existing lighting control systems

3. About GRE Alpha

Founded in 1989 and headquartered in Hong Kong, GRE Alpha is a manufacturer of power supplies, dimming modules, and other accessories for LEDs. With its unique state-of-the-art technology in LED lighting, GRE Alpha offers the global market the best, most efficient, and highest performance solutions for LED lighting systems. All GRE Alpha LED drivers are centrally wired to each compartment to facilitate easy on-site installation and enable significant cost savings.

The dimming module enables connection to power supplies from various companies, making it possible to realize highly reliable lighting systems that are compatible with dimming systems from around the world. The components used are of the highest quality and the transformers are manufactured in-house to ensure consistent high performance and quality.
