Revisions to the Consolidated Business Forecast for the Second Quarter Ended September 30, 2013

KITO CORPORATION revises as follows its business forecast for the six months ended September 30, 2013, announced on May 13, 2013.

1. Revisions to the consolidated business forecast

Difference between the previous forecast and the revised forecast for the six months ended September 30, 2013
(April 1, 2013 through September 30, 2013)

	Net sales	Operating income	Ordinary income	Net income	Net income per share
	Million yen	Million yen	Million yen	Million yen	yen
Previously announced forecast (A)	18,000	1,000	800	400	30.96
Revised forecast (B)	17,650	1,160	1,200	740	57.27
Increase/decrease (B-A)	(350)	160	400	340	
Percentage change (%)	(1.9)	16.0	50.0	85.0	
(Ref.) Previous 2Q results (Six months ended September 30, 2012)	16,005	748	621	275	21.42

(Note) Effective April 1, 2013, KITO conducted a 100-for-1 stock split of its common stock. Accordingly, net income per share is calculated on the assumption that the stock split was completed at the beginning of the previous fiscal year.

2. Reasons for the revision

Regarding the performance for the six months ended September 30, 2013, though businesses in Japan still remain cautious about capital spending, weaker Japanese yen boosted our overall business results. Operating income, ordinary income and net income are expected to exceed the previous forecast, with net sales slightly short of the forecast.

KITO CORPORATION has not revised its full year consolidated business forecasts at this time because of current economic trends and market conditions. If, in light of future market conditions, it is determined that revisions are necessary, announcements thereof shall be made immediately..

(Note) The above forecast is based on information that is currently available. Actual results may differ from this forecast due to various factors.
