

**Company presentation for major business plan
of the Fiscal Year ending March 31, 2015**

**Our approach to
IoT & GNSS solution**

CORE CORPORATION

September 9, 2014

This English text is a translation of the Japanese original. The Japanese Original is authoritative.

I Business environment

Major financial figures

Major financial figures (FY2010-FY2014)		Results				Plan
		FY2010	FY2011	FY2012	FY2013	
Sales amount	(1M¥)	20,580	20,629	20,007	19,358	22,000
Operating profit	(1M¥)	908	737	731	333	1,000
Current profit	(1M¥)	1,058	862	754	341	1,000
Net profit	(1M¥)	561	410	514	221	620
Total assets	(1M¥)	14,529	14,458	15,052	14,753	14,980
Net assets	(1M¥)	7,452	7,575	7,916	7,372	7,830
Sales growth		1.3%	0.2%	▲3.0%	▲3.2%	13.6%
operating profit on sales		4.4%	3.6%	3.7%	1.7%	5.0%
Return on assets		6.2%	5.1%	4.9%	2.3%	7.3%
Return on equity		7.5%	5.4%	6.5%	3.0%	8.3%
Earning per stock (¥)		39.51	28.85	36.24	16.00	45.39

Common issues which lies in IT service industry

IT service industry is in a transition from labor-intensive business to **knowledge-intensive business**

Aging of the IT engineer

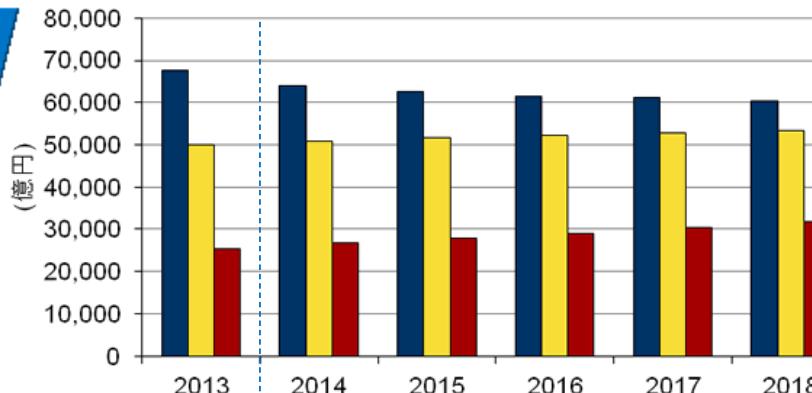

Every IT engineer has to optimize **OSS** and standardization for efficient software development.

From ownership (organic system) to use (**cloud service**)

Domestic IT vendors are confronted with **global competition**.

IT service industry at the turning point

Domestic IT market forecast 2013-2018

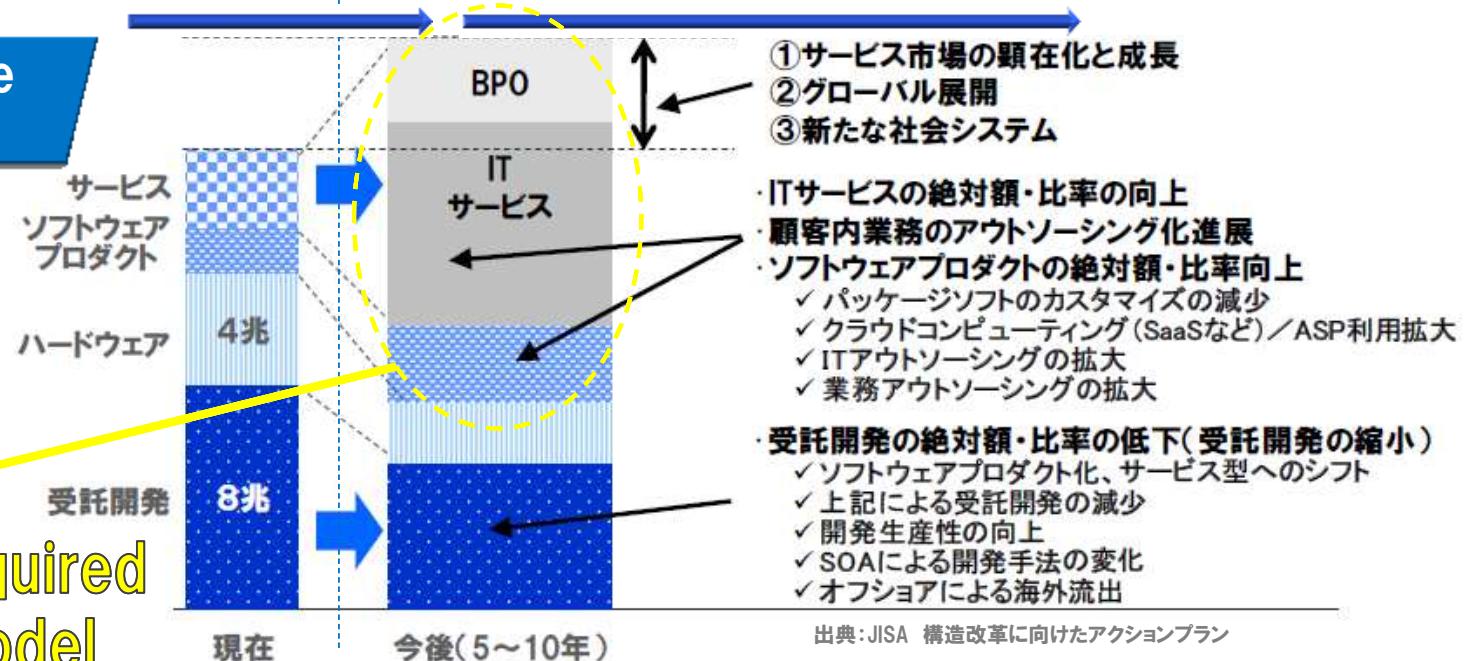

- Hardware
- IT service
- Software

Note: 2013年は実績値、2014年以降は予測
出典:IDC Japan, 5/2014

Existing market is shrinking, structural reform is needed

Structural reform image of IT service market

Each vendor is required
new business model

Our basic strategy

Linkage strategy(3rd)

FY2015

From product-out to market-out

Sales amount **22 billion (¥)**

Operating profit **1 billion (¥)**

SI business strategy

Proposal-based business

Target

**Medical service,
In-vehicle (ECU,infotainment)**

Main product

Proposal-based SI > Software engineering service

Solution business strategy

Problem solution type business

Target

**Government and municipal offices,
Agriculture, Social infrastructure**

Main product

Cloud service, IoT/M2M, GNSS

The aim of our new business domain

Scale(sales)

Existing business mainly

Proposal-based & problem
solution type business mainly

FY2016
30 billion¥

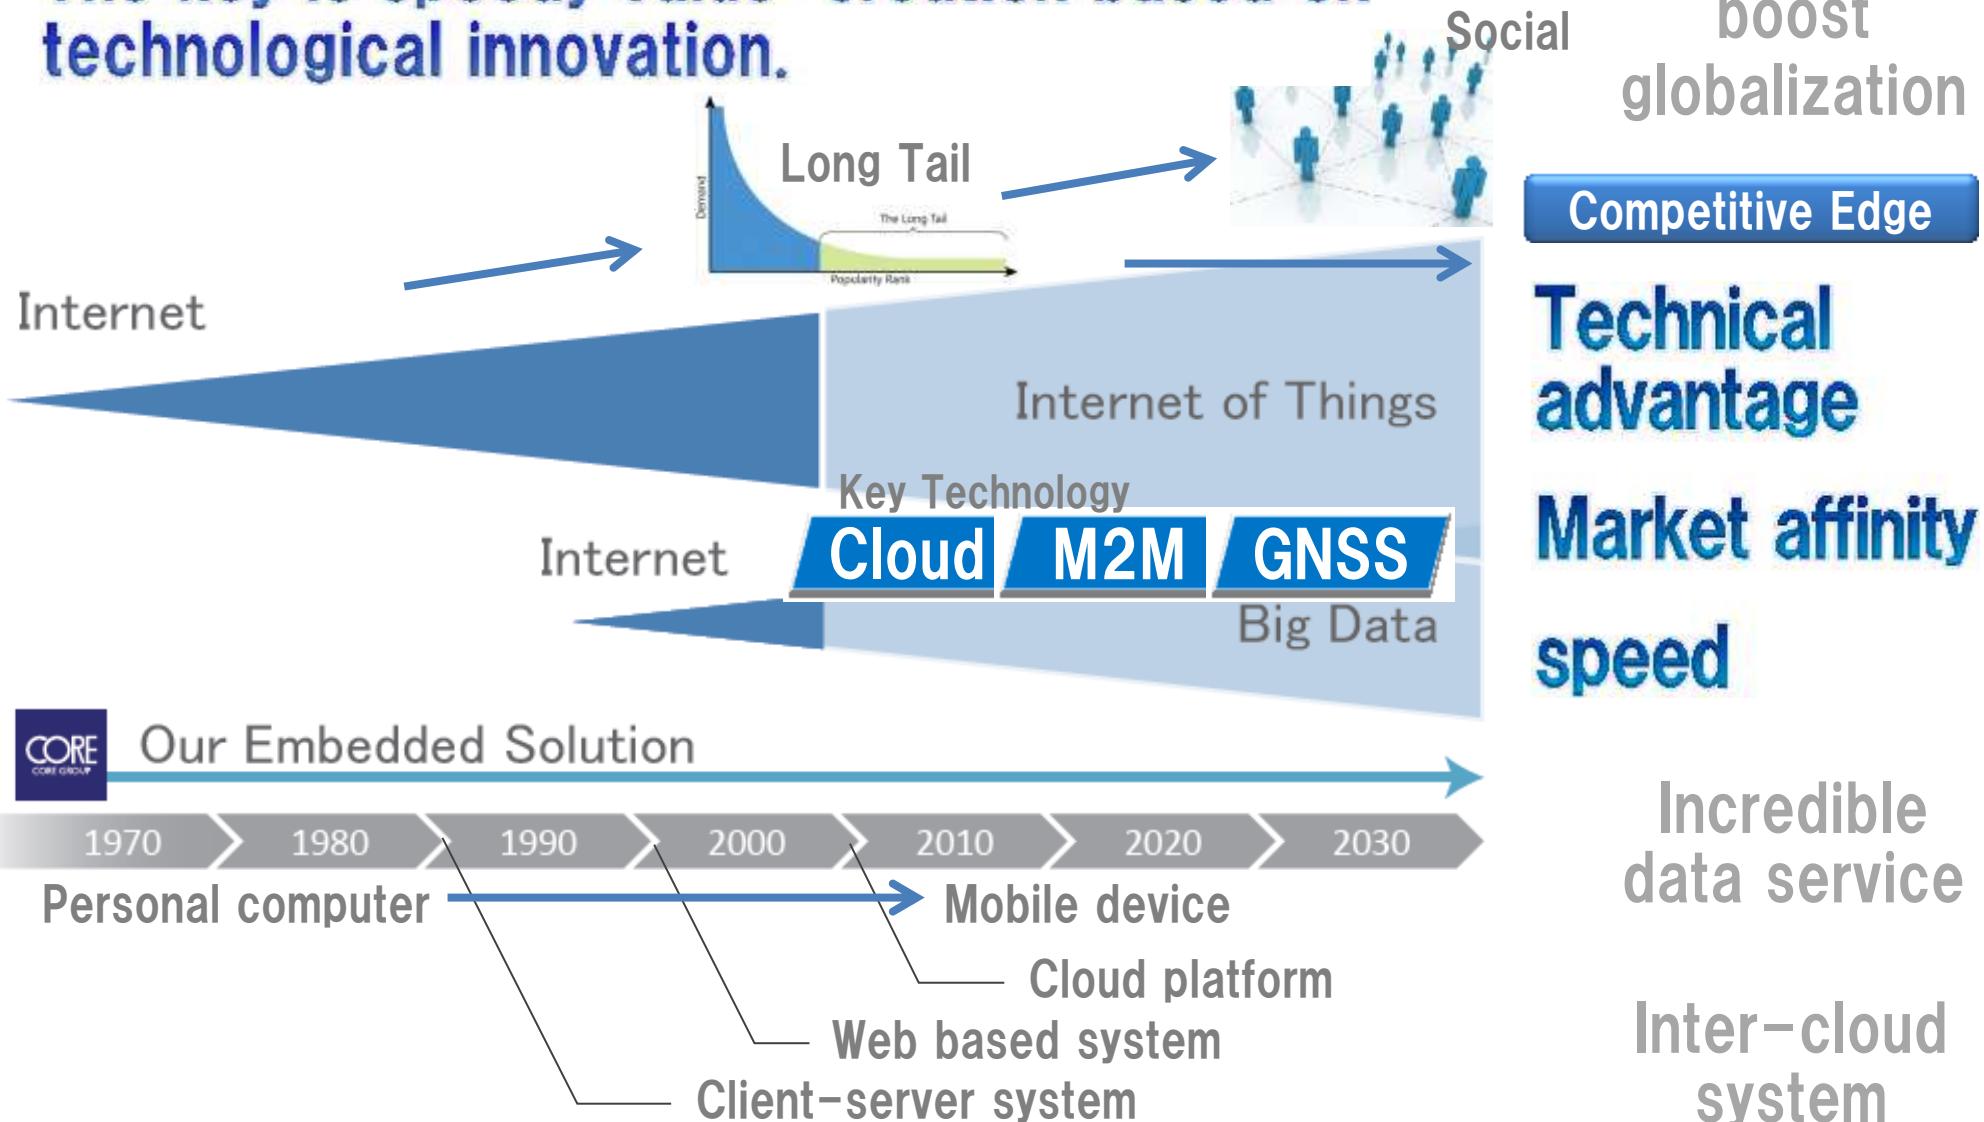

Key Activities

- IoT/M2M business expansion based on embedded technology
- GNSS business development based on R&D assets for 8 years

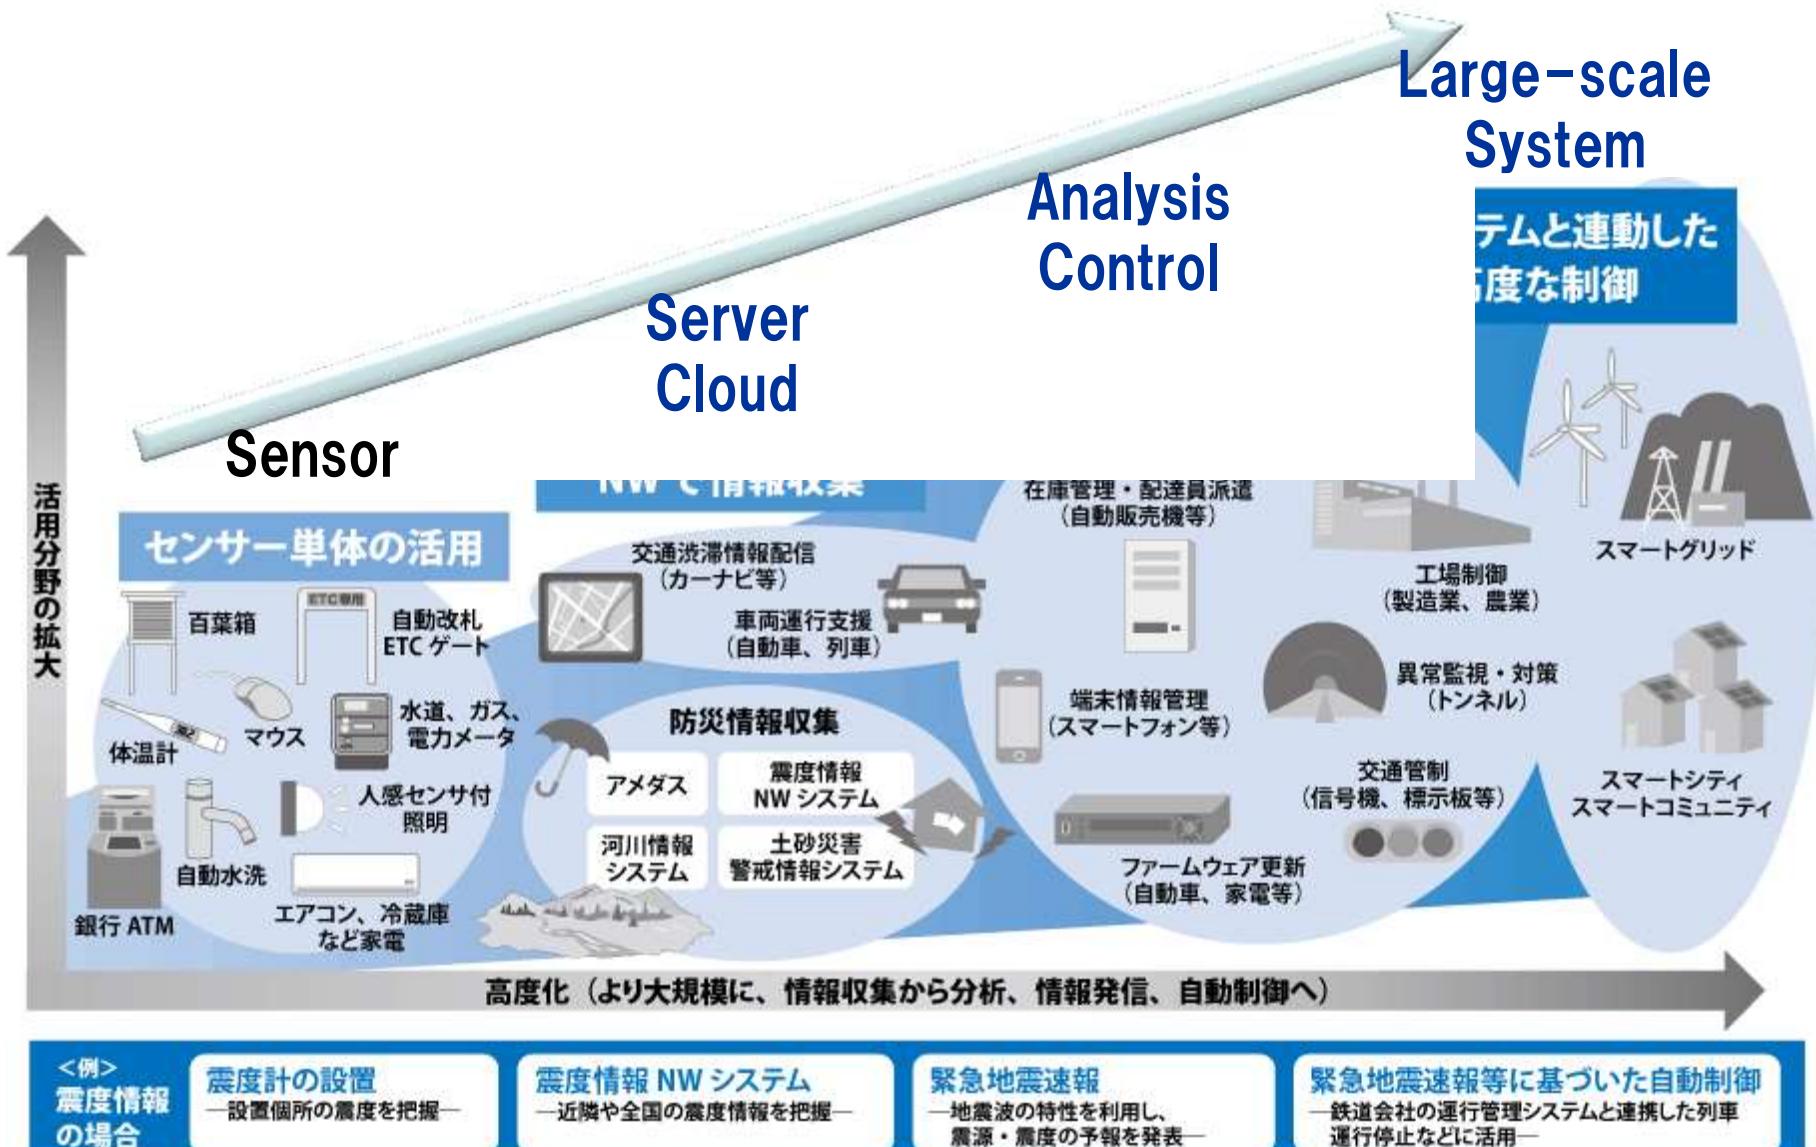

Market Potential

The key is speedy value-creation based on technological innovation.

II 2-pronged Strategy

About the Internet of Things / Machine to Machine

Ministry of Internal Affairs and Communications, Japan, "Council on urban development and global expansion using ICT", 2012.

Major business lines are changing into new lines just now

Transition table of sales & R&D cost for original product

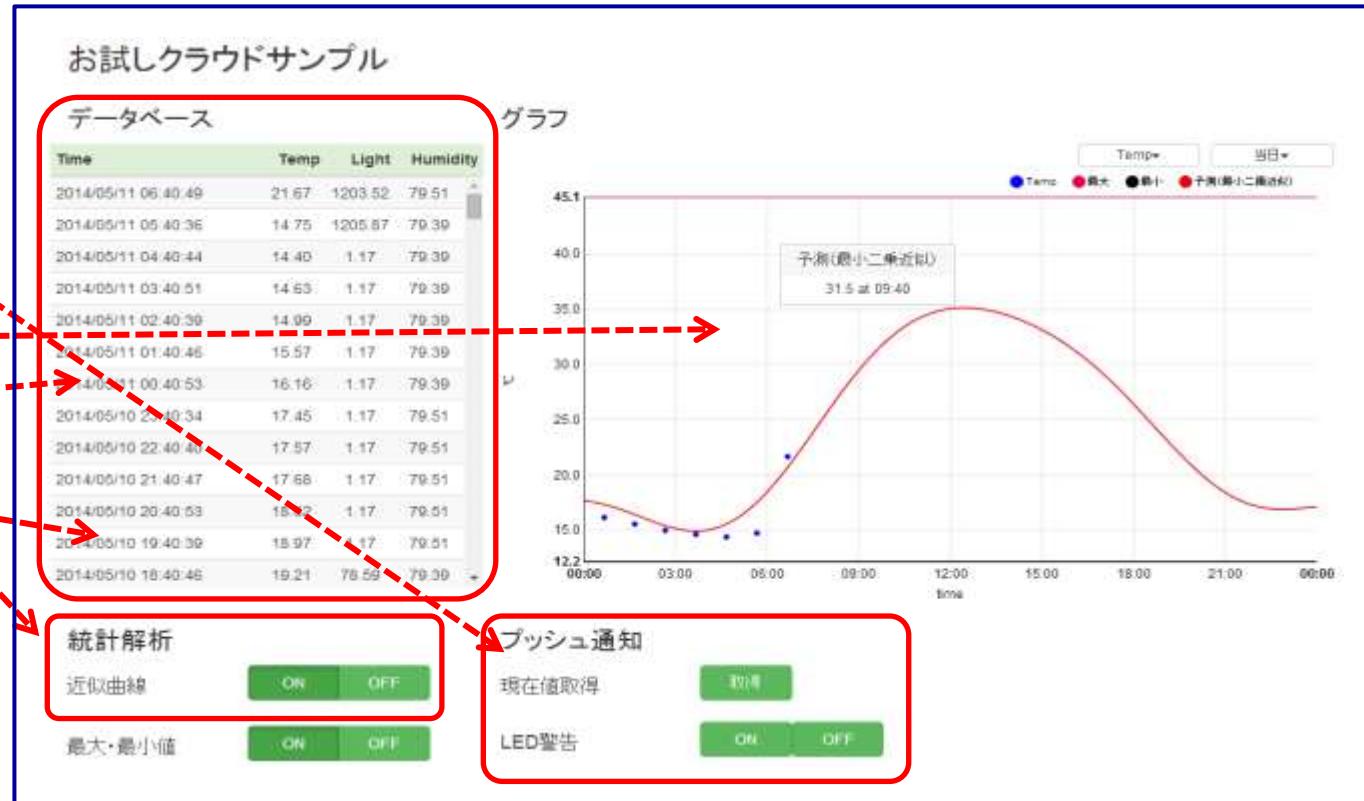

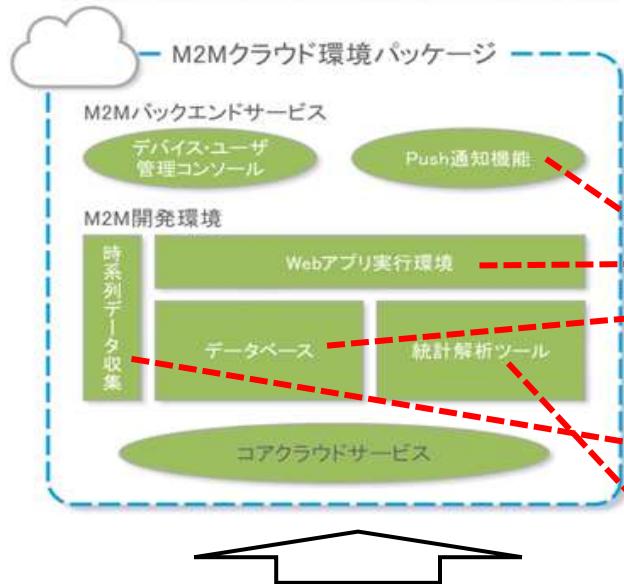

(1 million yen)

	FY2004	FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011	FY2012	FY2013
Sales amount (former product solution business)	2,479	2,775	3,873	4,351	4,291	4,359	4,443	4,433	3,516	3,598
IT Asset management & PLM solution	1,162	1,164	964	974	1,028	834	930	922	926	521
Development support tool	850	916	1,091	991	780	754	1,192	850	666	646
Telop system	-	-	897	1,307	1,511	1,847	1,629	1,916	1,249	1,746
Others	467	694	921	1,078	971	922	690	743	674	683
R&D expenses	42	71	319	242	515	469	387	458	441	256
GPS・GNSS	-	37	110	63	98	46	33	44	42	35
IoT/M2M Device (ASURA Series, etc)	-	-	6	11	22	7	4	10	4	10
IoT/M2M Platform (ReviveTally, etc)	-	-	-	-	-	-	23	40	24	10
Cloud Platform	-	-	-	-	-	-	19	39	24	14
Others	42	34	203	168	395	416	308	325	347	187

M2M Cloud Platform “ReviveTally”

ReviveTally provides a set of development environment for M2M.

M2M Cloud Package

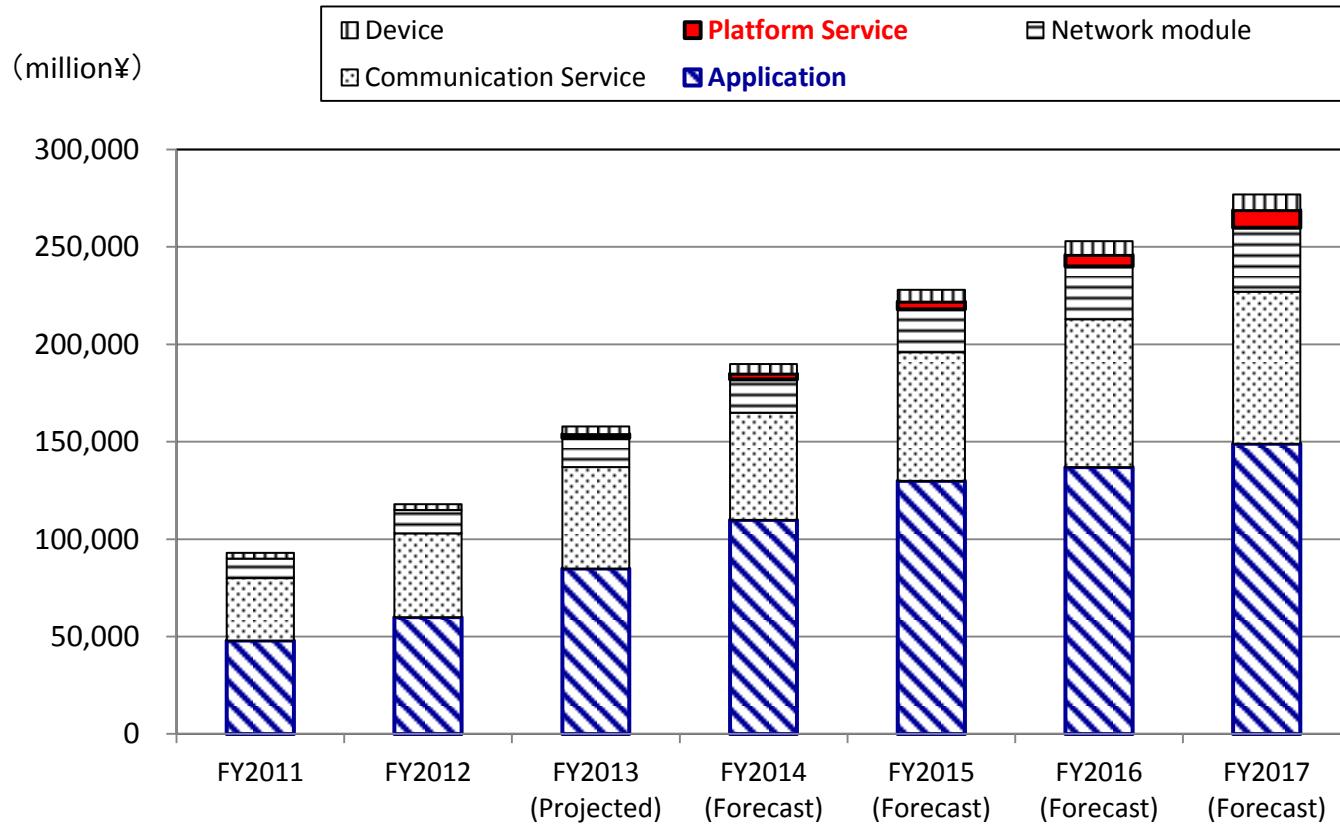

《Open Source Software》
fluentd, Mongo DB, R,
Python+Django etc.

Cloud's scalability makes it ease to handle time-series data of IoT.

IoT Business Strategy

Sales of **applications** is estimated to account for more than half in IoT market.

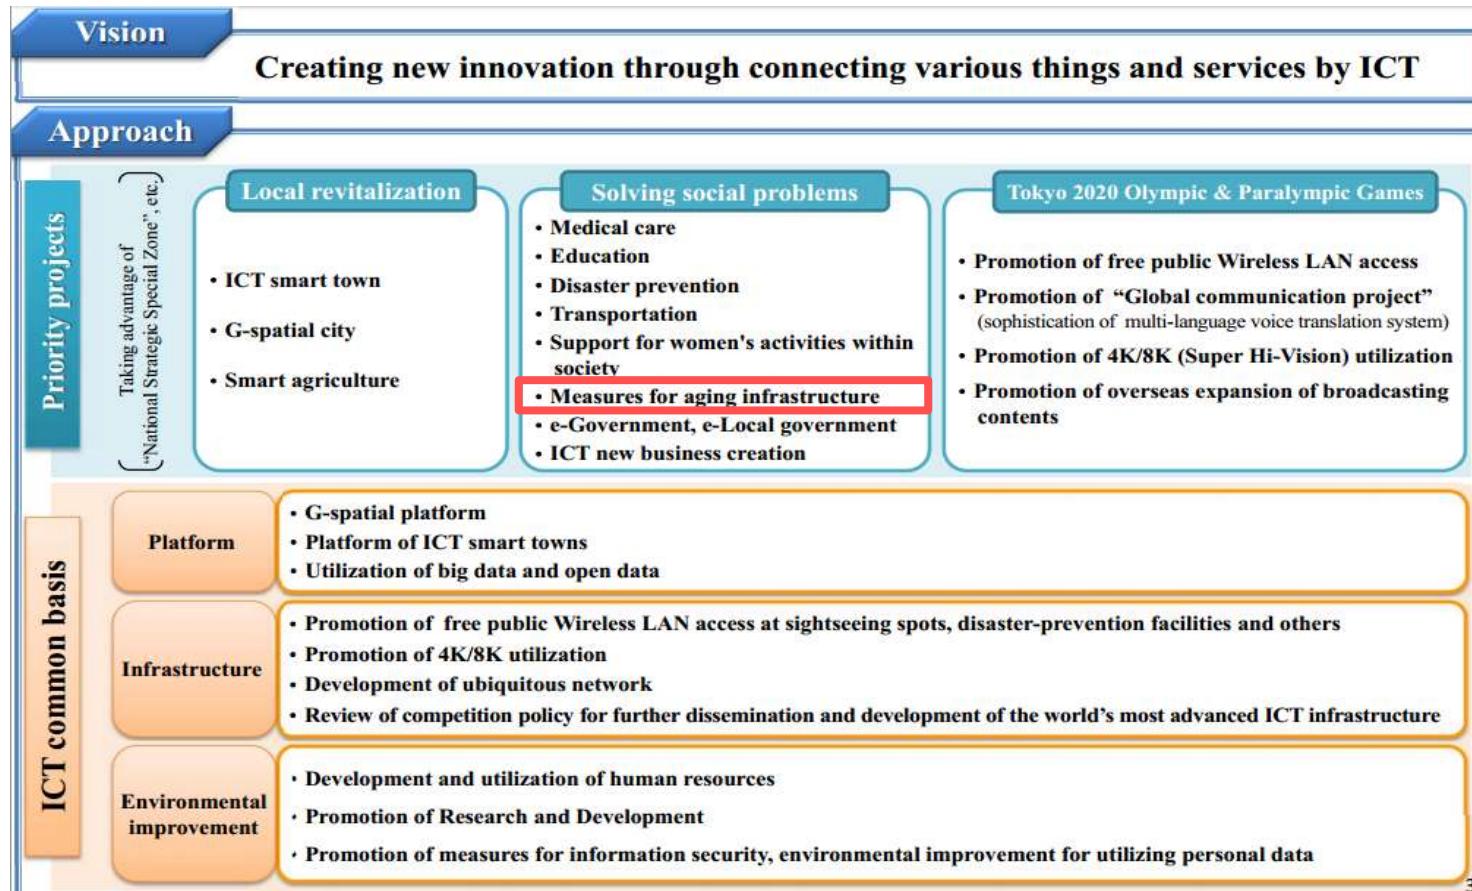

Fuji Keizai Management Co., Ltd.,
“M2M-related market in Japan”,
Market Data 102, June 2014.

Low-cost M2M platform makes customers to try M2M easily and leads their **M2M applications** to our M2M platform.

Japan ICT Growth Strategy

One of the most promising IoT markets is **structural monitoring**.

Ministry of Internal Affairs and Communications, Japan,
“Smart Japan ICT Strategy”, June 2014.

Japanese government declares 20% of infrastructures sensor-equipped until 2020 in “Declaration to be the World’s Most Advanced IT Nation”.

Earthquake & Structural Monitoring

Earthquake and structural monitoring gets much attention.
 (due to [The Great East Japan Earthquake](#) and [Sasago tunnel accident](#))

1999年8月 山陽新幹線の福岡トンネルでコンクリート片が落ち、列車を直撃

2002年4月 首都高速道路の八重洲トンネルでタイルが剥がれ、車両に被害

2006年8月 広島県営水道の送水トンネルで岩盤が崩落

2007年6月 国道23号線の木曾川大橋で横けたをつる部材が破断

2008年10月 千葉県君津市の君津新橋で横けたをつる部材が破損

2009年7月 沖縄県国頭村の辺野古橋が崩落

2010年12月 長崎県長崎市の県道下の水道管が破損し、約50mにわたって冠水

2012年12月 中央自動車道の箕子トンネルで天井板が崩落

2013年2月 静岡県浜松市の第一井天橋でケーブルが破断

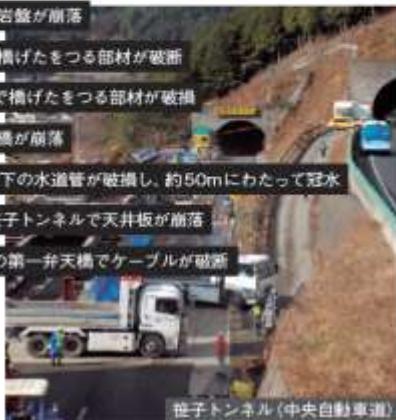

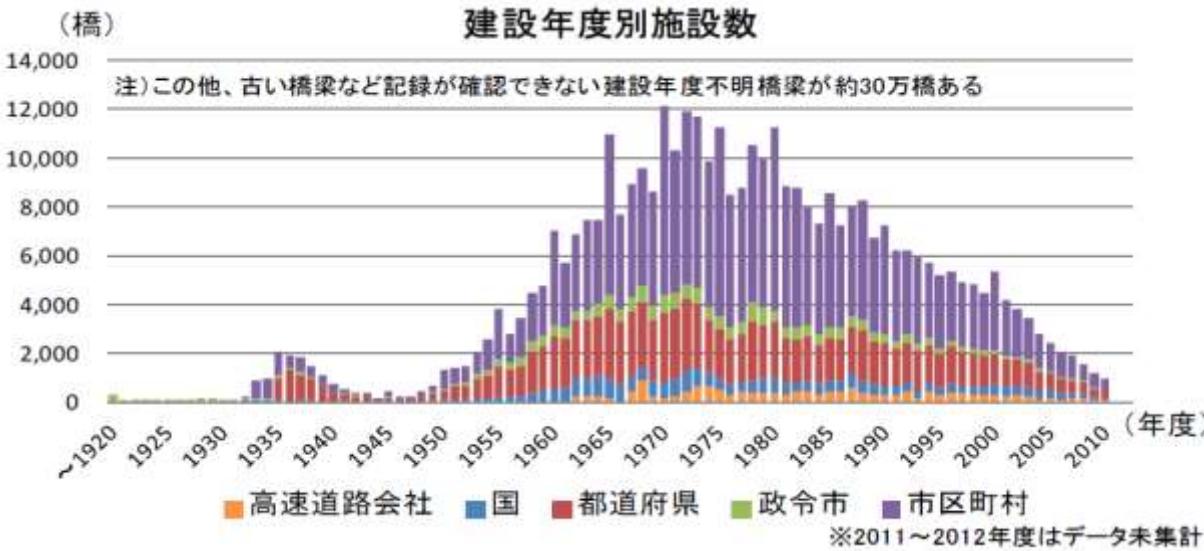

図1 トンネルが崩れ、橋が切れる

日本全国のトンネルや橋が壊れる事故が相次いでいる。主な原因是インフラの老朽化。(写真:第一井天橋は国土交通省中部地方整備局、箕子トンネルは日経コンストラクション)

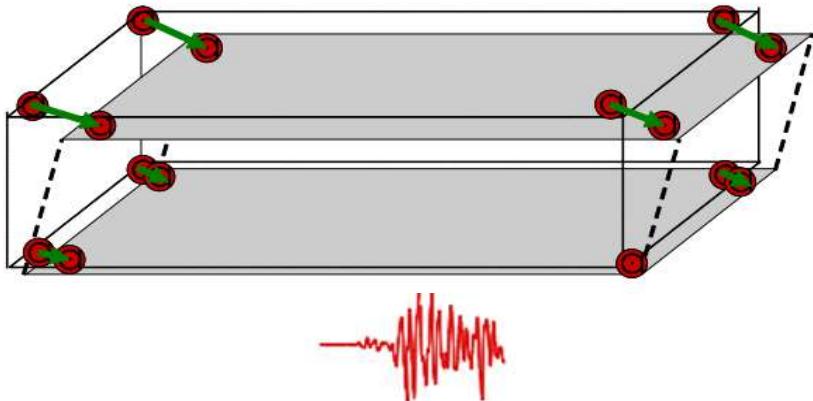

- A lot of infrastructures mark **50 years** because they are built during the period of rapid economic growth around 1970.
- Bridge and Tunnel Monitoring Market is estimated to grow **88.4 billion yen** in 2022.

High-Precision Time Synchronization

Fine-grained analysis requires high-precision timestamp. ($\leq 10\text{ms}$)

-> Chip-Scale Atomic Clock-equipped sensor board

Chip-Scale Atomic Clock (CSAC)

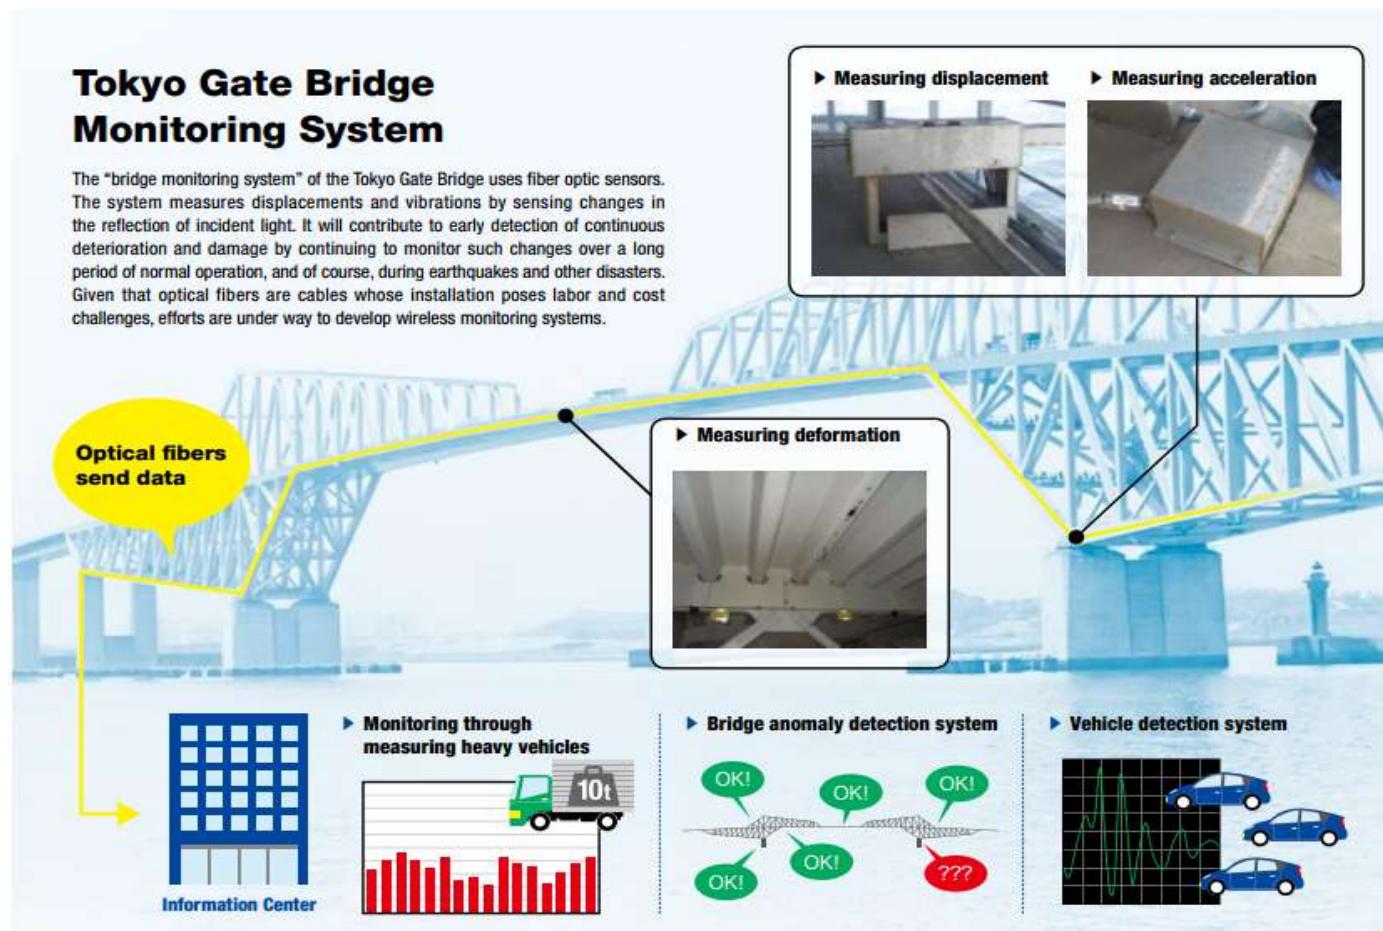

- 2001 DARPA project started
- 2004 Nature article
- 2011 Symmetricom's product

Our embedded technology realizes effective hardware-architecture for CSAC's high-resolution timestamp.

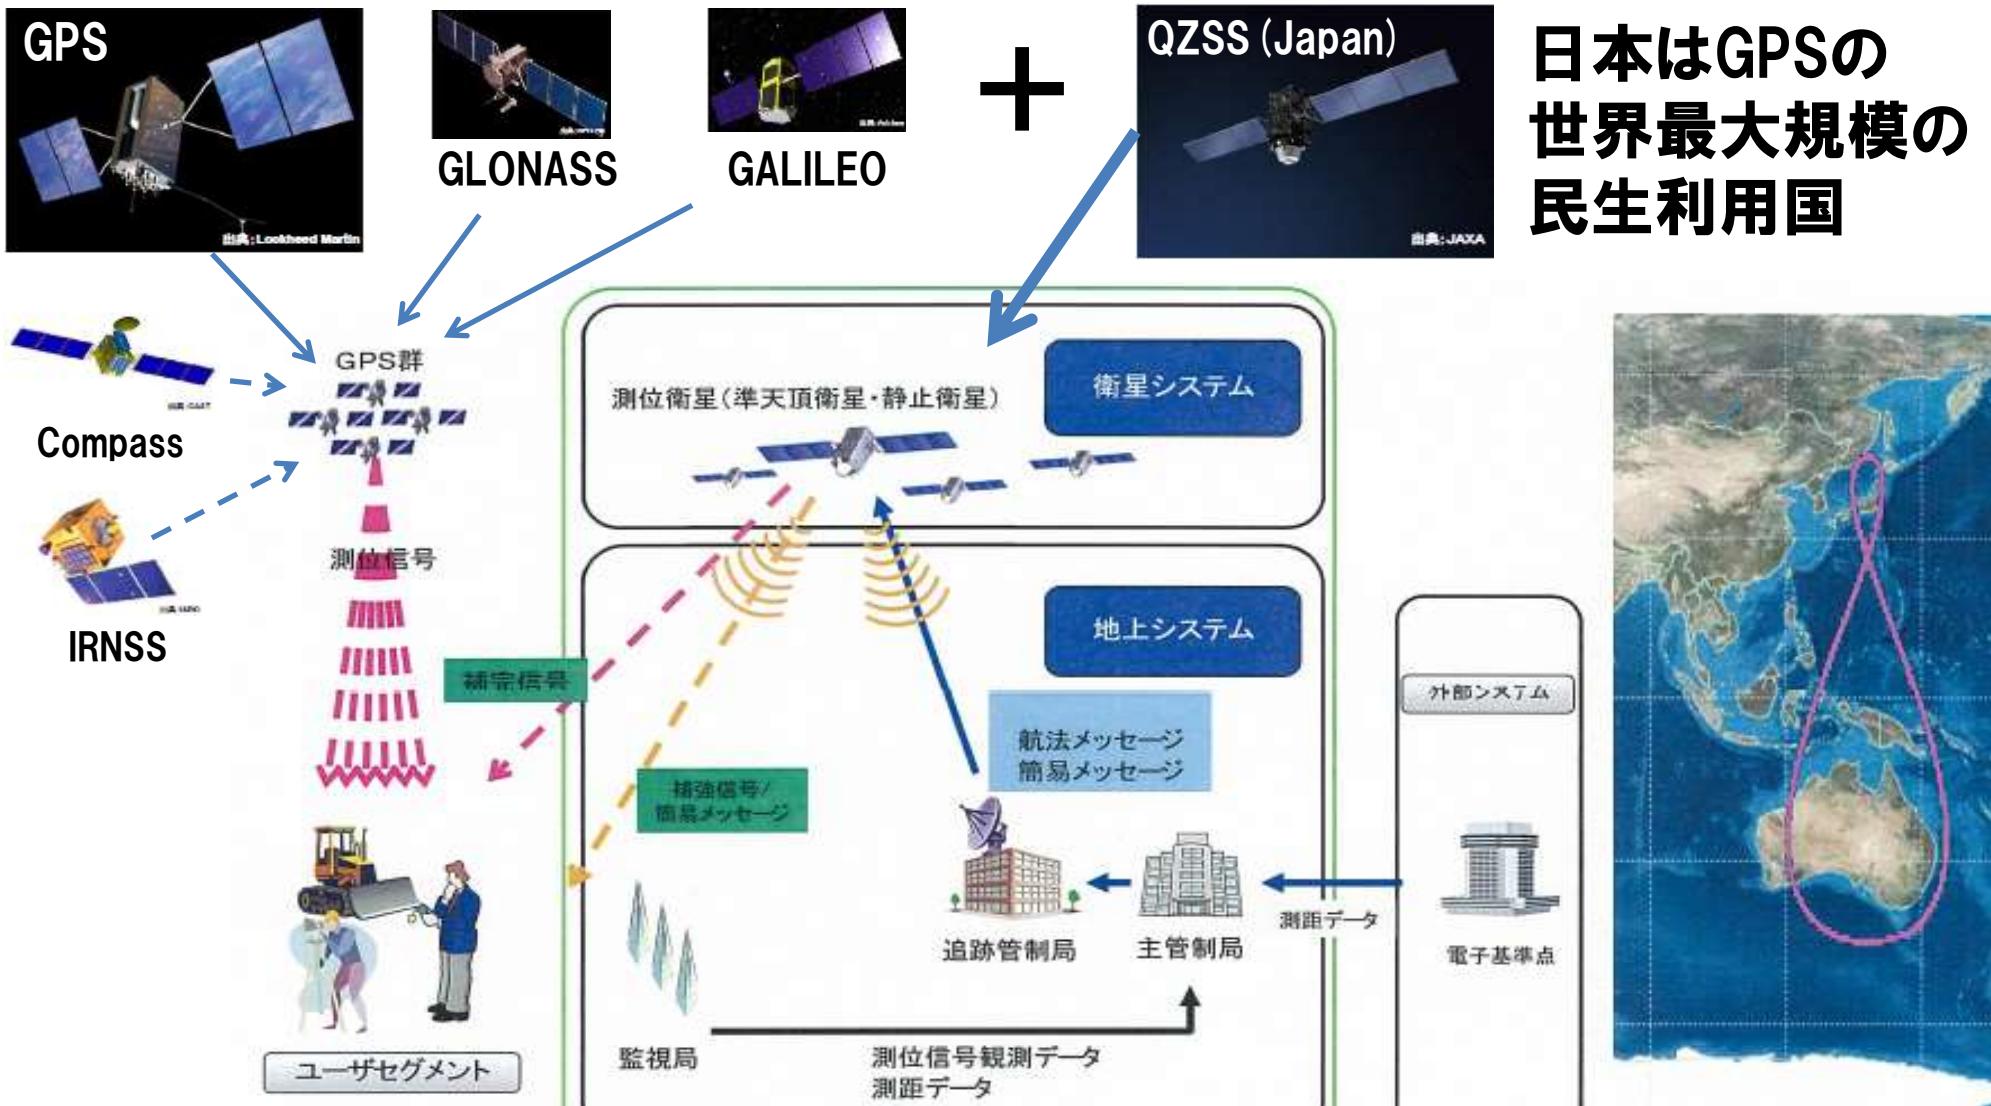

Structural Monitoring with M2M cloud

Gather sensor data from CSAC board and analyze structure vibration on M2M platform.

Ministry of Economy, Trade and Industry, Japan, "Sensors – Answering the Call !", METI Journal, July 2013.

Shift from GPS to GNSS

日本はGPSの
世界最大規模の
民生利用国

GNSS (Global Navigation Satellite System)

GNSS Service centering on QZSS

QZSS characteristics

サービス	みちびき	2号機～4号機	主な機能概要
	○	○	GPSと互換性のある測位補完信号を提供
測位補強サービス	○	○	衛星測位の補強信号として、L帯でサブメータ級測位補強信号を提供する機能。
簡易メッセージサービス	○	○	衛星測位の補強信号として、L帯でセンチブメータ級測位補強信号を提供する機能。
メッセージ通信サービス	○	○	災害発生時の緊急時に、国と協議の上定めた外部機関からの情報に基づき、津波情報、避難情報等の簡易メッセージを個人携帯端末等の汎用ユーザ端末に配信する機能。
	/A	○	大規模災害時に、被災者が近親者との間で安否確認を行うと共に、被災情報を災害対策のために関係の行政機関等に提供する機能。

出典：「準天頂衛星システムの衛星開発事業」の計画概要(2013年5月15日)より

SDS I 1
QZNAV **正確な位置/時刻情報の補足/保証**

LEX
(開発中) **正確な機器の自動制御が可能**

Development History

Our technological results accelerate the development and deployment for industrial applications, autonomous driving, and more.

User	Field	Product	Status
Private	Satellite	低軌道衛星用GPS受信機ファーム開発。	Complete
Private	Automobile	2周波ソフトウェア受信機(E1+E5a)開発。	Complete
Private	Automobile	2周波ソフトウェア受信機(L1+L5)開発。	Under Development
Private	Automobile	準天頂衛星利用実証用LEX受信機(MADOCA方式)開発。	Under Development
Private	Automobile	cm測位演算処理エンジンRTKLIBの組込みソフト開発。	Under Development
Private	Robot	cm測位演算処理エンジンRTKLIB+慣性航法によるロボット走行制御。	Under Development
Public/ Private	Satellite	準天頂衛星利用実証用2周波受信機開発。 準天頂衛星利用実証用LEX受信機(CMAS方式)開発。	Under Development
Public	Agriculture	cm精密測位による精密農業の実現。 準天頂衛星利用実証用LEX受信機(MADOCA方式)+ 2周波受信機開発。	Under Development

Precision Agriculture

JAXA

CORE
CORE GROUP

準天頂衛星を用いた精密測位技術

- 複数GNSSによる周囲環境によらない安定的な精密測位
- 1台の受信機だけで精密測位が可能(基準局が不要)
- ユーザ側は通信回線が不要で国内外どこでも利用できる

CORE

低成本な受信機プロトタイプの開発

- 準天頂衛星からの精密測位用信号も受信可能な現在の受信機は、すべての測位信号に対応したフルスペック機種で非常に高価。
- 取り扱う測位信号および補正情報を農業機械の自動制御に必要なものに絞ることによって、受信機能・演算機能を簡素化し、コストダウンを図る。

安定した精密な位置情報を農業機械の自動制御に応用

概念図

準天頂衛星の利用

精密な測位に必要な補正情報を天頂付近から直接配信

従来方式※と比べ、基準局の設置や携帯通信網が不要

※従来方式: 基準局での受信データを用いたRTK-GPSや、携帯通信網経由の有料補正情報配信サービスを利用した仮想基準局(VRS)方式による相対測位

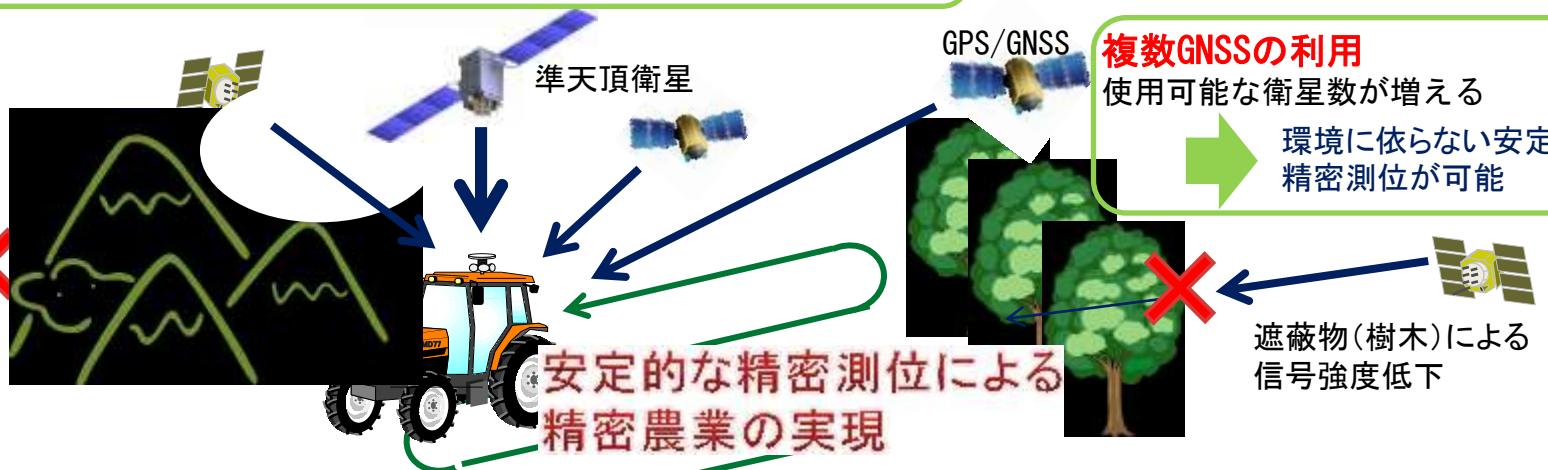

複数GNSSの利用

使用可能な衛星数が増える

環境に依らない安定的な精密測位が可能

低仰角/遮蔽物による
信号遮断
※測位には4機以上の
衛星が必要

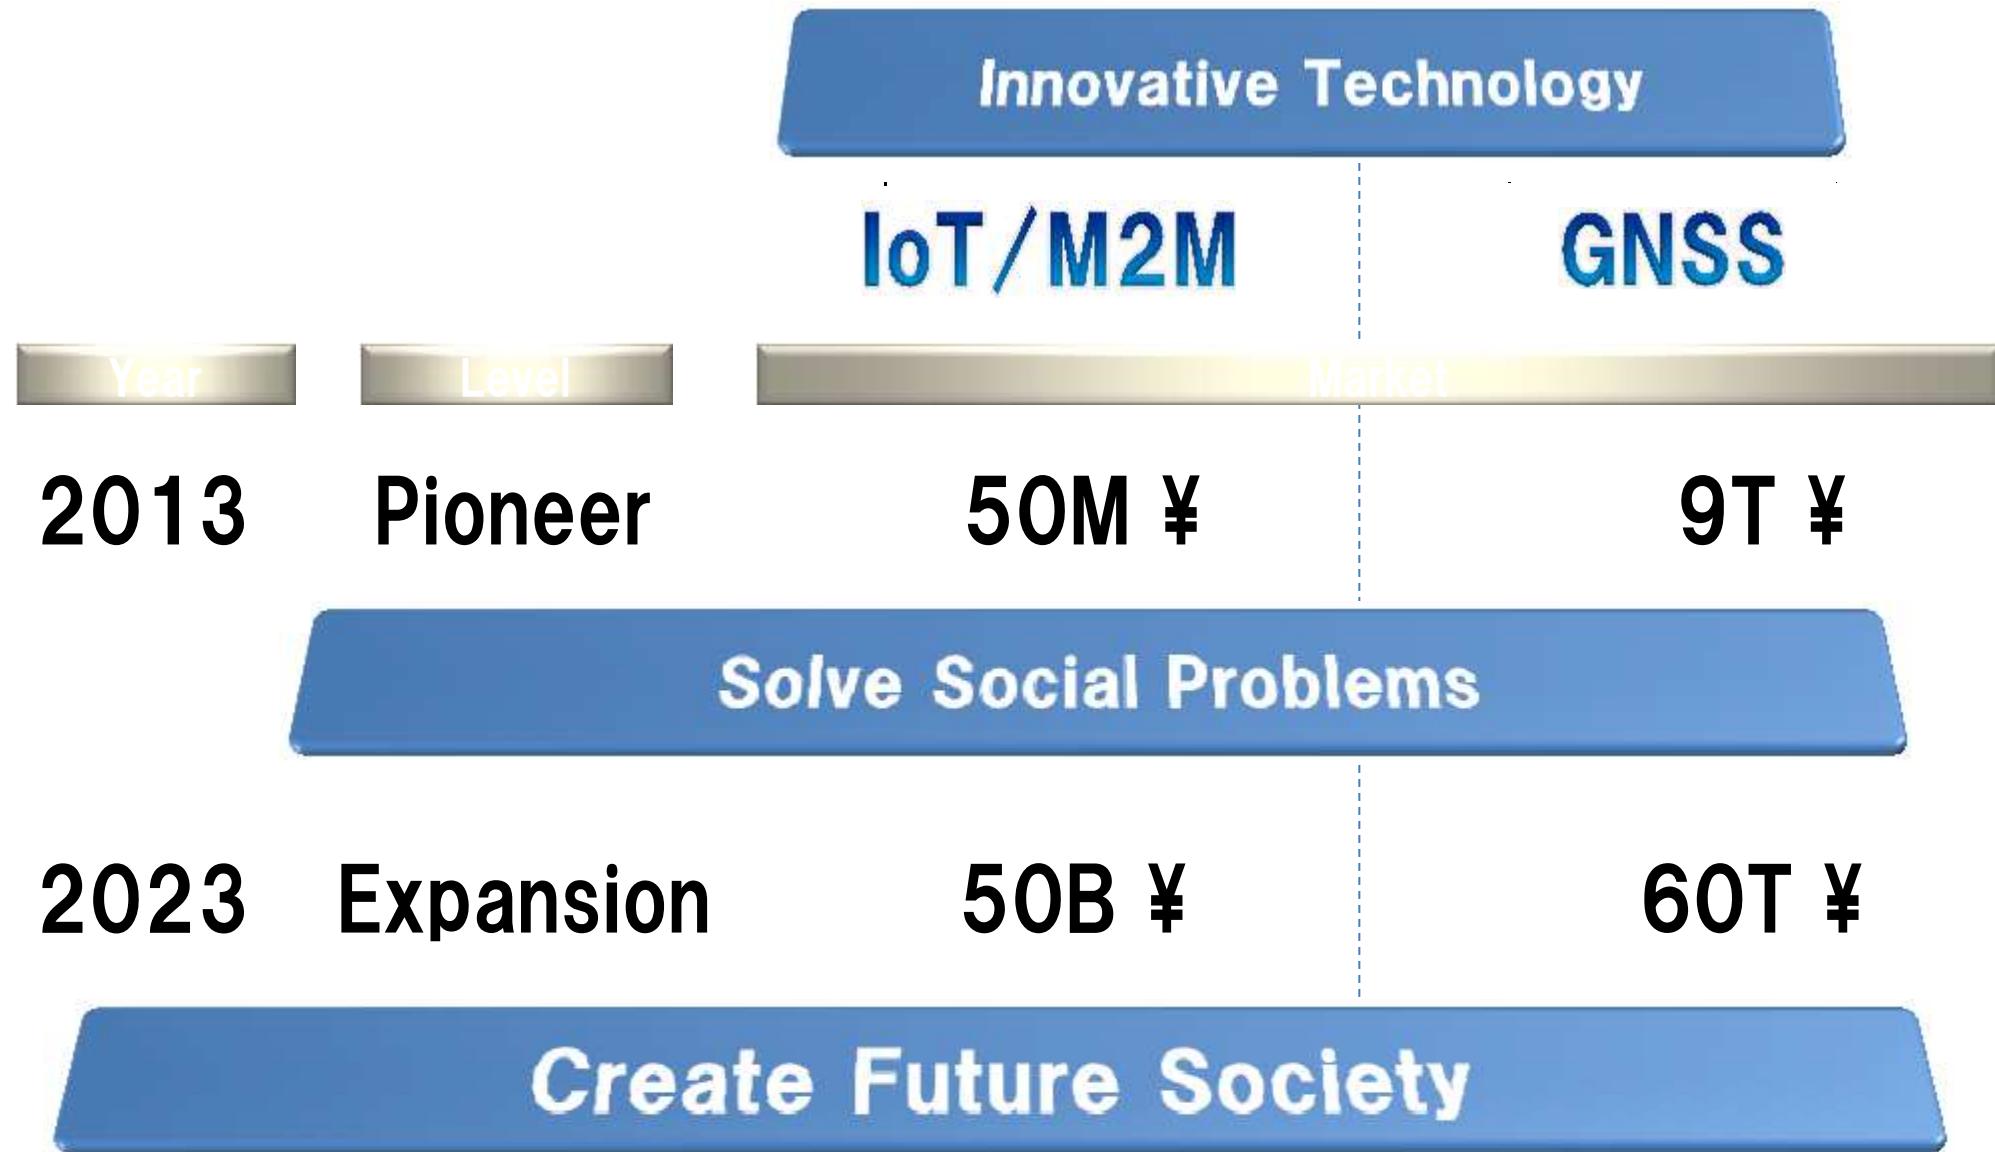

Smart City

Structure monitoring and GNSS are considered key technologies for Smart City.

Our Goal

Summary

Our IoT/M2M and GNSS solutions are based on advanced and leading edge of core technology.

Our flexible application platform and expertise will lead customer's business to success.

Our business aims to a new ICT services that focus on the creation of the next society and industry.

Appendix

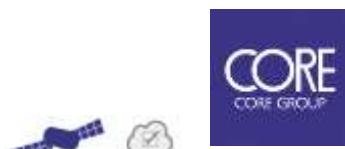

IOT X GNSS

IoT/M2M Solution & Service

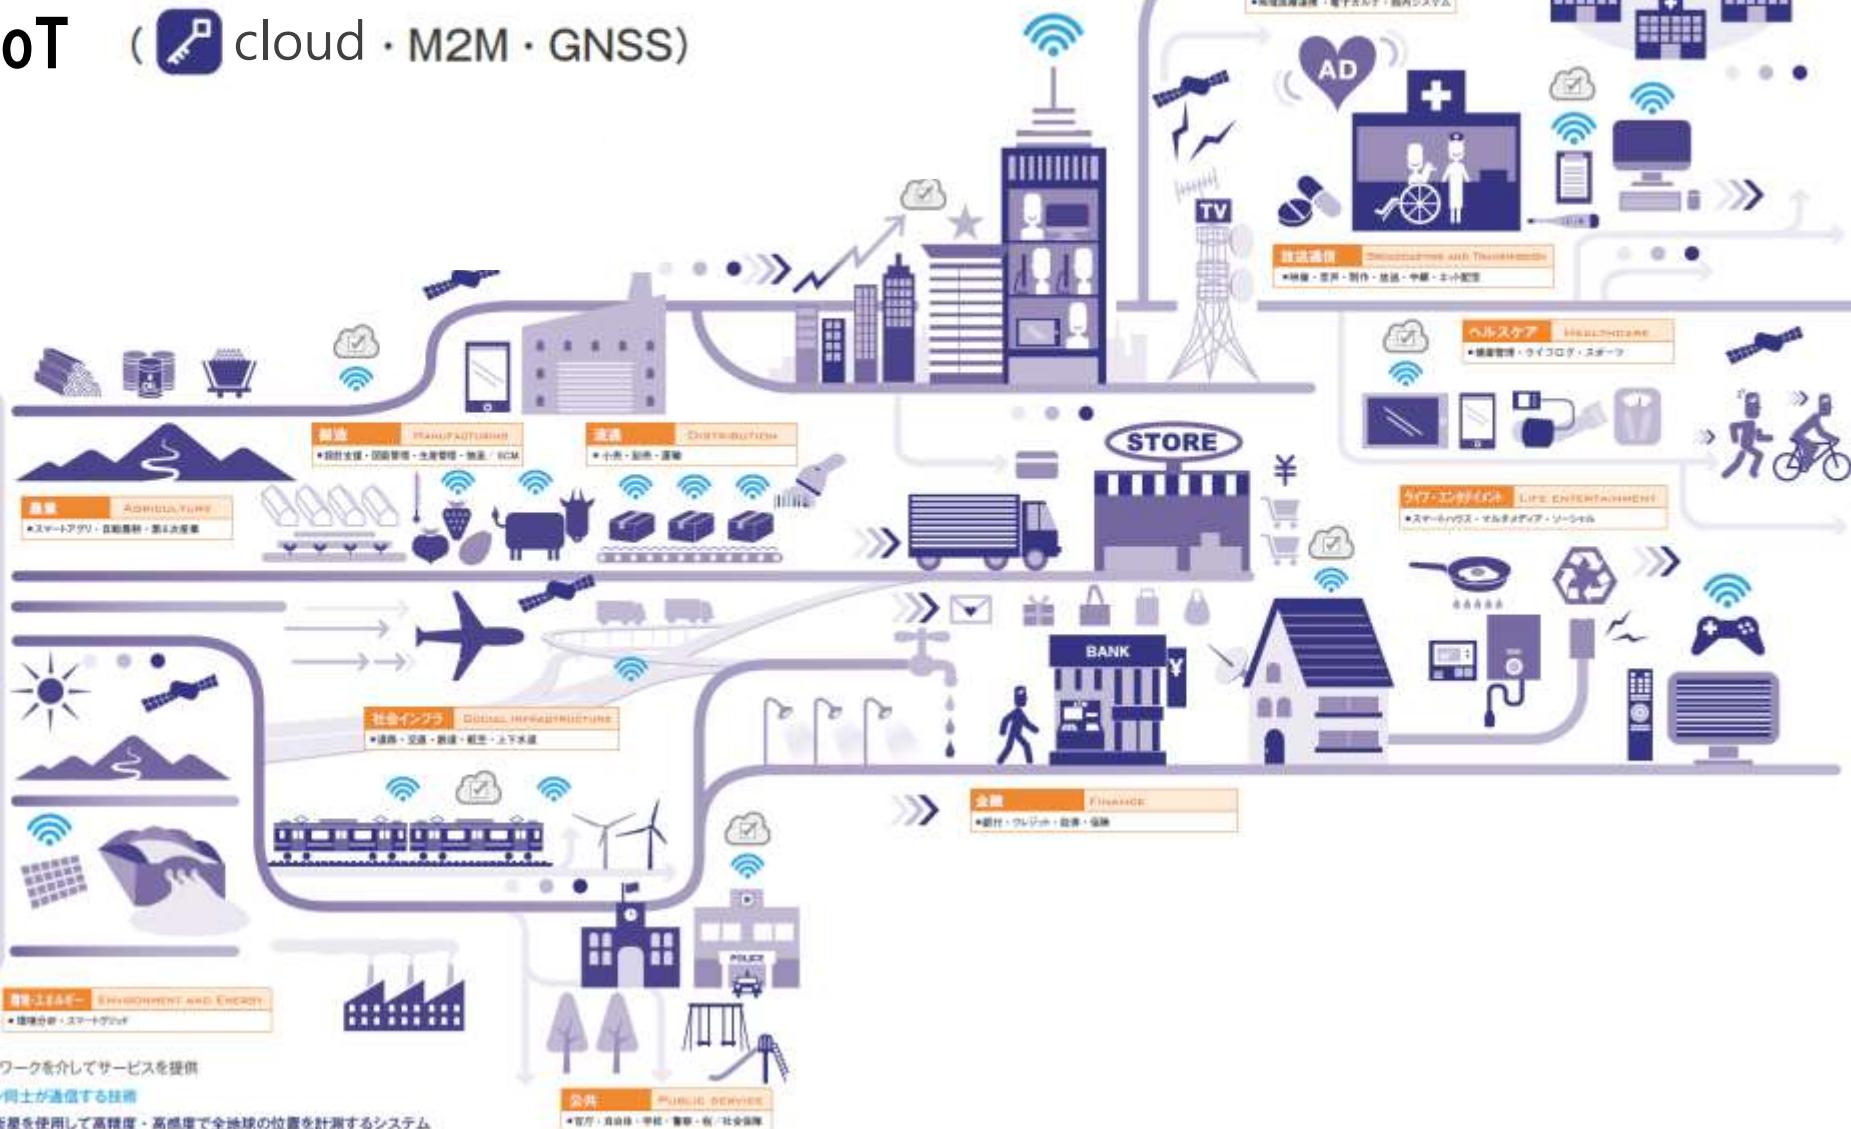

GNSS Solution

Prospect for the business

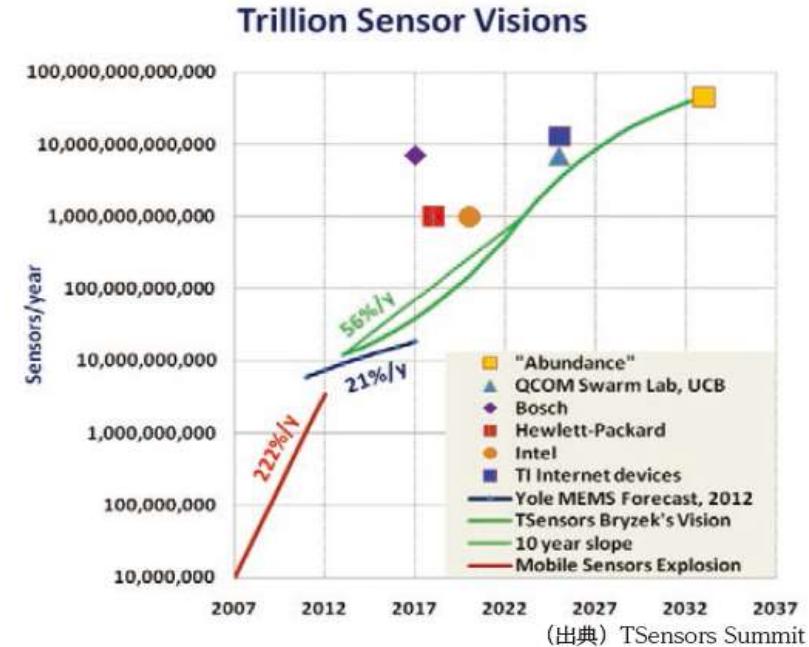

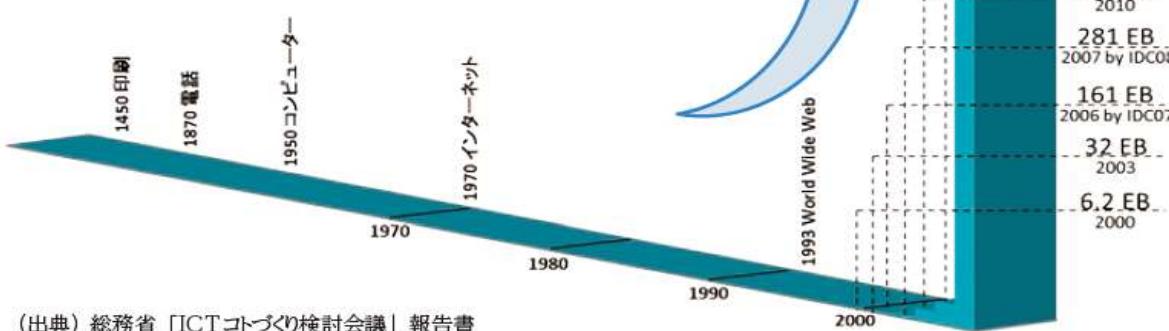

We believe the following next social model
by IoT ( cloud · M2M · GNSS) 

Big Data

Digital data grows exponentially and is going to reach **40 ZB** in 2020.

- 国際的なデジタルデータの量は、2010年時の988エクサバイト(9880億ギガバイト)から約40倍増加し、2020年には約40ゼタバイトへ拡大する見込み。

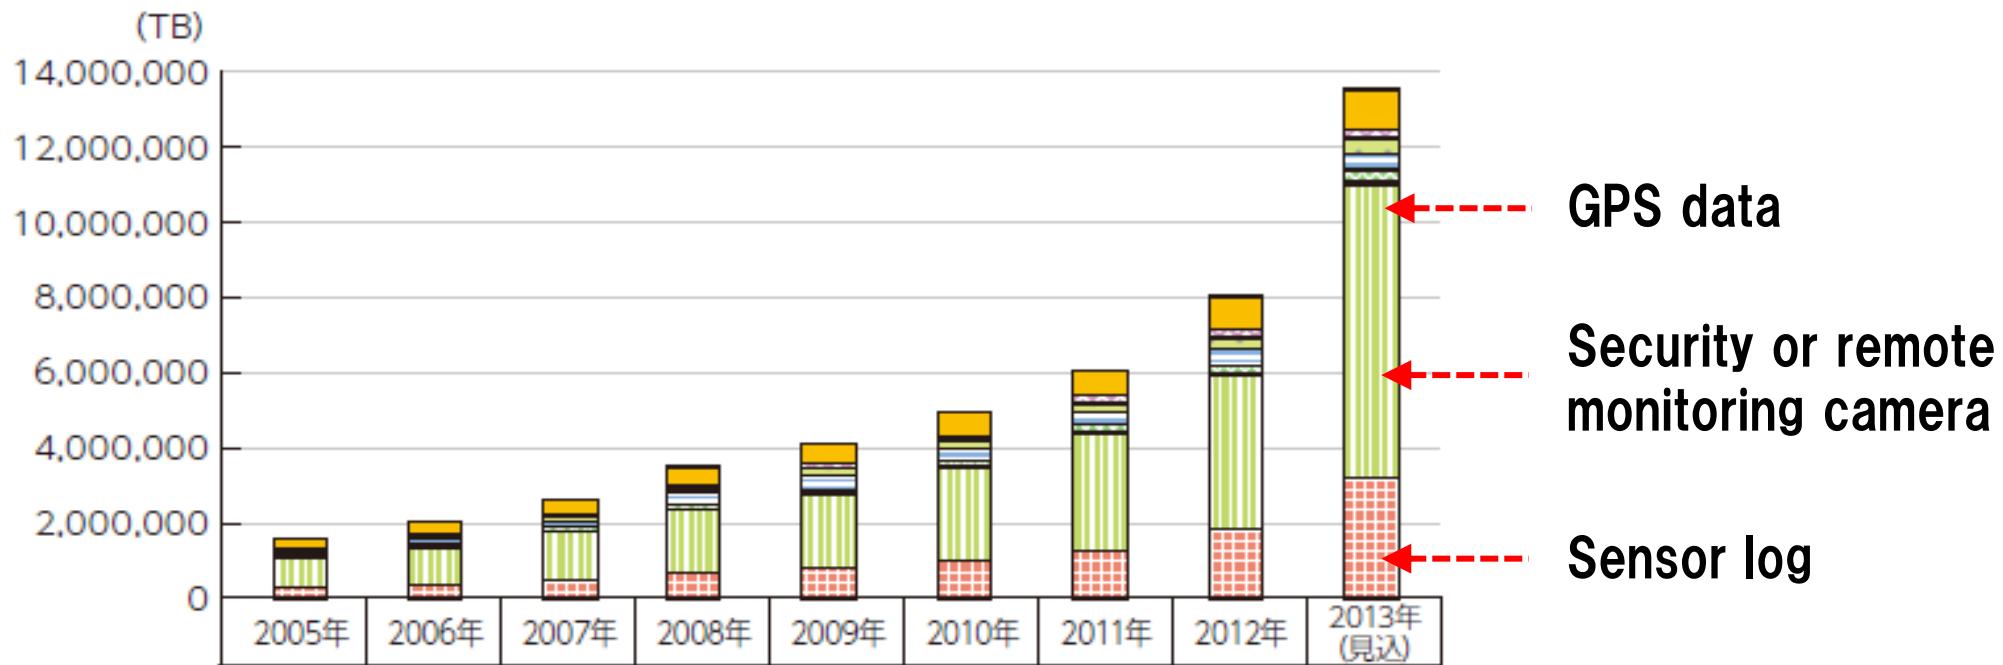

Ministry of Internal Affairs and Communications, Japan, "Information and Communications White Paper 2014 in Japan", July 2014.

Sensor shipment growth caused by downsizing, low-power technology, low-cost further accelerates big data.

IoT's Contribution

Especially sensor, camera and GPS data, is growing in Japan.

Ministry of Internal Affairs and Communications, Japan, "Information and Communications White Paper 2014 in Japan", July 2014.

Open Source Software Adoption

CAGR of open source software market is estimated 10.2% in Japan.

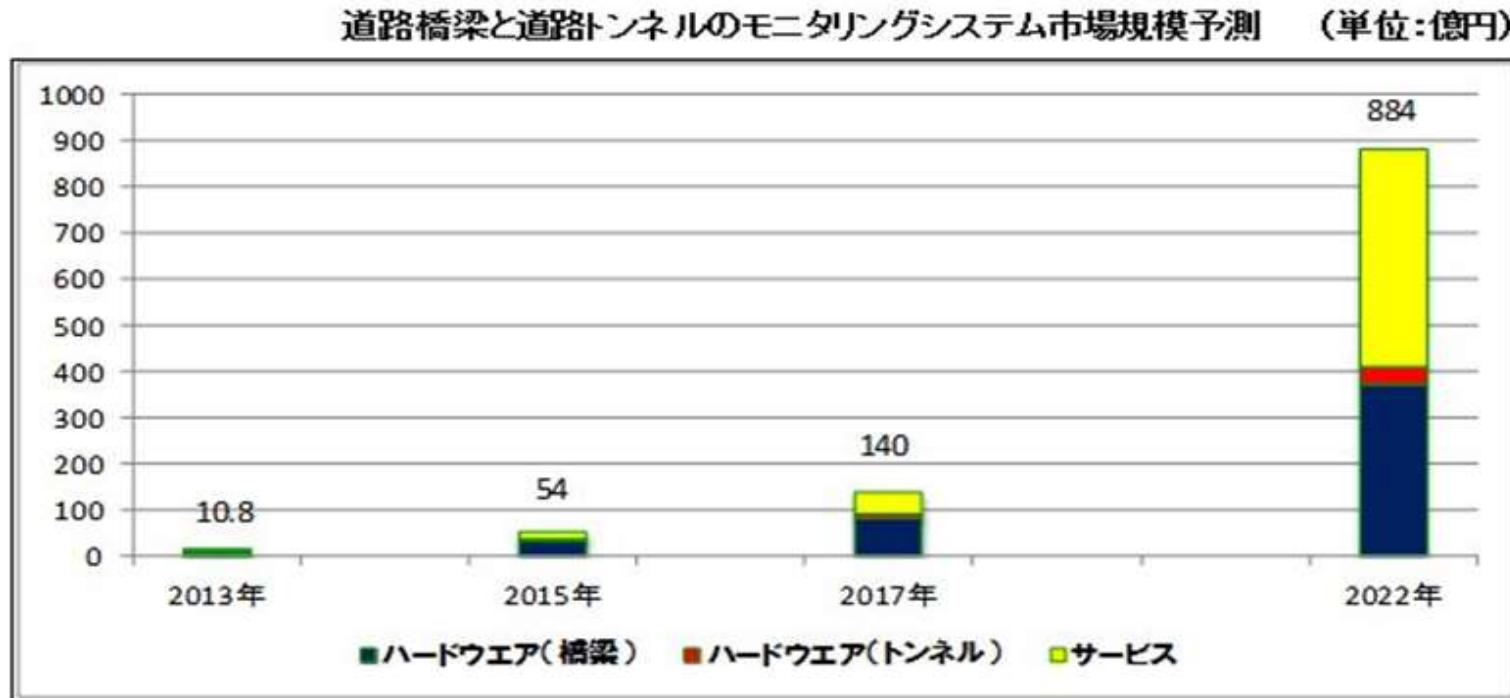

IDC Japan, "Japan Open Source Software Ecosystem Market Forecast 2013", May 2013.

- Smaller Investment
- State-of-the-art Technology
- Platform Compatibility

M2M platform provides more useful services with a smaller investment by making the best possible use of OSS.

Market Forecast

Bridge and Tunnel Monitoring Market is estimated to grow **88.4 billion yen** in 2022.

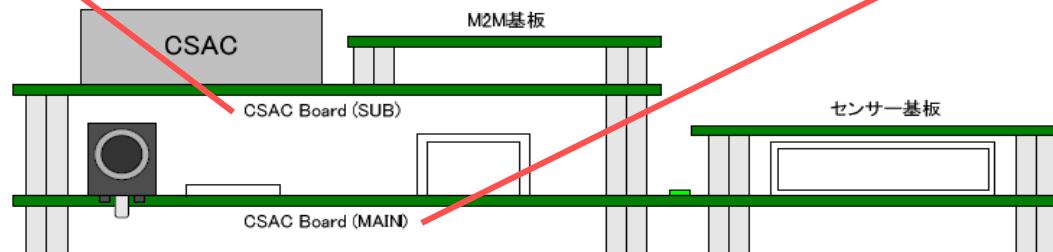

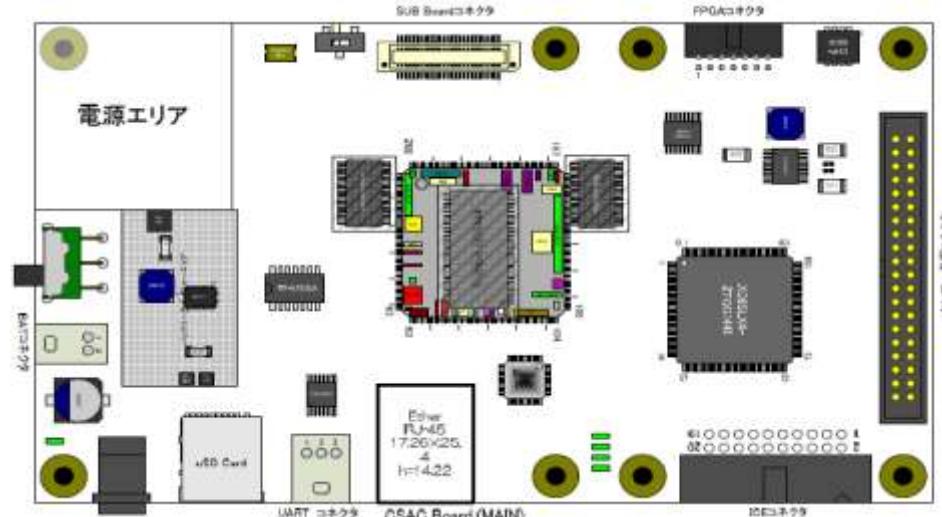

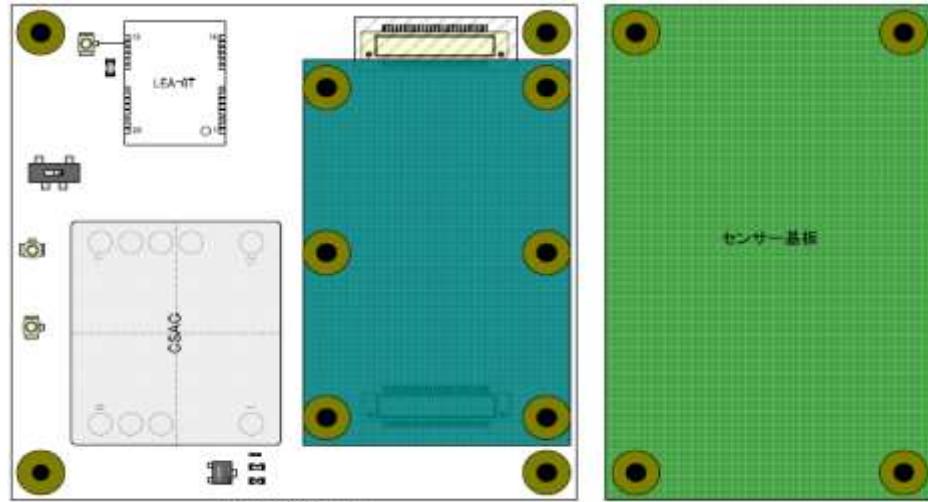

Seed Planning, Inc., "Market Forecast of Bridge and Tunnel Monitoring System", November 2013.

Service such as analysis, server, consulting, maintenance accounts for 50% of the markets.

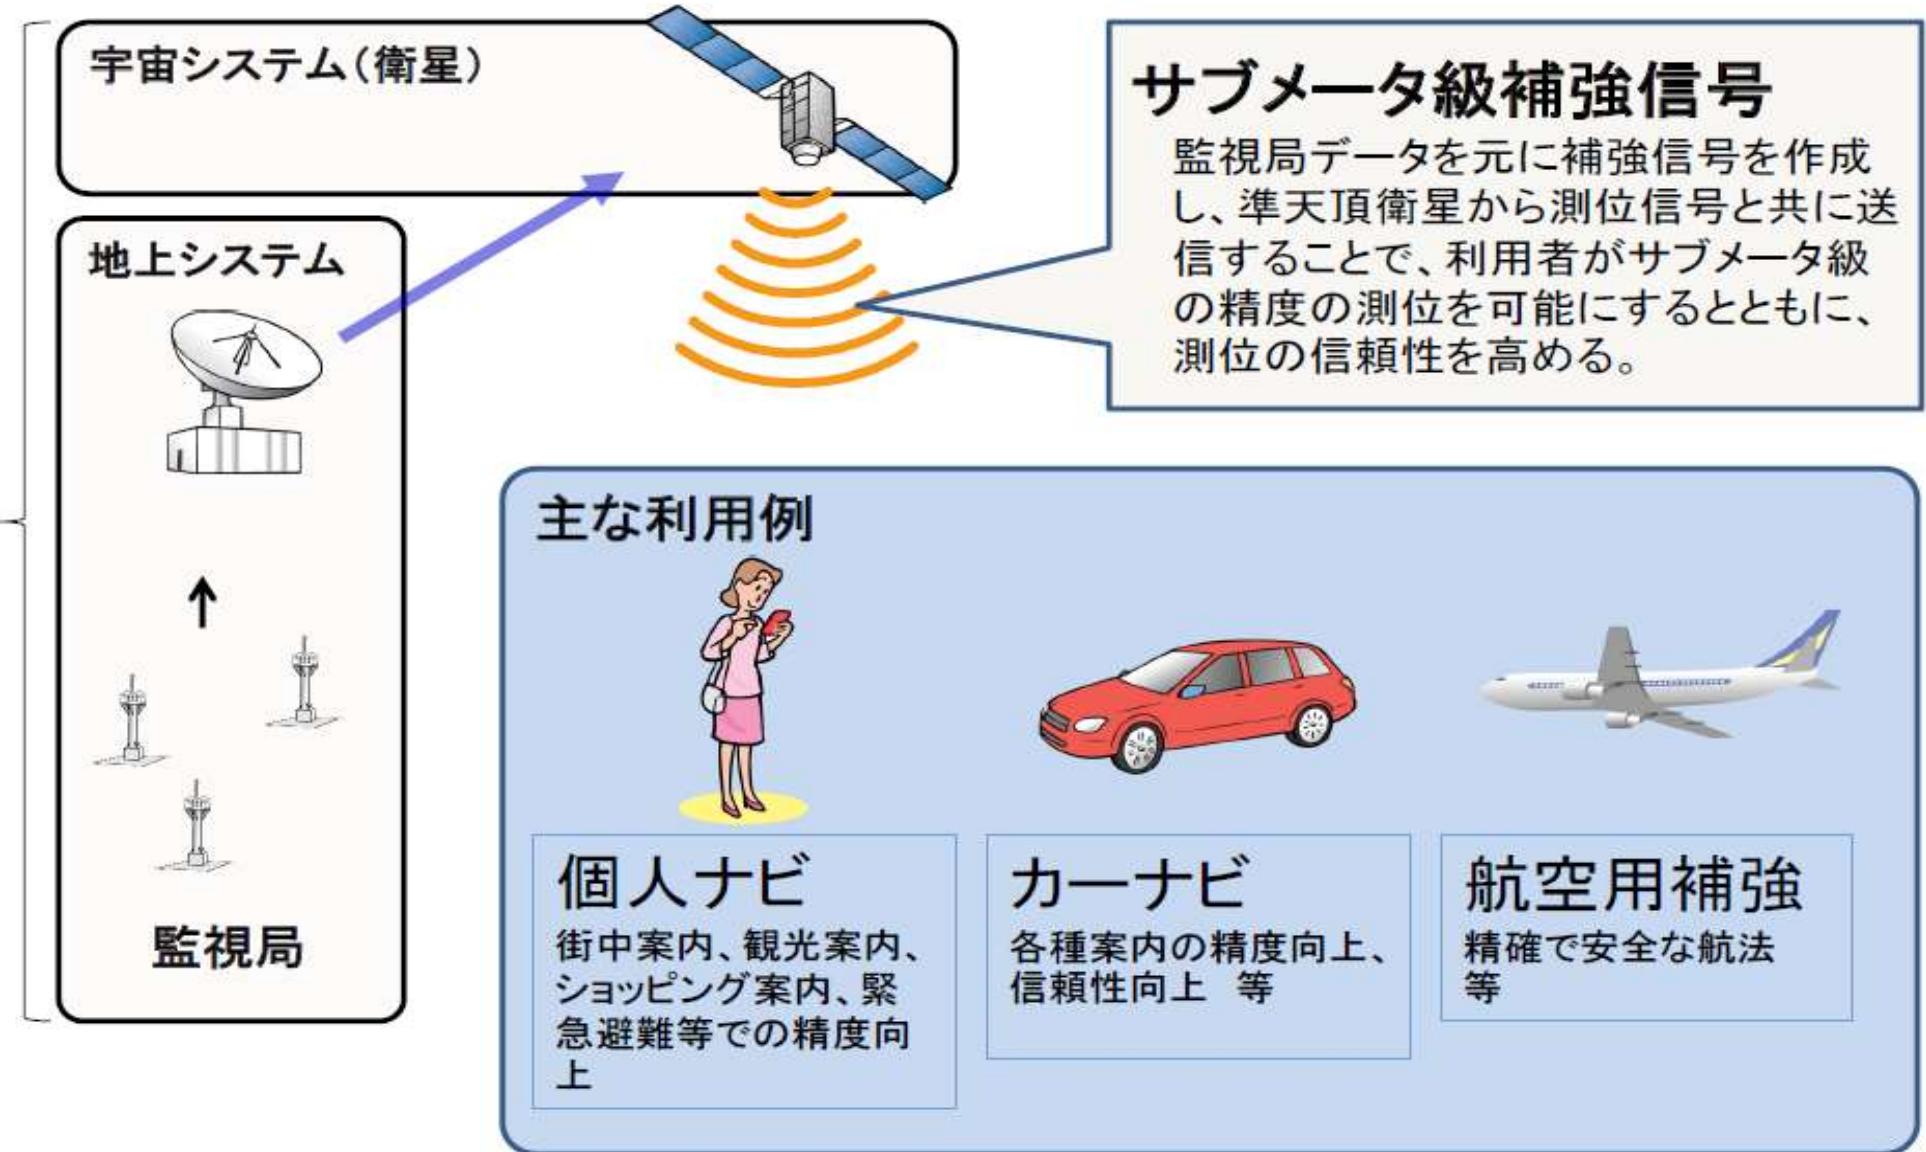

CSAC board

We are in the process of designing CSAC board architecture.

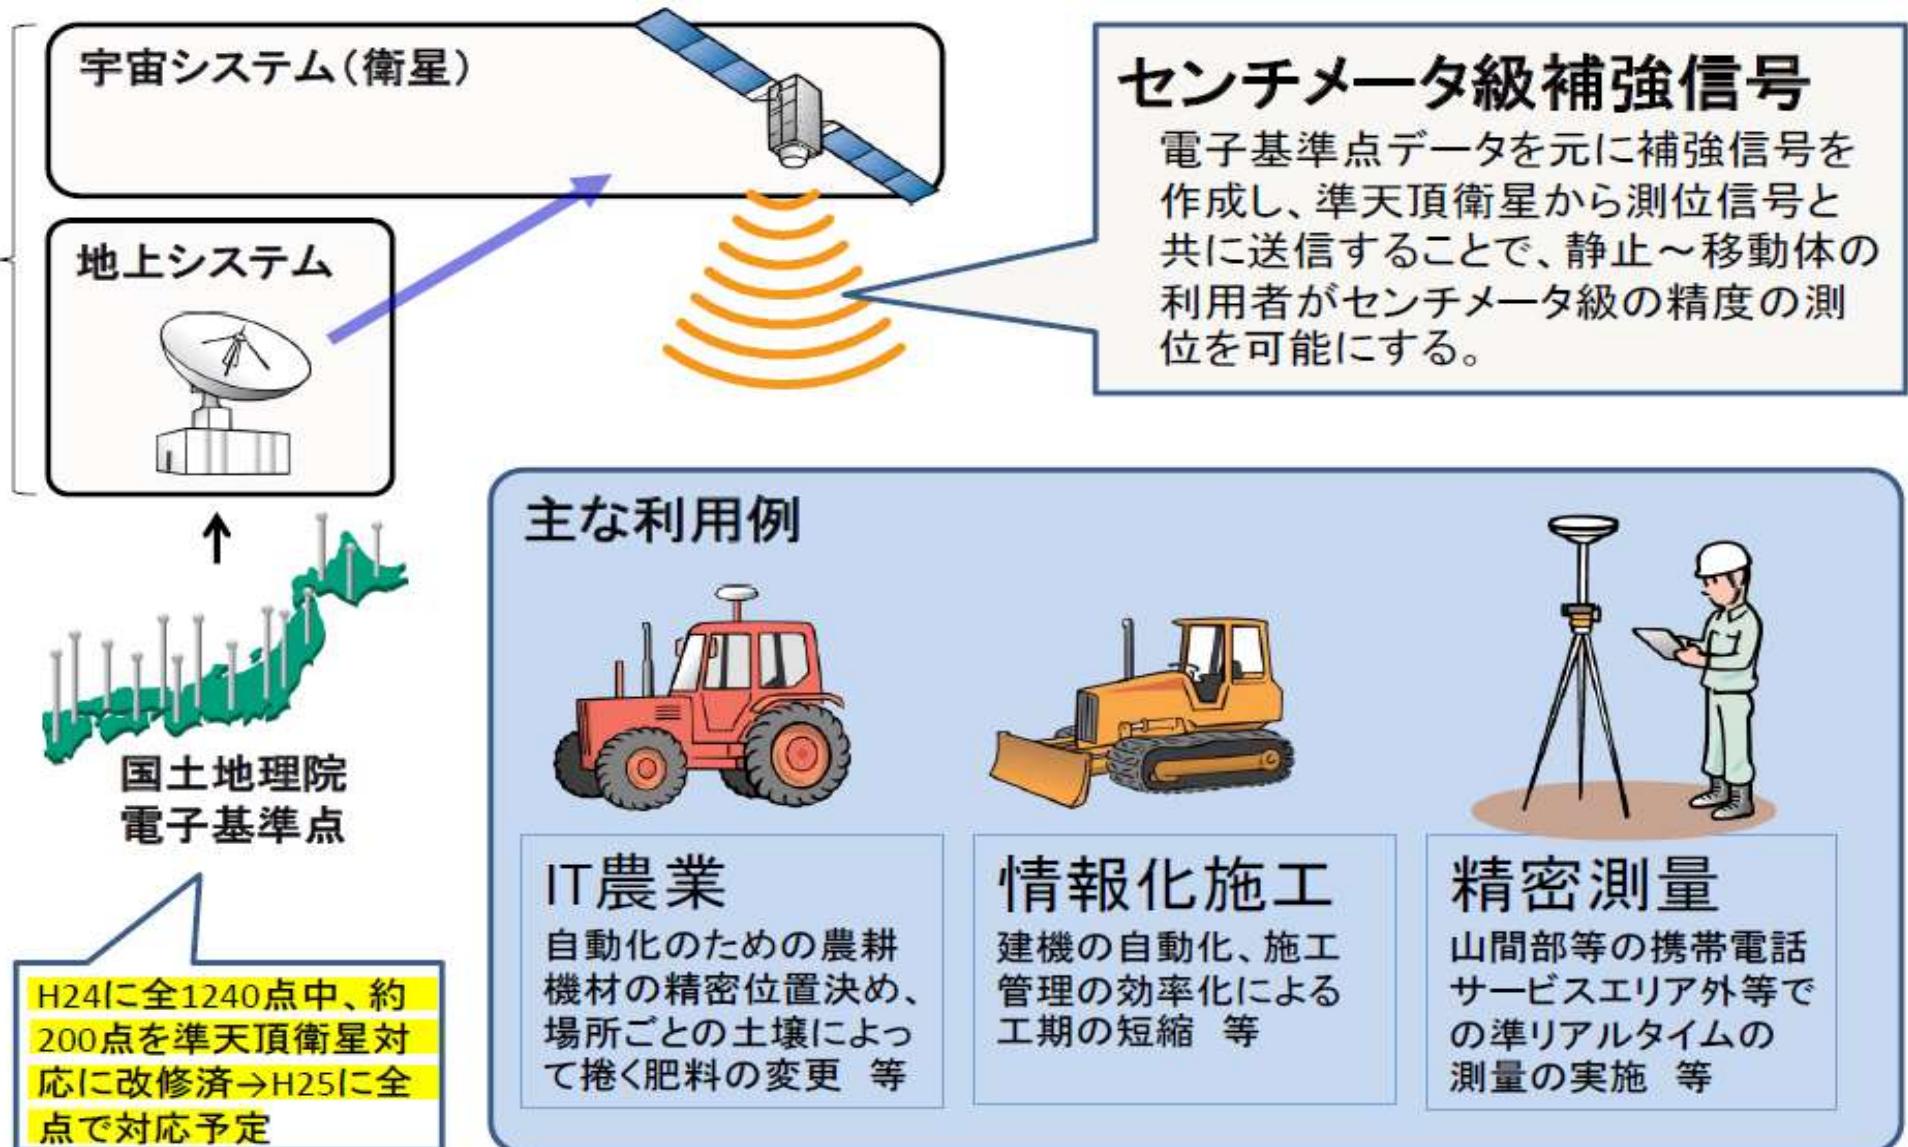

CSAC board is due to be released at Embedded Technology 2014.

Sub-meter class receiver

Centimeter class receiver

About us

Company name	CORE CORPORATION (The 1st Section of TSE Market Securities code 2359)
Establishment	December in 1969
Capital	440.2 million yen (as of April, 2014)
Number of employees	1,437(Consolidated), 1,111(Non-Consolidated) (as of April, 2014)
Group companies	17 (10 subsidiaries 6 affiliated companies)

Business domain

SI(System Integration)business

Consistency services from plan that analyzed duties of visitor, and accepted RFP to use

Integration software system development such as household appliance, OA apparatus, in-vehicle apparatus, facilities apparatus, production device

Finance, the circulation, production, system integration service of wide type of industry and duties including the community

Solution business

We solve problem that visitor has in unique product line corresponding to wide field

Security, relief, security, efficiency, cloud big data utilization

Cloud service, M2M (Machine to Machine), GNSS, others

Origin of our company name

The company was originally named "Core" because it would become the core of the information service industry, aim at the top of it and achieve it.

We have Top class actual achievements in the development of embedded solution.
