Items Regarding Summary (and Notes) Information Changes in Accounting Policies, Accounting Estimates and Restatement

(Changes in Accounting Policies Accompanying Revisions to Accounting Standards) (Adoption of Accounting Standard for Retirement Benefits, etc.)

From the first quarter of the fiscal year ending March 31, 2015, the Company has adopted the Accounting Standard for Retirement Benefits (Accounting Standards Board of Japan (ASBJ), Statement No. 26, issued on May 17, 2012; hereinafter "Retirement Benefits Accounting Standards") and the Guidance on Accounting Standard for Retirement Benefits (ASBJ Guidance No. 25, issued on May 17, 2012; hereinafter the "Guidance"), including the provisions stipulated in the main clause of Article 35 of the Retirement Benefits Accounting Standards and in the main clause of Article 67 of the Guidance. Accordingly, the Company revised its methods for calculating retirement benefit liabilities and service cost, and changed its method of attributing projected retirement benefits to periods from a straight-line basis to a benefit formula basis. Moreover, although the discount rate had been calculated based on the number that approximates employees' average remaining years of service, the Company has decided to determine the discount rate by using the single weighted-average rate that reflects the projected payment periods of retirement benefits and projected payment amount per such period.

In addition, the adoption of the Retirement Benefits Accounting Standards and their Guidance is subject to the transitional treatment stipulated by Article 37 of the Retirement Benefits Accounting Standards. Accordingly, the Company made adjustments in the retained earnings recorded at the beginning of this quarter by taking into consideration the impact of the aforementioned changes in the calculation methods for retirement benefit liabilities and service cost.

As a result, as of the beginning of the first quarter of fiscal year ending March 31, 2015, net defined benefit liabilities decreased 49 million yen, while retained earnings increased by the same amount. In addition, the impact of the aforementioned changes in accounting method on operating income, ordinary income and income before income taxes during this quarter is minor.

(1) Changes in Accounting Policies, Accounting Estimates and Restatement

(Changes in Accounting Estimates and Changes in Accounting Policies That Are Difficult to Distinguish from Changes in Accounting Estimates)

(Changes in Depreciation Method and Useful Lives of Property, Plant and Equipment)

Previously, the depreciation of property, plant and equipment had been calculated using mainly the declining balance method (excluding the depreciation of property, plant and equipment held by overseas consolidated subsidiaries). However, after introducing a system to administrate noncurrent assets held by Komori Corporation and its domestic subsidiaries, the Company conducted surveys on the actual status of use of such assets. Taking into consideration results gleaned from these surveys and recent changes in the Komori Group's businesses and its operating environment, a review was then carried out on depreciation methods for property, plant and equipment used by Komori Corporation and its domestic consolidated subsidiaries. Following the review, the Company predicted that property, plant and equipment held by each subsidiary will be used equally over each fiscal period during their useful lives, expecting continued steady demand for offset printing presses going forward.

Giving comprehensive consideration to the above factors, in this quarter, the Company changed its method for the depreciation of property, plant and equipment from the declining balance method to the straight line method based on the conclusion that the latter better reflects the actual status of the Group's operations in accounting results.

In conjunction with the abovementioned changes in depreciation method, in this quarter, Komori Corporation and its domestic consolidated subsidiaries have also made changes in the useful lives set for part of their property, plant and equipment in line with the actual status of their operations, with comprehensive consideration given to the usage period and payback period of their manufacturing facilities.

As a result, as of the beginning of the second quarter of fiscal year ending March 31, 2015, operating income, ordinary income and income before income taxes each increased 189 million yen compared with their respective values calculated using the conventional accounting methods.
