Trend of urban land price index (average of all uses)

(Source) Prepared by the Asset Manager based on "Urban Land Price Index" of Japan Real Estate Institute

- Tokyo is one of the largest cities in the world in terms of GDP and population
- Tokyo's 23 wards consistently achieve net population growth and continue to attract migration from other parts of Japan
- However, caution is required when making investments at times of significant increase in asset prices and MHR intends to take a cautious acquisition stance

Creation of National Strategic Special Zones

- ✓ As a breakthrough to force through bold regulatory reforms, etc. and to realize the Japanese government's growth strategy, the government created National Strategic Special Zones
- ✓ In May 2014, "Tokyo metropolitan area" including Tokyo's nine central wards was designated
- ✓ 2020 Tokyo Olympics targeted as a mid-term goal for government effort to create world's number one business-friendly environment

[Matters on specified business and related regulatory reform expected to be implemented]

- Development of buildings that contribute to the formation of an international business hub (floor area ratio)
- Provision of accommodations more in line with the duration of stay of foreigners (Hotel and Ryokan Management Law)
- Development of employment terms for global corporations, etc. (employment terms)
- Provision of medical care targeting foreigners (foreign doctors)
- Simplification and speeding up of incorporation procedures (English correspondence for documents, establishment of centralized windows, etc.)

2-1 16th period (ended July 2014) financial highlights

Factors that led to changes in dividend per unit from the previous fiscal period

Major factors behind change in NOI from existing properties:

- + End of free rent period at Koraku Mori Building
- Full period contribution of downward revision of land fee from Laforet Harajuku
- Full period contribution of reduction of NOI due to change in scheme for Roppongi View Tower
- Incurrence of registration related expenses associated with split of co-owned property for Roppongi View Tower

Major factors behind change in NOI from existing properties:

- + End of free rent period and upward rent revision at Koraku Mori Building
- + Decrease in depreciation and amortization
- Factoring out previous period's registration related expenses (Roppongi View Tower)
- Tenant lease cancellation at Koraku Mori Building

(Note 1) Factors that led to change are arrived at by dividing the change from the previous fiscal period by 1,384,925 units for 16th fiscal period and 1,570,040 units for 17th fiscal period and indicated as approximate figure in yen.

(Note 2) Dilution due to increase in number of units in accordance with the capital increase are arrived at by multiplying the dividend for the 16th period by the number of units newly issued in the 17th period (185,115 units) and dividing by 1,570,040 units and indicated as approximate figure in yen.

Changes in the rent and occupancy rates

(Note) The above rents and occupancy rates indicate the average rent and the average occupancy rate during relevant periods.

- Due to change in composition of properties and lease methods starting in the 9th period, the rent data is less comparable
- Increase in the number of fixed-rent properties with master lease contract from the 9th period helped stabilize and increase rents and occupancy rates

3-6 Operation highlights Luxury residential market

Change in rents and vacancy rates of luxury housing

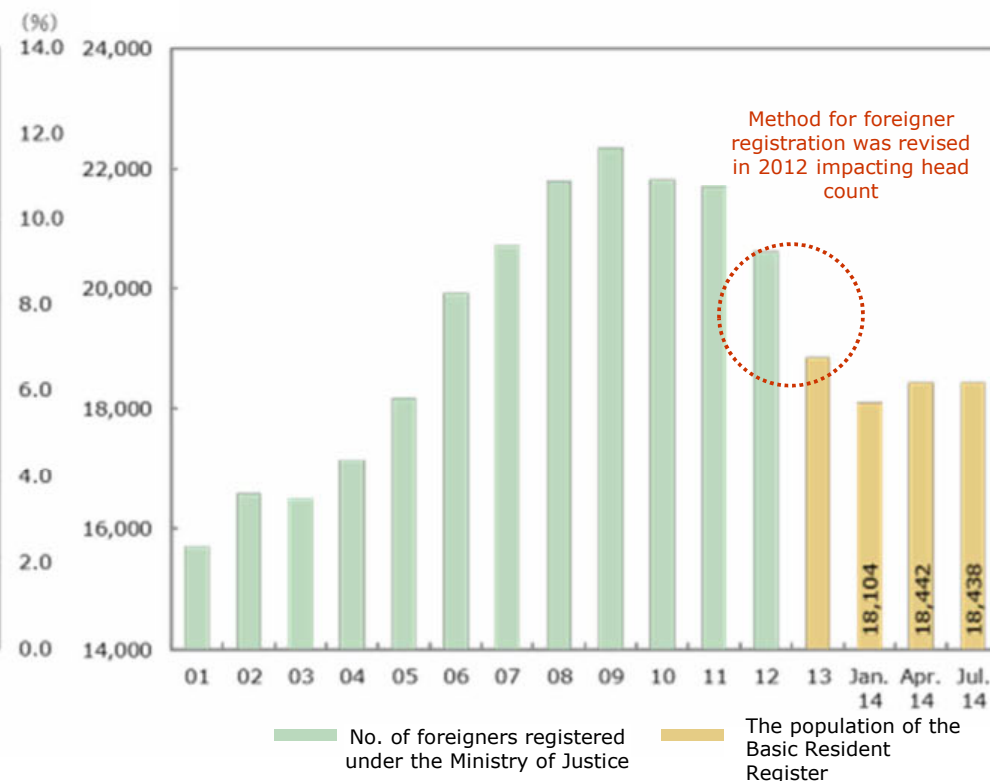

(Source) Created by the asset manager based on Ken Real Estate Investment Advisors' "Ken Residential Market Report" included in real estate appraisal reports by Japan Real Estate Institute regarding properties held by MHR.

(Note 1) Includes data on rental housing with monthly rent of more than JPY 300,000 or exclusively owned area of more than 30 tsubo. Average vacancy rate of Minato ward (annualized) indicates the average during the period from Jan. to Mar., from Apr. to Jun., from Jul. to Sep., and from Oct. to Dec. each year. Average contracted rent of Minato ward indicates annual average. As for average rent and average vacancy rate of Minato ward on a half-year basis, the period from Jan. to Jun. is indicated as 1H, and the period from Jul. to Dec. as 2H. As for 1H, average of the period from Jan. to Mar. and that of the period from Apr. to Jun. is indicated, and as for 2H, average of the period from Jul. to Sep. and that of the period from Oct. to Dec. is indicated.

- The vacancy rate of the luxury housing rental market in Minato Ward has gravitated to around the average of the past 10 years, and rents are increasing.

Change in number of foreign residents in Minato ward

(Source) Created by the asset manager based on "Number of registered foreign residents" prepared by Statistics Division Bureau of General Affairs of Tokyo

(Note 1) "Number of foreign residents" was the number of foreigners registered under the Ministry of Justice until July 2012. However, as the foreigner registration system was abolished based on revision of the law, the figure is the population of the Basic Resident Register from October 2012. Therefore, the data may not be consistent.

(Note 2) Number of foreign residents as of January 1 of each year is used for the year-based figures.

- The population of foreigners has recently stabilized, and MHR's residential properties are capitalizing on demand from both foreigners and Japanese.

4. Business environment recognition & MHR's strategy

4-1 Business environment recognition & MHR's strategy

Real estate market / Leasing attitude

- Decrease of vacancy rate and gradual increase of rents of office buildings in central Tokyo is ongoing
(Forecast of Office Market Trends Research Committee for Tokyo's five central wards)
 - ⇒ Vacancy rate: 6.1% in 2014 → 4.8% in 2018
 - ⇒ Rent index: 101 in 2014 → 121 in 2018
- Cap rate is on a downward trend but not as overheated as before the global financial crisis
(Japan Real Estate Institute's "The Japanese Real Estate Investor Survey")
 - ⇒ Class A buildings in Marunouchi
Cap rate: 4.0% in October 2013 → 3.8% in April 2014
- Lending attitude toward the real estate industry continues to be at a high positive level

- Rents of office buildings in central Tokyo are forecast to continue increasing gradually for the time being
- With regard to property acquisitions, selective investment is necessary with the overheating of the market

Interest rate trends / Macro environment

- Long-term interest rates are low and stable due to the monetary easing policy and CPI is on an upward trend
 - ⇒ 10-year bond rates: 0.49% (August 29, 2014)
 - ⇒ Core CPI: +1.3% excluding impact of consumption tax rate increase (July 2014)
- In the July 2014 preliminary business conditions composite index, the leading index was at 106.5 (0.6 PT increase from previous month) and the coincident index was at 109.9 (0.2 PT increase from previous month). Figures in and after July are being watched for the impact of the consumption tax rate increase.
- The growth of money stock is slightly slowing down. Moreover, the issue of wage increases can be seen from the consumer confidence survey and the monthly labor survey. Future trends will be scrutinized.

- CPI is on an upward trend, but will probably take some time to reach and maintain a certain level and be accompanied by a sustained increase in wages. Increase in long-term interest rates are also forecast to be limited for the time being.
(→positive environment for strengthening MHR's financial status.)

MHR's strategy ⇒ Continue "New 2013 Management Policy"

- Actively pursue external growth utilizing sponsors' property pipeline → Property acquisition capacity (LTV 48%) approximately 26.0bn yen
- Promote the extending of average duration of debt; Gradually increase the fixed rate ratio
- Maintain emphasis on the "continued increase" of dividend/NAV per unit and market value

5. Appendix

5-1 Sustainability Policy

Sustainability Policy

Mori Hills REIT Investment Corporation and Mori Building Investment Management Co., Ltd. will engage in real estate investment and management, taking into consideration "the environment," "Business Continuity Planning (BCP)" and "maintaining and enhancing asset value," based on the Mori Building Group's "Vertical Garden City" urban design philosophy as the ideal model.

The environment

- Promotion of cities and nature existing in harmony by creating microcosms of nature through promotion of landscaping
- Promotion of low carbon cities by introducing various energy-efficient systems
- Promotion of resource recycling based on the 3Rs (reduce, reuse, and recycle)

Business continuity planning ("BCP")

- Enhancement of earthquake resistance, disaster supply storage facilities, emergency power sources and other tangible measures
- Enhancement of the property management structure in the event of a disaster and other intangible measures

Maintaining and enhancing asset value

- Investment in high-quality real estate
- Implementation of appropriate asset value enhancement construction work

Common policies

- Compliance and maintenance of management system
- Implementation of sustainability education and awareness of building activities
- Disclosure of sustainability information

Roppongi Hills and ARK Hills certified as "urban oasis" in inaugural year

Roppongi Hills and ARK Hills were selected as certified greenery areas under the "urban oasis" certification system of Organization for Landscape and Urban Green Infrastructure, which evaluates openness, community and contribution to the environment, in the first fiscal year of the system.

<Environmental Policy>

1. Cities and nature existing in harmony

We create pleasant, verdant spaces where the chirping of birds and the singing of insects can be heard by leveraging the vertical plane in cities and creating microcosms of nature on the ground where people can commune with nature. Through these spaces we will foster environmental communities for people.

2. Low carbon cities

We will create cities with excellent environmental performance by matching energy-efficient systems to compact cities in which diverse urban functions are combined into vertical infrastructure. We will continue efforts to lower carbon emissions from operation through comprehensive, quality management of communities.

3. Resource recycling

We aim to build resource-recycling cities by promoting the 3Rs (reduce, reuse, and recycle).

4. Compliance and maintenance of an environmental management system

We will always keep our eyes on the trends in environment-related laws and regulations and adapt to any changes. Also, we will put in place and maintain an environmental management system in order to continuously improve our environmental enhancement activities.

5. Environmental education and awareness building activities

We will implement environmental education and awareness building activities for employees in order to improve the effectiveness of our environmental enhancement activities. We will also use our facilities to conduct environmental awareness building activities aimed at facility users.

6. Disclosure of environmental information

We will communicate with society by making efforts to disclose information, such as the environmental philosophy and policy, and information about environmental activities.

(Note 1) For property tax, city planning tax and depreciable assets tax, the Company charges the amount of property taxes assessed and determined applicable to the fiscal period to expenses of real estate rent. Registered owners of properties in Japan as of January 1 are responsible for paying property taxes for the calendar year based on assessments by local governments. Therefore, registered owners who sold properties to the Company were liable for property taxes for the calendar year, including the period from the date of the acquisition by the Company until the end of the year. The Company reimbursed sellers of properties for the equivalent amount of property taxes and included the amount in the acquisition cost of real estate.

(Note 2) "Other expenses" denotes the sum of rent expenses, custodian fees, and other lease business expenses (residential property management costs, and other property-related miscellaneous expenses) in aggregate.

(Note 3) Properties acquired or sold during the relevant period. "Annualized NOI/ Acquisition price" was calculated by taking into consideration the changes in acquisition price during the relevant period. "Annualized NOI" denotes the value which is based on the acquisition price as of end of relevant period.

(Note 1) "Type of ownership" denotes the type of rights held by MHR or the Trustee. "Ownership" stands for ownership, "Co-ownership" stands for the ownership of beneficiary interests, "Compartmentalized ownership" denotes ownership and right for exclusive use in or over parts of a building, and "Leased land" denotes Leasehold land. The land site of Atago Green Hills includes joint ownership in quasi-undivided interests of leasehold land and easement.

(Note 2) ARK Mori Building adopts "slitwall" as earthquake-resistant feature.

(Note 3) "Occupancy rate" of Koraku Mori Building, Moto-Azabu Hills, Roppongi First Plaza and Roppongi View Tower are based on the rates as of July 31, 2014.

(Note 4) For calculation of the "Average building age" of Atago Green Hills, we have assumed that construction of the building was completed on Jul. 30, 2001.
