

## TIAT, in collaboration with Jorudan, to launch TIAT ROUTE MASTER services, an online transit guide for the Haneda Airport International Passenger Terminal

**In addition to Japanese customers, international visitors can also easily find train and bus directions in English, Chinese (simplified/traditional) and Korean.**

Tokyo International Air Terminal Corporation (Headquarters: Ota-ku, Tokyo; President & CEO: Masayuki Sakurai) will launch TIAT ROUTE MASTER, an online transit guide service, in collaboration with NorikaeAnnai Visit, which has been developed by Jorudan Co., Ltd. (Headquarters: Shinjuku-ku, Tokyo; President & CEO: Toshikazu Sato) within Haneda Airport International Passenger Terminal's website starting April 30, 2015. The service, which has "more convenience, more simplicity" as its concept, will guide users from the Haneda Airport International Passenger Terminal to the locations they have searched and vice versa via train and bus. English, Chinese (simplified/traditional) and Korean are also available in addition to Japanese to make traveling easier for foreign tourists visiting Japan. For example, users can search for directions from the Haneda Airport International Passenger Terminal to their hotel even if they don't know the train station that is nearest to it. Simply selecting the hotel from a list displays the fastest route, so there is no need to type. Users can also search for the best routes from hotels to Haneda Airport International Passenger Terminal as well. We are working on improving accessibility by June 2015, and plan to add features to TIAT ROUTE MASTER so that users with wheelchairs and strollers can also enjoy stress-free optimized transportation. Information on flat-rate taxis and navigation features for use within the terminal are also planned for the launch.

### TIAT ROUTE MASTER Features

1. **Multilanguage options for international visitors (English, Chinese (simplified/traditional), Korean)**
2. **Searches the best route by train and bus starting from or ending at the Haneda Airport International Passenger Terminal.**
3. **Search for train stations, hotels and popular sightseeing locations by entering the name, or select from a dropdown list to search for routes.**
4. **The directions take into account walking time, and users can set the walking speed they want so they can travel in comfort even at unfamiliar locations.**

## 3. Hotels and sightseeing facilities can be selected from list, with walking speed options.

The screenshot shows the TIAT ROUTE MASTER interface. Step 1 involves selecting the destination as 'Haneda-Airport International Terminal'. Step 2 involves searching for routes. The 'To' field is set to 'Stations and bus', and the 'Walk Speed' is set to 'Normal'. A red circle highlights the 'To' field and the 'Walk Speed' dropdown. A blue arrow points from the 'To' field to a list of hotels, where 'Dai-ichi Hotel Tokyo' is selected. A red circle highlights the 'Dai-ichi Hotel Tokyo' entry in the list. A blue arrow points from the 'Walk Speed' dropdown to a list of walking speed options: Fast, Normal, Slow, and Leisurely. A red circle highlights the 'Leisurely' option.
