[Supporting System for Outside Directors and/or Company Auditors]

Outside officers hold their meetings on a regular basis to exchange information, views and ideas on business operations or corporate governance.

Outside directors and company auditors may, at any time when they deem it necessary or appropriate, request directors and employees to provide explanations or reports or to submit internal documents, and may also, if they deem it necessary, consult with external specialists at the expense of the Company.

2. Matters on Functions of Business Execution, Auditing, Oversight, Nomination and Remuneration

Decisions (Overview of Current Corporate Governance System)

ROHM believes that an agile and effective management system with emphasis on competitive enhancements in the semiconductor and electronic component industry, where the business environment is undergoing accelerated change, can be established so Directors familiar with ROHM's businesses and technologies have executive power and supervise each other. The Articles of Incorporation limit the number of directors on the Board of Directors to ten in order to encourage sufficient discussion while allowing adequate and swift decision making. Additionally, two outside Directors have been designated to enhance mutual supervision among the Directors. As part of the executive supervision, ROHM maintains the existing auditing system, which is implemented only by outside Company Auditors, based on the idea that internal supervision over the executive branch will function sufficiently by improving and enhancing the system.

With five Company Auditors, ROHM reinforces auditing functions by overseeing all implementations. The Auditors are committed to building a fair management supervision system through legally stipulated audits.

The Company Auditors attend important meetings such as the Board of Directors' meetings, and audit the individual divisions of ROHM and its affiliates at home and abroad along with the Internal Audit Department by holding meetings with those in managerial positions, inspecting documents and reports, and others. Through these audits, ROHM checks whether or not the Directors are performing their duties in compliance with existing laws, whether or not ROHM's internal control is well maintained and operated, whether or not in-house rules are well observed, and whether or not ROHM's assets are secured.

Company Auditors, the Internal Audit Department, and Accounting Auditors regularly hold report meeting, consistently maintain close cooperation and coordination, and proactively exchange information and opinions. Sharing information obtained through individual audits enhances the accuracy of the audits and allows for constant improvement of the operation process.

ROHM is under contract with Deloitte Touche Tohmatsu LLC for its accounting audits and internal control audits related to financial reporting and abides by both the Japanese Corporation Law and the Financial Instruments and Exchange Law. ROHM has an established environment where the auditing organization can perform audits from a fair, unbiased position as an independent third party. The following are the names of certified public accountants (CPAs) who audited ROHM's accounts for the fiscal year ended March 31, 2015, the number of consecutive years they have been engaged in auditing ROHM and information on the assistants involved in the audits.

CPAs who audited ROHM (Number of consecutive years they have been engaged in auditing ROHM)

Designated limited liability partners (in charge of performing the audits) of Deloitte Touche Tohmatsu:

Yasuhiro Onishi (2 year), Tomoyuki Suzuki (7 years), Seiichiro Nakashima (1 years)

3. Reasons for Adoption of Current Corporate Governance System

ROHM Co., Ltd.

Corporate Governance

In the semiconductor and electronic component industry, the most effective way of making prompt accurate decisions is to retain a small number of directors who are versed in operations and technologies, and have extensive experience in executive authorities and supervision. Therefore, first and foremost, to maintain such a policy and be audited by outside auditors who represent the frank opinions of outsiders or shareholders, executing policies will be suspended in some cases. For this reason, ROHM has strictly maintained a system in which all company auditors are outside auditors. Consequently, individual systems have mutually interacted in a good manner, and internal control has functioned very effectively. In addition, because of recent changes in the business environment and frequent misconduct within other companies, ROHM started to welcome outside directors in June 2008. Currently, the board directors' meeting is attended by two outside directors. Ever since, discussions within board directors have been active and much more considerate of business status. Thus, ROHM would like to strengthen these policies in the future as well.

their elimination based on the central government's Comprehensive Guidelines for How Companies Prevent Damage from Anti-Social Forces.

ROHM has included provisions on how to respond to such forces in in-house rules and requested company employees to observe them. The 'ROHM Group Business Conduct Guidelines', which is distributed to all employees, states that employees take a firm stand against antisocial forces. In addition to the above, ROHM strives to enlighten its employees on the elimination of antisocial forces via various in-house education and training programs.

1. Adoption of Anti-Takeover Measures

Adoption of Anti-Takeover Measures	Not Adopted
------------------------------------	-------------

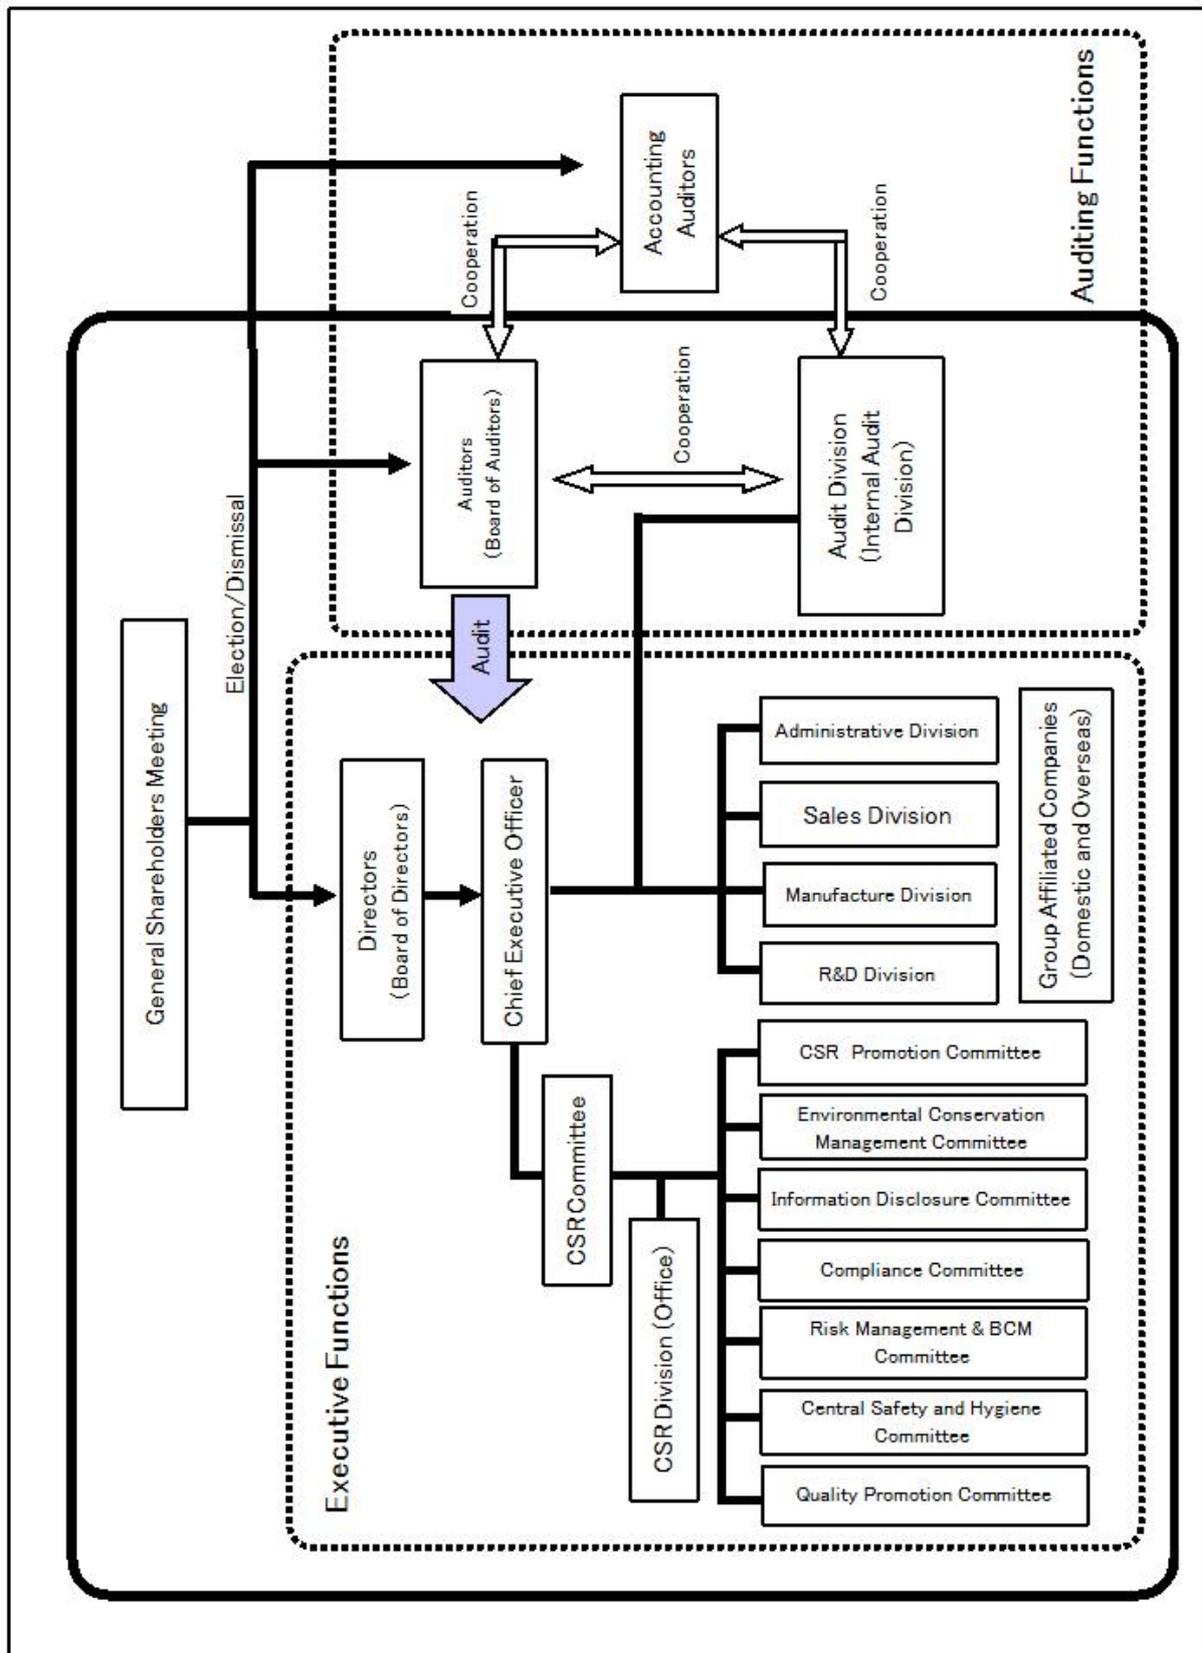

Supplementary Explanation

The ROHM Group believes the best defense against takeover attempts is to build a relationship of trust with shareholders by delivering higher stock prices via enhanced corporate value, accountability via proactive IR activities, and regular dialog with shareholders. If a proposal for acquisition is made to our company, we believe that the final decision of whether to accept or reject the offer should be left to the current shareholders at the time, and that the Board of Directors should not make selfish decisions intended to protect their own personal interests. In addition, in the event of an acquisition proposal, we believe that it is indispensable for ensuring and increasing ROHM's corporate value and the common interests of shareholders that shareholders can make an "informed judgment," meaning they would be able to make the best decision based on ample information and a sufficient amount of time.
