Business Report for the 97th Fiscal Year

Period from January 1, 2015
to December 31, 2015

The Company (“NEG”) changed the final date of its fiscal year from March 31 to December 31 from the 96th fiscal year.

Accordingly, as for the 96th fiscal year the nine-month period from April 1, 2014 to December 31, 2014 has been designated as the period for the consolidation of the Company and its domestic consolidated subsidiaries and the twelve-month period from January 1, 2014 to December 31, 2014 is the period for the consolidation of the Company’s overseas consolidated subsidiaries. We have therefore omitted year-on-year changes in earnings in the business report for this fiscal year.

1. Status of Corporate Group

(1) Progress and results of operations

Overall trend

The global economy recovered on the back of solid personal consumption and improved employment conditions in Europe and the US, as well as other factors. However, there were growing signs of a slowdown in China due to factors such as a decline in exports and fixed asset investments. The Japanese economy continued to sustain a modest recovery, as indicated by improvements in corporate earnings and employment conditions amid solid personal consumption.

Consolidated results of operations for the fiscal year under review

	96th Fiscal Year (April 2014 to December 2014)	97th Fiscal Year (January 2015 to December 2015)
	Millions of yen	Millions of yen
Net sales	192,692	251,177
Operating income	5,223	22,034
Ordinary income	6,883	14,272
Net income	5,938	9,636

Decline in prices for the substrate glass for liquid crystal displays (LCDs) narrowed and shipments remained stable. However, sales began to slow in the fourth quarter (October 1 to December 31, 2015). Sales of glass fiber were generally firm, despite some discrepancies between regions, and shipments of glass for optical devices remained strong.

On the profit/loss side, improved productivity and cost-cutting ensured stable operating income throughout the fiscal year. At the same time, ordinary income was pushed down by foreign exchange losses. In addition, although the reversal of deferred tax assets following tax system revisions, as well as loss on closure of the Fujisawa Plant, pushed down net income, it was

supported by gains on the reversal of provisions for special repairs and gains on sales of investment securities.

Sales by business category are as follows:

Category		96th Fiscal Year (April 2014 to December 2014)		97th Fiscal Year (January 2015 to December 2015)	
		Net sales	Breakdown	Net sales	Breakdown
Glass Business	Glass for electronic and information devices	Millions of yen 133,680	% 69.4	Millions of yen 167,050	% 66.5
	Glass for others	59,011	30.6	84,127	33.5
Total		192,692	100	251,177	100

Glass for electronic and information devices:

The decline in prices for substrate glass for LCDs narrowed and shipments remained stable, but sales slowed in response to the impact of sluggish demand for LCD panels in the fourth quarter. Shipments of cover glass for mobile devices (specialty glass for chemical strengthening) recovered as the result of an expansion in models adopted. Sales of glass for optical devices remained strong due to growing demand for communications infrastructure. In glass for electronic devices, sales of cover glass for image sensors were steady, despite the impact of seasonal fluctuations. Sales of substrate glass for solar cells were generally firm.

As a result, net sales of glass for electronic and information devices amounted to ¥167,050 million.

Glass for others:

Although glass fiber applications in high-function plastics for auto parts were affected by slower demand in Asia, sales increased due to solid performance in other regions. And while sales of glass for building materials were weak from the second quarter (April 1 to June 30, 2015), sales recovered in the fourth quarter. In the area of heat-resistant glass and glass for pharmaceutical and medical use, sales were generally firm, primarily overseas.

As a result, the net sales of glass for others amounted to ¥84,127 million.

(2) Capital investment

The NEG Group's capital investment amounted to ¥49,211 million in the fiscal year under review.

In the Glass for electronic and information devices sector, capital investment was made primarily for construction of production facilities at Electric Glass (Xiamen) Co., Ltd. In the Glass for others, capital investment was made mainly for enhancing production capacity of the Malaysian subsidiary.

(3) Fund procurement status

Funds required in the fiscal year under review were for capital investment and working

capital, which the Company financed with its own funds and borrowings, among other means.

Aiming at efficient and flexible fund-raising, the Company has entered into a commitment line agreement for a total amount of ¥25 billion with financial institutions in Japan.

(4) Main Lenders (as of December 31, 2015)

Lender	Borrowing Amount
Sumitomo Mitsui Banking Corporation	¥12.6 billion
Sumitomo Mitsui Trust Bank, Limited	¥8.6 billion
The Shiga Bank, Ltd.	¥7.8 billion
