supervisory committee members

Upon arrival at the meeting, please hand in the enclosed "Exercise of Voting Rights" form at the reception desk. In case of any changes in the information contained in the following business report, consolidated financial statements and financial statements, we will post the changes on our website (http://www.isolite.co.jp/).

Business Report

(from April 1, 2015 to Mar 31, 2016)

1. Brief Business Review of Isolite Group

(1) Business Progress and Results

Overall Performance

In the current fiscal year, Japan's economy has seen gradual recovery in the first half of the fiscal year due to the effects of a weak yen and the low price of crude oil; however, due to the slowdown in China and emerging economies and the appreciation of the yen, the situation in the second half of the year has become uncertain. On the other hand, there was strong improvement in corporate earnings, and there are signs of recovery in the employment situation and capital investment.

In such an environment, we made efforts to improve the strength of our brand and technical capabilities, and worked to strengthen development and sales promotion measures for products that meet the needs of domestic and foreign customers. As a result, overseas orders for automotive and semiconductor manufacturing equipment were strong, and sales increased. In addition, as efforts were made to reduce costs at our foreign subsidiaries, operating profit, recurring profit and current term net profit attributable to parent company shareholders also increased.

As a result, the results of this fiscal year on a consolidated basis showed a revenue of 14.33 billion yen (2.7% increase compared to the previous year), an operating profit of 1.683 billion yen (73.7% increase), a recurring profit of 1.539 billion yen (53.3% increase), and a current term net profit attributable to the parent company of 947 million yen (61.3% increase).

Individual Segment's Performance

In our insulation materials-related business, as the core business of the Group, overseas orders for automotive and semiconductor manufacturing equipment have been steady, sales were higher than in the previous year.

As a result, consolidated sales for the insulation materials-related business that is mainly involved in the sales of insulation materials such as ceramics fibers and insulating firebricks, as well as the design and construction of industrial furnaces, reached 12.888 billion yen, an increase of 3.7% compared to the same period last year.

In our other businesses, sales in functional ceramics products were higher than in the previous year. Environment greening products were down on the previous year. Sales of construction-related materials were about the same level year on year.

As a result, the consolidated revenue for the other businesses reached 1.442 billion yen (5.2% decrease compared to the same period last year).

(2) Investments in Plants and Equipment by Isolite Group

The total amount of capital investment of the Group during the consolidated fiscal year under review was 279 million yen. Within the Isolite Group, the main investments were for updating production equipment at our company, and updating production equipment at ITM Co., Ltd.

(3) Fund-Raising by Isolite Group

There are no significant fund-raising matters to be reported during the term under review.

(4) Issues To Be Addressed by Isolite Group

With regard to future prospects, because of the decline in growth of the Chinese economy, and the downturn in emerging economies due to the decline in resource prices, the outlook is uncertain. Growth in the Japanese economy is also expected to remain sluggish.

Under such an environment, our Group is making an effort to secure the profitability through the maximum utilization of the power of our branding, technology, and sales.

In our insulation material-related business, we will strengthen our sales promotion measures in order to precisely meet the needs and expectations of our domestic and foreign customers. In addition, we will continue to aim to increase sales in overseas markets, particularly in the Southeast Asian region.

In our other businesses, the Group will seize demand in the environmental sector, focus on sales of new low thermal conductivity products, and aim to increase sales.

(5) Change in Results and Assets
