1. Qualitative Information on Quarterly Consolidated Financial Performance

(1) Explanation of Results of Operations

The pace of Japan's economic recovery remained sluggish during the first quarter of the current fiscal year. Although there were improvements in jobs and personal income, corporate earnings stopped improving because of the yen's strength since the beginning of 2016. In addition, there are concerns about the risk of an economic downturn in Japan caused by weakness in the economies of China, other emerging countries in Asia and resource-producing countries.

The pharmaceutical industry, which is the primary source of demand for Freund Group products, has been growing more slowly, mainly in industrialized countries. Causes include more Japanese government actions to hold down healthcare expenditures, such as national health insurance drug price revisions and measures to increase the use of generic drugs, as well as the rising cost of R&D and higher risks associated with the development of new drugs. Consequently, the focus of attention in the pharmaceutical industry is shifting to emerging countries.

The Freund Group has developed innovative new products and worked on precisely targeting customers' needs. Group companies also aggressively pursued opportunities in new business fields.

Net sales increased 30.3% year-over-year to 3,912 million yen and there was an operating income of 295 million yen compared with a 24 million yen loss one year earlier and ordinary income of 314 million yen compared with a 0.4 million yen loss one year earlier. The profit attributable to owners of parent was 48 million yen, compared with a 29 million yen loss one year earlier.

Results by business segment were as follows.

Machinery Business Segment

In the machinery sector, where granulating and coating devices are the main products, sales and operating income increased as orders remained strong because of the large volume of capital expenditures in the generic drug industry.

As a result, net sales rose 32.2 % year-over-year to 2,413 million yen and operating income was 220 million yen, compared with operating loss of 9 million yen one year earlier.

Chemicals Business Segment

Although sales and operating income of food preservative were down slightly because of heated competition, sales of functional excipients used in oral pharmaceuticals were strong primarily for use in generic drugs. Sales of dietary supplements that incorporate Freund's technologies were also strong.

As a result, net sales rose 27.4% year-over-year to 1,498 million yen and operating income up 117.5 % to 178 million yen.

Note: From the first quarter of the current fiscal year, the Company has modified the English term of the business segment formerly titled "Chemical and Food Business" to "Chemicals Business." The content and Japanese term of the business segment remain the same.

(2) Explanation of Financial Position

Assets, liabilities and net assets

Total assets decreased 150 million yen from the end of the previous fiscal year to 17,056 million yen at the end of the first quarter under review. This mainly reflected a decrease in notes and accounts receivable-trade of 1,037 million yen, while there were increases in work in process of 411 million yen, cash and deposits of 221 million yen and electronically recorded monetary claims-operating of 175 million yen.

Total liabilities increased 219 million yen from the end of the previous fiscal year to 5,896 million yen at the

end of the first quarter under review. This mainly reflected an increase in advances received of 413 million yen, while there were decreases in electronically recorded obligations-operating of 110 million yen and income taxes payable of 49 million yen.

Net assets decreased 370 million yen from the end of the previous fiscal year to 11,159 million yen at the end of the first quarter under review.

(3) Explanation of Consolidated Forecast and Other Forward-looking Statements

There are no revisions to the first half and full year consolidated forecasts for the fiscal year ending February 28, 2017, which was disclosed in the Consolidated Financial Results for the Fiscal Year Ended February 29, 2016 dated April 5, 2016.

2. Matters Related to Summary Information (Notes)

(1) Changes in Significant Subsidiaries during the Period

Not applicable.

(2) Application of Special Accounting Methods for Presenting Quarterly Consolidated Financial Statements

The tax expenses are calculated by first estimating the effective tax rate after the application of tax effect accounting with respect to income before income taxes and minority interests during the fiscal year in which the quarter under review falls, and multiplying that rate by the income before income taxes and minority interests for the quarter under review. However, the Company uses the statutory effective tax rate to calculate tax expenses for cases in which using the estimated tax rate gives a noticeably irrational result.

(3) Changes in Accounting Policies and Accounting-based Estimates, and Restatements

Application of the Accounting Standards for Business Combinations

The Company has applied the “Accounting Standard for Business Combinations” (Accounting Standards Board of Japan (ASBJ) Statement No. 21, issued on September 13, 2013), “Accounting Standard for Consolidated Financial Statements” (ASBJ Statement No. 22, issued on September 13, 2013), “Accounting Standard for Business Divestitures” (ASBJ Statement No. 7, issued on September 13, 2013), etc. from the first quarter of the current fiscal year. Accordingly, difference arising from changes in the Company’s ownership interests in subsidiaries in cases where control is retained is recognized in capital surplus, and the acquisition costs in connection with business combinations are recognized as expenses in the fiscal year in which they arise. Regarding business combinations that take place on or after the beginning of the first quarter of the current fiscal year, the Company has revised the method to reflect reviewed allocation of the acquisition costs arising from determination of the provisional accounting treatment on the quarterly consolidated financial statements to which the date of the business combination belongs. In addition, the presentation of net income and other items has been revised, and the minority interests item has been renamed non-controlling interests. For consistency with these changes, the consolidated financial statements for the first quarter of the previous fiscal year and the previous fiscal year have been revised.

The Company has adopted these accounting standards, etc. from the beginning of the first quarter of the current fiscal year, in accordance with the transitional accounting treatments set forth in Article 58-2 (3) of the Accounting Standard for Business Combinations, Article 44-5 (3) of the Accounting Standard for Consolidated Financial Statements, and Article 57-4 (3) of the Accounting Standard for Business Divestitures. The cumulative effect at the beginning of the first quarter upon the retrospective adoption of the above accounting policies for prior years is added to or deducted from capital surplus and retained earnings.

As a result, there were decreases of 77,159 thousand yen in goodwill, 11,067 thousand yen in negative goodwill and 77,678 thousand yen in retained earnings, and increases of 8,991 thousand yen in capital surplus

and 2,594 thousand yen in foreign currency translation adjustment in the first quarter of the current fiscal year. In addition, operating income increased 4,100 thousand yen and ordinary income and profit before income taxes increased 2,255 thousand yen each in the first quarter of the current fiscal year.

Application of Practical Solution on a Change in Depreciation Method due to Tax Reform 2016

Following the revised Corporation Tax Law, the Company has applied the “Practical Solution on a Change in Depreciation Method due to Tax Reform 2016” (ASBJ Practical Issues Task Force (PITF) No. 32, June 17, 2016) from the first quarter of the current fiscal year, and changed the method for the depreciation of facilities attached to buildings and structures acquired on or after April 1, 2016, from the declining-balance method to the straight-line method.

This change has no effect on the results of operations in the first quarter of the current fiscal year.
