## 3. Status of Borrowings etc. following the Debt Financing

(1) Balance of interest-bearing debt following the Debt Financing

|                                 |                            |                |                | (Unit: million yen) |
|---------------------------------|----------------------------|----------------|----------------|---------------------|
|                                 |                            | Prior to       | After          | Increase /          |
|                                 |                            | Debt Financing | Debt Financing | Decrease            |
|                                 | Short-term borrowings      | 15,000         | 15,000         | 0                   |
|                                 | Long-term borrowings       | 379,750        | 389,750        | 10,000              |
|                                 | (of which those subject to | 19,000         | 19,000         | 0                   |
|                                 | floating interest rates)   | 10,000         |                |                     |
|                                 | Bonds                      | 45,000         | 35,000         | (10,000)            |
| Total interest-bearing debt     |                            | 439,750        | 439,750        | 0                   |
| Total long-term fixed-rate debt |                            | 405,750        | 405,750        | 0                   |

#### (2) Ratios of interest-bearing debt etc. following the Debt Financing

| <u> </u>                        | 0              | 0              |             |
|---------------------------------|----------------|----------------|-------------|
|                                 | Prior to       | After          | Increase /  |
|                                 | Debt Financing | Debt Financing | Decrease(%) |
|                                 | (%)            | (%)            |             |
| Ratio of interest-bearing debt  | 45.9           | 45.9           | -           |
| Long-term fixed-rate debt ratio | 92.3           | 92.3           | -           |

(\*1) The calculation of ratio of interest-bearing debt is derived through use of the following method, and interest-bearing debt includes bonds in addition to borrowings.
Ratio of interest-bearing debt = total interest-bearing debt ÷ (total interest-bearing debt +

- unitholders' capital) x 100 (\*2) Long-term fixed-rate debt ratio = total long-term fixed-rate debt ÷ total interest-bearing debt x 100.
- (\*3) Each ratio is calculated to the second decimal point with fractions less than .05 rounded downward and fractions of .05 and above rounded upward.
- 4. Other Matters Required for Investors to Appropriately Understand and Evaluate the Above Information

There is no change to the content of "Investment Risks" of NBF's Financial Report filed as of March 30, 2016 with respect to the risks involved in repayment etc. of the current debt financing.

End
