Note 2 - Principal accounting methods

a) Presentation of the financial statements

The financial statements of the Fund are presented in accordance with the legislation in force in Luxembourg on Undertakings for Collective Investment. The consolidation currency of the Fund is the US dollar (USD).

The statement of operations and changes in net assets covers the financial period from 1 January 2016 to 30 June 2016.

b) Net asset value

This semi-annual report is prepared on the basis of the last net asset value as at 30 June 2016.

c) Valuation of the securities portfolio

Investments listed on an official stock exchange or dealt in on another Regulated Market which operates regularly and is recognized and open to the public, are valued at the last available price, and, in the event that there are several such markets, on the basis of the last available price on the principal market for that investment. If such a price does not reflect the investment's fair value, it is valued at its probable sales value, which shall be estimated with prudence and in good faith by the Board of Directors of the Management Company.

Investments not dealt in or listed on a stock exchange or on a Regulated Market operating regularly, recognized and open to the public, are valued at their probable sales value, which shall be estimated with prudence and in good faith by the Board of Directors of the Management Company.

Liquid assets, money market instruments and all other instruments may be valued at the last known closing price on the valuation day or according to the straight-line depreciation method. In the case of straight-line depreciation, money market instruments are disclosed in portfolio at cost and their value is increased in the Statement of Operations and Changes in Net Assets by the accrued interest under the caption "Bank Interest". Portfolio positions will be regularly reviewed under the supervision of the Management Company in order to determine whether there is a difference between the valuation found according to the closing price method and straight-line depreciation method. If there is a difference that is likely to result in significant dilution or to be detrimental to the Unitholders, appropriate corrective action may be taken, including, if necessary, calculation of the net asset value using the last known closing prices.

The list of changes in the portfolio during the financial period from 1 January 2016 to 30 June 2016, is available free of charge at the Registered Office of the Management Company of the Fund.

Notes to the financial statements at 30/06/2016

d) Conversion of foreign currencies

The cost of investments denominated in currencies other than the Fund accounting currency is converted into that currency at the exchange rate prevailing at the purchase date.

Income and expenses in currencies other than the Fund accounting currency are converted into that currency at the exchange rate at the transaction date.

At the end of the period, the assets and liabilities denominated in currencies other than the Fund accounting currency are converted into that currency at the exchange rates prevailing at that date. The resulting realized and unrealized foreign exchange profits or losses are included in the Statement of Operations and Changes in Net Assets.

As at 30 June 2016, the sole sub-fund and unit class were denominated in USD.

e) Forward Foreign Exchange Contracts

Open Forward Foreign Exchange Contracts are valued at the exchange rate prevailing at the valuation date on the remaining life of the contracts. Resulting changes in unrealized profits or losses and the realized profits and losses are included in the Statement of Operations and Changes in Net Assets.

f) Swap Contracts

Open swaps are valued at their expected realization value. The resulting changes in unrealized profits or losses and the realized profits or losses are included in the Statement of Operations and Changes in Net Assets. Realized profits or losses are presented net of interest expenses paid by the Fund to the swap counterparty.

g) Income

Dividends are recorded at the ex-dividend date. Interest is recorded on an accrual basis.

h) Tracking error

The Fund's objective is to achieve a return comparable to that of the S&P GSCI® Energy & Metals Capped Component 35/20 Total Return Index (Bloomberg: SPGCNCT) (this Fund's "Benchmark Index"). As the Fund is index-based, its objective is to maintain a tracking deviation in absolute terms between its Net Asset Value and the value of the relevant Benchmark Index. The anticipated level of tracking error between the Fund and the level of the Benchmark index, in normal market conditions, is 1 % at the maximum.

The sub-fund aims at replicating as closely as possible the performance of its reference index. However, it may experience some degree of tracking error due to the replication costs.

In accordance with applicable Luxembourg law and accepted practice, the Fund is not liable for Luxembourg corporation tax.
