(Reference) Results for the fiscal year (the fiscal year ended March 31, 2016)	352,397	33,635	36,625	25,686	241.91

<Reasons for revisions>

1. Revisions to forecast data

During the third quarter of the fiscal year ending March 31, 2017 (October 1, 2016 to December 31, 2016), orders made a steady performance due to strong automobile and industrial equipment markets which the Company focuses as important markets, and increase of adoption of new products such as sensor devices for consumer electronics market including smart phones. Furthermore, due to the appreciation of the yen more than the forecast in November 2016, and the effect of costs reduction, sales and operating income are expected to exceed the forecast announced on November 1, 2016. Also, ordinary income and profit attributable to owners of parent are expected to increase significantly due to the occurrence of foreign currency exchange gain in the third quarter. Under these circumstances, the Company has revised its forecast data of consolidated business results for the fiscal year ending March 31, 2017 announced on November 1, 2016 as above. The exchange rate in the fourth quarter of the fiscal year ending March 31, 2017 is based on a rate of 110 yen to 1 US dollar.

2. Posting of Non-Operating Income (foreign currency exchange gain)

The Company posted a foreign currency exchange loss of 9,124 million yen as non-operating expenses in the first six months of the year ending March 31, 2017 (April 1, 2016 to September 30, 2016). Meanwhile, fluctuation of the exchange rates resulted in a foreign currency exchange gain of 11,833 million yen in the third quarter of the year ending March 31, 2017 (October 1, 2016 to December 31, 2016). Therefore, the Company has posted a foreign currency exchange gain of 2,708 million yen as a non-operating income in the first nine months of the year ending March 31, 2017 (April 1, 2016 to December 31, 2016).

Note on forecast data: Since the statement regarding the business results forecast accounted for in this press release is based on current information acquired by ROHM as well as specific legitimate prerequisites, actual business results may be considerably different due to various factors.
