Movements of assets and liabilities

The consolidated balance sheet has been prepared in accordance with International Accounting Standards (IAS) No. 1, “Presentation of Financial Statements.” On the other hand, “Movements of assets and liabilities” including net operating assets (NOA) are a reconfiguration of the consolidated balance sheet as internal indicators and are identical to the indicators disclosed by Roche. Furthermore, no items from the assets and liabilities of IFRS have been excluded, as the Core results concept only applies to the income statement.

Net operating assets (NOA)

Other cash adjustment on operating profit: adjustments for all non-cash income and expense items other than amortization expenses and impairment included in operating profit (such as loss on inventory differences, reserve for doubtful accounts, stock option expenses, loss on asset retirement, and increase/decrease in reserves) as well as all non-operating income and expense cash flows relating to net operating assets (NOA) (including proceeds from the sales of assets and reserve payments)

Operating free cash flow(Operating FCF): pretax cash flow after adjusting changes in working capital and operating investments in assets (tangible and intangible) to “operating profit, net of operating cash adjustments,” which shows the company’s cash generation ability from operating activities.

Free cash flow(FCF): the ability to generate net cash from a management perspective after deducting tax, dividends, and other payments from operating FCF.

Net change in net cash: increases and decreases in marketable securities and interest-bearing debt are included.

The concepts of operating profit, operating FCF and movements of assets and liabilities including NOA presented in the previous page are mutually consistent.

Movements of free cash flows:

The consolidated statement of cash flows has been prepared in accordance with International Accounting Standard (IAS) No. 7, “Statement of Cash Flows.” FCF is a reconfiguration of the consolidated statement of cash flows as internal indicators and is identical to the indicators disclosed by Roche. Furthermore, no items from FCF have been excluded, as the Core results concept only applies to the income statement.

Previously, FCF represents the amount net of dividends paid. However, effective from the second quarter of FY 2016, FCF represents the amount before the deduction of dividends paid to conform to the general definition of FCF, following Roche’s change in definition of FCF. This change is reflected from the financial results for the second quarter of FY 2016, and FCF before the first quarter of FY 2016 has been amended for comparison purpose. The change has no effect on operating FCF.

R&D Activities (Jan. 1, 2017- Apr. 25, 2017)

As for clinical development activities, Chugai saw progress as described below:

Oncology

- We obtained approval in Europe for the indication of adult patients with anaplastic lymphoma kinase (ALK) positive, metastatic NSCLC who have progressed on or those intolerant to crizotinib, for the ALK inhibitor AF802/RG7853 in February, 2017. We filed overseas applications for the expected indication of ALK positive, metastatic NSCLC (1st line) in March, 2017.
- We filed an application for the engineered anti-PDL1 monoclonal antibody RG7446 for the expected indication of NSCLC in February, 2017. We started Phase III multinational studies for the expected indication of renal cell carcinoma (adjuvant) in January, 2017, and for ovarian cancer and prostate cancer in March, 2017.
- We decided to discontinue development of the anti-VEGF (Vascular Endothelial Growth Factor) humanized monoclonal antibody (product name: Avastin) for malignant pleural mesothelioma, since Roche has judged that the MAPS study, an overseas investigator initiated trial, was not fully conducted according to registrational standards.

Renal Diseases

- We started overseas Phase I study for EOS789 for the expected indication of hyperphosphatemia in February, 2017.

Neurology

- We started Phase I study for the SMN2 splicing modifier RG7916 for the expected indication of spinal muscular atrophy in January, 2017.
- We started Phase III multinational study for the anti-amyloid-beta humanized monoclonal antibody RG7412 for the expected indication of Alzheimer's disease in March, 2017.
