## 1. Overview of Quarterly Consolidated Financial Results

### (1) Consolidated Operating Results

Consolidated net sales for the six months ended September 30, 2017 increased by ¥52.2 billion year on year to ¥584.6 billion. This was primarily due to the higher unit selling price of city gas under the fuel cost adjustment system of the Gas Business, and an increase in sales volume in the Electricity Business. Consolidated ordinary income decreased by ¥13.6 billion year on year to ¥36.4 billion. This was primarily because the time lag between fluctuations in raw material costs in the Gas Business and their reflection in the unit selling price of city gas caused a decrease in profit(\*). Profit attributable to owners of parent decreased by ¥9.5 billion year on year to ¥23.8 billion.

(\*) There is a time lag between fluctuations in raw material costs and their reflection in the unit selling price of city gas under the fuel cost adjustment system, which causes a temporary increase/decrease in profit. This resulted in a temporary decrease in profit for the current second quarter, and a temporary increase in profit for the previous second quarter.

### (2) Consolidated Financial Position

Total assets as of September 30, 2017 decreased by ¥22.9 billion compared with March 31, 2017 to ¥1,863.6 billion. (Calculation of tax expenses)

For major consolidated subsidiaries, the effective tax rates (after applying tax effect accounting) expected to be imposed on their income before income taxes applicable to the tax year in which the current second quarter is included were estimated based on reasonable assumptions. Tax expenses for the second quarter were then calculated by multiplying the income before income taxes of respective subsidiaries for the quarter by the estimated effective tax rates.
