\* Explanation for appropriate use of forecasts and other notes

- (1) SCREEN Holdings has revised our business forecast for the fiscal year ending March 31, 2018 that was previously announced on October 31, 2017, as noted in this financial report.
- (2) The forward-looking statements such as operational forecasts contained in this document are based on the information currently available to SCREEN Holdings and certain assumptions that are regarded as legitimate. SCREEN Holdings does not promise that the forecasts or estimates will be accurate. Large discrepancies may be seen in the actual results due to various factors. Please refer to P.4 "3. Qualitative information regarding consolidated business results forecasts" for the assumptions used and other notes.

## [Qualitative Information, Financial Statements]

### 1. Qualitative information regarding the status of consolidated business results

During the first nine months of the fiscal year ending March 31, 2018 (April 1, 2017 to December 31, 2017), global economic conditions continued to gradually improve despite growing uncertainty regarding the exit of the U.K. from the European Union and concerns about financial policy in the United States. The U.S. economy was firm, as employment and consumer spending continued to improve and capital investment gradually rose. In Europe, continued improvement in consumer spending drove ongoing, gradual economic recovery, although weakness persisted in certain areas. China's economy showed signs of improvement, due in part to the effects of government policy aimed at stable growth. The Japanese economy, meanwhile, saw gentle improvement, backed by improving corporate earnings and employment as well as recovery in capital investment and consumer spending.

With regard to the business conditions surrounding the SCREEN Group, in the semiconductor industry, capital investment among memory manufacturers remained steady, backed by memory demand due to growing data center processing volumes and a shift to SSD storage. In addition, capital investment by logic chip manufacturers ramped up and capital investment in miniaturization by foundries continued, reflecting strong demand for high-end smartphones and data centers for IoT (internet of things)-related big data processing. In the FPD business field, investment in large-sized LCD panels for televisions was strong in China, due to the shift to larger, higher resolution television displays, and investment in OLED displays for smartphones was brisk, especially in South Korea.

Under these circumstances, the SCREEN Group posted consolidated net sales of ¥224,162 million for the first nine months of the fiscal year ending March 31, 2018, an increase of ¥14,147 million from the corresponding period of the previous fiscal year. On the earnings front, operating income totaled ¥23,791 million, up ¥2,464 million year on year, reflecting the increase in net sales. Ordinary income amounted to ¥23,028 million, up ¥2,240 million year on year. Profit attributable to owners of parent totaled ¥15,047 million, down ¥1,290 million compared with the corresponding period of the previous fiscal year, reflecting such factors as an increase in income taxes.

Performance by reportable segment is explained below.

On April 1, 2017, the printed circuit board (PCB)-related equipment business of the previous SCREEN Graphic and Precision Solutions Co., Ltd. was spun off to form SCREEN PE Solutions Co., Ltd., a fully owned Group subsidiary. Consequently, as of the first quarter of the fiscal year ending March 31 2018, the Graphic arts equipment and PCB-related equipment businesses are classified as reportable segments, under the segment names Graphic arts equipment (GA) business and PCB-related equipment (PE) business.

In line with these changes, the other reportable segments have also been renamed as follows.  
 Semiconductor solutions (SE) business → Semiconductor equipment (SE) business  
 Finetech solutions (FT) business → Display production equipment and coater (FT) business

#### ***The Semiconductor Equipment (SE) Business***

In the SE business, sales to foundries decreased year on year, while sales to logic chip and memory manufacturers grew. By product, sales of single wafer cleaning equipment fell. Sales of batch-type cleaning equipment and coater/developers increased. By region, sales in Taiwan decreased, while those in such markets as South Korea and North America grew. As a result, net sales in this segment amounted to ¥145,327 million, up 2.1% year on year. Operating income in this segment came to ¥20,224 million, an increase of ¥1,745 million, or 9.4%, from the corresponding period of the previous fiscal year, reflecting the increase in net sales and an improvement in the variable cost ratio.

#### ***The Graphic Arts Equipment (GA) Business***

In the GA business, CTP (computer-to-plate) equipment sales fell, but POD (print on demand) equipment sales grew. As a result, net sales in this segment amounted to ¥36,609 million, up 12.4% year on year. Operating income in this segment came to ¥1,641 million, up 142.2% from the corresponding period of the previous fiscal year, reflecting the increase in net sales.

#### ***The Display Production Equipment and Coater (FT) Business***

In the FT business, sales in Japan were down year on year, but sales of production equipment for large-sized panels in China increased, as did sales of production equipment for OLED displays in South Korea. As a result, net sales in this segment amounted to ¥31,980 million, up 11.2% year on year. Operating income in this segment came to ¥2,344 million, down 20.8% from the corresponding period of the previous fiscal year, reflecting a deterioration in the variable cost ratio and increase in fixed costs, despite the increase in net sales.

#### ***The PCB-Related Equipment (PE) Business***

In the PE business, sales of mainstay direct imaging equipment in South Korea and China increased due to an increase in demand for high-end smartphones. As a result, net sales in this segment amounted to 9,247 million, up 65.9% year on year. Operating income in this segment came to ¥1,016 million, up 119.8% from the corresponding period of the previous fiscal year, reflecting such factors as the increase in net sales.

## 2. Qualitative information regarding changes in consolidated financial position

Total assets as of December 31, 2017 stood at ¥334,320 million, an increase of ¥ 33,660 million, or 11.2%, compared with March 31, 2017. This was largely due to an increase in inventories and investment securities despite decreases in cash and time deposits.

Total liabilities amounted to ¥ 175,321 million, up ¥17,577 million, or 11.1 %, compared with the end of the previous fiscal year. This was mainly attributable to an increase in notes and accounts payable-trade.

Total net assets amounted to ¥158,999 million, up ¥16,083 million, or 11.3%, from March 31, 2017. This was mainly attributable to the recording of profit attributable to owners of parent and an increase in valuation difference on available-for-sale securities due to an increase in the market values of held stocks, despite spending for the purchase of treasury stock.

As a result, the equity ratio as of December 31, 2017 stood at 47.5%.

### *Status of Cash Flows*

The status of cash flows for the first nine months of the fiscal year ending March 31, 2018 is as follows.

Net cash provided by operating activities amounted to ¥13,763 million, compared with ¥45,787 million provided by operating activities in the first nine months of the previous fiscal year. This was because the sum of income before income taxes, an increase in notes and accounts payable-trade and other inflows exceeded the increase in inventories, the payment of income taxes paid, and other outflows.

Net cash used in investing activities amounted to ¥4,949 million, compared with ¥3,508 million used in investing activities in the first nine months of the previous fiscal year. This was largely attributable to the purchase of property, plant and equipment, such as equipment for R&D.

Net cash used in financing activities amounted to ¥9,548 million, compared with ¥18,529 million used in financing activities in the first nine months of the previous fiscal year. This was due in part to the payment of cash dividends and the acquisition of treasury stock.

As a result, cash and cash equivalents as of December 31, 2017, totaled ¥44,726 million, down ¥196 million from March 31, 2017.

## 3. Qualitative information regarding consolidated business results forecasts

Taking the recent operating conditions into account, SCREEN Holdings has revised its consolidated business forecast for the fiscal year ending March 31, 2018, from the previous forecast announced on October 31, 2017, as shown below.

**[ Notes for quarterly consolidated financial statements ]**

Application of accounting methods specific to the preparation of quarterly consolidated financial statements:

Calculation of income taxes

Income tax amount is calculated principally by multiplying reasonably estimated annual effective tax rate through the third quarter ended December 31, 2017, with the effects of deferred taxes reflected, by the amount of year-to-date income before income taxes.

When calculation using reasonably estimated annual effective tax rate causes irrational results, income tax amount is calculated based on the legal tax rate.

Notes:

\*1 SE segment develops and manufactures semiconductor production equipment and conducts sales and maintenance services. In the GA segment, graphic arts equipment is developed, manufactured, sold and maintained. The FT segment develops, manufactures and markets display production equipment and coater equipment, and it also conducts maintenance services. In the PE segment, PCB related equipment is developed, manufactured, sold and maintained.

\*2 The “Other” category incorporates operations not included in reportable segments, including development, manufacturing and sales of equipment in life science business and other, software development, planning and production of printed matter and other businesses.

\*3 Segment operating income (loss) adjustment of ¥ (276) million is the Company’s profit (loss) not attributable to reportable segment.

\*4 Segment income (loss) is adjusted with operating income under consolidated statements of income.

## 2. The changes in reportable segments

On April 1, 2017, the printed circuit board (PCB)-related equipment business of the previous SCREEN Graphic and Precision Solutions Co., Ltd. was spun off to form SCREEN PE Solutions Co., Ltd., a fully owned Group subsidiary. Consequently, as of the first quarter of the fiscal year ending March 31, 2018, the Graphic arts equipment and PCB-related equipment businesses are classified as reportable segments, under the segment names Graphic arts equipment (GA) business and PCB-related equipment (PE) business.

In line with these changes, the other reportable segments have also been renamed as follows.

Semiconductor solutions (SE) business → Semiconductor equipment (SE) business

Finetech solutions (FT) business → Display production equipment and coater (FT) business

Segment information for the third quarter of the previous fiscal year has been prepared according to the reclassified segments and is presented under “Net sales and income (loss) in reportable segment” beneath “Nine months ended Dec. 31, 2016.”
