Notes to Consolidated Financial Statements

1. Important Matters that Become Basis of Presenting Consolidated Financial Statements

(1) Scope of consolidation

(i) State of consolidated subsidiaries

- Number of consolidated subsidiaries: 8
- Names of major consolidated subsidiaries: TSUGAMI MACHINERY CO., LTD.
TSUGAMI GENERAL SERVICE CO., LTD.
PRECISION TSUGAMI (CHINA) CORPORATION
Shinagawa Precision Machinery (Zhejiang) Co., Ltd.

- Names of major non-consolidated subsidiaries:
TSUGAMI (THAI) CO., LTD.
TSUGAMI EUROPE GmbH
TSUGAMI TECH SOLUTIONS INDIA PRIVATE LIMITED
TSUGAMI Universal Pte. Ltd.
- Reason for non-consolidation: The non-consolidated subsidiaries are small in size, and their total assets, sales, net income or loss (amounts to equivalent to the equity holding) and retained earnings (amounts to equivalent to the equity holding) do not have significant material effect on the consolidated financial statements.

(2) Application of equity method

(i) State of non-consolidated subsidiaries and affiliates to which the equity method is applicable

- Number of non-consolidated subsidiaries and affiliates to which the equity method is applicable:
0

(ii) State of non-consolidated subsidiaries and affiliates to which the equity method is not applicable

- Names of major companies: TSUGAMI (THAI) CO., LTD.
TSUGAMI EUROPE GmbH
TSUGAMI TECH SOLUTIONS INDIA PRIVATE LIMITED
TSUGAMI Universal Pte. Ltd.
- Reason for not applying the equity method: These non-consolidated subsidiaries and affiliates are excluded from the scope of equity method application because their exclusion produces minor effects on consolidated financial statements and has no significance in light of their respective net income or net loss (amount corresponding to equity), retained earnings and other items.

(3) Matters concerning changes in the scope of consolidation and the scope of equity method application

TSUGAMI PRECISION ENGINEERING INDIA PRIVATE LIMITED which had been included in the scope of Non-consolidated subsidiaries or affiliates accounted for by the equity method in the previous fiscal year, is included in consolidated subsidiaries from the fiscal year under review because of increasing their significance.

(4) Matters concerning fiscal year of consolidated subsidiaries, etc.

Among the consolidated subsidiaries, the balance sheet date of PRECISION TSUGAMI (CHINA) CORPORATION and Shinagawa Precision Machinery (Zhejiang) Co., Ltd. are December 31. In preparing the consolidated financial statements, financial statements based on provisional calculations made as of the consolidated closing date were utilized in connection with this company.

(5) Matters concerning significant accounting policies

(i) Valuation standard and valuation method of major assets

a. Other securities

- Securities with fair market value: Market value method based on the quoted market value on the closing date of the fiscal year (Valuation differences are directly charged or credited to shareholders' equity, and the cost of securities sold is calculated using the moving-average method.)

- Securities without fair market value:

Cost accounting method using the moving average method

b. Valuation standard and valuation method for inventories

Primarily cost accounting method using the moving average method (The values in the consolidated balance sheet were calculated using the book-value write-down method based on the decline of profitability.).

(ii) Depreciation and amortization methods used for material depreciable and amortizable assets

a. Property, plant and equipment (excluding leased assets)

The straight-line method is mainly adopted.

The significant service lives are summarized as follows:

Buildings and structures: 15-38 years

Machinery, equipment and vehicles: 9 years

b. Intangible assets (excluding leased assets)

- Software for internal use Such assets are amortized using the straight-line method based on the effective period of internal use (five years).

- Other intangible assets The straight-line method is used.

c. Leased assets

- Depreciation for leased assets is computed using the straight-line method over the lease terms as service life, assuming no residual value.

(iii) Accounting standards for significant allowances

- | | |
|---|--|
| a. Allowance for doubtful accounts | To provide for a loss on doubtful accounts, general allowances are provided using a rate determined by past experience with bad debts. Specific allowances are provided for the estimated amounts considered to be uncollectible after reviewing the individual collectibility of certain doubtful accounts. |
| b. Allowance for employees' bonuses | To prepare for bonus payments to employees of the Company and certain its consolidated subsidiaries, amounts that need to be paid in the consolidated fiscal year under review are provided as estimates. |
| c. Allowance for directors' retirement benefits | Certain of the Company's consolidated subsidiaries recorded an allowance for retirement benefits for directors equivalent to the amount payable in accordance with their rules for directors' retirement benefits. |
| d. Allowance for product warranties | To provide for expenses for repair cost that arise in the after-sales free-repair warranty period, the Company and certain its consolidated subsidiaries accrue repair expenses using an amount projected based on the past ratio of repairs. |

(iv) Standards for translating significant assets or liabilities in foreign currencies into yen

Monetary assets and liabilities denominated in foreign currencies are translated into yen at spot exchange rates at the consolidated closing date. Translation adjustments are accounted for as gains or losses. Assets, liabilities, revenues, and expenses at overseas subsidiaries are translated into yen at spot exchange rates at the consolidated closing date. Translation adjustments are included in "Translation adjustments" in net assets.

(v) Other important matters for the preparation of consolidated financial statements

a. Accounting standards for Net defined benefit liability

For net defined benefit liability, the amount that is obtained by subtracting pension assets from retirement benefit obligations is provided on the basis of estimated amounts at the end of the consolidated fiscal year under review to prepare for retirement benefits paid to employees of the Company.

Any actuarial difference is expensed equally from the fiscal year following its accrual over the average remaining service period (five years) of employees at the time of the accrual using the straight-line method.

Any unrecognized actuarial difference is posted in remeasurements of defined benefit plans in accumulated other comprehensive income under net assets, after making an adjustment for tax effect.

b. Accounting method for consumption taxes

The tax-exclusion method is used for the calculation of consumption tax and local consumption tax.

2. Changes in accounting policy

(Change in method of depreciation for property, plant and equipment)

The Company and its domestic consolidated subsidiaries previously used the declining-balance method for depreciation and amortization of property, plant and equipment (excluding leased assets) (Please note that the straight-line method has been used for buildings (excluding building fixtures) purchased on or after April 1, 1998 and building fixtures and structures purchased on or after April 1, 2016). From the consolidated fiscal year under review, the depreciation method has been changed to the straight-line method.

The manufacturing bases of the Group are located at the Company and its subsidiaries in China. With the expansion of the Chinese market, the Company has been shifting manufacturing to its subsidiaries in China. In addition, in the previous fiscal year, the Company integrated the domestic manufacturing function to Nagaoka Factory, sold other plants and

conducted a review of other domestic bases. In the current fiscal year and thereafter, Nagaoka Factory will play the role as headquarters for the Group's manufacture and development, and the Company expects stable operation that is resistant to order trends.

As a result, the Company changed the method of depreciation from the declining-balance method to the straight-line method in order to carry out a cost allocation for property, plant and equipment that reflects the actual conditions of the Company and its domestic consolidated subsidiaries.

Compared with the previous depreciation method, operating income, ordinary income and income before income taxes and other adjustments in the consolidated fiscal year under review each increased by ¥23 million.

3. Changes in Method of Presentation

(Consolidated Balance Sheet)

"Advances received" which had been included in "Other" of current liabilities in the previous consolidated fiscal year, was posted as a separate item in the consolidated fiscal year under review because of an increase in its importance in terms of the amount.

"Advances received" in the previous consolidated fiscal year was ¥905 million.

(2) Aggregated depreciation for property, plant and equipment: ¥10,171 million

(3) Amount of discount for bills receivable: ¥1,533 million

Amount of discount for export bills receivable: ¥2,692 million

(4) Notes due at the end of the consolidated fiscal year

Notes to Non-Consolidated Financial Statements

1. Matters Concerning Significant Accounting Policies

(1) Valuation standard and valuation method for assets

- (i) Shares in subsidiaries and affiliates: Cost accounting method using the moving average method
- (ii) Other securities:
 - Securities with fair market value: Market value method based on the quoted market value on the closing date of the fiscal year (Valuation differences are directly charged or credited to shareholders' equity, and the cost of securities sold is calculated using the moving-average method.)
 - Securities without fair market value: Cost accounting method using the moving average method
- (iii) Valuation standard and valuation method for inventories

Primarily cost accounting method using the moving average method (The values in the balance sheet were calculated using the book- value write-down method based on the decline of profitability.).

(2) Depreciation method for non-current assets

- (i) Property, plant and equipment (excluding leased assets)
 - The straight-line method is adopted.
 - The significant service lives are summarized as follows:

Buildings:	15 to 38 years
Machinery and equipment:	9 years
Tools, furniture and fixtures	5 years
- (ii) Intangible assets (excluding leased assets)
 - Software for internal use: Such assets are amortized using the straight-line method based on the effective period of internal use (five years).
- (iii) Leased assets
 - Depreciation for leased assets is computed using the straight-line method over the lease terms as service life, assuming no residual value.

(3) Accounting standards for allowances

- (i) Allowance for doubtful accounts: To provide for a loss on doubtful accounts, general allowances are provided using a rate determined by past experience with bad debts. Specific allowances are provided for the estimated amounts considered to be uncollectible after reviewing the individual collectibility of certain doubtful accounts.
- (ii) Allowance for employees' bonuses: To prepare for bonus payments to employees, an amount that needs to be paid in the fiscal year under review are provided as an estimate.
- (iii) Allowance for retirement benefits: To prepare for retirement benefits payment to employees, the allowance is provided on the basis of amounts of retirement benefit obligations and pension assets estimated at the end of the fiscal year under review.
Any actuarial difference is expensed equally from the fiscal year following its accrual over the average remaining service period (five years) of employees at the time of the accrual using the straight-line method.
- (iv) Allowance for product warranties: To provide for expenses for repair cost that arise in the after-sales free-repair warranty period, the Company accrues repair expenses using an amount projected based on the past ratio of repairs.

(4) Other matters that form the basis for the preparation of financial statements

Accounting method for consumption taxes

The tax-exclusion method is used for the calculation of consumption tax and local consumption tax.

2. Changes in accounting policy

(Change in method of depreciation for property, plant and equipment)

The Company previously used the declining-balance method for depreciation and amortization of property, plant and equipment (excluding leased assets) (Please note that the straight-line method has been used for buildings (excluding building fixtures) purchased on or after April 1, 1998 and building fixtures and structures purchased on or after April 1, 2016). From the fiscal year under review, the depreciation method has been changed to the straight-line method.

The manufacturing bases of the Group are located at the Company and its subsidiaries in China. With the expansion of the Chinese market, the Company has been shifting manufacturing to its subsidiaries in China. In addition, in the previous fiscal year, the Company integrated the domestic manufacturing function to Nagaoka Factory, sold other plants and conducted a review of other domestic bases. In the current fiscal year and thereafter, Nagaoka Factory will play the role as headquarters for the Group's manufacture and development, and the Company expects stable operation that is resistant to order trends.

As a result, the Company changed the method of depreciation from the declining-balance method to the straight-line method in order to carry out a cost allocation for property, plant and equipment that reflects the actual conditions of the Company.

Compared with the previous depreciation method, operating income, ordinary income and income before income taxes and other adjustments in the fiscal year under review each increased by ¥23 million.

3. Changes in Method of Presentation

(Non- Consolidated Statements of Income)

"Rent income" which had been posted as a separate item in the previous fiscal year, was included in "Other" of the non-operating income in the fiscal year under review because of the amount decrease in its importance in terms of the amount.

"Rent income" in the fiscal year under review was ¥15 million.

"Rental asset expenses" which had been posted as a separate item in the previous fiscal year, was included in "Other" of the non-operating expenses in the fiscal year under review because of the amount decrease in its importance in terms of the amount.

"Rental asset expenses" in the fiscal year under review was ¥22 million.

The Company will change its company form to a company with an audit and supervisory committee subject to approval of the proposed Item 1 “Partial Amendments to the Articles of Incorporation.”

We therefore request abolition of the current amount of compensation, etc. and setting of a new amount of compensation, etc. for Directors (other than Directors who are members of the audit and supervisory committee).

The amount of compensation, etc. for Directors of the Company and the amount of compensation, etc. in the form of subscription rights to shares to be allocated as stock options for a stock-linked compensation plan, both of which were approved at the 109th Annual Shareholders Meeting held on June 15, 2012, are respectively “not more than ¥250 million per year (excluding salary for employees)” and “not more than ¥80 million per year with the upper limit to the total number of the subscription rights to shares issued in each fiscal year, which is 300 units (1,000 shares per unit).”

The current number of Directors is not more than ten (10) persons. When the proposed Item 1 “Partial Amendments to the Articles of Incorporation” is approved and passed, the number of Directors (other than Directors who are members of the audit and supervisory committee) will not be more than ten (10) persons, same as the current number of Directors.

We therefore request the setting of the same amount of compensation, etc. as the current amount.

However, when the proposed Item 1 is approved and passed, the share unit number will be changed from 1,000 shares to 100 shares on October 1, 2018. Accordingly, the “upper limit to the total number of the subscription rights to shares, which is 300 units (1,000 shares per unit)” will be changed to the “upper limit to the total number of the subscription rights to shares, which is 3,000 units (100 shares per unit).

The subscription rights to shares to be allocated as stock options for a stock-linked compensation plan will not be granted to outside directors.

The terms and conditions for the subscription rights to shares to be allocated as stock options for a stock-linked compensation plan will not be changed from those already approved, except for the terms and conditions for exercise of those rights described below: the provision that “in principle, a holder of the subscription rights to shares may exercise the subscription rights to shares, only when the holder no longer holds a position as the Company’s Director, statutory auditor, executive officer, and/or employee with a similar title” will be changed to the provision that “in principle, a holder of the subscription rights to shares may exercise the subscription rights to shares, only when the holder no longer holds a position as the Company’s Director (other than a Director who is a member of the audit and supervisory committee), Director who is a member of the audit and supervisory committee, executive officer, and/or employee with a similar title” when the proposed Item 1 described above is approved and passed.

Item 5: Setting of Amount of Compensation, etc. for Directors Who Are Members of the Audit and Supervisory Committee

The Company will change its company form to a company with an audit and supervisory committee subject to approval of the proposed Item 1 “Partial Amendments to the Articles of Incorporation.”

We therefore request the setting of the new amount of compensation, etc. for Directors who are members of the audit and supervisory committee.

The amount of compensation, etc. for statutory auditors of the Company and the amount of additional compensation, etc. in the form of subscription rights to shares to be allocated as stock options for a stock-linked compensation plan, both of which were approved at the 103rd Annual Shareholders Meeting held on June 23, 2006, are respectively “not more than ¥60 million per year” and “not more than ¥20 million per year.”

The current number of statutory auditors is five (5) persons. When the proposed Item 1 “Partial Amendments to the Articles of Incorporation” is approved and passed, the number of Directors who are members of the audit and supervisory committee will be not more than five (5) persons, same as the current number of statutory auditors.

We request the setting of the new amount of compensation, etc. for Directors who are members of the audit and supervisory committee at “not more than ¥80 million per year” which is equivalent to the sum of the current amount of additional compensation, etc. in the form of subscription rights to shares to be allocated as stock options for a stock-linked compensation plan, which is “not more than ¥20 million per year,” which will be abolished upon change of the company form to a company with an audit and supervisory committee, and the current amount of compensation, etc., which is “not more than ¥60 million per year.”

Item 6: Delegation of the decision about the offering of subscription rights to shares as stock options for a stock-linked compensation plan to the Board of Directors with conditions particularly favorable to executive officers of the Company and employees with similar positions

Under the provisions of Articles 236, 238, and 239 of the Company Law, we request the shareholders to approve the delegation of the decision about the offering of subscription rights to shares as stock options for a stock-linked compensation plan to the Board of Directors in conditions particularly favorable to the executive officers of the Company and employees with similar positions.

1. Reason for offering of the subscription rights to shares for subscription under especially favorable conditions

The Company has been granting subscription rights to shares as stock options for a stock-linked compensation plan. The grants were designed to establish a closer link between the Company's stock prices and results and the officers and employees so that they share with shareholders not only benefits from high stock prices, but also the risks of low stock prices, bolstering their morale and enthusiasm for improving business results.

2. The outline and the numerical limit of the subscription rights to shares whose offering terms may be determined based on the resolution made at the above general meeting of shareholders scheduled

- (1) The numerical limit of the subscription rights to shares, the offering terms of which may be determined based on the above delegation

The maximum number of the subscription rights to shares as described in below (3) shall be 970.

The total number of the Company's shares that are issued in exchange of the exercise of the subscription rights to shares shall be limited to a maximum of 97,000 shares of the Company's common stock. If the number of shares (as defined below) is adjusted in accordance with the provisions stipulated in (i), (3) below, the maximum number of shares shall be the number calculated by multiplying the number of shares after the adjustment by the maximum number of the above subscription rights to shares.

- (2) No transfer of cash shall be required for the subscription rights to shares, the offering terms of which may be determined based on the above delegation
 - (3) The outline of the subscription rights to shares, the offering terms of which may be determined based on the above delegation

- (i) Type and the number of shares that are the object of the subscription rights to shares

The type of shares that are the object of the subscription rights to shares shall be common stocks of the Company. The number of shares for each subscription right to shares (the "Number of Granted Shares") shall be 100 shares. However, if a share-split (including a gratis allotment of common stocks of the Company; the same shall apply below regarding the descriptions of the share-split) or a reverse share-split is conducted for common stocks of the Company after the date of resolution at the above general meeting of shareholders (the "Resolution Date"), the Number of Granted Shares shall be adjusted by applying the following formula, with fractions of less than one share rounded down to the nearest one share:

$$\begin{array}{ccccc} \text{Number of Granted Shares} & & & & \\ \text{after adjustment} & = & \text{Number of Granted Shares} & \times & \text{Ratio of share-split /} \\ & & \text{before adjustment} & & \text{reverse share-split} \end{array}$$

In addition to the above case, if an adjustment of the Number of Granted Shares is considered to be necessary for unavoidable reasons, the Company shall carry out the adjustment deemed reasonable.

- (ii) Amount of assets contributed on exercise of the subscription rights to shares
The amount of assets contributed upon exercise of each subscription right to shares is calculated by multiplying the paid-in value of 1 yen per share delivered upon exercise of each subscription right to shares by the Number of Granted Shares.
- (iii) Exercise period of the subscription rights to shares
Within 20 years from the day following the allotment date of the subscription rights to shares
- (iv) Matters concerning the increase in capital and capital reserve when shares are issued upon exercise of the subscription rights to shares
 - i. The amount of increase in capital when shares are issued with the exercise of the subscription rights to shares shall be one half of the maximum amount of increase in capital, etc., which is calculated in accordance with Paragraph 1 of Article 17 of the Corporate Calculation Regulation, and fractions of less than 1 yen shall be rounded up to the nearest 1 yen.
 - ii. The amount of increase in the capital reserve when shares are issued upon exercise of the subscription rights to shares shall be the amount calculated by deducting the amount of capital to be increased as stated in the preceding paragraph i from the maximum amount of increase in capital, etc., as stated in the same paragraph i above.
- (v) Restriction on acquiring the subscription rights to shares by assignment
Acquisition of the subscription rights to shares by assignment shall require approval by a resolution of the Board of Directors.
- (vi) Provisions concerning the acquisition of the subscription rights to shares
If a proposal for a merger agreement in which the Company ceases to exist, or a proposal for a stock swap agreement or a stock transfer plan in which the Company will become a wholly owned subsidiary, is approved at a general meeting of shareholders of the Company, the Company may acquire the subscription rights to shares on the date stipulated separately by the Company's Board of Directors.
- (vii) Fractions of less than 1 share occurring on exercise of the subscription rights to shares
If a fraction of less than 1 share to be delivered to the holder of the subscription rights to shares occurs upon exercise of the subscription rights to shares, it shall be rounded down to the nearest 1 share.
- (viii) Other conditions for exercise of the subscription rights to shares
 - i. In principle, a holder of the subscription rights to shares may exercise the subscription rights to shares within the period described in Provision (iii) above, only when the holder no longer holds a position as the Company's director (excluding directors who are members of the audit and supervisory committee), directors who are members of the audit and supervisory committee, executive officer, and/or employee with a similar title. In this case, the holder may only exercise the subscription rights to shares within a period of seven days from the next day of the date when he/she loses the above titles.
 - ii. Any other conditions associated with the exercise of the subscription rights to shares shall be determined by the resolution of a meeting of the Company's Board of Directors.
