1. Summary Information Regarding Financial Results for the First Quarter of Fiscal 2019

(1) Summary Information Regarding Consolidated Business Results

Consolidated results for the first three months of fiscal 2019, the period from April 1 to June 30, 2018, are as follows.

During the first quarter of fiscal 2019, the global economy was generally bullish in spite of concerns about the impact of trade friction between the U.S. and China. In the U.S. and Europe, economies stayed firm while backed by brisk personal consumption and corporate business conditions and Japan remained on a recovery trend supported by strong capital expenditure and corporate business conditions. The economies of emerging countries continued to maintain growth rates higher than those of developed countries despite the rate of growth slowing in China.

Looking at the electronics market, which has a large bearing on the consolidated performance of TDK, demand for components in the automotive market continued to surge, fueled by a continued increase in the number of components installed per vehicle in step with the spread of Advanced Driving Assistance Systems (ADAS). In the industrial equipment market, demand continued to be firm, supported mainly by surging investment in semiconductors and corporate investment in automation. In the ICT (Information and Communications Technology) market, production of smartphones reached a higher level than in the same period of the previous fiscal year. Hard Disk Drive (HDD) demand was strong for data center applications although production of HDDs declined compared to the same period of the previous fiscal year.

In this business environment, the TDK's consolidated operating results for the first quarter of fiscal 2019 were as follows.

2. Other Information

(1) Changes in Significant Subsidiaries

Nothing to report.

(2) Simplified Accounting Treatment and Special Accounting Treatment

Nothing to report.

(3) Accounting Policy Changes, Accounting Estimate Changes and Restatements

Revenue from Contracts with Customers

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-09 “Revenue from Contracts with Customers” as amended.

This ASU requires an entity to recognize revenue when promised goods or services are transferred to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. TDK adopted this ASU from April 1, 2018 by the modified retrospective method to all contracts to recognize cumulative-effect adjustments to retained earnings.

The adoption of this ASU did not have a material impact on the cumulative-effects to retained earnings as of April 1, 2018 and TDK’s results of operations and financial position.

Recognition and Measurement of Financial Assets and Financial Liabilities

In January 2016, FASB issued ASU 2016-01 “Recognition and Measurement of Financial Assets and Financial Liabilities”. This ASU requires that equity investments that do not result in consolidation and are not accounted for under the equity method be measured at fair value with changes in fair value recognized in net income. TDK adopted this ASU from April 1, 2018 by the modified retrospective method to recognize a cumulative-effect adjustment to retained earnings.

According to the adoption of this ASU, TDK recognized a cumulative-effect adjustment to retained earnings of ¥3,083 million as of April 1, 2018 for the after-tax unrealized gains of equity investments classified as available-for-sale securities previously recognized in accumulated other comprehensive income.

Intra-Entity Transfers of Assets Other than Inventory

In October 2016, FASB issued ASU 2016-16 “Intra-Entity Transfers of Assets Other than Inventory”. This ASU eliminates the exception to defer the income tax consequence of intra-entity transfers of assets other than inventory until the assets are ultimately sold to an outside party and requires the recognition of tax consequence when those transfers occur. TDK adopted this ASU from April 1, 2018 by the modified retrospective method to recognize a cumulative-effect adjustment to retained earnings.

According to the adoption of this ASU, TDK recognized a cumulative-effect adjustment to retained earnings of ¥6,374 million as a reduction as of April 1, 2018.

Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost

In March 2017, FASB issued ASU 2017-07 “Recognition and Measurement of Financial Assets and Financial Liabilities”. This ASU requires an entity to disaggregate the service cost component from the other components of net benefit cost and report the service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net benefit cost are required to be presented in the income statement separately from the service cost component, such as in other income (deductions). The amendments also allow only the service cost component to be eligible for capitalization (for example, as a cost of internally manufactured inventory). The amendments in this guidance should be applied retrospectively for the presentation of the service cost component and the other components of net benefit cost, and prospectively for the capitalization of the service cost component of net benefit cost. TDK adopted this ASU from April 1, 2018.

According to the adoption of this ASU which requires to disaggregate the service cost component from the other components of net benefit cost, ¥466 million from cost of sales, ¥498 million from selling, general and administrative expenses and ¥199 million from research and development expenses included in selling, general and administrative expenses were reclassified to other income (deductions) for the first quarter of fiscal 2018. The adoption of this ASU which allows only the service cost component to be eligible for capitalization did not have a material impact on TDK’s results of operations and financial position.

(4) Fundamental Policy for Distribution of Earnings, and Fiscal 2019 Dividends

TDK recognizes that achieving increase in corporate value over the medium- and long-term ultimately translates into higher shareholder value. In line with this understanding, TDK's fundamental policy is to work to consistently increase dividends through growth in earnings per share. By actively investing for growth, mainly in the development of new products and technologies in key fields so as to respond precisely to rapid technological innovation in the electronics industry, TDK is aiming to increase a medium- and long-term corporate value. Accordingly, TDK actively reinvests its earning in business activities and determines its dividends taking into consideration comprehensive factors, including return on equity (ROE) and dividends on equity (DOE) on a consolidated basis, as well as changes in the business environment, among other factors.

Projected dividends per share for fiscal 2019 are as follows. TDK keeps initial dividend forecast unchanged.

(Yen)

	FY2019 Forecast	FY2018 Actual
Interim dividend	70.00	60.00
Year-end dividend	70.00	70.00
Annual dividend	140.00	130.00
