

November 6, 2018

Consolidated Financial Results for the Nine Months Ended September 30, 2018 [Japanese GAAP]

Listed company name: Toyo Tanso Co., Ltd.

Stock exchange listing: Tokyo Stock Exchange, 1st Section

Stock code: 5310

Location of headquarters: Osaka, Japan

Website: http://www.toyotanso.co.jp

Representative: Naotaka Kondo,

Representative Director, Chairman & President, CEO

Contact: Shigeki Masuda, General Manager,
Finance and Accounting Department

TEL: 81-6-6472-5811 (from overseas)

Scheduled date for submission

of quarterly report: November 7, 2018

Scheduled date for dividend payment:

Supplementary materials for quarterly

financial summaries: No Quarterly financial results briefing: No

1. Consolidated financial results for the nine months ended September 30, 2018

(From January 1, 2018 to September 30, 2018)

(1) Operating results (cumulative total)

(Millions of yen, rounded down)

(Percentages indicate changes from the same period in the previous fiscal year.)

1. Qualitative Information Regarding Consolidated Results for the Nine Months under Review

(1) Explanation Regarding Business Results

During the first three quarters of the consolidated fiscal year under review, the US economy continued to recover on the back of an increase in personal consumption and capital spending, while Europe continued to experience a gradual recovery. Even as emerging economies continued to improve, there were concerns that the US-China trade disputes would slow the Chinese economy, which has been a global economic driver. Meanwhile, despite concerns about the economic impact of a series of natural disasters, the Japanese economy made a gradual recovery thanks to improvements in corporate earnings and employment conditions.

In the business environment surrounding the Group, demand for products for wafer manufacturing products increased on the back of a strong semiconductor market, and also in the transportation equipment market, demand was solid for EDM electrodes for cars and pantograph sliders for trains. In addition, in the energy-related market, although there were concerns that a shift in Chinese governmental policy would have an impact on solar cells, sales were solid overall.

In this environment, although competition with other companies remains harsh and conditions are still difficult, the Company is working to achieve its medium-term business plan by reinforcing production and sales of high value-added products, improving productivity, and promoting the development of new products and new businesses.

Inspections of the delivery of graphite materials for the Chinese high-temperature reactor-pebble-bed modules (HTR-PM), ordered in 2008, were completed in the first quarter of the consolidated fiscal year under review. Sales totaling 3,208 million yen were recorded.

As a result, in the nine months of the consolidated fiscal year under review, net sales rose 23.6% year on year to 31,763 million yen. On the income side, operating income rose 140.5% to 5,983 million yen, ordinary income rose 148.8% to 6,030 million yen, and profit attributable to owners of parent stood at 4,404 million yen, up 122.5%.

The overall performance of each business segment was as follows. (Please refer to "3. Supplementary Information" for an overview of each product category.)

Japan

Products for semiconductor applications did well, carbon products for LED, metallurgical, and mechanical applications remained solid overall, and 2,651 million yen was recorded in sales for Chinese high-temperature reactor-pebble-bed modules (HTR-PM). As a result, a 28.6% increase in net sales to 17,097 million yen, and a 131.0% increase in operating income to 3,841 million yen.

United States

The Company endeavored to improve revenue, in addition to strong sales of products for electronic-related applications for semiconductor and LEDs and solid sales of products for metallurgical applications. This resulted in a 16.4% increase in net sales to 2,135 million yen and operating income was 456 million yen (compared to a 124 million yen operating loss in the same period of the previous fiscal year).

Europe

Strong sales of products for electronics-related applications and solid sales of metallurgical applications resulted in an 14.0% increase in net sales to 2,513 million yen. However, higher costs resulting from reinforced infrastructure resulted in a 179 million yen operating loss (compared to a 4 million yen operating loss in the same period of the previous fiscal year).

Asia

Although sales of carbon brush products were poor, sales were strong for solar cell applications in spite of their unclear outlook, as well as for metallurgical applications. Additionally, 557 million yen was recorded in sales for Chinese high-temperature reactor-pebble-bed modules (HTR-PM). As a result, net sales rose 19.8% to 10,015 million yen and operating income increased 148.9% to 1,951 million yen.

(2) Explanation Regarding Financial Position

Total assets as of September 30, 2018 increased by 933 million yen from the end of the previous consolidated fiscal year. This was primarily because, cash and deposits increased by 1,472 million yen and notes and accounts receivable - trade increased by 1,200 million yen, although inventory decreased by 1,193 million yen due to the posting of sales for the Chinese high-temperature reactor—pebble-bed modules (HTR-PM) and property, plant and equipment declined 483 million yen due to the posting of depreciation.

Total liabilities decreased by 2,292 million yen from the end of the previous consolidated fiscal year. This was primarily because, interest-bearing liabilities decreased 597 million yen and other current liabilities decreased by 2,405 million yen due to a decrease in advances received as a result of recording sales for the Chinese high-temperature reactor-pebble-bed modules (HTR-PM), although provision for bonuses increased 552 million yen.

Total net assets increased by 3,225 million yen from the end of the previous consolidated fiscal year. This was primarily because foreign currency translation adjustment decreased by 686 million yen and retained earnings increased by 3,778 million yen.

(3) Explanation of Information Regarding Consolidated Earnings Forecasts and Other Projections

In light of the results in the nine months of the consolidated fiscal year under review, the Company has revised the consolidated earnings forecasts for the fiscal year ending December 31, 2018, released on May 10, 2018.

For details, please refer to the press release entitled "Notification of Revisions to Consolidated Earnings Forecasts" released on November 6, 2018.

(3) Notes on quarterly consolidated financial statements

(Notes regarding the premise of a going concern)

Not applicable.

(Notes if the amount of shareholders' equity has changed significantly)

Not applicable.

(Adoption of specific accounting methods for the preparation of quarterly consolidated financial statements)

Tax expense calculations

Tax expenses are calculated by multiplying profit before income taxes by an effective tax rate, which are reasonably estimated by applying tax effect accounting to estimated profit before income taxes for the consolidated fiscal year, including the third quarter of the consolidated fiscal year under review.

| Total | 9,011 | 9,056 | 9,513 | 10,144 | 8,453 | 8,957 | 8,836 | |

(Notes)

- 1. These orders were denominated in foreign currency prior to the previous quarter; discrepancies resulting from fluctuations in foreign exchange rates during the quarter under review are included in the figure for outstanding orders placed in this quarter.
- *2. Outstanding orders for special graphite products in the year ended December 31, 2017 include orders for the Chinese high-temperature reactor—pebble-bed modules (HTR-PM).
- *3. Data for general carbon products (carbon for mechanical applications) includes orders that have not been officially confirmed.

iii. Sales performance by product category

(Millions of yen, rounded down)

(2) Overview

Special graphite products

In electronics applications, a consistent level of demand was maintained for solar cell applications despite concerns about the impact of a shift in Chinese governmental policy. Semiconductor applications also performed well. As a result, performance substantially surpassed that in the same period in the previous fiscal year.

In general industries applications, although demand for products for EDM electrodes fell short of levels in the same period in the previous fiscal year, demand for products for industrial furnaces was strong due to solid capital spending in the automotive industry.

In addition, with the recording of 3,208 million yen in sales for Chinese high-temperature reactor-pebble-bed modules (HTR-PM), special graphite products overall performed substantially better than in the same period in the previous fiscal year.

Carbon products for general industries

Sales of carbon products for mechanical applications surpassed the same period of the previous fiscal year with strong ongoing demand for mainstay products such as bearings, seal materials and pantograph sliders.

Carbon products for electrical applications fell short of their performance in the same period of the previous fiscal year because demand for electrical power tools and cleaner applications was weak.

Compound materials and other products

Sales of SiC (silicon carbide)-coated graphite products exceeded levels in the same period in the previous fiscal year due to an increase in demand for semiconductor applications and LED applications. C/C composite products exceeded their performance in the same period in the previous fiscal year, as demand for semiconductor applications was strong and demand for industrial furnace applications was steady, although demand for solar cell applications were weak. Sales of graphite sheet products were slightly up over the same period of the previous fiscal year due to solid demand for automotive applications.

Therefore, compound materials and other products overall performed better than in the same period of the previous fiscal year.
