Overview of FY2018 Financial Results and Business Outlook

"As a prominent Internet related network services provider as well as a system solutions integrator in Japan, we focused on enhancing our enterprise network services line-ups throughout FY2018 by adding various value-added functions to continuously capture enterprises' demands and to have further revenue and income accumulation from our already invested business assets. As a result, enterprise recurring revenues⁴ successfully increased by 9.1% YoY, which exceeded our initial expectation. Actions we took in FY2018 resulted in enhancement of our enterprises' business foundation and should contribute to accelerate our recurring business hereafter," said Eijiro Katsu, COO and President of IIJ.

"Security services have been one of the strongest drivers for our revenue growth. In FY2018, we upgraded virtual desktop services to handle a large number of concurrent user connections, introduced new Security Operation Center (SOC) line-up to widen our target customer base to small and medium-sized enterprises from the current blue-chip client base, and added endpoint security services. Security recurring revenue increased by 16.9% YoY to JPY14.1 billion and the total security related revenue (sum of recurring and related SI) was JPY16.8 billion. As for mobile, we focused to enhance our full-MVNO service offerings starting with SIM life cycle management, chipSIM, and small data volume-bundled services targeting IoT usage. Our full-MVNO services revenues grew to JPY0.7 billion, exceeded our initial target, along with strong demands for surveillance cameras and pre-paid SIMs for tourists to Japan. Total mobile revenues increased by 18.8% to JPY42.0 billion and total mobile subscription at the end of FY2018 was 2.75 million. As for IoT, by leveraging our advantages of having comprehensive business elements for IoT such as network, mobile, security, cloud and SI, we proceeded many IoT related projects such as transportation, agriculture, manufacturing, factory and smart home. Systems integration revenue grew by 6.6% YoY with favorable IT demands. Cloud recurring revenue, JPY20.1 billion (up 12.2% YoY), was in line with our target

¹ Unless otherwise stated, all financial figures discussed in this announcement are prepared in accordance with U.S. GAAP, unaudited and consolidated.

² YoY is an abbreviation for year over year change.

³ "Adjusted income before income tax expense" and "adjusted net income attributable to IIJ" exclude gains/losses on equity securities and funds to which accounting policies were changed due to revision of U.S. GAAP.

⁴ Enterprise recurring revenue is calculated by subtracting Internet connectivity services for consumers and IIJ Mobile MVNO Platform Service (MVNE) revenues from recurring revenue, which is the sum of network services and systems operation and maintenance revenues.

as our cloud migration and multi-cloud solutions have met with middle-to-large enterprises' needs successfully. Our flagship "IIJ Omnibus Services" were upgraded by applying SD-LAN to capture enterprises' network replacement demands. As for DeCurret, our equity method investee engaged in fintech business, they became a registered virtual currency exchange service provider with the Financial Service Agency this March and have launched exchange services this April. They're preparing to launch settlement services as their 2nd phase by utilizing partnerships with their prominent shareholders and business partners," said Katsu.

"As for profitability, stronger than expected enterprise recurring revenue as well as improvement in system integration margin with high utilization of system engineers should have resulted in healthy continuous margin improvement. However, due to much smaller than expected NTT Docomo's unit price revision for mobile data communication⁵ with regards to our mobile services offering costs, we had a large margin decrease impact in our network services. As a result, our total operating income decreased YoY. We should recover mobile services profitability as soon as possible and continuously pursue stronger recurring revenue accumulation for FY2019 and hereafter. In our mobile services, we're seeing many IoT related full-MVNO transactions which should contribute to gather enterprises' mobile traffic more and more. By having better mixture of enterprises and consumer mobile traffic, our mobile network utilization should improve and that should result in our mobile services profitability improvement," continued Katsu.

"IIJ's fundamental business strategy to provide highly reliable and value-added services to Japanese enterprises remain unchanged. Although Japan is said to be behind on adopting IT, it's inevitable for Japanese companies to utilize IT for their business operation in the long run to improve their efficiency. By leveraging our accumulated business and technology assets, we continuously seek to enhance our corporate value," concluded Koichi Suzuki, Founder, CEO and Chairman of IIJ.

For FY2018, we recorded JPY1,110 million of “realized and unrealized loss on other investments, net,” of which unrealized loss on our holding marketable equity securities was JPY1,542 million.

The net of tax amount of the unrealized gains, JPY5,079 million, was recorded as “accumulated other comprehensive income” on our consolidated balance sheet (“B/S”) as of March 31, 2018. Until the previous fiscal year, unrealized gains/losses of holding marketable equity securities had been recorded as the fluctuation of “accumulated other comprehensive income” on B/S without being recognized as profit on P/L.

- After the above mentioned reclassification, gains/losses due to fluctuations of stock prices are recognized as “realized and unrealized gain (loss) on other investments, net” in “other income (expenses)” in every quarter.

For FY2018, we recorded JPY432 million of realized and unrealized gain on investments other than marketable equity securities, such as funds that were available to be measured at fair value.

There were net income of JPY2,893 million, depreciation and amortization of JPY14,211 million, adjustment of realized and unrealized loss on other investments, net of JPY1,110 million, which was mainly due to fluctuations in holding marketable equity securities, and adjustment of deferred income benefit, net of JPY1,112 million. Regarding changes in operating assets and liabilities, it was net cash in of JPY5,404 million (net cash out of JPY3,526 million for FY2017) mainly due to an increase in accounts payable and an increase in deferred revenue (current and noncurrent), while the cash out increased due to an increase in inventories along with an increase in systems construction projects, and accounts receivable increased.

Net cash used in investing activities for FY2018 was JPY6,869 million (net cash used in investing activities of JPY13,037 million for FY2017), mainly due to payments for purchase of property and equipment of JPY10,670 million (JPY15,771 million for FY2017), proceeds from sales of property and equipment, which include sales and leaseback transactions, of JPY3,079 million (JPY3,306 million for FY2017) and proceeds from sales of other investments, such as funds and equity securities, of JPY565 million (JPY1,364 million for FY2017).

Net cash used in financing activities for FY2018 was JPY5,899 million (net cash used in financing activities of JPY748 million for FY2017), mainly due to net increase in short-term borrowings of JPY2,000 million, principal payments under capital leases of JPY6,524 million (JPY5,724 million for FY2017), FY2017 year-end and FY2018 interim dividends payments of JPY1,217 million (JPY1,217 million for FY2017) and payments of long-term accounts payable of JPY807 million (JPY571 million for FY2017).

Future Prospects including FY2019 Financial Targets

As Japanese economy continues to improve slowly, Japanese enterprises' IT-related investment as well as spending should continue to grow during FY2019. We target total revenue of JPY204.0 billion (up 6.1% YoY) as enterprise recurring revenue and systems integration revenue should continue to grow. As for operating income, we target JPY7.0 billion (up 12.8% YoY) as both network services and systems integration gross margin should expand. As for income before income tax expense, we target JPY6.3 billion, by considering equity in net income/loss of equity method investees and others. As for net income attributable for IIJ, we target JPY3.5 billion, by considering income tax expenses.

As for mobile services, we seek to improve profitability by accumulating full-MVNO services revenues which fixed cost had been added from FY2018 along with the service launch. We expect stronger accumulation of enterprise traffic and enterprise mobile revenue by leveraging our competitive enterprise IoT solutions as well as our capability of incorporating mobile to offer comprehensive solutions and execution of MVNE strategy to gather consumer mobile and we aim to improve our mobile infrastructure utilization rate by achieving more balanced traffic mixture between enterprise and consumer whose traffic patterns differ.

We are scheduled to adopt International Financial Reporting Standards (IFRS) from the filing of our FY2018 annual report "Yuka-shoken-houkokusho" and the above mentioned FY2019 financial targets are in accordance with IFRS. Regarding revenue and operating income, we expect there are not significant difference between U.S. GAAP, currently adopted accounting principles, and IFRS. Regarding income before income tax expense and net income attributable to IIJ, we expect following differences: (1) realized and unrealized gains/losses on marketable equity securities which were recognized on P/L under U.S. GAAP are to be recognized as "accumulated other comprehensive income" and "retained earnings" on B/S, (2) reclassification of equity in net income/loss of equity method investees, which is to be included in income before income tax expense in P/L under IFRS while under U.S.GAAP, it is included in net income.

<Reference> Planned schedule for IFRS adoption:

- ◆ May 28, 2019:
FY2018 consolidated financial statements disclosed in the Convocation Notice for the 27th Ordinary General Meeting for Shareholders (U.S.GAAP)
- ◆ June 28, 2019:
FY2018 consolidated financial statements disclosed in annual report “Yuka-shoken-houkokusho” (IFRS) and FY2018 earnings press release (IFRS)

- 1) Changes due to the revision of accounting standards: Yes
In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, "Revenue from Contracts with Customers (Topic 606)." IIJ adopted this ASU in the first quarter beginning April 1, 2018, using the "modified retrospective method" and recognized in beginning retained earnings an adjustment for the cumulative effect of the change. The adoption of this ASU resulted in the increase in beginning retained earnings of JPY381,678 thousand. The adoption of this ASU did not have a material impact on IIJ's consolidated financial position or consolidated results of operations.
- In January 2016, the FASB issued ASU 2016-01, "Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities," which amends the guidance in U.S. GAAP on the classification and measurement of financial instruments. Changes to the guidance primarily affected the accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. This ASU requires equity investments (except those that are in consolidated subsidiaries or in equity method investees) to be measured principally at fair value and with changes in fair value recognized in net income. IIJ adopted this ASU in the first quarter beginning April 1, 2018 and recognized in beginning retained earnings an adjustment for the cumulative effect of the change. The adoption of this ASU resulted in the increase in beginning retained earnings of JPY5,739,166 thousand, net of tax amount of unrealized gains on holding investments.
