Dividend policy

Dividend is one of the most important management objectives of the Group. Principally, profits are shared with our shareholders in line with our consolidated results, with a consolidated payout ratio of 30% as the target. We aim to maintain a stable dividend and improve dividend scale.

If any special factor, such as an extraordinary income or loss, significantly impacts the net income of a given fiscal year, a dividend incorporating such special factor would be determined in principal, following a comprehensive consideration on stable dividend, future business development, and retained earnings.
