Business Report (Fiscal Year 2018 Ended March 31, 2019)

I Current circumstances of the Nidec Group

1. Current circumstances and results of business operations

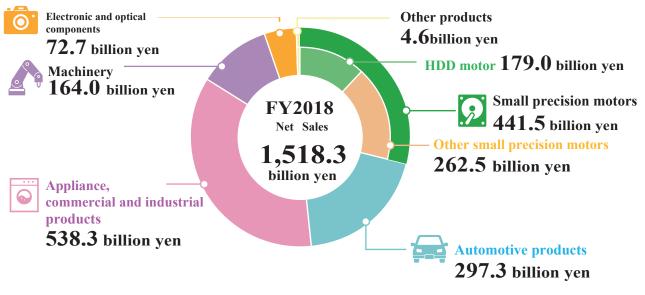

(1) Overview of business environment in the fiscal year 2018 ended March 31, 2019

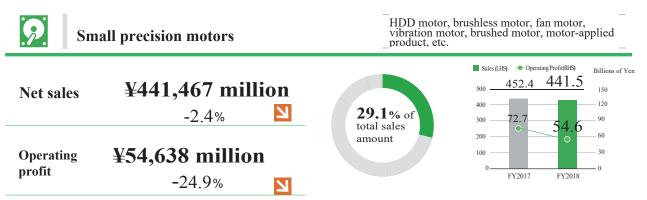

During the year ended March 31, 2019, the global economy saw the U.S. economy remain strong, but the FRB forwent raising interest rates in 2019 due to concerns about a global economic slowdown. China had a major global impact due to factors such as a temporary acceleration of the Chinese economy's downturn as the result of the impact of the monetary tightening for regional governments from the middle of the year and concerns regarding the trade conflict between China and the U.S. From January, due in part to the implementation of economic measures by the Chinese government, economic indicators reflecting business sentiment improved, and there are hopes of progress in U.S.-China trade negotiations. In the meantime, the deceleration of the Chinese economy caused the European economy's slowdown to continue. Likewise, in the Japanese economy, the Chinese economic downturn affected Japanese corporate results including weaker business sentiment in large corporations and the manufacturing industry in the Bank of Japan's Tankan survey.

It was under such an environment that the Nidec Group continued to pursue our targets for the fiscal year ending March 31, 2021 of consolidated net sales of ¥2 trillion and operating profit of ¥300 billion based on our mid-term strategic goal, "Vision 2020." Compared to the previous fiscal year, consolidated net sales increased 2.0% to ¥1,518,320 million, which is a new record high for the period in the Company's history, operating profit decreased 16.9% to ¥138,620 million, profit before income taxes decreased 15.1% to ¥139,014 million, and profit attributable to owners of the parent decreased 15.3% to ¥110,798 million, in the fiscal year ended March 31, 2019.

(2) Operating results by product category for the fiscal year 2018

From the fiscal year ended March 31, 2019, "Automotive, appliance, commercial and industrial products" products group has been further classified into "Automotive products" products group, and "Appliance, commercial and industrial" products group.

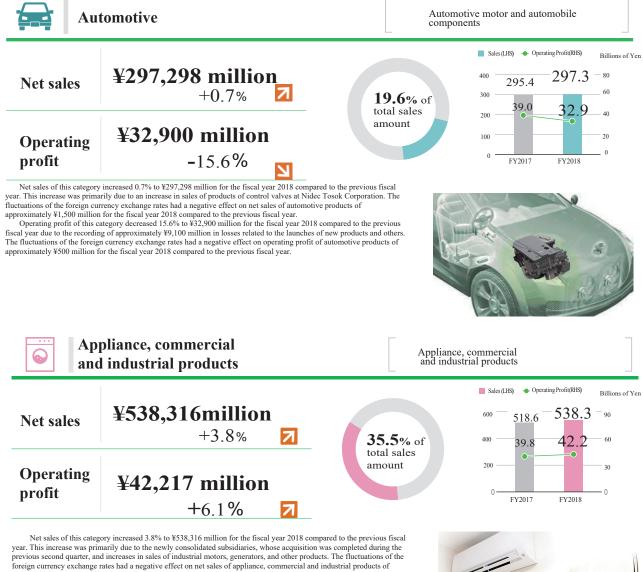

Net sales of this category decreased 2.4% to ¥441,467 million for the fiscal year 2018 compared to the previous fiscal year. The fluctuations of the foreign currency exchange rates had a negative effect on net sales of small precision motors of approximately ¥900 million for the fiscal year 2018 compared to the previous fiscal year.

Net sales of spindle motors for HDDs, for the fiscal year 2018 decreased 6.5% to \$179,011 million compared to the previous fiscal year. The number of units sold of spindle motors for HDDs decreased approximately 11.1% compared to the previous fiscal year, and sales fell.

Net sales of other small precision motors for the fiscal year 2018 increased 0.6% to ¥262,456 million compared to the previous fiscal year. This increase was due to an increase in sales of small vibration motors, despite decreases in sales of DC motors and fan motors.

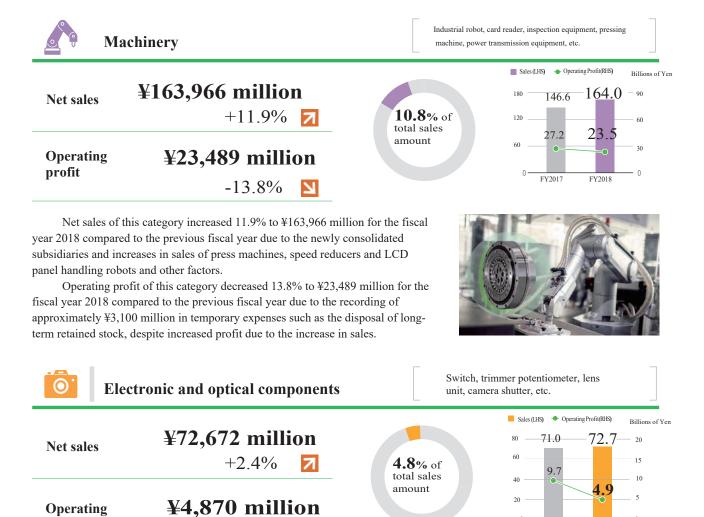

Operating profit of this category decreased 24.9% to \$54,638 million for the fiscal year 2018 compared to the previous fiscal year due to the recording of approximately \$12,000 million in losses related to the launches of new products and structural reform expenses caused by the streamlining of plants. The fluctuations of the foreign currency exchange rates had a negative effect on operating profit of small precision motors of approximately \$1,600 million compared to the previous fiscal year.

approximately ¥1,000 million for the fiscal year 2018 compared to the previous fiscal year. Operating profit of this category increased 6.1% to ¥42,217 million for the fiscal year 2018 compared to the previous fiscal year. This increase was due mainly to the increase in sales and cost reduction effects, despite the recording of approximately ¥9,400 million in temporary expenses resulting from the streamlining of plants and M&A costs. The fluctuations of the foreign currency exchange rates had a positive effect on operating profit of appliance, commercial and industrial products of approximately ¥100 million for the fiscal year 2018 compared to the previous fiscal year.

Net sales of this category increased 2.4% to \pm 72,672 million for the fiscal year 2018 compared to the previous fiscal year. Operating profit of this category decreased 49.9% to \pm 4,870 million for the fiscal year 2018 compared to the previous fiscal year. This decrease was due to the recording of approximately \pm 5,100 million in temporary expenses such as the disposal of long-term retained stock and startup expenses for a plant in Mexico, despite increased profit due to the increase in sales.

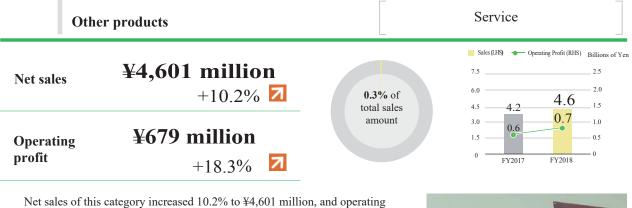

-49.9% N

profit

FY2017

FY2018

Net sales of this category increased 10.2% to ¥4,601 million, and operating profit of this category increased 18.3% to ¥679 million, for the fiscal year 2018 compared to the previous fiscal year.

2. Financing and capital investment

(1) Financing

During the fiscal year ended March 31, 2019, we issued 300 million euros in euro-denominated straight bonds in September 2018, with the funds to be allocated for uses such as the Group's capital investment in Europe.

With regard to our subsidiaries, we in principle do not procure funds from financial institutions, but use the cash management systems, etc. of management companies within our group to promote the consolidation of fund procurement sources and efficient use of funds.

The total amount of the loans and corporate bonds as of the end of the fiscal year ended March 31, 2019 is $\frac{1}{3}371,650$ million.

(2) Capital investment

The total capital investment in property, plant and equipment for the year ended March 31, 2019 was ¥120,555 million. This mainly consists of capital investment to strengthen domestic R&D such as constructing a new Nidec Sankyo Corporation plant, and increase production capacity of overseas subsidiaries.

4. Nidec Group's Challenges

(1) Enhancing the Corporate Governance System

For this fiscal year ending March 31, 2020, Nidec Group plans to have three independent outside members of the Audit and Supervisory Board and two independent outside members of the Board of Directors, five individuals in total, who will contribute to the carrying out of more lively discussions in the Meetings of the Board of Directors. With this system in the Meetings of the Board of Directors as a prime example, Nidec Group is striving to further enhance corporate governance.

(2) Building and Strengthening Global Management Infrastructure

Nidec Group as a global company will further enhance its group's business management, accounting and financial reporting, and business information disclosure systems in accordance with global standards.

To secure a global sustainable growth and accelerate the pace of the post-merger integration (PMI) process of companies purchased overseas, we are building a "five-pronged global matrix-based business management system" intended to strengthen the foundation of our growth strategy. Specific actions include the establishment and functional expansion of regional management companies, which will be tasked to improve management quality (in the areas of governance, compliance, and internal control), secure good management efficiency (providing high-quality, low-cost shared services for individual regions), and actively support PMI.

We previously maintained a "federate-style" management system, under which individual group companies maintained a high degree of independence and autonomy in their business operations; however, to address globalization needs, we are shifting towards a "unified group matrix management" increasingly quickly.

Nidec Group's Corporate Administration & Internal Audit Department, which is responsible for group-wide internal controls, has in place a global auditing system to strengthen auditing of the sphere related to prevention of improprieties as a response to strengthening the global management system. Nidec Group is striving to further strengthen internal controls based on the experience and know-how gained through the past audits of our financial statements and the implementation of measures to comply with the U.S. Sarbanes-Oxley Act of 2002. We also seek to improve our information disclosure system and policy through enhanced cooperation between a committee responsible for information disclosure and other relevant specialized departments.

Such specialized departments and offices, including the Compliance Office, the Risk Management Office, and the Investor Relations & CSR Promotion Department, also collaborate with one another and other departments as appropriate. We seek to find ways to create and maintain jobs and otherwise contribute to society based on our basic management policy as a good corporate citizen.
