[Supplementary Principle 4-11-3: Analysis and Evaluation of the Effectiveness of the Board of Directors as a Whole]

With the aims of regularly verifying that the Board of Directors is functioning appropriately and identifying issues to resolve for continuing improvement, the Company undertakes an evaluation of the effectiveness of the Board of Directors each year, and disclose the summary of the evaluation results. Based on this policy, an evaluation was conducted in fiscal year 2018. The evaluation method and summary of the results are as follows.

[Evaluation Method]

As the fourth evaluation was approaching, multiple discussions regarding the evaluation method, including those at Board of Directors meetings, were conducted, and it was confirmed that the method shall continue to be autonomous evaluation by members of the Board of Directors in this fiscal year. At a “meeting between Outside Directors and Audit & Supervisory Board Members” held in November 2018, the progress in the first half of the fiscal year regarding issues identified in the previous evaluation was discussed and an interim evaluation was conducted. In addition to the above, at the Board of Directors meeting held in February 2019, overall results of the initiatives taken during the fiscal year were reviewed, and the implementation policy of the evaluation for the FY 2018 was deliberated.

The evaluation items included the self-evaluation of each Director and Audit & Supervisory Board Member, the composition, operations, roles and responsibilities of the Board of Directors, operations of the Nomination and Compensation Advisory Committee, as well as the status of improvement of issues identified in the previous evaluation. An anonymous survey of all Directors and Audit & Supervisory Board Members was conducted in March. In order to obtain more specific views and opinions from the directors, the directors were encouraged to make comments on many of the questions.

Subsequently, results of the survey were consolidated and analyzed by the Board of Directors office. The results of the consolidation and analysis, as well as issues and initiatives for the future were discussed at a meeting among the Outside Directors, Audit & Supervisory Board Members and the Representative Director.

Based on such discussion, the final evaluation results and action plans were confirmed at the Board of Directors meeting held in April 2019.

[Summary of Evaluation Results]

- 1) The effectiveness of the Board of Directors has been steadily improving, even when compared to the previous three evaluation results.
- 2) In particular, the structure of providing information to outside directors, including the routinization of briefings prior to Board of Directors meetings and enhancement of information on the Company's business portfolio, has been further augmented, and the resulting improvement in operations was positively evaluated.
- 3) The issues for further improvement in the effectiveness of the Board of Directors are as follows:
 - Enhance discussions regarding strategies further, on topics including the progress status of the Medium-term Business Plan, the impact of changes in the business environment, and optimization of the business portfolio
 - Further enhance information regarding risks to contribute to appropriate and decisive investment decisions by the Board of Directors; conduct deeper discussions on the business strategy (including governance) in Australia, centering on the Ichthys LNG Project that began production and shipment last year; and further strengthen cooperation between the Board of Directors and the Nomination and Compensation Advisory Committee
 - Discussions on the desired state of governance in the Group, and deeper discussions, including at meetings of the Nomination and Compensation Advisory Committee, on how to secure greater diversity and independence in the Board of Directors

Based on these evaluation results, the Company will continue striving to improve the effectiveness of the Board of Directors.

[Supplementary Principle 4-14-2: Training Policy for Directors and Audit & Supervisory Board Members]
See Article 32 ("Training Policy") of the Guidelines of the Company.

[Principle 5-1: Policy for Constructive Dialogue with Shareholders]
See Article 33 ("Constructive Dialogue with Shareholders") and Exhibit 3 ("Policy concerning the Development of a System and Initiatives for Promoting Constructive Dialogue with Shareholders") of the Guidelines of the Company.

5. Other Special Circumstances Which May Have Material Impact on Corporate Governance **Updated**

The Company's Articles of Incorporation prescribe that decisions on certain important matters related to management require the resolution of a general meeting of Class A stock shareholders (hereinafter the "Class A stock shareholders' meeting"), in addition to the resolution of the general meeting of shareholders or that of the Board of Directors. The Class A stock has been issued to the Minister of Economy, Trade and Industry, and does not have voting rights at general meetings of shareholders of the Company (unless otherwise specified by laws and regulations).

The certain important matters related to management refer to the "appointment or removal of directors," "disposition of all or a portion of material assets," "amendments to the Articles of Incorporation," "business integration," "capital reduction," and "company dissolution." The "appointment or removal of directors" and

“business integration” require the resolution of the Class A stock shareholders’ meeting, if at least 20% of the total voting rights of the shareholders relating to common shares of the Company are held by a single shareholder other than a public entity, or by such single shareholder and its co-holders.

With respect to the exercise of the veto rights by means of the Class A stock (resolution on the disapproval at the Class A shareholders’ meeting), the Minister of Economy, Trade and Industry sets forth the guidelines for the exercise of voting rights of the Class A stock, in the Public Notice of the Ministry of Economy, Trade and Industry (No. 74, April 3, 2006). Under the guidelines, the Minister of Economy, Trade and Industry is entitled to exercise veto rights for each of the above important matters, “when it is judged there is a high probability that the Company will be managed inconsistent with its role to provide a stable supply of energy to Japan in an efficient manner as a core company,” or “when it is judged there is a high probability that it may adversely affect the Company’s role to provide a stable supply of energy to Japan in an efficient manner as a core company,” or “when there is a possibility that it may have an effect on the exercise of voting rights of the Class A stock.” The aforementioned guidelines were re-announced in the Public Notice of the Ministry of Economy, Trade and Industry (No. 220, October 9, 2008), due to partial changes in contents associated with the change of the Company’s trade name on October 1, 2008. Subsequently the guidelines were re-announced in the Public Notice of the Ministry of Economy, Trade and Industry (No. 37, June 24, 2019), due to partial changes in content associated with the amendment to the number of clauses in the partial amendments to the Articles of Incorporation of the Company.

We believe the holding of the Class A stock with the aforementioned function by the Minister of Economy, Trade and Industry is an effective countermeasure to eliminate the possibility of speculative takeovers or management control by a foreign capital, resulting in inappropriate management inconsistent with the Company’s role to provide a stable supply of energy to Japan in an efficient manner as a core company or causing any other adverse effects. Furthermore, we expect positive results in terms of external negotiation and credits as a national flagship company efficiently contributing to the stable supply of energy in Japan. Those are the reasons for issuing the Class A stock. The Board of Directors of the Company does not have any power over the exercise of veto rights through the exercise of voting rights of the Class A stock by Class A stock shareholders. Therefore, the Class A stock does not have the purpose of maintaining the position of the executive officers of the Company. In addition, given the limited scope of the veto rights of the Class A stock, and because the guidelines has been set forth for the exercise of veto rights, the Company believes that this measure is designed to be highly transparent to avoid unreasonable impeding the efficiency and flexibility of the Company’s management and to minimize the impact thereof.

For further details on the Class A stock, please see “IV. Information on the Company, 1. Information on the Company’s Stock, etc.” in the Securities Report dated June 26, 2019.

The Company has reported all outside directors and outside audit & supervisory board members as Independent as defined by Tokyo Stock Exchange, Inc.

Taking into consideration the background noted below, the Company has set criteria as minor for transactions concerning independent directors and/or audit & supervisory board members, which the Company does not think that has influence on shareholders' decisions regarding exercise of voting rights.

(Background)

The mission of the Company is to ensure a stable supply of oil and natural gas produced throughout the world. The Company's sales structure consists mainly of wholesale to oil refining companies, electric power companies, and city gas companies, etc., in Japan and therefore the Company's customers are limited.

In addition, the Company's customers are declining in number due to consolidation of companies, etc., owing to industry reorganization, which means that the ratio of the amount of transactions with a single customer tends to be relatively high. A further peculiarity is that oil and natural gas prices are formed in the international market, and cannot be set arbitrarily by the Company or any specific company.

Therefore, the Company does not believe that the Company is able to carry out transactions particularly favorable to a director and/or an audit & supervisory board member of the Company just because that person comes from a certain business partner of the Company, and that an individual's independence is not affected at all.

Moreover, in view of these peculiarities, the Company has obtained from all directors including outside directors a written pledge to ensure that they carry out their duties as officers of the Company appropriately and with the highest regard for the importance of such matters as their duty not to compete with the Company under the Companies Act, the proper manner for dealing with conflicts of interest, and prevention of confidential information leakage, etc.

(Criteria as minor for transactions)

Both the ratio of the amount of transactions with the company in which an outside director or an outside audit & supervisory board member holds significant concurrent positions, to the Company's consolidated net sales as well as consolidated cost of sales for the most recent fiscal period, and such company's ratio of the amount of transactions with the Company, as reasonably estimated from the disclosure materials, etc., to such company's consolidated net sales as well as consolidated cost of sales for the most recent fiscal period must be less than 15%.

To ensure the continued and stable management of the Company based on its corporate mission, the Company has adopted the structure of a Company with audit & supervisory board members, whereby audit & supervisory board members audit the business execution of directors, who are well versed in their fields. In addition, the Company strives to further increase the agility and efficiency of its management by introducing an Executive Officer System aimed at further strengthening its business operation system in order to respond accurately and quickly to a rapidly changing management environment and the expansion of its business activities.

The Company frequently engages in important negotiations with the governments of oil-producing countries, the government-owned oil companies, and international oil companies. This necessarily requires internal directors and executive officers that have knowledge, expertise and international experience relating to the Company's business and both a sound knowledge of the Company and their particular fields of expertise. Internal directors in principle hold concurrent position as executive officers. By adopting this organizational structure, the Company's Board of Directors is better placed to make decisions on the execution of business in an efficient manner. At the same time, this structure helps to ensure the effective supervision of management.

The company has appointed 5 of its 13 members of the Board of Directors from outside the Company to enhance the transparency of management and strengthen the effective supervisory function of the Board of Directors. This also aims to utilize for management objective perspectives which are different from the ones of insiders: those directors from outside the Company are, from their independent standpoint, expected to provide advice based on their own knowledge and experience, monitor the management and conflict of interest transactions, and to appropriately represent the views of stakeholders in the boardroom.

The Company has selected outside directors from external persons who have extensive experience and wide-ranging insight as corporate managers, academics, or other specialists in the resource/energy industry, or in fields of finance or legal affairs, etc.

Furthermore, four of the five audit & supervisory board members are outside audit & supervisory board members. In addition, in order to strengthen the audit function by ensuring independence of audit & supervisory board members and efficiency of audits, an audit & supervisory board has been established pursuant to laws and regulations. Further efforts of the Company include the placement of employees in Audit & Supervisory Board Members' Office as an organization dedicated to assist operations by audit & supervisory board members, and efforts in strengthening the coordination between the internal audit departments(Audit Unit), outside directors, and accounting auditors.

While the Company is operating its internal control system effectively based on the contents decided on the “Development of the Systems for Ensuring the Proper Operations as a Stock Company (Internal Control Systems),” the following are the outline of its major operations of such systems during this fiscal year:

<Compliance system>

The Company has established the Code of Conduct with which all officers and employees shall comply. This obliges them to respect social norms and act with high ethical standards, not to mention comply with laws and regulations. Also, the Company has held its Compliance Committee periodically and when necessary to confirm the status of implementation of the compliance and hence report to the Board of Directors.

Based on the activity plans resolved by the Compliance Committee, the Company has enhanced various information dissemination tools regarding compliance used in the Company. Also, after clearly defining the roles of compliance administrators and compliance managers in each Unit based on internal regulations, through holding meetings between the person-in-charge of the department supervising compliance and the compliance managers of each Unit semiannually, the Company has worked on enhancing and strengthening compliance activities among all personnel. As major activities of this fiscal year, besides the internal compliance training conducted regularly, education sessions about power harassment for those in managerial positions, compliance awareness surveys to determine the level of penetration and implementation conditions of all officers and employees in the Group, and training based on the results of those surveys, were also implemented. Furthermore, as part of strengthening the global implementation of the systems of anti-bribery and corruption within the INPEX Group, the Company conducted training sessions by department, and implemented the risk assessment of overseas offices as per the previous fiscal year.

To specify its stance towards the issue of respecting human rights, the INPEX Group formulated the “Human Rights Policy” based on the United Nation’s “the UN Guiding Principles on Business and Human Rights” and announced it. E-learning sessions were also conducted for officers and employees to raise the overall awareness of the Group in terms of respecting human rights. Furthermore, the INPEX Group published its “Modern Slavery Act Statement” as per the previous fiscal year, as disclosed on its website pursuant to the UK Modern Slavery Act 2015 enforced in October 2015, in order to clarify its initiatives against human rights violations such as slavery and human trafficking in the business and supply chain of the INPEX Group as well as the risks thereof.

As the Group develops its business globally, in order to appropriately respond to taxation risks concerning cross-border transactions, efforts were made to strengthen the taxation governance structure. As a part of such initiatives, the “Policy on Tax Affairs,” which specifies the Group’s basic policy on taxation compliance, was formulated and announced in March 2019.

The Company has established its whistle-blowing system, and an internal department in charge of compliance and outside experts (lawyers) were designated as contact points. There were however no whistle blowing cases related to material breach of laws and regulations, etc. during this fiscal year.

<Risk management system>

To respond to various risks related to business projects, first, the New Ventures Division carries out a centralized analysis/examination on whether to adopt or reject a new project. In addition, the Company operates the “INPEX Value Assurance System Committee” as a structure for conducting cross-sectional technical evaluation, etc. at each phase of exploration, evaluation, development, etc.

The Company has set guidelines for country risk management in countries and territories where projects are planned,

which include the establishment of a maximum target amount for accumulated investment balance in high-risk countries.

Furthermore, the Company has been conducting financial risk control by identifying risks of fluctuation of currency exchange rates, interest rates, crude oil/natural gas prices and securities prices, and establishing corresponding managing/hedging methods.

With regard to HSE risks, in order to promote continuous improvement activities of industrial health and safety and environments associated with the development of crude oil and natural gas based on the HSE Risk Management Procedures established under the HSE Management System, each business location identifies, analyzes and evaluates HSE risks, as well as establishes and implements risk countermeasures. In addition, the status of risk management is to be reported to the head office for supervising HSE risks, and the head office confirms the report. With regard to security risks, the Company is promoting company-wide management based on procedures and guidelines. In this fiscal year, based on the Corporate HSE 3rd Phase Medium Term Plan, the Company is promoting HSE management that is effective and integrated, and in order to link it to an improvement in HSE performance for the Company's business on the whole, the HSE Management System provisions have been revised, and the scope of HSE management has been extended to cover non-operator projects as well.

On the other hand, the Company has established an emergency/crisis response plan in order to enhance capabilities to cope with emergencies such as major accidents and disasters, etc. and is positively promoting risk management which includes conducting emergency response training regularly even in times of safety. Furthermore, the Company has drawn up a business continuity plan (BCP) in order to keep important operations from being stopped, and reviews it as necessary.

With regard to climate change response, which is receiving a high degree of interest internationally, the Company announced and published a position paper in December 2015 which summarized the INPEX Group's basic views and actual efforts, and continues examination of the issues to be discussed in the future. This position paper is, in principle, to be reviewed once every year and was partially revised in July 2018.

Furthermore, in terms of legal risks, regarding important contracts, lawsuits, etc., the Company has developed a structure that can appropriately provide legal advice to business divisions and the management team.

Also, the Company convenes an information security committee regularly and as necessary in order to implement organizational and systematical information security measures in addition to the education and training regarding information leakage prevention.

<Systems to ensure the efficient performance of duties>

"Vision 2040," which represents the Company's long-term outlook until fiscal year 2040, and the "Medium-Term Business Plan 2018-2022," which states the Company's initiatives and goals across five years from fiscal year 2018 to 2022, were formulated and announced in May 2018. Based on the companywide policy of initiatives, which is the business execution departments' business operation policy for realizing goals in the medium-term business plan, companywide plans and targets for fiscal year 2018 were formulated, the status of progress was reflected upon at the second half and end of the fiscal year, and the corresponding evaluation results were reported to the Board of Directors.

Furthermore, we will formulate the new companywide policy of initiatives as well as annual plans and targets based on "Vision 2040" and the "Medium-Term Business Plan 2018-2022," and report the progress and results of such initiatives to Board of Directors each year.

<Systems for corporate management of the Group companies>

Based on the Group's corporate management rule and the Group's agreements with regard to corporate management, the Company in principle urges reporting to or approval by the Company about important matters. Also, the Audit Unit, the Company's internal audit division, conducts audits of subsidiaries based on the annual auditing plan, and reports the results of the audits to the Company's Board of Directors.

With regard to the operation of the Group companies, we are utilizing a concurrent management system with subsidiaries involved in overseas projects. At the same time, for financing, we are conducting efficient business operations such as by enhancing financial efficiency through a unified management system of the Group's assets by

means of the Cash Management System, and by centralized management of the INPEX Group's intercompany finance operations through the Company's financial subsidiary established in the Republic of Singapore.

The Company's whistle-blowing system is designed to be applied to all Group companies. The Company provides thorough instructions, through the Company's and each subsidiary's trainings and communication activities, to prohibit unfavorable treatment of whistle-blowers.

<Auditing system for Ensuring Effectiveness of Auditing by Audit & Supervisory Board Members>

Audit & Supervisory Board Members have been obtaining required information as well as exchanging opinions, for the purpose of improving effectiveness of their auditing, through their attendance at important meetings such as Board of Directors meetings and other management meetings, conducting hearings from each division, and through meetings with Directors including Representative Directors. Also, Audit & Supervisory Board Members participate in the exchange of opinions during the formulation of the annual auditing plan by the Audit Unit, receive individual reports on the results of audits whenever they are made, and receive necessary reports including reviews of quarterly financial results from the Accounting Auditor, thus keeping close contact with the internal auditing division and the Accounting Auditor.

Furthermore, reports from the Unit in charge of the whistle-blowing system about the contents and handling of whistle-blowing are swiftly accepted by Audit & Supervisory Board Members.

The Company established "Audit & Supervisory Board Members' Office" as an organization having an employee, independent of the Company's executive team, dedicated to assisting operations by Audit & Supervisory Board Members.

In accordance with the internal control reporting system enacted in September 2007 based on the Financial Instruments and Exchange Act, the Company has conducted assessment on the development and operation of its internal control systems in all areas (company-wide internal controls, process-level internal controls and overall IT-related internal controls), and enforced improvement on any deficiencies detected in the process. As a result of the assessment, the Company concluded that its internal control systems over financial reporting were effectively functioning as of March 31, 2019, and submitted to the Kanto Local Finance Bureau an internal control report prepared based on these findings.
