3. Reason

The Company has adopted a policy of allocating sufficient earnings to internal reserves for the expansion and strengthening of its corporate capabilities, and will endeavor to make shareholder returns in line with a dividend policy linked to consolidated performance and based on sustained payment of a stable dividend.

The business environment in the current fiscal year is becoming increasingly uncertain due to factors including an economic slowdown resulting from U.S.-China trade friction. TNSC recorded strong growth in sales and profits year on year in the first half of the current fiscal year, with consolidated financial results essentially in line with the initial forecast, due to the contribution from acquisition of the European and U.S. businesses in the previous fiscal year.

Under these circumstances, TNSC will increase its interim dividend to 14 yen per share and revise the year-end dividend forecast to 14 yen per share. As a result, the annual dividend forecast will be 28 yen per share.
