Impact of the Temporary Output Curtailment by Kyushu Electric Power

On November 15, 16 and 17 2019, the Kyushu Electric Power Co., Inc. (“Kyushu Electric”) conducted its temporary curtailment on renewable energy output in Kyushu under the Renewable Energy Act, pursuant to which electric utility operators are able to suspend energy procurement without compensation for a certain period. Canadian Solar Infrastructure Fund, Inc. (the “Fund” or “CSIF”) hereby provide further update on the impact to the Fund’s assets in Kyushu during this period.

1. CSIF PV Plant affected by this Curtailment

Based on the Kyushu Electric notification, energy generation from the Fund’s PV Power Plant (the “Power Plant”) was temporarily suspended from 8:00 am to 4:00 pm on the date provided above.

The following PV Plant was affected by the Curtailment by Kyushu Electric.

PV Facility	Solar Module Output (MW)	Date of Temporary Curtailment Suspension
S-01_CS Shibushi shi	1.22	November 16, 2019
S-02_CS Isa shi	0.93	November 15, 2019
S-04_CS Isa shi Dai ni	2.01	November 15, 2019
S-05_CS Yusui-cho	1.74	November 15, 2019
S-06_CS Isa shi Dai san	2.23	November 15, 2019
S-09_CS Ashikita-cho	2.34	November 15, 2019
S-10E_CS Minami shimabara shi East	2.23	November 16, 2019
S-10W_CS Minami shimabara shi West	1.69	November 16, 2019
S-13 CS Mashiki-machi	47.69	November 17, 2019

2. The Financial Impact of the Curtailment

The financial impact of this Curtailment is provided in the following table. The fund takes this impact to the fund's financial as limited.

The Curtailment Power Plant: Suspended Energy Output in the 5 th Fiscal Period vs. Energy Output Forecast (P50-based, Note 1)	The Curtailment Power Plant: Rent Income Reduction in the 5 th Fiscal Period vs. Rent Income Forecast (Note 2)	CSIF Portfolio: Suspended Energy Output in the 5 th Fiscal Period vs. Energy Output Forecast (P50-based, Note 1)	CSIF Portfolio: Rent Income Reduction in the 5 th Fiscal Period vs. Rent Income Forecast (Note 2)
0.451%	0.150%	0.268%	0.080%

The Fund expects that the rent income reduction in the 5th Fiscal Period will be approximately JPY 1,762,000 from this Curtailment and approximately JPY3,678,000 on a cumulative curtailment basis in the 5th Fiscal Period. As a result of this Curtailment, the Rent Income for the 5th Fiscal Period is expected to be 0.167% lower than Forecast.

(Note 1) P50-based energy output forecast is calculated by the producer of technical reports or other experts on the assumption that it happens with an occurrence probability of 50%. The rent scheme of CSIF is a combination of the base rent and the variable rent which can be paid in case actual energy outfit is greater than 70% of P50-based monthly energy output forecast.

(Note 2) The Base Rent for CSIF is represented as 70% of the P50-based monthly energy output forecast. The rent income reduction from the curtailments will be reflected as lower variable rent.

3. Disclosure timing of the Temporary Output Curtailment

If the temporary output curtailment is conducted from Monday to next Sunday, the disclosure of the combined results will be made next Monday (next business day if it is not a business day).
