**Notice concerning the Current Situation of S-20/CS Marumori-machi Power Plant
after the Typhoon (19th, named “Hagibis”) (follow-up for previous notice)**

We would like to express our deepest condolences to all those affected by the typhoon “Hagibis” and our wishes for the earliest possible recovery.

As a follow-up report for the notices on the website of Canadian Solar Infrastructure Fund, Inc. (“CSIF”) dated October 15, 2019 and on the website of CSIF and the Tokyo Stock Exchange’s TDnet, “Company Announcements Service”, dated October 28, 2019, CSIF announces the current status of S-20/CS Marumori-machi Power Plant (panel output: 2,194.5kw, “Power Plant”).

It was confirmed that the Power Plant did not sustain physical damage after inspections conducted after the typhoon. However, due to heavy damages on the electricity distribution system under the Tohoku Electric Power Co., Inc. (“Tohoku Electric”), the Power Plant is instructed by them not to resume generation of electrical power until their further recovery from the damages.

According to Tohoku Electric, although the subject area is broad and includes some difficult points to work, their construction works for recovery are in process and the progress rate is approximately 80% as of the end of November 2019. The completion of the recovery construction works is expected in the late December 2019.

CSIF will continuously check the status and the progress to Tohoku Electric. The Power Plant will resume to generate electrical power immediately after some testing for the Power Plant's facilities upon the completion of Tohoku Electric's recovery.
