\*<sup>1</sup> The generation capacity for solar power plants is based upon the maximum output of each solar power plant's modules, and the generation capacity for biomass power plants is based upon the gross capacity. Both list generation capacity at month end.

\*<sup>2</sup> The planned electricity sales figures are calculated by RENOVA.

\*<sup>3</sup> Existing plants refer to those which have been in operation for at least 13 months.

\*<sup>4</sup> Outage at the biomass power plant is planned due to the scheduled annual maintenance in May 2019.

\*<sup>5</sup> Nasukarasuyama solar power plant operated in May 2019.

\*6 Karumai West solar power plant operated in July 2019.  
 \*7 Karumai East solar power plant operated in December 2019.

## 2. Monthly Electricity Sales by Plant

January 2020

Total				30,300,871	326,114,621

\*8 The fixed purchase price, exclusive of consumption tax, is based upon the FIT Scheme for each power plant and may differ from the actual electricity sale price.

\*9 Kikugawa-Ishiyama Solar Co., Ltd., Kikugawa-Horinouchiya Solar Co., Ltd., Kokonoe Solar T.K., Ozu Solar T.K., and Yokkaichi Solar T.K. consider the impact of output curtailment caused by Utilities' grid construction in the vicinity of the RENOVA's Power Plant in full-year performance forecasts.

\*10 Expected output curtailment at the Kokonoe Solar T.K. and Ozu Solar T.K. are incorporated into its full year performance forecasts.

\*11 RENOVA has invested in URE through Sensyu Holdings Co., Ltd., a subsidiary of RENOVA. Assuming that RENOVA directly owns URE's shares, RENOVA's substantial interests, calculated by multiplying URE's shares owned by Sensyu Holdings by RENOVA's equity in Sensyu Holdings, are 35.3%.

\*12 The purchase price for wood biomass derived from thinned wood is 32 yen whereas that for general wood biomass is 24 yen.

Annual sales exceeded the annual sales plan despite an unplanned shutdown of 2 days in January 2020.

## 3. Status of output curtailment

In January 2020, Kyushu Electric Power, Incorporated. issued an output control instruction and some solar power plants operated by RENOVA stopped generating electricity.

As the effect on the consolidated financial forecast for the fiscal year ended March 31, 2020 was minor, the total amount of power generation loss was 0.03% (Total power generation due to output restriction in January 2020) of

the annual sales plan for all solar power plants. In the process of setting planned full-year figures for electricity sales, RENOVA takes into account certain output control risks as well as risks arising from continual rain and other climate events.

(Output curtailment by Solar power station)

Solar power plant	Days of Outage (Figures in parentheses are annual totals.)	The percentage of total lost power generation compared to the planned full-year figures for electricity sales of all solar power plants operated by RENOVA. (Figures in parentheses are annual totals.)
Kokonoe Solar power plant	2days (12days)	0.02% (0.44%)
Ozu Solar power plant	1days (11days)	0.00% (0.34%)
